Naviglio Grande, canal, Italy, Lombardy, parting from the Ticino and passing Milan; it dates from end of 12th century.

Navita, tn., Mexico, Sinaloa, 142 m. W. by N. Durango.

Navitl, isl., Fiji Archipelago, 32 m. NW. of Viti Levu.

Navodo, or **Pleasant Island,** Pacific. See **Nauru.**

Navy, or **Limon Bay,** an open roadstead in the Caribbean Sea, on N. shore of the Isthmus of Panama, in 9° 21′ N., 80° W.

Nawa, ancient *Neve,* vil., Palestine, 32° 54′ N., 36° 3′ E., 30 m. E. by N. Tiberias; on the route of the projected Haifa-Damascus railway.

Nawábganj, or **Náwábganj Barrackpur,** municip., Brit. India, Bengal, 24 Parganás, in 22° 46′ N., 88° 24′ E. P. (1872) 16,500; (1891) 21,000; Hindus, 16,300; Moham. 4500.

Nawábganj, tn., Brit. India, Oudh, cap. dist. Bára Banki, 16 m. ENE. Lucknow; trade in sugar and cotton. The civil station is on high ground 1 m. to the W. P. 14,400; Hindus, 8800; Moham. 5200.

Nawábganj, tn., Brit. India, Oudh, dist. Gonda, 75 m. E. Lucknow; the largest grain mart in the dist. P. 5200; Hindus, 7200; Moham. 2000.

Nawalapitiya, vil., Ceylon, Central Prov., 15 m. SSW. Kandy.

Nawalgarh, tn., India, Rájputána, 66 m. NNW. Jaipur. P. (1881) 10,000.

Nawalgúnd, tn., Brit. India, Bombay, cap. dist. and 24 m. E. by N. Dhárwár, on a trib. of the Malprabha R.; noted for cotton carpets. P. 9000; Hindus, 7200.

Nawánagar, tn., India, Káthiáwár Penin., 136 m. NNW.

Diu, a flourishing place almost entirely built of stone, surrounded by a fort; has beds of pearl oysters. P. (1881) 39,700; (1891) 48,500.

Nawáshahr, municip., Brit. India, Punjab, dist. Hazára, 96 m. E. by N. Pesháwár, 3 m. ESE. Abbottábád. P. 5300; Moham. 4200.

Nawashahr, municip., Brit. India, Punjab, dist. Jalandhar, 65 m. W. Simla. P. 5600; Hindus, 3700; Moham. 1800.

Nawibandar, port, India, on the SW. ct. of the Káthiáwár Penin., 95 m. NW. by W. Diu. P. (1881) <5000.

Naworth, hamlet, Eng., Cumberland, Eskdale div., on the Irthing, 11½ m. ENE. Carlisle, on the NE. R.

Nawton, par., Eng., Yorkshire, N. Riding, Whitby div., 21 m. N. by E. York, on the NE. R., PM.O. P. <500.

Naxos, or **Naxia,** isl., Greece, the largest and most fertile of the Cyclades, 75 m. SE. of the SE. point of Eubœa, in 37° N., 26° 31′ E. Surface mountainous; produces emery, said to be the hardest and finest in the world. The island was formerly consecrated to Bacchus. In the 13th century it formed, with the neighbouring islands, the Venetian duchy of Naxos. It was taken by the Turks in the 15th century, and now forms a government of the kingdom of Greece. Length, 19 m.; breadth, 15 m.; area, 173 sq. m. (Strelbitsky), 163 sq. m. (Wisotzki). P. (1882) 10,508.

Naxos, or **Naxia,** tn., on the W. ct. of Naxos I. P. <2000.

Nay, tn., France, dep. Basses-Pyrénées, on the Pau, arr. and 10 m. SE. by S. Pau. P. <4000.

Nayá Dumká, or **Dumká,** tn., Brit. India, Bengal, cap. dist. Santál Parganás, 70 m. S. by E. Bhágalpur, one of the oldest British stations in Bengal. P. <5000.

Nayatt Point, bathing-resort, U.S., Rhode I., Bristol co., on Providence R., 9 m. W. by N. Fall R. (Mass.). P. <1500.

Nayin, tn., Persia, prov. Irak-Ajemi, 75 m. E. by N. Ispahan.

Nayland with Wissington, par., Eng., Suffolk, on riv. Stour, 9 m. SE. Sudbury, PMT.O. P. <1500.

Nazareth, bay, W. ct. Africa, S. of the estuary of the Gabun, in 0° 40′ S.; Nazareth R., an arm of the Ogowe, enters the bay on the SE.; shores low, marshy, and covered with mangroves. Shallows extend 5–6 m. out.

Nazareth, comm., Belgium, prov. E. Flanders, arr. and 8 m. SW. Ghent. P. <5000.

Nazareth, tn., Brazil, Bahia, 35 m. W. São Salvador. P. 8000.

Nazareth, tn., Brazil, state and 35 m. NW. Pernambuco, with which it is connected by rail. P. 15,000.

Nazareth, vil., Brazil, prov. and 31 m. NE. São Paulo.

Nazareth (Arab. *en Nâsrah*), tn., Palestine, pash. and 17 m. SE. Acre, 32° 42′ N., 35° 18′ E., near the plain of Esdraelon. Chief edifice, the Latin convent, built by Franciscans in 1620, with a richly decorated church, reputed to be on the site rendered memorable as the scene of the Annunciation of the advent of Christ. Nazareth was a flourishing town in the time of the Crusades, and to it Tancred removed the seat of the bishopric of *Scythopolis*. It fell into the hands of Saladin in 1187, and was completely ruined in 1263 by the Soldan of Egypt. The view from a hill behind the town, embracing the Lebanon, Hermon, Carmel, and the Mediterranean, is sublime and beautiful. P. (estimated 1871) 7000, Christians and a few Mohams.

Nazareth, fishing vil., Portugal, Estremadura, 17 m. SW. Leiria, in 39° 37′ N., said to be the prettiest seaside resort on the Portuguese coast.

Nazareth, bor., U.S., Pennsylvania, Northampton co., 43 m. NE. Reading, 6 m. WNW. Easton; has a celebrated Moravian academy. P. <1500.

Nazareth, P.O., Wales, 3 m. from Pen-y-groes, Carnarvonshire.

Nazareth Islands, Indian Ocean. See **Cargados.**

Nazas, Rio de, riv., Mexico, states Durango and Coahuila, flows first N. then SE. and E., then NE. into the Coahuila, and finally enters the lagoon of Muerto to the S. of the Bolson de Mapimi.

Naze, in place-names, 'a promontory.' See *Naes.*

Nebra, tn., Prussia, prov. Saxony, circle Querfurt, on riv. Unstrut, 21 m. SW. Halle-am-Saale. P. <3000.

Nebraska, one of the United States of the North Central group, extending westward from the Missouri R., between 40° and 43° N. lat.; chief cities, Omaha, Lincoln (the cap.), Beatrice, Hastings, Nebraska City. The surface partakes of the general nature of the long, gentle, eastern slope of the Great Plains, prairie land predominating, with fertile bottom lands occupying one-fifth the total area. 'Bad Lands' and sand hills occupy a strip about 300 m. long in the N. and NW., in a Neocene formation which covers two-thirds of the state. The eastern third is mainly Cretaceous. Chief streams are the Platte and Niobrara, not navigable, trib. to Missouri R. The climate is temperate [**N. Platte, Omaha**]. In the western part of the state droughts may be expected, and there flowing wells are rare, and irrigation is needed. The most common diseases are diphtheria and those of the respiratory organs. Agriculture forms the leading industry. The corn (maize) crop predominates, far outstripping in importance all other cereals. Hogs are reared in great numbers in the eastern counties, and cattle upon the grass-lands of the western uplands. The live-stock trade centres in Omaha, which ranks after Chicago and Kansas City. Flax and sugar beets are minor crops. Minerals are of but local importance, and confined to building-stone, salt, and brown lignite. Forests are almost wholly wanting (hence extensive tree-planting). Manufactures have increased as the state has been settled, though supplying only local needs. The university of Nebraska is at Lincoln. Nebraska was a part of the Louisiana purchase. The terr. Nebraska, organised in 1854, included Montana, and parts of Wyoming, Colorado, and Dakota. The state organisation dates from 1867. Area, 77,510 sq. m. P. (1890) 1,059,000. See **United States,** table. [**C. H. L.**]

Nebraska, city, U.S., Nebraska, Otoe co., on the r. bk. of the Missouri, 40 m. S. Omaha. Alt. 941 ft. (R.R.). P. (1880) <5000; (1890) 11,500.

Negril Point, North, cape, Jamaica, on the W. ct., in the N. of Long Bay. **Negril Point, South,** cape, 6 m. to the S., in the S. of Long Bay; the westernmost point of the island.

Negrin, oasis, Algeria, 140 m. SSE. Constantine.

Negri Sembilan ('nine states'), a Brit. protectorate (comprising five states—Johor, Sri-Menanti, Jempol, Inas or Jelei, and Ulu Moar) in the Malay Penin., immediately to the N. of the terr. of Malacca, drained eastwards by Moar R. Surface diversified, traversed by offshoots of the main range of the penin., with several detached mountains, highest Mount Ophir or Gunong-Ledang (3850 ft.). The upper valleys and mountains are densely wooded; the lower valleys are fertile, producing in abundance rice and fruits. Elephants and cattle (especially buffaloes) are reared in large numbers. Minerals include gold and tin. The states, originally nine, afterwards ten, formed themselves into an independent confederation on the breaking up of the kingdom of Johore, to which they had belonged; of these, six (two being united) form the present protected confederation, the others having previously been brought under British control. The inhabitants are Sumatran Malays. Area about 2070 sq. m. P. estimated at 300,000. *Proc. R. G. S.*, 1882, map, p. 456 (1 : 1,210,000).

Negritos ('little negroes'), a name given by the Spaniards to the native race found in the mountainous interior of the Philippines. This race, now rapidly dying out, appears formerly to have peopled a wide area. According to MM. de Quatrefages and Hamy it comprises two sub-types, the Northern Negritos or Negritos proper, and the southern, or Papuan Negritos; the former, including the Negritos of India, Mincopies of the Andaman Is., Sakkayes and Semangs of the Malay Penin., and Aetas of the Philippine Is. The southern Negritos are largely intermixed with the Papuans. The Negritos, of whom the Aetas may be taken as the type, are small of stature (generally under 5 ft.), of rather slight build, with large head, and high but small cranium. They live chiefly on the products of the chase, and on wild roots and plants. Each tribe is governed by an elected chief; the love of freedom is strongly inherent; monogamy prevails. The language now used approximates to the Malayo-Polynesian dialects. Numbers quite uncertain.

Negro, Italian, Portuguese, Spanish; *Nègre,* French, 'black.'

Negro, cape, in Magellan Strait, on the W. shore of the Broad Reach, in 52° 56′ 57″ S., 70° 46′ 14″ W.

Negro, Cape, Morocco, on the Mediterranean, 16 m. S. by E. Ceuta.

Negro, Cape, Tunis, NW. ct., in 8° 59′ E.

Negro, Rio, Portuguese and Spanish, 'black river.'

Negro, Rio, riv., Argentine Republic, formed by the union of the Limay and the Neuquen; the Limay, the longer stream, issues from Lake Nahuel-Huapi, and flows NE., receiving several tribs.; the Neuquen issues from Lake Malbarco (36° 38′ S.), and flows SE., receiving on r. bk. the Agrio. From the point of union of the two headstreams (about 39° 10′ S. and 68° W.) the Negro (here called by the Indians Limay-Lefu) flows E. to 66° W., where it divides into two arms enclosing the island of Choele-Choel, and then turns SE., separating the prov. of Buenos Aires from the terr. of Chubut, and enters the Atlantic in 41° 2′ S. E. of 66° W. the Negro receives no tribs. The river is navigable to the confluence of the headstreams, where at the mouth of the Limay are the rapids of Villarino. Steamers occupy four days in ascending to Fort Roca, about 20 m. below the rapids, and two days in descending. The mouth is obstructed by a bar. Sudden and dangerous floods occur in spring and autumn. The principal settlements are Viedma, or Mercedes, and Carmen de Patagones (21 m. from mouth). Length to confluence about 415 m.; to Nahuel-Huapi, 630 m. (*Mulhall's Handbook to River Plate,* sixth edition).

Negro, Rio, riv., Brazil, the largest l. bk. trib. of the Amazon in respect of the volume of its water, probably rises near 2° N. and 70° W., flows on the whole more or less E., but with a southerly course between 2° 40′ N. and the equator, mainly between 67° and 68° W., joins the Amazon just below Manaos (60° W.). Principal trib. on the l. bk. the Rio Branco (mouth 62° 10′ W.), r. bk. the Waupes or Maupes (mouth 0° 10′ N., where the main stream changes its direction from S. to E.). About 2° N. it receives the Casiquiare, a branch from the Orinoco (*q.v.*), and above that it is called the Guainia, and is said to be connected by another bifurcation with the Inirida. The current is remarkably feeble, but the width and depth great. The lower part of the river is at its narrowest a little above its mouth, but even there is nearly 1½ m. in width; but about 40 m. higher up it becomes, for a stretch of 200 m., a network of streams interlacing between innumerable islands, the total width from bank to bank 15 m. or more. In high water (April–August, maximum July–August) the islands are submerged. Depth below Barcellos (63° W.) in places 115 ft., above that 50 ft. or more. The first rapids occur below Santa Isabel, about 65° 5′ W., the limit of steamboat navigation; others occur above Castanheiro (65° 40′ W.), and above Trinidad, in the part of the course just below the confluence of the Waupes cataracts, usually called the rapids of São Gabriel, occur over a stretch of 20 m., where the river boils and rushes between masses of granite rock. These rapids can be descended by an expert boatman in a few hours, but a laden canoe requires a week or more to ascend them. Owing to the uncertainty of its source the total length of the river is unknown, but it is estimated at 1000 m. or more. Estimated area of basin, 275,000 sq. m.; discharge upwards of 350,000 cubit ft. per second; length of steamboat navigation 450 m., canoe navigation 680 m.

Negro, Rio, riv., Brazil, state Matto Grosso, l. bk. trib. of the Paraguay, which it joins in 19° 30′ S., flows on the whole W. The Negro with its tribs. drains, during the dry season, the southern part of the great Xarayes Marsh, but during the annual inundations of the Paraguay the whole region is submerged and the course of the rivers cannot be traced. Length about 180 m.

Negro, Rio, riv., Brazil, SE., l. bk. and principal trib. of the Iguassu, rises in the Serro do Mar and flows due W. Length about 150 m.

Negro, Rio, riv., Uruguay, rises in the SW. of Brazil, near the Uruguayan frontier, and flows WSW. across Uruguay into the riv. Uruguay, which it enters in 33° 25′ S. Principal trib. on the r. bk. the Tacuarembo, which enters it in about 55° 35′ W., on the l. bk. the Rio Yi, which enters it about 57° 17′ W. Length, 290 m.

Negropont, isl., Greece. See **Eubœa.**

Negros, former **Buglas,** one of the Philippine Is. (the most SW. of the Visayas), formed by a long and narrow ridge (Malaspina, a volcano 8200 ft.), continuation of the NW. penins. of Mindanao (Dapitan). Area, 3467 sq. m. P. (prov.) 242,000.

Neisse, fortified tn. and arsenal, Prussia, prov. Silesia, 46 m. S. by E. Breslau, on the riv. Neisse, cap. circle Neisse; important railway centre, with manufactures of machinery and textiles. Several times besieged in the Thirty Years' War; taken by assault by the French in 1807. P. (1871) 19,400; tn. P. (1890) 22,300; comm. P. 22,400.

Neisse, Glatzer, riv., Prussian Silesia, rises in the Sudetes Mts., flows N. past Glatz, E. past Neisse, and finally NE. into the Oder, which it enters about 20 m. below Oppeln; navigable from Löwen, 7 m.

Neisse, Lausitzer, riv., mainly in Prussia, rises in the Sudetes in the N. of Bohemia, flows on the whole N. through the E. of the kgd. of Saxony, passing Zittau, and the Prussian provs. of Silesia and Brandenburg, passing Görlitz in Silesia; navigable from Guben, 11 m.

Neithrop, par., Eng., Oxfordshire, in Banbury mun. bor. P. 6200. See **Banbury.**

Neiva, tn., Colombia, Tolima, on the r. bk. of the Magdalena, 130 m. SW. by S. Bogotá. Alt. 1435 ft.

Neiva, riv., Russia, govt. Perm, on E. slope of Urals; with Nitsa makes the Tobol. Several important iron-works on its banks (Neivo-Alapaevskiy, Neivo-Rudyanskiy, Neivo-Shaitanskiy). Length, 170 m.

Nejd, Nejid, or **Negd** ('the highland'), region of central Arabia, comprising the kgds. Shomer or Shummar in the N., cap. Hail, and Nejd proper in the S., cap. Riad, with Kasim, formerly a prov. of Nejd; situated approximately between 24°–28° N. and 40° 30′–48° 30′ E. This region, 'the cradle of the Arab race,' is the kernel of the interior plateau, encircled by deserts, with a mean elevation of 3200 to 3500 ft., traversed by mountain ranges (general direction NE. and SW.), principal Jebel Aja in the N., Jebel Selman, more to the E. (between which is Shummar, according to Mr. Blunt, the highest plateau in Arabia), and SW. Jebel Imarie or Taweik. Nejd is intersected by many fertile valleys; surface streams are almost wanting, but wells and springs are numerous. The climate is remarkably salubrious; temp. equable; air dry, and of great purity. The region appears to come within 'the tail of the monsoon,' the rainy season lasting 5 or 6 weeks from the end of August or beginning of September. Nejd as a political div. (*i.e.*, Nejd proper) is now the centre of the Wahabis. Area (estimated), 204,000 sq. m. P. 1,133,000 (Palgrave, 1867). A more recent estimate gives P. 718,000 (one-third Bedouins). See **Arabia.** *Proc. R. G. S.*, 1881, p. 188; 1884, p. 390.

Nejef, or **Mejed** (or **Mechet**) **Ali,** tn., Asiatic Turkey, 100 m. S. Bagdad, on the NE. shore of Lake Nejef; a great Shiah necropolis and place of pilgrimage on account of its containing the tomb of Ali, the son-in-law and regarded by the Shiahs as the first legitimate successor of Mohammed. Compare **Kerbela. Kufa,** which contains the mosque in which Ali was assassinated, is a ruined village about 1 m. to the E. P. 5000, mainly Shiahs (Cuinet). **Lake Nejef** is a large and partly marshy expanse traversed by the Hindieh, a stream which leaves and afterwards re-enters the Euphrates.

Nejerabad, tn., Persia, prov. Irak-Ajemi, 20 m. WNW. Ispahan.

Nepál (nepaul), a native state of India, in the Himalayan region between Sikkim and the division of Kumáun in the NW. Provs., includes the highest known peaks of the Himalayan mountains. It comprises three zones, which present respectively the characteristics of arctic, temperate, and tropical climates: (1) The highland region, mainly between the two great ranges of the Himálayas, elevation 10,000 to 16,000 ft.; (2) the middle region, including the valley of Nepál or Khátmándu, 4000 to 10,000 ft.; (3) the region below 3000 ft. From the base of the mountains stretches again a gently sloping tract, which comprises three belts—the Dúns, a series of marshes, the *sál* forest, and the *tarái* proper. The country is watered by numerous affluents of three tribs. of the Ganges—Gogra, Gundak, and Kosi. In the great forests wild animals abound, elephants on the hills, the rhinoceros, tiger, and leopard in the *tarái;* varieties of the two last are peculiar to the hills of Nepál; the Nepál dog is brought from Tibet; several handsome birds, particularly pheasants. Agriculture is pursued with great industry, though in a very primitive fashion, and wherever possible the slopes of the mountains are terraced and carefully cultivated. Amongst the inhabitants hand labour is almost universal; irrigation is frequent. The staple culture is rice, which forms the main food of the inhabitants; but wheat, barley, ginger, cardamom, sugar-cane, potatoes, tobacco, &c., are also cultivated. Fruit is abundant; groves of orange, citron, peach, cherry, and other fruit-trees frequently surround the villages; the tea-tree is native. The leaves of the *yúa* yield a strong narcotic juice, which also burns like resin, and a fibre, similar to hemp, from which a strong coarse cloth is manufactured. Minerals occur in great variety; rich copper and iron ore are found near the surface; sulphur is abundant; of different kinds of stone, the most important are jasper and marble; rock-crystal is said to exist. The inhabitants present great diversity; the aboriginal inhabitants appear to be of Tatar or Chinese origin, and still remain in the E. part of the country. The Navars of Khátmándu valley are almost the only artisans, being weavers, and workers in iron, copper, brass, and bell-metal; they also manufacture a very strong paper from the bark of a shrub. The Gúrkhas are the predominant race; their ancestors, mainly of Rájput origin, are said to have migrated from Rájputána at the end of the 12th century. The southern valleys afford many easy routes to the Indian plains, with which a considerable trade is carried on. The chief Nepálese exports are food grains, oil-seeds, timber, cattle, and horns. The imports include both European and Indian products. From Khátmándu (the cap.) two routes branch over the northern Himalayan chain, and by means of these a small trade is carried on with Tibet.

Nepean, riv., New South Wales, one of the headwaters of the Hawkesbury; sometimes regarded as a portion of the main stream.

Nepean, bay, on the E. side of Kangaroo I., S. Australia, in 35° 40′ S., 137° 40′ E.

Netherlands, Holland, or the **Low Countries,** lies between Belgium (S.), Prussia (E.), and the North Sea (N. and W), and between the extreme limits of 53° 32′ and 50° 45′ N. lat., and 3° 23′ and 7° 12′ E. long. The area is constantly changing owing to two supreme causes—(1) the encroachments of the sea, and (2) reclamation from the sea by human agency. In 1889 the land area was officially stated to be a little over 12,500 sq. m.—approximately one-seventh the size of Great Britain. The area in sq. m., converted from the official figures in sq. km., is shown in the following table, which gives also the population

of the provs. in thousands (000 omitted), and the increase per cent. per annum between successive censuses :—

Provinces.	Area in sq. m.	Population in Thousands. 31st Dec. 1869.	1879.	Inc. '69-'79.	1889.	Incr. '79-'89.	Pop. per sq.m. 1889.
North Holland	1,070	577	680	1.65	831	2.03	777
South Holland	1,167	688	804	1.57	958	1.77	821
Utrecht	534	174	192	.99	222	1.46	416
Zeeland	689	178	189	.60	202	.67	293
North Brabant	1,980	429	466	.83	514	.99	260
Limburg	851	224	239	.65	262	.92	308
Gelderland	1,962	433	467	.76	515	.98	262
Overijssel	1,292	254	274	.76	298	.84	231
Drenthe	1,028	106	119	.93	132	1.04	128
Groningen	887	225	253	1.18	277	.91	312
Friesland	1,282	292	330	1.23	338	.24	264
Total	12,741	3,580	4,013	1.15	4,549	1.26	357

The total area of the colonial possessions of the N. (see below) is estimated at about 783,000 sq. m., the population at about 34,000,000. The **surface** is everywhere flat and low, and consists of alluvial fens, *i.e.*, moss, peat (18½ per cent.), clays (35 per cent.), and sand (6 per cent.), and of diluvial sands and gravels (39 per cent.). The SE. corner reaches an altitude of 660 ft., but the W. parts lie mostly 10 to 12 ft. below the level of the sea and the rivers, which traverse the country between high banks, and in places 20 ft. or more lower than the mean level of the North Sea. Sand-dunes and specially constructed dykes or embankments, 50 to 60 ft. in height, and extending to more than 1500 miles in length, protect the country from inundation. The **coast** is on the whole irregular in outline. In the SW. it is broken into a number of islands and estuaries, the names of the former being Walcheren, N. and S. Beveland, Tholen, Schouwen, Flakke, and Voorne. The N. and NW. are protected by a chain of low islands—Tessel (Texel), Vlieland, Terschelling, Ameland, Schiermonnikoog, Boschplaat, Rottum. The shallow Zuider Zee (South Sea) penetrates 60 to 70 m. S. into the heart of the country. See **Zuider Zee.** In the NE. the estuary of the Ems, and an expansion of the same, the Dollart, separate prov. Groningen from E. Friesland. The Netherlands consist almost entirely of the deltas of three large **rivers,** the Rhine, Maas (Meuse), and Scheldt, all of which split into numerous ramifying arms and estuaries; the larger of these are known as the Vecht, IJssel (both to the Zuider Zee), Old Rhine, Lek, Vaal, Merwede, North, Old, and New Maas, Haringvliet, E. and W. Scheldt (all to the North Sea). There are numerous small lakes in the provs. of Friesland, Gelderland, and N. and S. Holland. The **climate** bears a close resemblance to that of England; but the maritime (W.) provs. are moister and warmer than those inland. Mean annual temp. 49.8° F., Jan. 34.7°, July 65.1°; rfall. (43 yrs.), 27.8 in. In hot summers the provs. of Zeeland, N. and S. Holland, and Friesland are apt to be somewhat unhealthy. The Netherlands are essentially an **agricultural** country. It is originally to the enlightenment and enterprise of Dutch agriculturists in the 17th century that the modern system of farming with artificial grasses and winter roots (especially turnips and carrots) owes its development. More than one-third of the total area of the country is laid down to grass and meadows, for feeding cattle, horses, and sheep; swine and goats are also kept. Out of the aggregate of 8,150,000 acres, some 2,134,000 (26.2 per cent.) only are under farm cultivation; but there are 134,000 acres of gardens and orchards. The crops principally grown are rye, potatoes, clover, and grasses, oats, wheat, buckwheat, barley, beans, peas, beet-root, flax, and to a less extent colza, mustard, canary, caraway, coriander, and anise seeds, chicory, tobacco, madder, hemp, and hops. For generations the Netherlands have been famous for the cultivation of bulbs and flowers (headquarters, Haarlem and Noordwyk). Fruit (cherries, apples, pears, strawberries) is grown in the provs. of Gelderland, Utrecht, N. and S. Holland, and Limburg. Of the total number of estates in the country 85 per cent. are less than 50 acres in extent, and 58 per cent. of the whole are farmed by their owners. **Forests** cover nearly 7 per cent. of the area, and grow for the most part in Gelderland. Turf is the only **mineral** existent in considerable quantity; but a little coal is extracted in Limburg. The **fisheries,** especially the herring fishery, are valuable, and support nearly 16,000 men and their families. The North Sea yields herring, cod, plaice, soles, tunny, mussels, oysters (16,000,000 in a year, of which one-half go to England), &c.; the Zuider Zee, herring, anchovies, shrimps, flounders, eels; and the rivers, salmon, eels, pike, perch, &c. **Industry** has made great strides since the separation from Belgium in 1830. Foremost stand shipbuilding and the manufactures dependent upon it, the making of marine and hydraulic machinery, spirit-distilling and brewing, and mill-making. But brick and pottery making, the manufacture of margarine, vinegar, soap, salt, paper, oil, tobacco and cigars, cacao, carpets, leather, and gold and silver articles, sugar-refining, the weaving of cottons, woollens, and linens, and diamond-cutting are all important branches. As means of **communication** the rivers and canals, which measure nearly three thousand miles in length, are of greater importance than either the brick-paved roads or the railways (the latter approximately 2000 m.). The maintenance of these waterways is entrusted to a special department of the state. The more important canals comprise the N. Holland, North Sea, New Waterway, N. and S. William's, Zederik, Dedem, Damster, and S. Beveland Canals. Although the **commerce** of the Netherlands is no longer of that supreme importance in Europe which it was in the 17th century, their trade, both inland and foreign, is at the present time very considerable. The imports—grain and flour, drugs, iron and steel, textiles, coffee, sugar, rice, coal, copper, saltpetre, tin, seed-oils, &c.—average about £100,000,000 per annum, and the exports—drugs, butter and margarine, textiles, grain and flour, iron and steel, leather and skins, paper, rice, grease, cheese, vegetables, &c.—nearly the same figure. Trade is principally carried on with Prussia (exports to Prussia, 46½ per cent.; imports from Prussia, 18½ per cent.), Great Britain (26 and 20 per cent. respectively), Belgium (13 and 14 per cent.), Dutch E. Indies (5½ and 16½ per cent.), Russia (9 per cent. imports), and United States (6½ per cent. imports). The annual trade with Great Britain in imported textiles, iron and machinery, coal, &c., and exported margarine, butter and cheese, drugs and dye-stuffs, woollens and cottons, leather, iron and steel, sugar, gin, and other commodities, is valued at more than £37,000,000 sterling. The Dutch mercantile marine numbers over 600 vessels of nearly 700,000 tons aggregate. The unit of the **money** is the guilder, gulden, or florin, equivalent to 1s. 8d., and divided into 100 cents. The metric system of **weights and measures** is employed. The executive **government** is in the hands of an hereditary constitutional monarch, assisted by a cabinet of eight ministers. The legislative power is shared between the sovereign and the States-General of two chambers. The First Chamber consists of fifty members, chosen by the provincial estates; they sit for nine years, and one-third retire every third year. The Second Chamber numbers 100 members, who are elected for four years by direct suffrage of the citizens. The **army** is levied partly by voluntary enlistment, partly by conscription for five years, of which one only is spent with the colours. There are also a militia, drawn from suitable men between 25 and 35 years of age, and a final reserve of all men under 50 years. There is a separate army of about 33,000 men for the E. Indies, raised entirely by free enlistment. The **navy** comprises about 100 war-vessels and 30 to 40 torpedo-boats, manned by 12,000 men. There is a special naval detachment for the E. Indies. The **population,** which has nearly doubled since 1830, was originally of Teutonic stock, but is now in parts modified by French Huguenot, Belgian (Walloon), and Jewish blood. The language, Dutch, is a direct development of an old Teutonic speech closely akin to original Low German. The Frisians, who speak a Low German dialect, have preserved their racial purity to an unusual degree. From 4000 to 6000 persons emigrate every year, nearly all going to the United States. For generations the Netherlands have been the home of religious freedom. The predominant **religion** is the Reformed (Protestant), with a presbyterian form of church government. It is professed by three-fifths of the population; Roman Catholics number one-third. There are 100,000 Jews and over 50,000 Mennonites. **Education,** which is neither altogether free nor altogether compulsory, does not stand on the highest footing, in spite of the excellent equipment of primary and secondary schools, a large number of special and technical colleges, learned societies and academies, and four universities—at Leyden, Utrecht, Groningen, Amsterdam. About 7 per cent. of the conscripts enrolled annually are illiterate. There are 21 **towns** with more than 20,000 inhabitants. Amsterdam has nearly half a million, Rotterdam approaching a quarter of a million. These two cities are the commercial capitals of the Netherlands. The political cap. is The Hague, with 170,000 inhabitants. Utrecht ranks fourth with close upon 90,000. The remaining 17 are Groningen, Haarlem, Arnhem, Leyden, Tilburg, Nimeguen, Dordrecht, Maastricht, Leeuwarden, Delft, Nieuwr Amstel, Hertogenbosch (Bois-le-Duc), Zwolle, Schiedam, Breda, Deventer, Helder. Nevertheless, the rural population amounts to 68 per cent. of the total. The principal **colonies** of the Netherlands are Java, Sumatra, Borneo, &c., in the E. Indies, and Dutch Guiana and half-a-dozen small islands in S. America. **History.**—The terrs. of the modern Netherlands, after being ruled by the Romans and Franks, became (870) part of the duchy of Lorraine, and therefore of the German Empire. In the 15th century they were subject to Burgundy, and in the 16th to Austria, and subsequently Spain. Against Spain, however, they revolted and constituted themselves a republic. Napoleon in 1806 created the kingdom of Holland. In 1814 the Netherlands were united with Belgium, but were separated again in 1830. There is no good modern account of the Netherlands in English. For statistics, consult *Jaarcijfers*

voor de Statistiek in Nederland, in Dutch and French (Amsterdam). Maps: *Topographische en militaire Kaart* (1 : 50,000), 1871, &c. [**J. T. B.**]

Neu-Buckow, vil., Ger., Mecklenburg-Schwerin, 20 m. W. by S. Rostock. P. <2000.

Neuburg, tn., Ger., kgd. Bavaria, govt. Swabia, cap. circle Neuburg, on the r. bk. of the Danube, 11 m. W. by S. Ingolstadt. P. 7500.

Neubydžow, Slavonic **Novy Bydžow,** tn., Austria, Bohemia, 15 m. W. by N. Koniggrätz. P. 7200.

Neuchâtel, Ger. **Neuenburg,** frontier cant., Switzd., between Lake Neuchâtel and France, in the midst of the Jura mts., (highest point, Creux du Vent, 4900 ft.), having several ridges and corresponding valleys crossing the canton from SW. to NE. Most of the streams flow directly to the Rhine, but others to the Lake Neuchâtel, which by the Thièle drains into Lake Bienne and thence into the Aar. The chief industry is watch-making, occupying about 20,000 persons; other products are asphalt, wine, absinthe, lace, and cheese; mineral products are iron ore (at Vausyon and Louvet), asphalt (Val de Travers, 23,400 tons in 1885), coal (Locle and Brevine). Neuchâtel was connected with the crown of Prussia from 1707 to 1806; and in 1848 it became a republic in spite of Prussian protest. The Prussian connection was finally dissolved in 1857, the canton being now a member of the Swiss Confederation. Area, 312 sq. m. P. (1870) 97,300; (1888) 108,200, of whom three-fourths speak French, and four-fifths, at least, are Protestants.

Neuchâtel, tn., Switzd., cap. of canton, at the foot of the Jura, on NW. shore of the Lake of Neuchâtel, with grand prospect, 85 m. NNE. Geneva, and 25 m. W. Berne. It has an ancient castle (whence its name), a college with library of 100,000 vols., and various other important institutions; manufactures of watches, jewellery, &c. Alt. 1435 ft. Mean temp., Jan. 33.8°, July 67.1°. P. (1870) 13,300; (1888) 16,500, mostly French and Protestant.

Neuchâtel, Lake of (Ger. **Neuenburger See**), Switzd., 18 m. N. Lake of Geneva, fed by the Thièle, Broye, Reuse, and Seyon, and drained on NE. by the Thièle, which passes through Lake Bienne into the Aar. The NW. or Jura shore is cultivated, having vineyards below and forests above, and the opposite side less peopled and much less picturesque; it is the largest lake entirely within Swiss terr. Area, 92 sq. m.; depth, 500 ft. Alt. 1425 ft.

Neudamm, tn., Prussia, prov. Brandenburg, circle Königsberg, 11 m. N. by E. Küstrin. P. <5000.

Neutra (German, in Hungarian **Nyitra**), tn. with magistracy, Hungary, cap. co. Neutra, 37 m. N. Komorn; has a cathedral. The riv. **Neutra** flows S. into the Waag (Vág) at Komorn. Alt. 564 ft. Mean temp., yr. 49.4° F., Jan. 28.3°, July 70.5°. P. 13,500.

Neu-Ulm, tn., Ger., kgd. Bavaria, govt. Swabia, circle Neu Ulm, on the r. bk. of the Danube, opposite Ulm. Founded in 1821; fortified along with Ulm in 1842. P. 7700.

Neuveville (German **Neuenstadt**), tn., Switzd., cant. Bern, on the W. side of the Lake of Bienne, 10 m. NE. by E. Neuchâtel. P. (comm.) <3000.

Neuvic, tn., France, dep. Corrèze, arr. Ussel, 48 m. SW. by W. Clermont-Ferrand. P. <2000.

Neuvic, tn., France, dep. Dordogne, arr. Ribérac, on the Isle, 13 m. WSW. Périgueux. P.<2000.

Neuville, vil., Canada, Quebec, Portneuf co., on the riv. Jacques Cartier, and a rly., 23 m. W. by S. Quebec.

Neuville, vil., France, dep. Seine-et-Oise, arr. Pontoise, 17½ m. NW. Notre Dame, Paris. P.<2000.

Neuville, tn., France, dep. Vienne, arr. and 9 m. NW. by N. Poitiers. P.<2000.

Neuville-aux-Bois, tn., France, dep. Loiret, on the Œuf, arr. and 14 m. NE. by N. Orléans. P.<2000.

Neuville-sur-Saône, tn., France, dep. Rhône, on the l. bk. of the Saône, arr. and 8 m. N. Lyons. P.<3000.

Neuvilly, tn., France, dep. Nord, arr. and 13 m. E. by S. Cambrai. P.<3000.

Neuvy-le-Roi, tn., France, dep. Indre-et-Loire, arr. and 16 m. N. by W. Tours. P.<2000.

Neuvy-Pailloux, vil., France, dep. Indre, arr. Issoudun, 29 m. WSW. Bourges. P.<2000.

Neuvy St. Sépulchre, tn., France, dep. Indre, 42 m. WNW. Montluçon, arr. and 8 m. W. La Châtre. P.<2000.

Neuwarp, tn., Prussia, prov. Pomerania, circle Ueckermünde, on the Grosses Haff, 24 m. NW. by N. Stettin. P.<3000.

Neu-Wedell, tn., Prussia, prov. Brandenburg, circle Arnswalde, 52 m. E. by S. Stettin. P.<3000.

Neu-Wegersleben, vil., Prussia, prov. Saxony, circle Oschersleben, 11 m. N. Halberstadt. P.<2000.

Neu-Weissensee, vil., Prussia, prov. Brandenburg, govt. Potsdam, circle Niederbarnim, 2½ m. NE. Berlin. P. 18,000.

Neuwerk, small isl., at the mouth of the Elbe, belonging to Hamburg, Ger. It has a lighthouse, and is very important for signalling vessels navigating the river.

Neuwerk, vil., Prussia, Rhine Prov., circle Gladbach, 14 m. W. Düsseldorf. P. 6100.

Neuwied, tn., Prussia, Rhine Prov., on the r. bk. of the Rhine, 7 m. NW. Koblenz, cap. circle Neuwied, with manufactures of iron and tin goods, &c.; bell foundry; iron and zinc works near the Rhine; has an ethnological and natural history collection, brought from America by Prince Maximilian of Wied. Built 1653 by Count Frederick of Wied. The French under Hoche defeated the Austrians here, April 18, 1797. P. (1816) 5600; (1890) 11,100.

Neuzen, tn., Netherlands. See **Terneuzen.**

Neva, riv., Russia, flows from Lake Ladoga into Gulf of Finland. See **St. Petersburg.**

Nevada, one of the U.S.A., in the western div., lying E. of California, and S. of Oregon and Idaho. The cap. is Carson City; other chief towns, Virginia City, Reno, Eureka, and Gold Hill, with populations of from 3000 to 9000. N. is wholly within the great plateau region of western America, and its elevation is in few places less than 5000 ft. (Virginia City, 6230 ft.). Large areas of volcanic rock exist, with smaller beds of various ages, but the state has not yet been fully surveyed geologically. In the S. the surface descends abruptly to the level of the Colorado R. (600 ft. above sea-level), which stream forms a state boundary for about 150 m., and affords navigation to the Gulf of California. The longest river within the state is the Humboldt, which flows from near the E. boundary WSW. 350 m. until, greatly reduced by evaporation, it spreads out into the Humboldt Sink. The valley of the Humboldt intersects several N. and S. mountain ranges, thus showing the priority of the stream, and furnishes a route used by early pioneers and now by the Central Pacific Rly. In the W. are many other 'sinks' similar to the Humboldt, and some fresh-water lakes, receiving streams from the E. slope of the Sierra Nevada. The climate is exceedingly dry, W. winds losing most of their moisture on the sierras. Temperature moderate [**Winnemucca**]. Irrigation is practised, but is limited in scope by lack of water. Crops are chiefly subsidiary to grazing of sheep and cattle. The leading occupation is mining, especially of silver and gold. The famous Comstock Lode, at and near Virginia City, yielded from 1859 to 1891 (inclusive) $140,000,000 in gold and $197,000,000 in silver. The rich ore occurred in great masses, 'bonanzas,' the last one yielding $104,000,000, an average of $93 per ton. The output having decreased considerably since 1878, the population of the state dwindled from 62,000 in 1880 to 46,000 in 1890, new discoveries of silver not maintaining the former total. Other minerals are lead, in Washoe and Eureka cos.; sulphur in Humboldt co.; antimony in Humboldt and Lander cos.; nickel and cobalt in Humboldt co.; borax from the marshes of Esmerelda co.; rock-salt and salt-brines in Churchill, Washoe, and Elko cos. The salt is used mainly in chlorinating silver ores. With the bulk of its population in its small cities Nevada has cared well for education, and has a state university at Reno. The state is part of the Mexican cession of 1848. Its area was part of Utah until 1861, and a territory until 1864. Area, 109,740 sq. m. P. 45,761. See **United States,** table. [**C. H. L.**]

Nevada, co., U.S., Arkansas, a little to W. of 93° W., and S. of 34° N.

Nevada City, U.S., California, cap. N. co., 56 m. NNE Sacramento; the centre of gold-mining and wine-growing region. Rfall., yr. 56.72 in., June-Sept. 1.22 in. P.<3000.

Nevada, tn., U.S., Iowa, Story co., 30 m. N. by E. Des Moines. P.<2000.

Nevis, Brit. isl., W. Indies, Leeward Is., off the S. ct. of St. Christopher, in 17° 10′ N., 62° 35′ W. (middle of island). An extinct volcano, 3000 ft., in centre of island; staple crop, sugar. Cap. Charlestown (P.<2000). Area, 50 sq. m. P. 13,000. See **St. Christopher.**

Nevis, Loch, inlet, Scot., Inverness-shire, in the W., to the N. of Nevis Morar Penin., in 57° N., 9 m. long.

Nevlyansk, iron-works and gold-mines, Russia, govt. Perm, 56 m. by rail N. Ekaterinburg, on Neiva R. P. 16,100.

Nevrokop, tn., Turkey in Europe, vilayet Seres, 65 m. SW. Philippopolis. Alt. 1855 ft. P. 11,000; Moham. 5600; Christians, 2500 (G.).

Nevshehr, tn., Asia Minor, 42 m. WSW. Kaisarieh.

Nevskiye Zavody, large paper, candles, chemical, and iron works, Russia, 3–5 m. from St. Petersburg, on l. bk. Neva.

New. For places with this prefix not undermentioned, see the second part of the name.

New Abbey, par., Scot., Kirkcudbrightshire, 6 m. S. Dumfries, 4½ m. SE. Lochenhead stn., PMT.O.; 13,199 ac. P.<1000.

Newala, vil., Ger. E. Africa, about 10 m. N. of the Rovuma, in 10° 56′ S., 39° 8′ E.

New Albany, city, U.S., Indiana, Floyd co., on r. bk. of Ohio R., which has a fall of 29 ft. 2 m. above the town, affording the finest water-power, 4 m. NW. Louisville (Ky.), finely situated on a gentle rise; W. and NW. are hills called the Knobs, 300 to 500 ft. in height; has great river trade; important manufactures of cottons, woollens, machinery, iron and brass; one of the most extensive glass-works in the U.S., producing polished plate-glass. Incorporated as a city in 1839. P. (1870) 15,400; (1880) 16,400; (1890) 21,100.

Newall with Clifton, par., Eng., Yorkshire, W. Riding, Otley div., 9 m. N. by E. Bradford. P.<500.

New Almaden, vil., U.S., California, Santa Clara co., 57 m. SE. by S. San Francisco. Its quicksilver mine, the most productive in the U.S., has latterly declined in production; 1883, 29,000 flasks (flask of 76½ lbs.); 1890, 12,000 flasks. P. <1500. See **Almaden.**

New Amsterdam, tn., Brit. Guiana, on the r. bk. of the riv. Berbice, near its mouth, 63 m. SE. Georgetown.

New Amsterdam, volcanic isl., Indian Ocean, 37 m. N. St. Paul, in 37° 48′ S., 79° 25′ E., 25 sq. m. in extent. Discovered by the Dutch navigator, Van Vlaming, in 1696. Formally annexed with St. Paul, in 1892, by France, which had long before laid claim to it.

New Amsterdam, U.S. See **New York.**

New Annan, vil., Canada, Nova Scotia, Colchester co., 34 m. W. by S. Pictou.

Newark, or **Newark-upon-Trent,** mun. bor. (since Edward VI.), par., and market-tn., Eng., Nottinghamshire, Newark div., 17 m. NE. Nottingham, in the diocese of Southwell, on the N. canal, a navigable branch of the Trent, which here receives the riv. Devon, and on the G. N. R. and M. R.; staple trade in malt, corn, and flour, brewing, foundries, manufacture of agricultural implements and boilers, gypsum and limestone quarries. Anciently named *Sidnacester*, a Saxon bishopric; when destroyed by the Danes and rebuilt, named New-work; styled later, 'Newerk' and 'Nowrk.' During the Civil War, the town took the part of King Charles; it was four times besieged. Grammar-school founded 1529, by Archdeacon Magnus; ancient castle (ruins), where King John died. Many fairs; the corn-market is one of the largest in the United Kingdom. Market-days, Tu. (fat stock), W., and S. Mun. bor. 1932 ac., P. (1801) 6700; (1851) 11,300 (1871) 12,200; (1891) 14,500; par. (**Newark-upon-Trent**) P. 14,600; parl. div. P. (1891) 50,000.

Newark, eccles. par., Scot., Renfrewshire, Port-Glasgow par. P. <4000.

Newark, tn., U.S., Delaware, Newcastle co., 12 m. WSW. Wilmington, with mines of brown hematite near. P. <1500.

Newark, city, U.S., New Jersey, Essex co., 7 m. W. by N. Jersey City, on a fertile plain, with rising ground on the W., connected by five different railroads with New York. The city is supplied with water from a number of neighbouring springs. It has four cemeteries; Mount Pleasant, the oldest, is elegantly laid out, occupying 40 ac. of ground. Free library of 50,000 vols. Newark is extensively engaged in manufactures of various kinds of leather goods. About 1676, mechanics were invited to settle here. Its extensive tanneries were first established in 1698. Manufactures also hats, thread, and celluloid goods. P. (1830) 11,000; (1870) 105,100; (1880) 136,500; (1890) 181,800.

Newark, vil., U.S., New York, Wayne co., 27 m. ESE. Rochester, on the Erie Canal. P. <4000.

Newark, city, U.S., Ohio, Licking co., on Licking R., 32 m. E. by N. Columbus. Coalfields at no great distance; extensive prehistoric remains in and round the town. P. (1880) 9600; (1890) 14,300.

Newark Castle, a ruin, Scot., Selkirkshire, on the r. bk. of the Yarrow, 3 m. W. by N. Selkirk.

New Brunswick, prov. of Canada, E. ct., between 45° 5′–48° 5′ N., 63° 47′–67° 53′ W., bounded W. by Maine and by Quebec, N. by Quebec and Chaleur Bay, E. by the Gulf of St. Lawrence, Northumberland Strait, and the isthmus of Chignecto (14 m. across), which connects it with Nova Scotia, and S. by the Bay of Fundy. Area, about half that of England; cap. Fredericton, on St. John R.; coast indented (length 500 m.) by spacious inlets (Miramichi Bay on W. coast, Shepody Bay, St. John's Harbour, and Passamaquoddy Bay on S. coast); shores N. of the isthmus low and sandy, S., on the Bay of Fundy, rocky and sterile, except at head of bay, where are rich reclaimed marshlands. Surface undulating, of slight elevation; highest point 2170 ft., in a range of hills in the N., extending from the falls of St. John to the Bay of Chaleur. Principal rivers, St. John and St. Croix, forming part of the W. boundary, the former in the N. flowing SE., the latter in the S., Restigouche, forming part of the N. boundary, and Miramichi in E., all in part navigable, and with others forming a network of waterways in the interior. In the S. are Grand Lake (30 m. in length) and Washdensoak (20 m.), besides many smaller lakes. A characteristic feature of the prov. consists in the 'intervale' lands, alluvial deposits in the valleys, sometimes forming a belt several miles in width on each side of the river. These lands have been formed by a succession of overflows, and continue to be fertilised by the addition of fresh layers, until they are thereby raised above the reach of floods. Like the marshlands, they are of remarkable fertility, and require no artificial manuring. Dense forests still cover large areas, and the exportation of timber has hitherto been the principal source of wealth. Land can be obtained either by purchase or under the Free Settlement Act, the terms of which enable a man to acquire freehold property by his own labour. Climate severe in winter, though exceedingly healthy (**St. John, Fredericton**); on the shores of the Bay of Fundy, much milder and more equable than in the interior; fogs, however, prevail in summer. The soil is fertile and well adapted for the cultivation of barley, oats, rye, and to a less extent of wheat, root-crops, leguminous and garden vegetables generally, and various fruits; excellent pasturage supports considerable numbers of cattle, and the rearing of live stock is an increasingly important branch of industry. Fisheries are very valuable, comprising cod, pollock, hake, haddock, herring, mackerel, salmon, shad, sardine, &c., besides lobsters and oysters. Minerals worked include coal (of which an important field occurs in Gloucester county, along the Caraquette Rly.), manganese, and gypsum, and to a much smaller extent antimony and plumbago; gold, silver, sulphides of iron and lead, iron pyrites, and copper have been discovered on Chaleur Bay, N. of Bathurst, and other deposits are known to exist, but the mineral resources of the prov. are as yet feebly developed. Shipbuilding, formerly a leading industry, has declined, but other manufactures are making considerable advance. These include cotton and woollen goods, machinery, paper, and fertilisers. The lumbering industry, which supplies more than three-fifths of the exports, is likely to become of increased value, owing to the demand for black spruce (*Abies nigra*) in the manufacture of wood pulp, as great numbers of trees are available for this purpose which would not be large enough for timber. In 1858, the first railway, 65 m. in length, between St. Andrew's and Woodstock, was opened. Besides other lines, the prov. is now traversed S. and W. by the Intercolonial Rly., thus affording direct communication with the western provs. of the Dominion, Halifax on the Atlantic coast, and the U.S. Area, 28,200 sq. m. P. 321,300. See **Canada, Dominion of,** table.

New Brunswick, city, U.S., New Jersey, Middlesex co., on the Raritan R., 22 m. SW. Newark, and 31 m. from New York city, at terminus of Delaware and Raritan Canal. The oldest part of the town is on low land, the newer part on high sloping ground, in the form of a crescent; has extensive factories; also a theological seminary of the Reformed (Dutch) Church, established 1810, with a library of 44,000 vols. Also the seat of Rutgers College, one of the oldest institutions in the United States, founded in 1766. It was formerly Queen's College. P. (1880) 17,200; (1890) 18,600; (1894) 19,000.

New Caledonia, isl. in the W. Pacific, lying almost half-way between Queensland and the Fiji Is., in 164°–167° E. and 20°–22½° S. Its length, from NW. to SE., is about 240 m., or, counting in the extremities of the reef which surrounds New Caledonia, fully 400 m.; breadth, 25–35 m.; area, including the Pines, Uen, Huon, Chesterfield, Bélep, and some smaller islands, 6450 sq. m. A high narrow plateau, wider and higher in the N. than in the S., and keeping more to the E. than to the W. coast, runs down the whole length of New Caledonia. In the N. it is built up of Archæan schists, in the middle of Triassic, Jurassic, and Cretaceous rocks, and in the S. of eruptive formations, chiefly serpentine. In the N., which is well wooded and well watered, containing the longest stream of the island, the Diahot (50 m.), the highest point is Mount Panié (5400 ft.); in the S., which is more irregular, as well as barer and more infertile, the highest point is Mount Humboldt (5300 ft.). A great number of short ranges, with well watered valleys between, run down from the main axis to the coast on both sides, being longer and steeper on the W. The climate is healthy and agreeable, though of course tropical. The heat is moderated by sea-breezes, yet even then it ranges between 55½° and 77° F. from April to September, and between 71½° and 100½° from October to March. Rfall. (1863–64) 48 in. at Numéa on the SW. ct., 63 in. at Canalá on the NE. ct.; most rain falls at the former place between April and July, at the latter between January and April. The island is sometimes visited by devastating hurricanes. New Caledonia is unusually rich in minerals—nickel, chrome, copper, cobalt, antimony, gold (all these worked), coal, iron, manganese, lead, &c. (exist), and lithographic stone on Mato Is., off the S. extremity. The soil is very fertile in the valleys, and yields maize, rice, coffee, sugar, tobacco, manioc, cocoa-nuts, yams, bread-fruit, bananas, sweet potatoes, &c., as well as cotton and vanilla. Timber of various kinds abounds, and trees yielding caoutchouc, gums, tar, ebony, cajaput, &c. The natives devote their attention principally to cattle-breeding, and keep also sheep, goats, horses, pigs, and poultry. Ore is smelted, and tobacco, sugar, soap, salt, &c., manufactured. Trade, which amounts to only about half a million sterling annually, is in Anglo-Australian and French hands. Principal port Numéa, with Balad, Puébo, Hyenghène (Yengen), and Canalá. A submarine cable from Gomen on the N. ct. connects with the Queensland telegraphs at Bundaberg about 180 m. N. Brisbane, and thence with the cable to Europe. Total population about 63,000, including 43,700 natives (of whom about 23,000 are Canaques, the Melanesian indigenes), 10,000 convicts (including those who have served their time and remain as colonists), and 9000 officials, soldiers, and free colonists. The island is administered by a governor, assisted by a colonial council, and is divided into five arrondissements, having for their caps. Numéa (cap. of the island), Canalá, Huaïlu, Tuhu, Uégoa. It was discovered by Captain Cook in 1774, and was occupied by France in 1853. Since 1860 it has been used as a convict settlement; here many of the Paris communards of 1871 were sent. See H. Le Chartier, *New Caledonia* (1885), and L. Pelatan, *Les Mines de New Caledonia*, with a good map (1892).

Newcastle, city, New South Wales, and principal coaling depôt of the Australian colonies, co. Northumberland, at the mouth of Hunter R., 75 m. N. Sydney. It is the principal port for the N. dists. of New South Wales, and its coal trade, from extensive mines in the neighbourhood, is unrivalled in the southern hemisphere. Great quantities of wool are also exported. There are two forts to protect the harbour, besides two breakwaters. On Nobby's Head is a lighthouse, visible 17 m. The length of quayage is 10,975 ft., with 2000 ft. of wharfage, and the depth of the harbour 27 ft. (high water) to 23 ft. (low water). There are two lines of steamers daily to Sydney. Newcastle gives title to a diocese. At Stockton, on the N. side of the harbour, are a patent slip and a shipbuilding yard. Mean temp., yr. 64.2° F., Jan. 72.8°, July 53.6°; rfall. (24 yrs.), 46.41 in. P. (1871) 7581; (1891) 24,600.

Newcastle Emlyn, called by the ancient British *Dinas Emlyn*, eccles. par. and small tn., Wales, Carmarthenshire and Cardiganshire, on the l. bk. of the Teifi, 9 m. ESE. Cardigan, contains Adpar. The castle from which the town takes its name has now completely disappeared. PMT.O. P. <2000.

Newcastle-on-Tyne, episcopal city, parl. bor. and (since William II.) mun. bor., also (since 1888) co.-bor. and (since 1400) co. of itself, seapt., and market-tn., Eng., Northumberland, 275 m. (by rail) NNW. London, and 60 E. Carlisle, in the diocese of Newcastle, on l. bk. of the Tyne, with stations on NE. R. and other branch lines. Though 8 m. from the mouth of the Tyne, the tidal river serves Newcastle as a port, just as the Thames does London. £3,250,000 have been spent on the improvement of the Tyne, including two piers at the mouth. The main industries of Newcastle are connected with coal, the produce of the district, and shipbuilding. The coal exportation began in the end of the 13th century, and has since steadily increased. Henry VIII. ordered 3000 chaldrons to be shipped to Boulogne; under a charter of Queen Elizabeth, dated 1600, 48 persons were appointed to load coals at Newcastle. In 1615, 400 colliers sailed from the Tyne, one-half to supply London; in 1699, 1400 sailed, exporting 200,000 chaldrons; in 1764, the number rose to 4092 (365 being for foreign parts). In 1826, 12,924 vessels cleared, shipping 915,990 chaldrons; and the capital then employed in the coal trade was estimated at £4,000,000. In 1838, 2,450,800 tons of coal were exported coastwise, and 554,200 tons to foreign parts. In 1853, 11,172 sailing-vessels cleared this port of 1,502,800 tons, and 429 steamers of 97,200 tons. Since 1882 several ships of war (e.g., *Victoria*, 10,000 tons) have been constructed in the Tyne. (For later shipping statistics, see **Appendix,** p. 13.) For 10 m. both banks of the Tyne are lined with quays, shipbuilding yards, and numerous manufactories, the chief quay, nearly a mile long, serving as an excellent thoroughfare. The Northumberland Dock, 3700 ft. long by 650 ft., has 450 ft. of quayage, and basin 480 ft. by 170 ft.; the Albert Edward Dock, 1300 ft. by 900 ft., has 2800 ft. of quayage, and basin 450 ft. by 300 ft.; the Tyne Dock, 2640 ft. by 840 ft., has 5340 ft. of quayage, and tidal basin 530 ft. by 600 ft.; the Corporation Quay, from Swing Bridge to Ouseburn, has 4770 ft. of quayage. Three important bridges now connect Newcastle with Gateshead, one of which cost very nearly £500,000. There are several fine public parks, besides an extensive common, which has been preserved on the N. side. The Norman keep, on a height by the river, is a survival of the famous castle (by Henry II., on the site of an older fortress) which gave its name to the town, the previous name being *Monkchester*. Some towers still remain of the walls, which, according to Leland, 'far surpassed for strength and magnificence all those of the cities of England.' The chief public buildings are the Corporation Buildings, the Guildhall, the Moot Hall, the Exchange, the Barracks, the Market, the Natural History Museum (built 1884), and the Public Library, &c. There are also the College of Medicine and the College of Science, both affiliated to the University of Durham, and other excellent educational and scientific institutions. In 1882 Newcastle became a bishopric, including the whole of Northumberland with Berwick-on-Tweed and the par. of Alston in Cumberland. Market-days, Tu. and S. Revenue, £3500. Within the 19th century the city more than quadrupled its population. As parl. bor. Newcastle returns two M.P.'s. P. parl. and mun. bor. (1801) 28,400; (1851) 87,800; (1871) 128,400; (1891) 186,300.

Newcastleton, Scot., vil., Roxburghshire, 7½ m. E. by N. Langholm, on Liddel Water and N. B. R., PMT.O. Alt. 350 ft. Mean rfall. (1866-80), 49.3 in. P. <1000.

Newcastle-under-Lyme, parl. bor., mun. bor. (since Henry II.), par., and market-tn., Eng., Staffordshire, in the diocese of Lichfield, 15 m. NNW. Stafford, adjoining Stoke-upon-Trent on the W., with station on the N. Staffordshire Rly., and communicating by Great Junction Canal with Stoke, &c. Formerly there was a large hat manufacture; now the principal manufacturing establishment is an army clothing factory. There are also mills for cotton, paper, cloth, &c., &c. The name is from a castle built in 1135 by the Earl of Lancaster—*under-Lyme*, referring to a forest of *linden* trees then covering the dist. Simon de Montfort held the manor from 1263 till his death at the battle of Evesham. There have been public recreation grounds since 1816. Grammar school (founded 1602) recently converted into the High School, with excellent building. There is a handsome town-hall in the market-place; also new municipal buildings, including a public library. Many fairs are held. Market-days, M., W., and S. Mun. bor. P. (1801) 4600; (1851) 10,600; (1891) 18,500; parl. bor. (1891) P. 54,200.

Newchwang, or more properly **Niuchwang,** a treaty port, China (since 1861), the chief seapt. of Manchuria, prov. Fengtien, 110 m. SW. by W. Mukden, 30 m. from the mouth of the Liauho, in a vast alluvial plain rapidly extending seawards; though Newchwang gives name to the port, and actually was so about 40 years ago, the port proper is now at Yingtse, at the mouth of the river, the depth of water at Newchwang itself being too little for sea-shipping. At Yingtse the depth on the bar at high water ordinary spring tides is 15–22 ft.; rise and fall of the tides very irregular, being affected by the winds—in height 6–12 ft. Vessels loaded and discharged at the jetties or by boats and godowns. Port frozen end of Nov. to March. Value of exports nearly £2,000,000; principal articles, beans and bean-cake, then bean-oil, wild and refuse silk, ginseng, and skin rugs. Principal imports, Indian yarn, Chinese raw cotton, and American sheeting. Mean temp. (2 yrs., 1861–62, 1872), yr. 47.2° F., Jan. 10.4°, July 77.7°. P. 60,000.

New City, vil., U.S., New York, Rockland co., 30 m. N. New York. P. <1500.

Newdale, vil., Canada, prov. Manitoba, on the Manitoba and NW. Rly., 97 m. W. Portage-la-Prairie.

New Decatur, tn., U.S., Alabama, Morgan co., adjoining Decatur (75 m. N. by W. Birmingham). P. <4000.

Newdigate, par., Eng., Surrey, Reigate div., 5 m. SSE. Dorking, 1½ m. ESE. Holmwood stn., PM.O.; 4551 ac. P. <750.

New Diggings, vil., U.S., Wisconsin, Lafayette co. (in SW. of state), with lead and zinc mines. P. <1500.

New Dublin, vil., Canada, Nova Scotia, Lunenburg co., at the mouth of the riv. La Have, 47 m. SW. by W. Halifax.

Newdyquoddy Head, cape, Canada, Nova Scotia, on the SE. ct., in 44° 50′ N.

New Edinburgh, vil., Canada, Ontario, Carleton co., on the r. bk. of the riv. Ottawa, and of the Rideau R., adjoining Ottawa on the E.

New Egypt, vil., U.S., New Jersey, Ocean co., 17 m. SE. Trenton; seat of Plumstead Institute. P. <1500.

Newelltown, mining locality, Queensland, co. Cardwell, about 10 m. from Herberton, and about 17½° S.

Newenden, par., Eng., on the S. border of Kent, Ashford div., on the Rother, 7 m. NW. by W. Rye, P.O. P. <250.

New England, a collective name applied to the former British possessions in N. America, now comprising the six NE. states of the Union—Maine, New Hampshire, Vermont, Massa-

chusetts, Rhode I., and Connecticut. The inhabitants are descendants of English Puritans and Scotch Presbyterians, and familiarly designated as Yankees.

New England, pastoral dist., New South Wales, Sandon co., forming a tableland 13,100 sq. m. in area, alt. 300 ft., crossed by railway from Sydney to Queensland border. P. 15,200.

New England Range, mt. chain, E. Australia, NE. New South Wales, part of the Great Dividing Range, the crest of which (length 280 m.) runs parallel to, but 75–100 m. distant from, the coast. Highest points, Ben Lomond (5000 ft.) and Capoompeta (4730 ft.).

Newent, par. and market-tn., Eng., Gloucestershire, Forest of Dean div., 8 m. NW. by W. Gloucester, on the G. W. R., and the Hereford and Gloucester Canal; has manufactures of linen fabrics and nails. PMT.O. Market-day, F. 8091 ac. P. <3000.

Newfane, vil., U.S., Vermont, Windham co., 46 m. SSE. Rutland. P. <1500.

New Ferry, eccles. par., Eng., Cheshire, in Bebington, near Birkenhead, with stn. (**Bebington and N. F.**) on Birkenhead R. P. <4000.

New Ferry, P.O., Ire., co. Londonderry, 7 m. N. Toomebridge, 7 m. from Toome Bridge stn.

Newfield, P.O., Eng., near Chester-le-Street, Durham, 1 m. from Pelton Fell.

Newfield, par., Eng., Durham, 3 m. N. Bishop Auckland, PM.O. P. <1500.

Newfieldyke, part of Binniehill and Southfield tn., Scot., Stirlingshire.

New Florence, bor., U.S., Pennsylvania, Westmoreland co., 34 m. NE. Greensburg. P. <1500.

New Forest, royal forest of England, laid out by William the Conqueror, and occupying most part of the SW. portion of the co. Hants, W. Southampton Water. Length, 16 m.; breadth, 14 m.; area, 92,000 ac., of which 64,000 crown demesnes. Managed by the court of Verderers as a public pleasure ground. Swine feed on the beech mast; and a race of small ponies are bred in the forest. It supplies excellent timber, principally oak and beech, especially valuable from its proximity to Portsmouth dockyard. It is now a favourite resort of artists and naturalists. The principal town within its confines is Lyndhurst.

New Forest, the SW. div. of Hampshire, Eng. P. 51,300.

Newfoundland, isl., Brit. N. America, off the coast of Labrador and Quebec, between 46° 37′–51° 39′ N., 52° 35′–59° 25′ W., separated from the mainland by the Strait of Belle Isle (12 m. across) and the Gulf of St. Lawrence. Length about 419 m.; area, rather more than two-thirds that of England and Wales; cap. St. John's, on SE. ct. Attached to the colony is the Labrador coast from Chidley Cape (Hudson Strait) to Blanc Sablon (Strait of Belle Isle), with the basin of the Hamilton R.; area about that of the United Kingdom; chief port Battle Harbour, on Strait of Belle Isle; other settlements (Moravian mission stations) are Hopedale, Nain, Okkak, and Hebron. Shape of Newfoundland a very irregular triangle, of which the extreme points are Capes Race (SE.), Ray (SW.), and Bauld (NE.); it includes two large penins.; one in the NW., long and narrow, stretches N. by E., the other (Avalon penin.) in the SE. is itself broken up into several smaller penins. The shores are nearly everywhere rocky, and greatly indented. Principal inlets are (E.) Hare, White, Notre Dame, and Exploits Bays, Hamilton Sound, Bonavista, Trinity, and Conception Bays; (S.) St. Mary, Placentia, Fortune, and Hermitage Bays; (W.) Port Basque, St. George, and Port-au-Port Bays, Bay of Islands, and Bonne Bay; (N.) Pistolet Bay. The country in the E. is generally low, westward more rugged and mountainous, and especially so in the northern penin., which is traversed near the W. ct. by the Long Range, rising to 1500 ft. Reliable information as to the particular character of the interior is wanting, but it is known that there are numerous lakes, ponds, and rivers. Principal rivers, the Exploits and the Gander; the former rises in the SW., and flows NE. to Bay of Exploits, draining in its course Red Indian and other lakes; the latter flows N. by E. through Gander Lake to Hamilton Sound. In the W. is Grand Lake. Off the E. ct. are Fogo, New World, Bell, and other islands; N., Belle Isle; and S., the French isls. of Miquelon and St. Pierre. SE. is the great bank of N., the most extensive submarine plateau yet discovered, about 600 m. in length, in some places 200 m. in breadth, with a depth varying from 25–95 fathoms, and a bottom of solid rock. The principal fishing ground is over this bank, between 42°–46° N. The Labrador coast is a bleak, inhospitable region, sparsely populated by Eskimos and descendants of British settlers, who subsist by fishing and trapping. During summer there is a large temporary addition to the population, caused by a great influx of fishermen, besides many sportsmen. Timber is scarce near the coast of N., but is believed to be more abundant in the interior; pasturage is, however, plentiful, and the plains abound with cariboo deer, which, with the famous Newfoundland dogs, wolves, bears, foxes, and some beavers, constitute the principal animals. The climate of Newfoundland is healthy, rather milder than that of Canada, with scarcely any spring, the transition from winter to summer (which is short) taking place abruptly in May [**St. John's**]. Fogs are prevalent off the S. ct. As regards geological structure, Archæan rocks (chiefly granite) predominate, with Secondary and Carboniferous formations. The soil appears to be little favourable to agriculture, which is carried on to a limited extent along the coast-belt. The cod-fishery is the staple industry, and next in order are the seal, lobster, herring and salmon fisheries. Minerals include copper, mined at Tilt Cove, in the NE., and asbestos on the W. ct.; an important coalfield has been discovered near Grand Lake; lead and silver are also found. Shipbuilding is carried on to a considerable extent, and the lumber industry is increasing. Exports consist chiefly of the produce of the fisheries, and of copper. The means of internal communication is still very limited; the first railway, of 84 m., from St. John's to Harbour Grace, was opened in 1888; since then another of 25 m. to Placentia, and a longer line running N. to the Bay of Exploits and Hall's Bay have been completed; while a further extension to the W. ct., by the Bay of Islands, St. George's Bay, and Port Basque Bay, in the extreme SW., has been begun. This extension promises to be of great importance in developing the resources of the interior. Newfoundland has a regular fortnightly mail steamer service (except from Feb. to April) round the island, and with the American continent, Prince Edward's I., and Liverpool. Heart's Content Harbour, an inlet of Trinity Bay, is the landing-place of the Trans-Atlantic cables from Valentia; the American cable starts from Placentia. Newfoundland was discovered by John Cabot in 1497, and within three years Portuguese, Spaniards, and French were frequenting it for its fisheries. In the 16th century both English and French settlements were formed on the SE. ct., and between these much hostility existed. At the Peace of Utrecht (1713) the sovereignty of the island passed entirely to Britain, but certain fishing rights reserved to the French have given occasion for serious disputes between the French fishermen and the colonists. Under this treaty fishing rights, including the right to dry fish on land, were granted to the French on the coast of Newfoundland, from Cape Bonavista to Point Rich, going round the N. point of the island; but by the treaty of Versailles in 1783 the limits were altered to Cape St. John (E. ct., just N. of 50° N.) and Cape Ray (SW. point of island), and this is what is now known as 'the French shore.' Under the treaties the French claim the exclusive right of fishing off these shores, and deny the right of the people of Newfoundland to make permanent settlements for agriculture, mining, or other purposes on that shore; but these claims are denied by Newfoundland, and the matter in dispute is still unsettled. The colony of Newfoundland is, with the exception of the Bermudas, the only part of British N. America not included in the Dominion of Canada. Since 1832 the colony has had a legislature, and since 1855 responsible government. Area, 42,200 sq. m. (including Labrador, 160,200 sq. m.). P. (1891) 197,900 (including Labrador, 202,000).

New Found Pool, par., Eng., co. and 4 m. S. Leicester. P. <2500.

New Galloway, royal burgh and vil., Scot., Kirkcudbrightshire, on the r. bk. of the Pulharrow Burn, 17 m. N. by W. Kirkcudbright, with a stn. 5 m. SSE. on the Portpatrick and Wigtownshire Joint Rly., PMT.O. P. <500.

New Georgia, group of the Solomon Is., in the British sphere of influence between 7½° and 9° S., and 156½° 0′ and 158° 20′ E.; principal islands, Kausagi (Cowsoggie), or Rubiana, Kulambangra, or Kurombangara, Wella Lawella, Ronongo, and Rendowa, or Rendezvous I. Inhabited, it is said, by the most treacherous tribes, and those most given to head-hunting, in the Western Pacific.

New Germany, vil., Canada, Nova Scotia, Lunenburg co., on the riv. La Have, 55 m. W. by S. Halifax.

New Gilston, P.O., Scot., near Lower Largo, Fifeshire.

Newgrove, electoral div., Ire., co. Clare, dist. Quin.

Newgrove, electoral div., Ire., co. Longford, dist. Granard.

New Guernsey, isl., Pacific Ocean. See **Egmont.**

New Guinea, or **Papua,** an extensive island of the E. Archipelago, and comprised in the great div. Australasia, stretching NNW. and SSE., between the equator and 12° S., 130° 50′ and 154° 30′ E., separated southward by Torres Strait from the N. point of Australia (from which it is distant about 80 m.), and having W. the Arafura Sea. Length from E. to SW. about 1500 m.; breadth from 30 to 430 m.; area about twice that of the United Kingdom, politically divided between Britain, Germany, and Holland, British terr. comprising the SE. and S. (cap. Port Moresby), German terr. the NE. (cap. Finschhafen), and Dutch terr. all the W. half of the island. The boundary between Dutch terr. on the one hand and British and German terr. on the other hand is mainly formed by the meridian of 141° E., but in 1893 an agreement was concluded between the British and Dutch by which a frontier having more regard to physical features was adopted. Under this agreement the

frontier begins at the mouth of the Bensbach, in about 9° 7′ 35″ S., 141° 1′ 46″ E., runs thence N. to the Fly, and then ascends the Fly till it reaches the meridian of 141° E. in about 6° 20′ S. Between British and German terr. the boundary is formed by a straight line running from 5° S. in 141° E. to 6° S. in 144° E., thence by another straight line running to 8° S. in 147° E., and thence along the parallel of 8° S. to the S. coast. It has a remarkably irregular shape, indented by large and deep bays—Gulf of Papua, McCluer or Beran Inlet in the S., Geelvink Bay N., Astrolabe Bay, Huon Gulf, Dyke Ackland, Collingwood, Goodenough, and Milne Bays in NE. to S. Amongst harbours may be noted Port Moresby, Port Milport, Losoa Doudon, near Orangerie Bay, and Duau in Normbany I. Straits—China and Goschen SE., Vitiaz NE., Geelvink and Dampier NW., Dourgo and Marianne SW. Off the coast are the D'Entrecasteaux, Louisiade, Woodlark, and Trobriand Is. SE., Canoa and other islands in the Gulf of Papua, Frederick Henry I., Arru, Kei, and Tenimber or Timor Laut Is. in the Arafura Sea, Waigeu NW., Schouten or Mysory Is. and Jappen or Jobi I. in Geelvink Bay. The SE. coast is bold and rocky, the S., W. of Torres Strait, low and marshy, the N. mountainous. The interior is still imperfectly known, but there are various lofty ranges with wide alluvial plains. In British New Guinea the Owen Stanley Mts. run SE. and NW. (Mount Victoria, 13,205 ft., Mount Obree, 10,246 ft., Mount Suckling, 12,228 ft.), continued NW. by other ranges. In Dutch terr. the Charles Louis Mts. stretch E. and W., in about 4° S., between 139° and 135° E. (highest summit, 16,730 ft.), NW. are the Arfak Mts., and N. the Gaultier (6560 ft.); the Bismarck Range in German terr., about 145° E., is said to rise to over 16,000 ft. The principal rivers are the Baxter and Fly (with l. bk. trib. Strickland), the Bamo, Philip, Turama, Aird, and some other considerable rivers flowing into Gulf of Papua, Kei, NW., and Empress Augusta, NE. Climate hot; rainfall abundant. The rainy season lasts from Dec. to May [**Port Moresby**]. Very unhealthy on the coast, fever of a severe type being prevalent; more salubrious in the elevated parts of the interior, but nowhere, so far as known, adapted to Europeans. Vegetation is luxuriant; most of the country is covered with dense forest (cedar, sandalwood, ebony, hardwood, camphor-tree, sago-palm, wild nutmeg, indiarubber, and many other trees); coco-nuts and bananas form an important part of the food-supply of the inhabitants, and with yams, taro, and sweet potatoes are carefully cultivated; tobacco and various species of sugar-cane are also native. Some new species of marsupial animals have been discovered, and the island is rich in birds, including several varieties of the bird of paradise. The mineral resources of the country are almost entirely unknown; a little gold has been obtained on Sudest and St. Aignan Is., and plumbago has been discovered on the SW. coast. The chief industries are pottery, wood-carving, and rope (made of the inner fibrous bark of a tree); in the making of pottery considerable skill is shown. Principal exports (besides gold), *bêche de mer*, sandalwood, and copra, with a small quantity of pearl shell. The Papuans are distinguished from the Negroes proper, to whom they bear close affinity, by their narrow head and slight chin; medium or small stature. They present, however, considerable variety owing to the intermixture of Malayan and Polynesian elements, the former predominating in the W., the latter in the S. In many parts there are large and well-kept villages, and considerable trade is carried on by barter. The natives in the vicinity of Hood Bay are said to be the most advanced in the island. Some of the interior tribes, as those of the Arfak Mts., are very degraded, and are even said to be cannibals. The island was discovered by the Portuguese (De Abrea) in 1511, named by De Menesis in 1526 Papua, and by De Ortez in 1545 New Guinea. During the 16th and 17th centuries it was visited by many other navigators, and in 1699 circumnavigated by Dampier. In the 18th century the Dutch annexed some parts of the W. coast. In 1793 the East India Company formally annexed the island, and established a post (soon abandoned) at Geelvink Bay. In 1828 the Dutch took possession of the country W. of 141° E.; in 1871 the London Missionary Society commenced operations. In 1883 the island E. of 141° E. was annexed by Queensland, but this action was not ratified by the Home Government, which, however, in the following year declared a protectorate over the southern coast. In 1886 a German protectorate was established in the NE., and in 1888 the British protectorate was made a Crown colony. Area (estimated), 234,768 sq. m. P. variously estimated at from 2,500,000 to 5,486,000. British New Guinea area, 88,000 sq. m. P. (estimated) 350,000 to 460,000. *Proc. R. G. S.*, 1882, p. 768.

Newhall, par., Eng., Cheshire, Knutsford div., 3½ m. SE. Northwich; 4159 ac. P. <750.

New Hamburg, vil., Canada, Ontario, Waterloo co., on the riv. Nith, 38 m. NE. London.

New Hampshire, one of the so-called New England states of the United States, W. of Maine and N. of Massachusetts, with 18 m. of sea-coast. The Connecticut R. forms the boundary between New H. and Vermont. Capital, Concord; other chief towns, Manchester, Nashua, Dover, Portsmouth (the chief port), Keene, Rochester. Nowhere level to any extent, the surface rises in the White Mts. to 6288 ft. (Mt. Washington); and the rivers, of which the Merrimac is most important, furnish abundant water-power. Numerous small and beautiful lakes exist. The winters are long, with deep snow (Mount Washington); nor is the heat of summer excessive. There is an excess of cases of consumption in the SE. In agriculture the product is limited, nor equal to the demands of the state. Manufacturing, largely with water-power, is the chief industry. Cotton (at Manchester), woollen and worsted goods, mixed textiles, hosiery and knit goods, boots, shoes, and leather are the most important products. The manufacturing towns are all in the south of the state, and belong to the larger industrial region, of which Boston, in Massachusetts, is the centre. In common with other eastern states New H. suffers from a drain of her rural population to the cities and to the western states, the three mountainous counties of Grafton, Belknap, and Carroll having fewer inhabitants in 1890 than in 1880. About one hundred quarries of granite, from Archæan rock, are worked in all counties except Belknap and Coos. The forests yield hard and soft woods. The scenery of the White Mts. (the Switzerland of America) and their healthfulness attract many summer tourists. A cog railway ascends Mount Washington. Dartmouth College, at Hanover, is the only college in the state. The first settlements were made by Englishmen in 1623. From 1641 New H. was part of Massachusetts, until in 1679 it became a royal province. During many years of colonial history, Indian warfare caused serious losses of life and property. As a state, New H. was ninth in ratifying the Constitution. Area, 9005 sq. m. P. 376,530. See **United States,** table. [**C. H. L.**]

Newhaven, par. and seapt. tn., Eng., Sussex, Eastbourne div., on the SE. ct., 6 m. S. by E. Lewes, with a town and harbour stn. on the L. B. & S. C. R.; coastguard station; is a bonding port, and has regular steam communication with Dieppe (64 m. SE.). Gridiron 217.5 ft., and patent slip 125 ft. in length. PMT.O. P. <5000.

Newhaven, eccles. par. and fishing tn., Scot., Midlothian, on the S. shore of the Firth of Forth, and the C. R., 2½ m. N. Edinburgh, included in the Leith dist. of parl. burghs. Eccles. par. P. 6100.

New Haven, city, U.S., Connecticut, New H. co., on New H. Bay, 36 m. SSW. Hartford, situated on a large plain, surrounded by hills except on the S., where is the rather shallow harbour formed by the confluence of the rivs. Quinnipiac, Mill, and West; there are two wharves 3500 and 1500 ft. long, and other landings for steamboats; has large coasting trade and considerable foreign commerce, and extensive manufactures. Founded in 1638. It is the seat of Yale University, one of the oldest and most important in America, founded in 1700, and embracing a library with 170,000 volumes, and the Peabody museum. The village of Fair Haven, 2 m. E., within the town limits, has a large oyster trade. Mean rfall., yr. 50.1° F., Jan. 28.9°, July 72.9° P. (1810) 5800; (1870) 50,800; (1880) 62,900; (1890) 81,300. P. tn. (=tp. 1890) 86,000.

Newhaven, postal-tn., Victoria, co. Mornington, 64 m. by rail and steamboat SE. Melbourne, at E. end of Phillip I. P. <1500.

New Hebrides, a group of isls. in the W. Pacific, lying NE. of New Caledonia, and W. of Fiji Is., in 14°–21° S., and 167°–172° E. They stretch 500 m. from NW. to SE., and consist of Espiritu Santo, Mallicolo, Aurora, Lepreux (Aoba), Pentecost, Ambrym, Api, Sandwich (Vaté), Erromango, Tanna, Futuna (Eronan), Aneytum (Annatom), and numerous smaller islands. They are partly coralline, partly volcanic. The type of the former is a succession of bare terraces ascending by easy gradations to a maximum alt. of 3000 ft. The volcanic islands are well wooded and well watered, with fertile soil. The coasts are, as a rule, steep and irregular, with numerous bays, and all are protected by coral reefs. Active volcanoes exist on Ambrym, Api, Tanna, and Polevi; and on Tanna there are sulphur springs. Good harbours are found at Port Villa and Port Havannah on Sandwich Is., at Port Sandwich on Mallicolo, at Port Resolution on Tanna, and in Dillon Bay on Erromango. The climate is generally healthy, except the NW. coasts, which, being sheltered from the prevailing winds, are at times malarious. Temp. 60°–90°. Most rain falls between November and April. Principal products yarn, bread-fruit, coco-nut, rice, maize, tobacco, manioc, sugar, coffee, cotton, cacao, vanilla, fruits, bamboo, palms. The seas yield fish, coral, pearl, trepang, and tortoise-shell. Sandalwood, formerly cut on Erromango, is now exhausted. The people, of Papuan descent, exhibit remarkable diversity of language, customs, and habits, and number 75,000 to 80,000. Christianity is established on Aneytum. Most of the other islanders are heathens, cannibals, and ancestor-worshippers; they are honest and truthful, but suspicious and revengeful. They have been much employed on the plantations in Queensland and Fiji. Both England and France set up claims to the islands. They were first discovered by the Spanish navigator Quiros in 1606, but more fully explored by Captain Cook in 1774. See Dr. J. Inglis, *In the New Hebrides* (1887); J. G. Paton, *Memoir* (1889); and H. Le Chartier, *Nouvelle-Calédonie* (1885).

New Island, Chilean isl., Tierra del Fuego, S. of Beagle Channel, crossed by 55¼° S., 66½° W.; alluvial gold, nearly exhausted.

New Jersey, one of the United States of the N. Atlantic group, E. of Pennsylvania, and S. of New York, with Atlantic coast for 120 m., the Delaware R. (once called South R.) and the Delaware Bay on its W., and on the NE. the Hudson, still called locally North R. In the N. are low ranges of hills and mountains of the Appalachian system. The Kittatinny or Blue Ridge, the Walkill, and others, nowhere above 1800 ft., from which the Passaic and Raritan Rivs. flow to Newark and Raritan Bays. This elevated part of the state consists of primary strata, which are succeeded by secondary strata. The latter contain dikes of igneous rock (the Palisades), and also extensive beds of sand, marl, and clay, which furnish material for glass, fertilisers, pottery, and brick. Tertiary strata occupy the SE., and the coast is fringed with lagoons and long sandy islands, where the numerous 'beaches' are utilised as summer resorts (Cape May, Atlantic City, Asbury Park, Long Branch). Climate temperate. Lakewood is a famous winter resort. Manufacturing is the leading occupation, with a great variety of products, and is carried on chiefly in the N., where shipping facilities are best, and the Pennsylvania coal is easily obtained. Sugar-refining, meat-packing, and silk goods lead in aggregate values. Much fruit is grown, and market gardening is largely developed by reason of the markets of Philadelphia and New York City. Several trunk lines of railways cross the state, terminating at Jersey City and Hoboken, opposite New York, whence sail the steamers of various important ocean lines. The Morris Canal and the Delaware and Raritan connect the Delaware R. and the sea. Besides the towns already mentioned, the chief are Newark, Paterson, Camden, Trenton (the capital), Elizabeth, Bayonne, Orange, and New Brunswick. The college of New Jersey is at Princeton, Rutger's College at New Brunswick. The common schools are well attended. The first settlers were Dutch, in about 1620, and the settlements were attached to New Amsterdam. Swedes settling along the Delaware were overpowered by Stuyvesant in 1655. After the English conquest in 1664 Charles II. granted the land to the Duke of York, who gave it to Berkley and Carteret, with the name New Jersey. New Jersey was one of the original thirteen states. Area, 7455 sq. m. P. 1,445,000. See **United States,** tables. [**C. H. L.**]

New Mexico, a terr. of the United States, NW. of Texas and S. of Colorado, with 175 m. adjacent to Mexico. Capital, Santa Fé; other chief towns, Albuquerque, Las Vegas, Socorro, Silver City, Las Cruces. The surface is nearly everywhere above 4000 ft. in elevation, with large areas in the N. averaging 6500 ft. The N. boundary crosses the main range of the Rockies, including within the terr. a series of ranges, with peaks of 12,000–13,000 ft. (Truchas Peak, 13,150 ft.). The ranges extend in detached series from N. to S. in all quarters, enclosing in the N. the long San Luis Park with the Rio Grande, which flows thence through a narrow but fertile valley S. to the Texan boundary. The NW. ranges separate the Atlantic and Pacific river systems, and, like the lava-topped Mesas to their S., are much subdivided by cañons. In the SW. the Gila R. rises, in the NE. the Canadian, and the Pecos traverses a fertile N. and S. valley in the E. The climate is exceedingly dry, the scanty rains coming in summer [**Santa Fé**]. Diseases of the respiratory organs are very rare. Many minerals are profitably worked in the terr., but not so extensively as elsewhere, because of lack of shipping facilities, and the existence of richer deposits in other regions. Copper is found near Santa Fé and in Socorro and Grant cos., gold and silver in Colfax, Santa Fé, Lincoln, and Grant cos., lead in Santa Fé, bituminous coal in Colfax and Santa Fé cos., anthracite in Santa Fé, zinc in Grant co.; the turquoise mines in Santa Fé co. are the only important producers of gems in the United States. Agriculture is mainly confined to irrigated land, but that yields richly. The large portion of the terr. is pastoral. New Mexico was first explored by Spaniards, who in the 16th century established themselves as conquerors among the Pueblo, or village building, Indians. Later the natives were enslaved to work in the mines, until they revolted successfully in 1680 and filled up the shafts, and so thoroughly, that discoveries of ancient workings are still made. The eastern two-thirds of New Mexico were formerly part of Texas; the W. part was taken from the Mexican cession of 1848, and the Gadsden purchase. Spanish is largely spoken; Catholicism the prevailing belief; both Spanish and English schools are maintained. Area, 122,460 sq. m. P. 153,600. See **United States,** tables. [**C. H. L.**]

New Orleans, city, U.S., on both sides (but chiefly l. bk.) of Mississippi R., 690 m. S. St. Louis by rail, and 960 m. SW. Washington by rail. The older part of the city (statutory limits nearly 150 sq. m., actual city about 41 sq. m.) is within a great bend of the river, hence it is known as the 'Crescent City.' Built on an inclined plane, descending gently from the river towards Lake Pontchartrain in the rear. The streets, when the Mississippi is full, are 3 or 4 ft. below the surface. An artificial embankment, called the Levee (15 ft. wide and 14 ft. high), has been constructed along the river bank to guard the city against inundation. Chief public buildings are the cathedral, the custom-house, the branch mint, and cotton exchange; Tulane University (founded 1847). There are about 17 cemeteries; and the usual mode of burial is above ground, in tombs, owing to the marshy nature of the soil. New O. is the emporium of all the Mississippi regions, and thus commands a vast internal trade. Owing to the improvements at the mouth of the river, vessels of the largest size can ascend to the city. New O. has the greatest cotton-market of the world. Yellow-fever is sometimes prevalent, but since the institution, in 1878, of the present quarantine system, there has been no epidemic, as the disease is imported and not indigenous. Depth at entrance to port between jetties, 26–28 ft.; depth in port at all stages of the river, 25–30 ft. 'The above are the depths officially given, but there appears to be serious doubt whether they are not more favourable than the facts warrant' (*Lloyd's List*). Mean temp., yr. 69.1° F., Jan. 54.1°, July 82.5°; rfall. (30 yrs.), 55.17 in. The city was founded in 1718 by Bienville, and in 1722 was made the seat of government of the French colony of Louisiana. The population consists of Americans, French Creoles, and Spaniards, with a mixture of other nations. P. (1810) 17,200; (1870) 191,400; (1880) 216,100; (1890) 242,000. See **Louisiana.**

Newpark, stn., Scot., Midlothian, on the C. R., 8½ m. SSE. Linlithgow.

New Philadelphia, city, U.S., Ohio, Tuscarawas co., on the Tuscarawas, 50 m. NW. Wheeling (W. Va.), with extensive coal-mines and important iron-works (sheet-mills, tinplate-mills, nail-works, &c.), tile-factories, &c. P. (1890)<5000; (local census, 1895) 6000.

New Plymouth, bor., New Zealand, North I., Taranaki co., on the W. ct., 160 m. S. by W. Auckland, in 39° 4′ S. The roadstead is open, with wharves (partly protected from the prevailing SW. wind by an unfinished breakwater) only available at from full to half-tide. P.<4000.

New Point Comfort, U.S., Virginia, in SE. of Matthews co., between Chesapeake and Mob Jack Bays, with fixed light, 60 m. above sea-level.

Newport, vil., Canada, Quebec, Gaspé co., on the E. ct. (Gulf of St. Lawrence), in 48° 14′ N.

Newport, eccles. par., Eng., Devonshire, div. and 1 m. SE. by E. Barnstaple, on the r. bk. of the Torridge. P.<1500.

Newport, par., Eng., Essex, div. and 3½ m. SSW. Saffron Walden, on the G. E. R., PMT.O. P.<1000.

Newport, mun. bor. (since 1193), and market-tn., Eng., Hampshire, in the centre of the Isle of Wight, on the Medina, 17 m. SSE. Southampton, in the diocese of Winchester, with railway lines to Cowes, Ryde, and Ventnor. It is the commercial cap. of the island. Cement works and brewing. Carisbrooke Castle and Parkhurst Barracks are in the neighbourhood. Newport returned two M.P.'s from 1585 till 1867, then only one till 1885, when it was disfranchised. Market-days, S. and each alternate W. P. (1801) 3600; (1851) 8000; (1871) 8500; (1891) 10,200.

Newport, mun. bor. (since Richard II.) and co. bor., par., seapt., and market-tn., Eng., Monmouthshire, Monmouth dist., 20 m. SW. Monmouth, in the diocese of Llandaff, near the mouth of the Usk (trib. of the Severn), with stn. on G. W. R., and branches to Monmouth, Pontypool, &c. The Usk is navigable for the largest vessels. There are extensive docks. Newport exports more iron than any other English port, and ranks third for the export of coal (see statistics, **Appendix,** p. 13); important iron and chemical works. Ruins of ancient castle; tower of parish church built by Henry III. Newport constituted a co. bor. in 1891. Fairs are held in August and November. Market-days, W. and S. Par. 4463 ac., P. 10,400; mun. bor. P. (1801) 1100; (1851) 19,300; (1871) 31,200; (1891) 54,700.

Newport, parl. div., Eng., Shropshire. P. (1891) 53,000.

Newport, par. and market-tn., Eng., Shropshire, 11 m. SW. Stafford, on Shrewsbury Canal and L. & NW. R., PMT.O. Market-day, S. Par. and tn. P.<3000.

Newport, vil., Yorkshire, E. Riding, Howdenshire div., on the Hull and Barnsley Rly., 8½ m. NE. Goole, close to the Market Weighton Canal.

Newport, vil., Eng., Yorkshire, N. Riding, on the NE. R., in the SW. of the parl. bor. of Middlesbrough, PMT.O.

Newport, tn., Ire., NW. co. Mayo, bar. Burrishoole, at mouth of riv. Newport, E. of Clew Bay, 5½ m. N. Westport, on the M. G. W. R., PMT.O. (**Newport,** or **Newport Pratt**). P.<750.

Newport, tn., Ire., W. co. Tipperary, bar. Owney and Arra, 10 m. ENE. Limerick, on the Mulkear R., 3 m. from Castleconnell stn., PMT.O. P.<1000.

Newport, watering-place, New South Wales, co. Cumberland, at the head of Broken Bay, 23 m. by road and steamboat N. Sydney. P.<1500.

Newport, seapt. tn., Scot., E. Fife, on the S. shore of the Firth of Tay, 1½ m. SE. Dundee, with two stns. (**East** and **West Newport**) on the N. B. R., PMT.O. P.<3000.

Newport, tn., U.S., Arkansas, Jackson co., on l. bk. of White R., 78 m. NW. by W. Memphis (Tenn.). P.<2000.

Newport, vil., U.S., Delaware, Newcastle co., on Christiana R., 4 m. SW. by W. Wilmington. P.<1500.

Newport, vil., U.S., Indiana, Vermillion co., on r. bk. of Wabash R., 28 m. N. Terre Haute. P.<1500.

Newport, city, U.S., Kentucky, Campbell co., on the l. bk. of the Ohio, and the r. bk. of the Licking R., opposite Cincinnati (Ohio), with iron and steel works, large distilleries, &c.; connected with Covington by a suspension bridge, and with Cincinnati by two bridges (one a railway bridge). About 1 m. off is the U.S. military post of Fort Thomas. P. (1880) 20,400; (1890) 24,900.

Newport, tn., U.S., Maine, Penobscot co., 23 m. W. by N. Bangor. Alt. 200 ft. (R.R.). P.<1500.

Newport, tn., U.S., New Hampshire, Sullivan co., on Sugar R., 32 m. WNW. Concord. P.<3000.

Newport, vil., U.S., New Jersey, Cumberland co., 43 m. S. Philadelphia (Penn.). P.<1500.

Newport, vil., U.S., New York, co. and 12 m. N. Herkimer. P.<1500.

Newport, vil., U.S., Oregon, Benton co., on Yaquina Bay, 90 m. SW. Portland. P.<1500.

Newport, bor., U.S., Pennsylvania, Perry co., on Juniata R., 20 m. NW. Harrisburg; the shipping point for a large number of adjacent towns. P.<1500.

Newport, city, U.S., Rhode I., Newport co., on the E. side of Narragansett Bay, 17 m. SW. by S. Fall River (Mass.); has safe, commodious harbour, deep enough for the largest ships, defended by Fort Adams on Brenton's Point. The city is on a declivity facing the harbour, and is one of the most popular summer resorts in the U.S., with limited manufactures. The U.S. torpedo station is on an island in Newport harbour. On another island near by is the U.S. Naval War College. The co. of Newport is in the extreme SE. of the state, and includes Block I. and most of the islands in Narragansett Bay. Mean temp., yr. 49.7° F., Jan. 29.8°, July 70.8°. P. (1880) 15,700; (1890) 19,500.

Newport, vil., U.S., Tennessee, Cocke co., 40 m. E. Knoxville. P.<1500.

Newport, tn., U.S., Vermont, Orleans co., on Lake Memphremagog, 49 m. NNE. Montpelier, with manufactures of boots and shoes; trade in lumber. P.<4000.

Newport (strictly speaking, portion of Williamstown), Victoria, 7 m. by rail SW. Melbourne, with railway workshops.

Newport, par., tn., and small port, Wales, Pembrokeshire,

6½ m. E. by N. Fishguard, on **Newport Bay,** PMT.O.; 4494 ac. P. <1500.

Newport Bay, Ire., W. co. Mayo, at the head of Clew Bay, in the NE.

New Portland, tn., U.S., Maine, Somerset co., 16 m. N. Farmington. P. <1500.

Newport News, seapt. tn., U.S., Virginia, Warwick co., at the mouth of the James R., N. bank, on Hampton Roads, 69 m. SE. Richmond; has a timber graving dock 609 ft. long, two coaling and two merchandise piers. Depth at entrance to port high water ordinary springs, 29 ft.; in port, high water 31 ft., low water 28 ft. P. <5000.

Newport Noyes, harb., Wales, Pembrokeshire, Milford Haven, with iron pier, 928 ft. of quayage, and staithes for shipment of coal.

Newporton, electoral div., Ire., co. Fermanagh, dist. Tempo.

Newport Pagnell, par. and market-tn., Eng., Buckinghamshire, Buckingham div., on the Great Ouse, 11½ m. WSW. Bedford, on the L. & NW. R.; has lace manufactures, but almost extinct. Market-day, W. Par. P. <4000.

Newport River, Ire., NW. co. Mayo, flows out of Lough Beltra into Clew Bay at Newport.

New Providence, one of the Bahama Isles. Length, 21 m.; breadth varies up to 7 m.

New Providence, tn., Bahama Is. See **Nassau.**

New Providence, vil., U.S., Tennessee, Montgomery co., on the Cumberland R., just below Clarksville, 42 m. NW. Nashville. P. <1500.

Newquay, tn. and watering-place, Eng., Cornwall, St. Austell div., on the coast, 11 m. N. Truro, on a branch of the G. W. R.; has tin ore. PMT.O. Alt. 90 ft. Mean rfall. (1866–80), yr. 37.6 in. P. <2000.

New Quay, tn., Wales, Cardiganshire, on **New Quay Bay,** 14½ m. NW. by W. Lampeter, PMT.O.

New Quay Road, stn., Wales, Carmarthenshire, W. div., on the Manchester and Milford Rly., 9½ m. SW. Lampeter.

New Republic, in Dutch **Nieuwe Republiek,** a short-lived Boer republic to the SE. of the Transvaal (S. African Republic), proclaimed Aug. 16, 1884, annexed to the Transvaal Sept. 16, 1887.

New Richmond, vil., Canada, Quebec, Bonaventure co., on Chaleur Bay, in 65° 54′ W.

New Richmond, vil., U.S., Ohio, Clermont co., on Ohio R., 20 m. N. Cincinnati by rail. P. <3000.

New South Shetland, archipelago. See **Shetland, South.**

New South Wales, a British colony on the E. side of Australia, bounded S. by Victoria, W. by S. Australia, N. by Queensland, E. by the Pacific Ocean, situated between 28° 10′ and 37° 28′ S., 141° 0′ and 153° 40′ E.; it is divided into 13 pastoral dists., subdivided into 141 counties; area about 3½ times that of Great Britain; cap. Sydney. The surface is divided naturally into three distinct zones—the coast dist., the tableland, and the plains of the interior. The first is a comparatively narrow tract of undulating land, varying in width from 35 to 120 m., extending back to the Dividing Range, which under the names of New England Range, Liverpool Range, Blue Mountains, Gourock Range, Monaro Range, Muniong Range, and others, traverses the country in an irregular line from N. to S., constituting the outer edge of the tableland, and forming the watershed of the colony; numerous spurs, however, from the main range intersect the coast region, dividing the waters of the numerous rivers flowing to the Pacific Ocean. The tableland is an elevated dist. rising abruptly to an average height of from 2000 to 3000 ft., furrowed with narrow and precipitous valleys and deep gorges, sloping gently westward towards the great central plain of Australia; in the southern part, some peaks rise to over 7000 ft. above the sea [**Australian Alps**]. The coast-line has a total length of about 800 m., and generally presents a bold and rocky outline; it comprises some magnificent harbours, but is almost devoid of adjacent islands. All the larger **rivers** rise on the W. side of the Dividing Range and flow to the Murray, which forms a great part of the Victoria boundary; they are the Murrumbidgee, the Lachlan, and the Darling or Barwon (the headstream of which is the Macintyre, dividing New South Wales from Queensland), which receives also the Macquarie, Namoi, and Gwydir on its l. bk., and the Culgoa and Warrego on its r. bk. Of the rivers flowing to the Pacific, the principal are the Clarence, Macleay, Hunter, Hawkesbury, and Shoalhaven. A belt of Palæozoic rocks about 200 m. wide extends inland from the coast, with a spur crossing the centre of the colony nearly at right angles to it, in which occur numerous intrusions of granite and other igneous rocks containing the metalliferous deposits; Cretaceous formations cover a wide extent in the N. and W.; the remainder consists chiefly of plains of Pleistocene origin. As to the **climate,** see **Australia,** and **Sydney, Newcastle, Port Macquarie, Goulburn, Bathurst, Deniliquin, Bourke.** Open forests (chiefly eucalypti) cover the greater portion of the surface of the colony, except portions of the Monaro, Lachlan, and Murrumbidgee dists., where extensive treeless plains occur clothed with scrub and natural grasses [**Australia**]. In the coast region, which is favoured with an abundant rainfall, a great deal of the **soil** is very poor, except along the rivers, where there is an extraordinary fertility arising from the detritus deposited by the inundations which frequently occur; the northern dists. are suitable for the cultivation of sugar, maize, and semi-tropical fruits. On the tableland within the Dividing Range there is a greater extent of good soil, especially suited for the cultivation of cereals, but the rainfall ceases to be sufficient for agriculture within 200 m. of the coast. Attention has, however, been given to the construction of artesian wells, with no little success. The plains still further W. have a soil of excellent quality, and the cereals might be grown here in immense quantities were the rainfall more abundant and regular. New South Wales is, however, essentially a pastoral

country; sheep-rearing is the most important industry in the colony, chiefly for the yield of wool, which is exported to an annual value of nearly £8,000,000. The **mineral resources** of New South Wales are extensive, particularly in respect of gold, silver, tin, copper, and coal; gold was first practically discovered in 1851 near Bathurst, and is now worked in nearly all parts of the country, the estimated auriferous area being 13,700 sq. m., and the total yield to end of 1892, 10,500,000 oz.; silver is chiefly found in the extreme W., at Broken Hill in the Barrier Range; tin in the NE., in the New England dist.; copper is pretty generally distributed; iron and lead are also worked in small quantities; diamonds in considerable numbers have been found in various places, notably at Bingera, on the Gwydir R.; and opal mines are situated near Mount Lyell. The coal-measures, of superior quality, are extensive and valuable; they occur in the E. of the colony from the 29th to the 36th parallel, and ramify to the coast along many miles of seaboard, the seams being of great extent and practically inexhaustible, the mines in the neighbourhood of Newcastle being the most prolific; it is computed that the coal area approximates to 24,000 sq. m. Main lines of railway (all belonging to the state) radiate from Sydney a considerable distance into the interior through the Dividing Range, and connect with those of Victoria and Queensland. The Murray is navigated by small steamers as far as Albury, and at certain seasons steamers ascend the Murrumbidgee to Wagga Wagga, and the Darling to Bourke; several of the rivers on the Pacific coast are navigable for vessels of light draught. The trade of New South Wales greatly exceeds that of any other colony of the Australian group, and is almost entirely in British hands; Sydney and Newcastle are the only ports of importance. The government is vested in a governor appointed by the crown and a parliament of two houses, one nominated by the governor, the other elected by universal suffrage. All religious bodies are on an equal footing; about three-fourths of the people are Protestants, the majority of whom are connected with the Church of England, but almost every sect is represented; education is compulsory between the ages of six and fourteen years, and state aid is given through the Public Instruction department. New South Wales, which originally included all the E. side of Australia, received its name from its first explorer, Captain Cook, in 1770; the first settlement was effected in Jan. 1788 at Botany Bay. Victoria was separated in 1851, and Queensland in 1859. See **Australia** for exploration, and **Australian Colonies** for area and population.

New World Island, isl., Newfoundland, off the N. ct., in 54° 35′–57′ W.

Newydd, Cymric, 'New.' See **Neu.**

New York, one of the United States of the N. Atlantic group, extending from the Atlantic at the 40th parallel to the Canadian boundary at 45°, and having some 400 m. of water front along the Great Lakes and the St. Lawrence R. Long I. (115 m. in length) forms part of the state, and at its western end, with Staten I., helps to form the most important of all American harbours, New York Bay. From the bay, East R. and Long Island Sound furnish a route to the New England coast, and the Hudson R. is navigable northward for 156 m. Two other features of the surface increase the commercial importance of this harbour—the valley of Lake Champlain, on the Vermont boundary, affording a route northward from the Hudson to the lower St. Lawrence, and the valley of the Mohawk, through which easy communication is had with the Great Lakes and the W. It is along the Mohawk-Hudson depression and the route westward that the chief cities lie—New York, Brooklyn, and Long Island City on the harbour; Yonkers, Albany, the capital, and Troy on the Hudson; Utica, Syracuse, Rochester, and Buffalo to the W., along the Erie Canal. The chief elevation is the Adirondacks (Mount Marcy, 5344 ft.), of Archæan rock, N. of the Mohawk. To the S. are the Catskills (Slide Mt., 4220 ft.) and several lower ranges, the continuation of the Pennsylvania system, among which are the headwaters of the Delaware and Susquehanna Rivs. Further W. the Genesee flows across the state northward to Lake Ontario. The Niagara forms part of the W. boundary. Lakes abound in the Adirondacks, and the 'finger lakes.'

Cayuga, Seneca, and others, occupy probable glacier depressions in 'Central New York.' Lake Chautauqua is tributary to the Mississippi. The climate is nowhere extreme, and is generally healthful. Only in exceptional winters is the cold severe in the Adirondacks [**Albany, Buffalo, New York, Oswego, Rochester**]. The exceptional facilities of New York Harbour, its position and accessibility, have made it the first centre of commercial activity in America, handling more than one-half of all the foreign commerce of the United States. Manufacturing is, however, the first industry of the state, and New York City has the largest output of manufactures of all American cities. The state is exceptionally rich agriculturally, its annual product being exceeded by those of two other states only. In dairy produce, buckwheat, hops, and beans it is the first. Magnetite iron ore, the chief mineral, is found in Essex, Franklin, and Clinton cos., in Archæan formations, and in Orange, Putnam, Rockland, and Columbia; fibrous talc in St. Lawrence, salt from brine in Wyoming and Onondaga, gas in Chautauqua, oil in Cattaraugus, cement in Ulster, Onondaga, and Erie, and graphite in Essex. There is a large variety of building stone. Spruce lumber is obtained from the forests of the Adirondacks. Springs of saline and chalybeate waters are found at Saratoga, of sulphur at Richfield, and of iron, sulphur, and magnesia at Sharon Springs. Cornell, at Ithaca, and Columbia, in New York City, are the chief of the twenty-three colleges and universities of the state. New York was first settled by the Dutch in 1623, on Manhattan I., at New Amsterdam, and later along the Hudson and Mohawk valleys. In 1664 the colony was taken by the British at the command of the Duke of York, and re-named in his honour. New York was one of the original thirteen states. Area, 47,620 sq. m. P. 5,998,000. See **United States,** tables. [**C. H. L.**]

New York, chief city of U.S. in population, wealth, commerce, and manufactures; city hall in 40° 42.7′ N., 74° 00.1′ W. Situated between and at the union of the Hudson, here called North R. and the East R., the narrow SW. extension of Long Island Sound, between Long I. and the mainland. The city boundaries agree with those of New York county in New York State, and include Manhattan I., 22 sq. m., 13½ m. long, and 2½ m. at greatest width, and tapering to N. and S., and an area of 19 sq. m. on the mainland to N., from which the Harlem R. divides it, giving, with Governor's, Bedloe's, and Ellis Is. in the bay to S., and Blackwell's, Ward's, Randall's, &c., Is. in the East R., a total area of 41½ sq. m. The length of the city from N. boundary to Battery, S. of Manhattan I., is 16 m.; the greatest width is 4½ m., on the mainland, from Hudson to mouth of Bronx R. A further area of 23½ sq. m. on mainland, with 17,000 population, was annexed June 1895. The city is thus built on a narrow triangle of land to the N. of an unequalled, well-fortified, landlocked **harbour** over 100 sq. m. in extent, with a S. entry at Sandy Hook, 18 m. from city, for ocean vessels and S. coasters, while Long Island Sound to N. shelters ships for Connecticut and Rhode I. ports from Atlantic storms. The North and East Rivs., 1 m. and ½ m. broad respectively, are so deep near the shores, that wharfs for the largest ships are easily built on the waterfront, of which Manhattan I. alone has 22 m.; half of this is now fully occupied. The opening of the Harlem R. ship-canal, June 1895, adds 10 m. available water-front. The Hudson is navigable 148 m. N. to Albany and Troy, and the entrance of the Erie Canal to the great lakes. Due W. from New York the low middle section of the Alleghany Mts. is at its lowest, and lets through the western railways with Ohio and Pennsylvania manufactures and the agricultural wealth of the W. **Commerce.**—With these immense advantages it is not surprising that some 18,000 vessels, of tonnage approaching five millions, enter the harbour yearly. Over 5000 of the vessels are engaged in foreign trade. Three-fifths of the imports and nearly half the exports of the U.S. enter and leave New York. Chief imports, sugar, wool, coffee, silk, iron, and steel; chief exports, bread stuffs, meat products, manufactured cotton, petroleum, tobacco, leather, and dairy products. For the New York customs dist., including Brooklyn, Jersey City, &c., the 1893 imports were above £100,000,000, exports above £73,500,000. (See **Appendix,** p. 14.) The distance of coal and iron injures machine industry, but the commercial advantages bring raw material and distribute products cheaply, and create a large population with its demand, and so the city ranks first in the U.S. in **manufactures,** with value of 1890 products nearly £160,000,000. Most important are clothing, largely a 'sweated' industry; printing and publishing, nearly 800 periodicals, 43 daily, issued in 12 languages; slaughtering and meat-packing; tobacco, &c.; and malt liquors. The output of pianos (£2,500,000) is of special interest. **Site.**—Crystalline Archæan rocks, chiefly gneiss and mica schist, underlie Manhattan I., and are covered in most places by glacial drift deposits, usually shallow enough to be cleared away so that buildings may rest on the rock. The surface is rolling and, in the N., hilly, reaching 238 ft. The S. end, the oldest part of the city, is the financial and commercial centre. The **streets** there are irregular and often narrow, and bear names. Elsewhere they are numbered, and from 14th Street to 155th Street are usually broad, and cross the island at regular intervals. Broad avenues, in some places as many as sixteen, run lengthwise, while Broadway traverses the island with a general westerly trend. The celebrated Central Park, ½ m. wide, with its mingled natural and artificial beauty, runs N. 2½ m. from 59th Street. Several smaller parks are scattered about the city, and on the N. mainland four large pleasure grounds aggregate 5⅓ sq. m. The narrow island only allowing the city to expand freely northwards is the key to most New York peculiarities. Old Peter Minuit, the first governor-general of the Dutch colony in New Netherland, is said to have bought the whole island from the Indians for £5; the value of the ground alone is now some £500,000,000. The architecture, even of adjacent **buildings,** varies greatly in character, style, materials used, &c. Fifth Avenue and the adjoining cross-streets (the 'brown-stone' district) show most uniformity; here are most of the one-family houses, which only the well-to-do can afford, and many religious edifices, hotels, and clubs of beautiful design. Over two-thirds of the population, including many of the wealthy, live in the hundred huge hotels or the joint-homes, known according to class as apartment, flat, or tenement houses. Boarding-houses abound, and lodging-houses are numerous. Pressure of space forces many of the hotels, apartment-houses, and business buildings to be 'sky-scrapers,' but some are externally decorative and internally beautiful. The older churches and one or two newspaper offices and public buildings are also worthy of notice. Over 300 buildings, including two colleges, are devoted to public **education,** to which add the partly or entirely private institutions, including Columbia College and the University of the City of New York, and a host of theological seminaries and colleges and schools devoted to special branches, a fine museum of Natural History and another of Art, and sixty libraries. The natural terminus of **railways** from the W., New York is also the important railway centre for Canada, New England, and the South. Most of the lines have their termini on the Jersey shore, and complete the journey by the numerous Hudson ferries. A design for a bridge is officially approved. Three important lines enter the city from the N. as far as Grand Central Station, on 42nd Street. Some dozen Harlem bridges connect the island and mainland, and the celebrated East R. bridge (see **Brooklyn**) and numerous ferries carry many of New York's toilers to homes on Long I. Tramways (or street car lines) occupy many avenues and streets, and four lines of elevated railway and four of cable-cars give inadequate rapid transit from N. to S. **History.**—Discovered by Henry Hudson, 1609; first permanent Dutch settlement, 1621; Indian name, Manhattan, changed to Nieuw (New) Amsterdam, 1647, and to New York after seizure by the English, 1664. The national capital for about six years, 1784–90. **Climate.**—Average alt. 25 ft. Mean temp. (25 yrs.), yr. 51.4° F., Jan. 30.5°, July 73.6°; rfall., 44.76 in. **Population** greatest in U.S. at every census—(1790) 33,100; (1830) 197,000; (1860) 806,000; (1880) 1,206,000; (1890, probably incomplete) 1,515,300; police enumeration, 1,711,000; (1892, state census) 1,801,000; (1895, police census) 1,850,000. A referendum vote of the districts concerned favoured by a large majority in 1894 the principle of the early union with New York of Brooklyn and other cities and areas on Long I., Staten I., and a further considerable area to N. on the mainland. This would give Greater New York an 1895 estimated population of somewhat more than 3,000,000. [**W. S.**]

New Zealand, Brit. colony in the Pacific Ocean, about 1200 m. SE. of Australia, between 34° 23′ and 47° 16′ S., 166° 30′ and 178° 34′ E., being almost antipodean to the British Isles, and about one-sixth larger in area than Great Britain. It consists chiefly of two large islands, each about 520 m. in length, separated by Cook Strait, and Stewart I., off the S. extremity of the South Island, from which it is detached by Foveaux Strait, considerably smaller. The two larger islands are divided into the nine provincial dists. of Auckland, Hawkes Bay, Taranaki, Wellington, Nelson, Marlborough, Canterbury, Westland, and Otago, the first four forming the North, the others the South Island. Besides the main islands, with the smaller immediately adjacent, several groups of small islands, at distances from 200 to 500 m., are included within the colony, raising the total area to 104,471 sq. m. [**Auckland Is., Chatham Is., Kermadec Is.,** &c.]. The coast-line, which in the North Island extends to about 2200 m., and in the South Island to 2000 m., is in most places high and rocky, especially on the W. coast; in the SW. it is broken up by numerous fiords, with steep, cliffy shores; in the N., on both coasts, large bays, sometimes bordered by low shores rising gradually to higher ground behind, extend a long distance inland, forming fine natural harbours. The **surface** is highly mountainous, and both islands contain summits which rise above the line of perpetual snow. One long succession of mountains runs from the extreme SW. to the extreme NE.,

interrupted by Cook Strait, and divided by gaps into a number of chains, to which different names are given; in the South Island these lie for the most part close by the W. ct., and it is about the middle of this island, in the Southern Alps, that the highest part of the whole series is found, where Mount Cook (Aorangi) attains a height of 12,350 ft. For more than 100 m. these mountains present almost a complete barrier to communication between E. and W., not being crossed by any road. The West Coast Road, which crosses the N. end between Christchurch and Hokitika, passes through a difficult defile known as the Otira Gorge and over a pass more than 3000 ft. high. In the NE. of the South Island there is a somewhat isolated range called the Kaikoura Mts., and it is this which is directly continued by the mountains of the North Island, the Tararua, Ruahine, and Kaimanawa Ranges, which run parallel with the E. ct. But the highest mountains of the North Island do not belong to this system; they occur further W., and are all volcanic, Mount Ruapehu, near the centre, rising to 9195 ft., with a remarkable crater-lake on its summit; quite separate from these, the volcanic cone of Mount Egmont rises on the W. ct. The most extensive plain is that known as the Canterbury Plains, stretching for upwards of 100 m. from N. to S. along the E. side of South Island, from the sea-board and Banks Penin. to the foot of the Southern Alps. The Southern Alps have their higher valleys filled with immense glaciers, while the lower valleys enclose large and picturesque lakes, relics of still vaster glaciers which in former geological times covered a great part of New Zealand; the principal of these are Tekapo, Wanaka, Hawea, Wakatipu and Te Anau; the lakes in North Island are of volcanic origin, of which Taupo, near the centre, is the largest, whilst Rotomahana (which was considerably altered by the eruption which took place in June 1886), Rotorua, and others in the neighbourhood, are remarkable for the various colours and the high temperature of their waters. The **rivers** are numerous, but the larger ones are for the most part unfit for navigation; the most important navigable river is the Waikato, which drains Lake Taupo, and can be ascended by steamer for about 50 m. from the sea; those in the South Island are mostly rapid torrents, fed in summer by the melting glaciers, at other times the water occupies only a few narrow, ever-shifting channels in the broad rocky bed; the Molyneux or Clutha, draining Lakes Hawea, Wanaka, and Wakatipu, is the largest of the South Island rivers. The **geology** of the two islands differs considerably; that of the North Island is essentially volcanic, and volcanic action is still active near the centre in its volcanoes, hot geysers, and boiling sulphur springs and solfataras; the South Island is mainly sedimentary, the ranges are of slate and granite, with Silurian sandstones and limestones, only in the basalt of Banks Penin. is there evidence of igneous origin. The **climate** is agreeable, but the changes of weather and temperature are very sudden; the rainfall is generally high, especially on the W. ct., where it is obstructive to agriculture; snow rarely remains, except on the mountains; strong gales are frequent [**Auckland, Taranaki, Napier, Wellington, Hokitika, Dunedin**]. The **forests** are chiefly on the W. side of the islands, but in Wellington prov., where there are lofty mountain ranges directly exposed to the rain-bearing winds, great forests also exist; much of the flora is indigenous to the country, and comprises a large quantity of valuable woods, chiefly pine and beech (the Kauri pine, which yields not only a fine timber, but also the valuable resin known as Kauri gum, though it is mainly found fossil in areas formerly occupied by this tree, is now almost confined to the extreme N.); ferns are in great variety and almost endless profusion, many of them, with also the so-called New Zealand flax, being native to these islands only. There are scarcely any indigenous animals, and none of the marsupials which abound in Australia; in past years the moa, a gigantic wingless bird of the ostrich tribe, must have been very common, but it has long since disappeared; a small running bird without wings, called the apteryx or kiwi, still exists; there are no snakes. **Industries.**—Large areas in both islands, the mountain region of the South and the volcanic central dist. of the North, are unfitted for cultivation; the rearing of live-stock is the most important industry, and wool is the staple product, being exported to the annual value of 4–4½ millions sterling; large quantities of frozen mutton and butter are exported to England. Arable agriculture is chiefly confined to the provs. of Canterbury and Otago, which produce wheat, oats, and barley; maize is grown in Auckland; the soil is admirably adapted for the cultivation of all fruits and edibles that flourish in Great Britain, and much attention is devoted to the production of these and semi-tropical fruits, also the olive. The **chief mineral product** of New Zealand is gold, first practically discovered in 1861 at Tuapeka, in Otago, in which prov. large yields are still obtained, though the most important goldfields now exist near Hokitika, other principal gold-mining dists. being in the Coromandel Range and the Thames Valley, and in the provs. Nelson and Marlborough; the total quantity exported to 1893 was over 12,360,000 oz. Coal seams of considerable thickness are being worked at several places, in the North Island at the Bay of Islands and on the Waikato R., and in the South Island principally on the Grey R. and in the Clutha Valley; the area of the coalfields is estimated at 774 sq. m., and the total output to end of 1892 was nearly 8,000,000 tons. Silver, of which a total of 605,000 oz. was exported to end of 1892, has been found in several localities, and occurs mixed with the gold in Auckland prov.; copper exists at D'Urville I. and other places; and iron-sand, producing steel of superior quality, is found on the sea-coast at Taranaki, Onehunga, and Stewart I., and ironstone in Nelson prov. In addition to railways, which do not provide continuous communication between the provincial caps., there is an extensive coaching system connecting with the terminal railway stations and other important centres; there is also regular steam service by sea between the principal ports. The principal **exports** in the order of importance are wool, wheat, oats, and other grains, frozen meat, Kauri gum, butter, and cheese. The **government** is administered by a governor appointed by the crown, assisted by a ministry who form the executive, and a parliament of two houses elected by the people. All religious bodies are on an equality, and there is no established church; the great majority are Protestants. **Education** is free; secular higher education is provided by 24 endowed colleges and grammar-schools, under the control of the Education Department. The University of New Zealand is a mere examining body, but affiliated to it are three colleges, Auckland College at Auckland, Canterbury College at Christchurch, and the University of Otago at Dunedin. The natives, called the **Maori,** are a fine intelligent race; they are supposed to be of Malayan origin, and to have colonised the country about the 15th century; since the arrival of Europeans (when it is believed they were not less than 120,000) they have to a great extent adopted European modes of life, but their numbers have greatly diminished (in 1891 less than 42,000). They were for a long time very troublesome, but are now generally friendly. By a treaty with the crown their right to their own lands is secured to them. The great majority of them live in the North Island, in the area known as the King County, comprising the greater part of the volcanic region, and a coast-line of about 80 m. on the W. ct. New Zealand was so called by Tasman, who first sighted it in 1642, but little was known of the country until Cook visited it in 1769 and 1774; a mission was established in the Bay of Islands in 1814; and the first colonial settlement was made in 1840 at Wellington. See **Australia,** table.

Ngunie, riv., W. Africa, French Congo, flows NW. into the Ogowe on its l. bk., in 10° 20′ E.; navigable to the falls of Fugaonu in about 1° 5′ S., 10° 50′ E.

Nguri, vil., central Sudan, Kanem, about 30 m. from the middle of the NE. shore of Lake Chad.

Nguru, dist., German E. Africa, crossed by 6° S. and 38° E.

Nhill, post-tn., Victoria, co. Lowan, 248 m. by rail W. Melbourne. P.<1500.

Nia, or **Niya,** oasis, E. Turkistan, 150 m. E. Khotan. Alt. 4600 ft. (Przhevalsky, *m.b.*).

Niadi, riv., W. Africa. See **Kwilu Niadi.**

Niag'ara (Indian, 'thunder of water'), riv., N. America, between Canada and the U.S., connecting Lakes Erie and Ontario, having a N. course of 36 m. from the former to the latter, and a total descent in that distance of 336 ft., 52 ft. being in the rapids above the falls. It encloses numerous islands; the largest, Grand I., is 12 m. long, and from 2 to 7 m. broad; 22 m. from Lake Erie it forms the famous **Falls of Niagara,** where the river is precipitated over a vast ledge of Silurian limestone, forming two cataracts separated by Goat I., 1000 ft. in width. The Horse-shoe Fall, on the Canadian side, is 2000 ft. across (in 1890, 3010 ft. in circuit), and 158 ft. in perpendicular depth; and the American falls, 1060 ft. in breadth, 167 ft. in depth. It is calculated that the edge of the falls recede at the average rate of one foot in a year (*Nature*, April 2, 1891, p. 515). From the foot of the falls to Lewiston, 7 m. distant, where it enters a level region, the river descends 104 ft., running through a deep and narrow gorge from 200 to 400 ft. wide, with almost perpendicular sides. About one-eighth of a mile below the falls a suspension bridge crosses the river, 190 ft. above the water, 1190 ft. from cliff to cliff; there is another 2 m. below the falls, 245 ft. above the water. Niagara stands pre-eminent among the great cataracts of the world for the enormous volume of water that is carried over so high a precipice. It has been estimated that the falls discharge 100,000,000 tons of water per hour. Navigable from Lake Erie to the commencement of the rapids; in its lower course, from Lewiston to Lake Ontario, about 8 m. A space of 107 ac. on the American side was in 1885 declared public property, under the title of the New York State Reservation at Niagara; on the Canadian side is the Queen Victoria Niagara Falls Park (1888), 154 ac. in extent. The electric power of the falls is now being utilised for industrial purposes. See **Niagara Falls,** city.

Niagara, tn., Canada, Ontario, Lincoln co., on Lake Ontario, at mouth of Niagara R., 29 m. N. by W. Buffalo. P.<1500.

Niagara, co., U.S., New York, on Lake Ontario and the Niagara R., in the extreme NW. of the state.

Niagara Falls, tn., Canada, Ontario, Welland co., on the W. bank of Niagara R., 20 m. NW. by N. Buffalo. P.<4000.

Niagara Falls, city, U.S., New York, Niagara co., on Niagara R., 18 m. NNW. Buffalo. Water is now led from the adjacent falls through pipes 7½ ft. in diameter into turbines, whence it passes through a 7000 ft. tunnel under the town, emerging with a capacity of producing 100,000 horse-power. Factories for utilising this power are rapidly rising in the neighbourhood. The power is transmitted by electricity, and the plans for transmitting it to Buffalo, 18 m. distant, are complete. The city now includes **Suspension Bridge,** a former village, 2 m. to the N. P. 5500; since 1892 (probably) 16,000.

Niagara Junction, stn., Canada, Ontario, Welland co., 5 m. NW. Buffalo (New York).

Niagassola, trading station, French W. Africa, in the Mandingo country, in 12° 7′ N., 9° 1′ W.

Niagusta, or **Agostos,** tn., Turkey in Europe. See **Niaushta.**

Niakale-Ciraya, vil., French Sudan, on l. bk. of the Bakhoy, a branch of the upper Senegal R., 12 m. ESE. of Bafulabe; iron exists in the vicinity.

Niambara, Niambare, or **Yambara,** tribe, E. Sudan, W. of Lado, in a mountainous region which separates the Nile from its trib. the Yei or Rodi.

Niam-Niam (native name, indicating cannibals), or **Á-Sande,** important central African tribe belonging to the Nuba race. The Niam-Niam inhabit the terrs. N. of the Ubangi-Welle, between the western tribs. of the upper Nile and the Shari. They are of tall stature and reddish colour, and ethnographically totally different from the negroes. Their principal occupations are agriculture (millet, maize, sesamum, ground-nuts) and hunting. Tobacco is largely cultivated. They are a warlike people, and addicted to cannibalism. See Schweinfurth, *The Heart of Africa*, English edition, 1873; Junker, *Travels in Africa*, English edition, 1892. [**H. G. S.**]

Niamzu, tn., Roumania. See **Neamţŭ.**

Nicæa, ancient tn., Asia Minor. See **Isnik.**

Nicæa, ancient name of **Nice,** France.

Nicaragua (from Niquirao or Nicarao, a Nahua tribe in the 16th century), a republic in Central America (10°–15° N., 83°–89° W.), half as large as Great Britain, a triangle in shape, between riv. Segovia (NE.–SW. Honduras), the Pacific, and riv. San Juan (NNW.-SSE. Costa Rica), and the Caribbean Sea (N.–S.), formed by (1) a cordillera (alt. 800–3000 ft.), with peaks at 4000 ft., one part of which, called 'Amerrique,' is supposed by some to be the real origin of the name of the New World, continued (NE.) in (2) an extensive plain inclining to the Caribbean Sea, and bordered (SW.) by (3) Estero Real, lakes Managua, Nicaragua, and riv. San Juan (see **America, Central**), separated from the sea (4) by a long volcanic region. All important rivers run E., between the great angle formed by riv. Segovia (403 m., the longest of Central America) and riv. San Juan, the latter being the outlet (*desaguadero*) of Lake Nicaragua. Schists, dolerites, and volcanic rocks predominate on the cordillera; recent volcanic products and coral on the low penin. lands. Gold, silver, copper, iron, tin are found and worked. The E. slopes are subject to the moist trade winds (rains May–June, the heaviest, July–Aug.; driest season, Oct.–Nov.; mean temp. 77°). The flora has the Panama character, with many Mexican representatives. Tropical forests cover all littoral lands and E. slopes (mahogany, gayac, *Tecoma sideroxylon,* oaks, and coniferæ). Savannas on the drier highlands. Maritime fishes still survive in Lakes Managua and Nicaragua. The Mosquitos terrs. were once called Tologalpa, 'land of the birds.' The NE. Indians (Chorotéga, Nicarao, Mangues) are of Nahua or Maya descent (see **Mexico**). The islands of Lake Nicaragua show monuments of an old civilisation. The Indians of the centre and SE. (Chostalen, Suma, Waikua, Rama) are related to the Leuca (see **Honduras**). The littoral Caribs (Moscos, Mosquitos) are *ladinos* of Indians and Negros. Some (Segovia, Matagalpa) have blue eyes and fair hair. Very little immigration (a German colony at Matagalpa). Railway from Corinto to Momotombo, Managua, Masaya, Granada, to be ultimately extended to Puerta Mico (Monkey). A trans-oceanic canal across the terr. of Nicaragua, a project first broached in the 16th century (1550, Antonio Galvão), was actually begun in 1889–94, and is expected to be finished in 1902. Starting from America (a new port near Greytown) on the Caribbean Sea, it proceeds to the riv. San Juan (through Lakes Benard, Deseado, San Francisco), crossing Lake Nicaragua, and cutting the Rivas isthmus (141 ft. for about 3 m.) by the valleys of rivs. Del Medio and Grande, to the port of Brito, on the Pacific, with only 20 m. of artificial canal, 143 m. on Lake Nicaragua, and a total length of 170 m. The principal port of Nicaragua is San Juan del Norte (Greytown); among others are Corinto (22–38 ft. deep), Salinas, Santa Elena (Papagayo Bay). Ocotal is the centre of the internal commerce with Honduras. Exportation of coffee, woods, bananas, caoutchouc, cacao, cattle, hides; importations of cotton, machinery, metals. Exports and imports (1890) £830,000 (Great Britain, £250,000). Principal commercial relations with the United States, Great Britain, Germany, France. The government is vested in a president and a congress of two chambers, both elective. Cap. Managua. The metric system of weights and measures has been in use since 1893. As to money, see **Honduras.** In 1503 Columbus saw the E. coast of Nicaragua. The Spaniards first saw the W. ct. and entered the country (G. Avila) in 1522–23. Nicaragua was part of the *Capitania* of Guatemala (vice-royalty of Nueva España). During the 17th century Nicaragua was often devastated by English and French pirates. In 1824 it became one of the federated republics of Central America, but made itself independent in 1839. From 1855–57 the filibuster Walker dominated Nicaragua. The present constitution dates from the year 1858. P. (1778) 132,000; (1846) 257,000; (1889) 300,000 (7 inhabitants per sq. m.). [**J. B. R.**]

Nicastro, tn., Italy, Calabrie, prov. and 16 m. WNW. Catanzaro. P. 10,300.

Nice, Italian **Nizza,** the ancient *Nicæa,* seapt. and episcopal city, France, cap. dep. Alpes-Maritimes, cap. arr. Nice, on the S. ct., 8 m. W. by S. Monaco, with a commercial port on the Mediterranean called **Limpia;** exports quantities of flowers, olives, oranges, lemons, and celebrated oils; has marble quarry. The climate is remarkably soft and mild in winter, but its salubrity has been overrated, as it is liable to great and sudden variations of temperature. The suburb called the Croix de Marbe is exposed to the baneful effects of the wind called the *libeccio.* Of the formidable castle, blown up by the French general Catinat in 1691, there are but few remains. Nice has often been taken by the French; and was transferred, with its territory, by Sardinia to France in 1860. The town was shaken by an earthquake in February 1887. Birthplace of General Garibaldi, the painter Vanloo; the astronomer J. Dominique Cassini (or in the county) died 1712. Marshal Masséna was born in its vicinity. Mean temp., yr. 58.6° F., Jan. 45.4°, July 73.8°. P. (1872) 52,400; (1890) 88,300.

Nice, County of, formerly part of the kingdom of Sardinia, now forming, together with arr. Grasse, the French dep. of Alpes-Maritimes. Under the dukes of Savoy and the kings of Sardinia it was divided into the three circles of Nice, Oneglia, and San Remo. Ceded to France in 1860 by the treaty of Turin.

Nickerie, or **Nieuw Rotterdam,** vil., in the NW. of Dutch Guiana, at the mouth of the Nickerie, which here enters the Corentyne from the SE.

Nickerson, city, U.S., Kansas, Reno co., on the l. bk. of the Arkansas, 147 m. SW. by W. Topeka. P. <2000.

Nickol Bay, NW. ct. of W. Australia, E. of the Dampier Archipelago, in 117° E.

Nic'obar Islands, group of a score of isls. stretching NNW. to SSE., on the E. side of the Indian Ocean, lying between the N. extremity of Sumatra and the Andaman group, in 6°–9° N., and 92½°–94° E. Area, 426 sq. m. (Strahan), 635 (Man). Pop. 6000, of whom some 3500 are on the principal, though not the largest, island, Car Nicobar. They are divided into two groups: northern—Car Nicobar, Nancowry (Nankauri), Camorta, Trinkat, Teressa, Tillangchong, Katchall, &c.; southern—Great and Little Nicobar (the former 30 m. long by 12 m. wide), and several islets. Most of the northern group are flat, with gentle hills; in these calcareous sandstones predominate. The S. group, separated from the northern by Sombrero Strait, are mountainous (600–2000 ft.) and covered with forest; in these plutonic rocks and alluvial deposits prevail. The coasts are difficult of approach by reason of surf and strong tides and currents, but there is an excellent harbour on Nancowry. The islands are notoriously unhealthy from malaria. Temp. 73°–94°; yearly mean, 82½° F. Rfall., mostly coming during the SW. monsoon, May to October, 100 in. Principal products—coco-nuts, edible birds'-nests, and trepang; yams, mangoes, and other fruits, palms, betel-nut, tree fern, and bamboo are noticeable vegetable products. The coast people are closely akin to the Malays, and probably have Burmese or Siamese blood in their veins. In the interior of some of the larger islands is a savage race known as Shom-Pen, who show Mongolian affinities. During more than a century (to 1858) the Danes endeavoured at different times to colonise the group. It was in 1869 annexed by the government of British India, who maintain a penal settlement on Camorta. They are administered by the chief commissioner of the Andaman Is. Rfall. (Nancowry), yr. 109.7 in., May–Dec. 98.1 in. See Man, *Journ. Anthropological Inst.* (1889), and *Scot. Geog. Mag.* (1888).

Nieves, French name of the isl. of Nevis, W. Indies.

Nièvre, dep., central France, formed mainly out of the old prov. of Nivernais, with part of Orléanais, divided into 4 arrs: Nevers (cap.), Château-Chinon, Clamecy, and Cosne. Nièvre belongs to the basins of the Loire and Seine, about two-thirds to the former, and one-third to the latter. It is traversed in SW. by the Loire, which also forms part of its W. boundary; principal tribs. in dep., l. bk., Allier, on W. frontier, r. bk., Nièvre; the drainage to the Seine is by the Yonne, which flows N., receiving beyond the limits of the dep. the Cure, which drains the NE., forming in its course the famous 'Reservoir of Settons.' The surface in the E. is rugged, comprising part of the granitic Morvan group, of which the highest point within the dep. is Préneley (2790 ft.); soil generally poor, but interspersed with numerous fertile dales ('ouches'). The mean elevation of the W., in which calcareous formations predominate, is about half that of the E., rising in numerous conical hills; more fertile than E. The lowest point of the dep. (445 ft.) is at the exit of the Loire. Forests cover large areas and supply much wood for fuel. The climate in the Morvan dist. is more severe than in the W., the mean annual temp. being 2°–4° lower, according to altitude. There is a still greater difference in the rainfall, which varies from 21.3 in. to 73.6 in., the latter being the highest in France. Of cereals, wheat is the most important, then oats; the vine, of which the produce is about ½ per cent. the total for the country, is cultivated in the dists. of Pouilly, Tannay, and St. Quentin; a little hemp is grown. Cattle and sheep, reared in large numbers, form the chief source of wealth. The principal mineral is coal (Decize and neighbourhood). Manufactures limited, chief, iron and steel (Guérigny, Fourchambault, Imphy). Area, 2659 sq. m. P. (1890) 343,600. See **France,** table.

Nièvre, small riv., France, dep. Nièvre, joins the Loire on right at Nevers, course southward. Length, 30 m.

Nif, the ancient *Nymphio,* tn., Asia Minor, 13 m. E. Symrna.

Nifu, maritime tn., W. Africa, SW. ct. of Liberia, in 4° 45′ N., open to foreign commerce since 1884.

Nifzaua, oasis, Tunis. See **Nefzaua.**

Nigde, tn., on the SE. of Asia Minor, 68 m. NNW. Adana.

Niger (in antiquity *Nigir,* from the Berber word *ghir, eghirreu, neghirreu* = 'river'), great W. African riv., as regards length the third, and as regards quantity of water the second of the African rivers. The Niger takes its rise not far from the Pepper Coast, on the inner slopes of the plateaux of the western Sudan, which form the water-parting between the Niger, Senegal, and Gambia. Its source (alt. 2950 ft.) is at Nelia in the dist. of Kissi, in about 8½° N., 10½° W. The general direction of the upper Niger (or Joliba) is NE., first through the mountainous dists. and then through the great laterite plains, which extend from the tenth degree of N. lat. to the borders of the Sahara. After flowing through Lake Debo, the Niger turns E. near Timbuktu and SE. near Burrum (long. 0°), thus forming a great bend, round the plateaux of the Sahara desert. In this part of the river rapids and sandbanks extend from Bamba (about 1° 10′ W.) to Garu and Sinder (about 14° 15′ N., 2° 35′ W.). From there the river (called variously Mayo, Kowara, Kuara, Kwora) flows with a gentle course through the fertile and well-peopled valley; but from Gomba (11° 30′ N. lat.) to Rabba (9° N. lat.) occur other cataracts and rapids, the mountains of Sokoto here approaching the river. At Idda the Niger enters the coast-plain. Soon afterwards the delta commences, the Niger dividing into many arms (more than 20), of which the Nun is the principal, the Benin, Forcados, Brass, and Bonny mouths being likewise of importance ('Oil Rivers'). Mangrove forests are a characteristic feature of this low and swampy region (area, 9000 sq. m.), which is one of the most interesting delta formations of the earth. The Niger has but few large tribs., the most important being the Bakoi or Ulu-Ulu, the Gulbi-n-Sokoto, the Kaduna, and the Benue (*q.v.*). The upper Niger is navigable from Baguinta (a few miles below Bammako, 450 m. in a direct line SW. Timbuktu) to Bamba (about 120 m. E. of Timbuktu), and the lower Niger from Rabba to its mouth. The upper Niger was explored by Mungo Park (1795–97, and 1805–1806), the middle Niger by Barth (1854), and the lower Niger by Clapperton (1826–27) and Lander (1830). Length, 2600 m.; area of basin, 780,000 sq. m. [**H. G. S.**]

Niger Coast Protectorate, formerly **Oil Rivers Protectorate,** British possession in W. Africa, extending along the Guinea coast from the boundary of Lagos to the mouth of the Rio del Rey, with the exception of the W. part of the Niger delta (from riv. Forcados to riv. Brass), which belongs to the Niger Territories (*q.v.*). The export of palm-oil, palm-kernels, ground-nuts, ivory, and india-rubber is of great importance. The rivers of the Niger delta are called 'Oil Rivers;' steamers of light draught ascend the Benin, Brass, New Calabar, Bonny, Opobo, Kwo-Ibo, and Old Calabar. On the coast are about forty European trading stations, and attached to most of them are two or three up-river factories; Brass and Bonny are connected by telegraph with Lagos and Europe. The Niger Coast Protectorate is under the general supervision of an Imperial Commissioner and Consul General. The moist and oppressively hot climate of the Niger delta is very unhealthy to Europeans. [**H. G. S.**]

Niger Territories, British possession on W. Africa, comprising all territories in the basin of the lower Niger, with the exception of the Niger Coast Protectorate (*q.v.*). About E. boundary line see Kamerun, and about N. boundary line see French W. Africa. The governing power is mainly vested in the Royal Niger Company, to which a royal charter was granted in July 1886. The chief exports are palm-oil, palm-kernels, indiarubber, gum, hides, ground-nuts, ivory, shea-butter, and various drugs. The principal imports are textiles, hardware, spirits, and salt. The revenue is chiefly raised by export duties. On the Atlantic coast the Niger Territories occupy about 120 m. of the Niger delta, viz., from the mouth of the Forcados R. to that of the Brass R. The Royal Niger Company has about fifty stations on the lower Niger and on the Benue, the principal of which are Asaba, Onitsa, Akassa, Abo, Atani, Ida, Lokoja, Egga, Loko, Odeni, and Yola. The steamers of the Company (about thirty in number) ply from the Bussa Rapids (on the lower Niger), and from Ribago (on the upper Benue) to the coast. The Niger delta is one of the most unhealthy countries of the world, the hot air saturated with moisture being very oppressive and producing malignant fevers. In the interior the climate is better, especially in the mountainous districts. Area estimated at 500,000 sq. m. P. estimated at 30,000,000. See **Niger, Benue, Bornu, Sokoto.** [**H. G. S.**]

Nigg (Gaelic *N-uig,* 'at the corner'), par., Scot., Kincardineshire, 2 m. S. Aberdeen, 1½ m. NNW. Cove stn., P.O.; 4432 ac. P. <5000.

Niigata, seapt. tn., Japan, cap. prov. Echigo, and of prefecture, on W. ct. of Honshiu, 260 k. NNW. Tokyo, on a sandy strip of land at mouth of the Shinano R. The streets are built parallel and at right angles, with canals generally in the centre of each to assist traffic. There is a good college (with an engineering school, and a department to teach English), and a large hospital. Tea grown throughout the dist. Large junk trade, but being obstructed by a sand-bar, the harbour is not entered by European craft. It was opened to foreign vessels in 1869. Manufacture, lacquer ware. There are kerosene wells 12 m. off. Climate very trying because the winter is intensely cold, though the summer is hot. Mean temp. (6 yrs.), yr. 53.7° F., Jan. 34.8°, July 77.3°; rfall. (4 yrs.), 70.13 in. P. (1880) 34,000; (1890) 47,000.

Niihau, one of the Sandwich Is. to the W. of Kauai, from which it is separated by the Strait of Kaulaka. Area, 119 sq. m.

Nilam-Jong, or **Kutl,** vil. and fort, Tibet, on the Bhutia Kosi R., in about 28° 10′ N., 86° 3′ E. The **Nilamla Pass,** a pass of extreme difficulty, is situated to the N. Alt. of Nilam-Jong, 13,900 ft.

Nile (from the Semitic *nahal*=river), the most important river of Africa. Its length is greater than that of any other river of the old world. It takes its rise in the great equatorial lake, the Victoria Nyanza (alt. 3900 ft.), all the affluents of which (including the Alexandra Nile), as compared with the very large size of the lake, are too insignificant to be regarded as source-rivers. Leaving the lake at the northern end the Nile flows NW., passing through the Ibrahim and Koja Lakes. At Fauvera (alt. 3300 ft.) the river, now called Somerset Nile, leaves the central African highlands, turning suddenly westward, and descends in the very short distance to the Albert Lake (alt. 2300 ft.) not less than 1000 ft., forming numerous cataracts and falls (Murchison Falls, 118 ft.). After leaving the Albert Lake (trib. Semliki Nile, from Lake Albert Edward, alt. 3300 ft.) the river commences its northern course, soon entering near Lado (alt. 1525 ft.) the vast plains of the eastern Sudan. Here the river becomes navigable, and shows all the characteristic features of a slow and sluggish lowland river—innumerable sinuosities, channels, sandbanks, marshes, &c., and, moreover, enormous masses of floating vegetation. In 7½° N. lat. the river divides into two arms (Bahr-el-Jebel and Bahr-el-Seraf), which unite again in 9¾° N. lat. From Fashoda to Khartum (alt. 1260 ft.) the river is called Bahr-el-Abiad ('white river'), and after the confluence with the Bahr-el-Azrek, or Abai ('blue river,' coming from Abyssinia, Lake Tana [alt. 5760 ft.]) at the last named town, the name Nile is used for the united rivers. Shortly afterwards the Nile commences to force its way through the desert plateaux of the Sahara, forming numerous cataracts between 16° and 24° N. lat. (six great groups of cataracts, largest near Wadi Halfa [alt. 420 ft.]). The great S-like bend of the river in Nubia is the result of the Libyan and Red Sea plateaux approaching the river in succession. In 20° N. lat. the fertile Nile valley (average width, 9¾ m.) commences, flanked on both sides by deserts (see **Egypt**). A branch of the Nile, the Bahr-Yusuf, waters the Fayum depression. N. of Cairo the Nile divides into numerous arms, and forms the delta (8500 sq. m., 120 m. wide), characterised by a network of rivers, canals, lakes, and lagoons. The most important mouths of the Nile are those of Damietta and Rosetta. Of great commercial importance is the Mahmudieh Canal, connecting the Rosetta Nile with Alexandria. The Nile has few tribs.; the majority are, however, very large, viz., the Bahr-el-Ghazal (with its numerous affluents), Sobat, Bahr-el-Azrek (Blue Nile), and Atbara. After the last named has joined the Nile, this remarkable river receives no further tribs., passing through waterless deserts for more than 13° of lat. The regular annual rising (at Cairo, 25 ft.) of the Nile (from end of June till October) is due to the periodical rains in Abyssinia and equatorial Africa. In antiquity the Nile was explored as far as the Bahr-el-Ghazal region, and reliable information about the Nile lakes was obtained. In modern times the source of the Nile was discovered by Speke, who first reached and explored the Victoria Nyanza (1858 and 1863). Total length of the Nile 3670 m., of which 3100 m. are navigable; the cataracts (see above), however, prevent navigation when the river is low, and the enormous masses of floating vegetation often block the Upper Nile for months or even years. Area of basin, 1,620,000 sq. m. [**H. G. S.**]

Niles, vil., U.S., California, co. Alameda, in 37° 35′ N., 121° 58′ W. Mean temp. (19 yrs.), 59.1° F., Jan. 48.2°, July 68.6°; rfall., yr. 17.62 in., May–Sept. 0.95 in.

Nimeguen, or **Nymegen,** English spellings of the Dutch Nijmegen (*q.v.*).

Nimes, the ancient *Nemausus,* tn., France, cap. dep. Gard, and of arr., a bishop's see, and seat of a court of appeal, on a fertile plain with the Rhone on E., Cevennes on W., and the Mediterranean on the S., 80 m. NW. Marseilles, and 480 m. SSE. Paris. It is mainly known from the magnificent remains of the Roman period still preserved: the amphitheatre, 438 ft. long, 333 ft. broad, and 70 ft. high, reckoned sufficient for 24,000 spectators; the *Maison Carrée,* a beautiful temple, now used as a museum; the temple of Diana; the great tower (still 92 ft. high), built on an elevation of 375 ft., with a very extensive view from its top; two gates, one dating from 16 B.C. The famous ruins of the *Pont du Gard* are NE. of Nîmes. Nîmes became a stronghold of Calvinism at the Reformation; Louis XIV. built a fortress to check the religious quarrels. Even more recently the two sections, Catholic and Protestant, have been keenly opposed. Modern buidings are the cathedral, the citadel, museum, &c. Manufactures silk, upholstery, shawls, carpets, leather, &c.; there are also some foundries. Nîmes is an important market for wine and brandy. Alt. 375 ft. Mean temp., Jan. 42.8°, July 80.6°. P. (1872) 62,400; (1886) 62,200; (1891) 71,600; arr. (1886) P. 156,800.

Ninghsia-fu, Ninghia, Ningsia, or **Ninsia,** called by the Mongols **Irgekotun,** and by Marco Polo *Egrigaia,* tn., China, prov. Kansu, 177 m. NE. Lanchou, 203 m. from l. bk. Hwang-ho, in 38° 30′ N., 101° 18′ E., cap. of a Tangut kingdom in the 10th and 11th centuries, ruined by Jenggiz Khan. In recent times it suffered greatly in the Mohammedan rebellion, and at the time of Rockhill's visit, at the end of 1891, was just beginning to rise from its ruins. Alt. 3723 ft. (Rockhill, *bp.*).

Ningkwe-hsien, tn., China, prov. Nganhwei, 27 m. SE. Wuhu.

Ningpo, tn. and treaty port, China, commercial cap. of prov. Chekiang, in a fertile alluvial plain intersected by streams and canals, on the Takin or Ningpo R., 100 m. S. Shanghai. It is surrounded by a wall 25 ft. high, and 4½ m. in circumference. Its chief public buildings are the Pagoda, 160 ft. high, with 14 stories, and the 'Drum Tower,' built in the 14th century, famous temple of Queen of Heaven, richly adorned. Manufactures silks, cottons, carpets, straw hats, jewellery, and furniture; large salt-works and fisheries. Large importation of opium (valued £982,500) yearly; competes with Shanghai in foreign trade. Ningpo is one of the ports first opened by the Treaty of Nanking, 1842. It was held by the Taiping rebels, and recaptured by a British naval force in 1862. The dist. is noted for its fine climate, fertility, and pleasant surroundings. Foreigners, however, suffer from malarious fever. Like Nanking, Ningpo has a reputation for letters and culture, one of its private libraries containing 50,000 volumes. Depth of harbour, 35 ft. high water, 27 ft. low water; vessels loaded and discharged at private wharves. P. (1872, estimated) 115,000; (1891, estimated) 250,000.

Ningte-chou, tn., China, prov. Fokien, on the E. ct., 45 m. NE. by N. Fuchow.

Ningtiaoleang, tn., China, Mongolia, 320 m. SW. Kukukhoto, centre for the commercial transports between China and Mongolia, destroyed and sacked by Mohammedan rebels about 1870; the Belgian missionaries, De Vos and Verlinden, 12 years after, found it an almost deserted heap of ruins.

Ninguta, thriving tn., Manchuria, on the l. bk. of the Mutankiang, in the middle of a large plain, 160 m. E. by N. Kirin. See **Mutan-kiang,** and *Proc. R. G. S.,* 1887, p. 556.

Ningwood, vil., Eng., Isle of Wight, 5½ m. W. Newport, on the Isle of Wight Central Rly.

Ningwu-fu, tn., China, prov. Shansi, 230 m. W. by S. Peking.

Ningyuan-fu, or **Hsichang-hsien,** tn., China, Süchwan, in Kienchang dist., to the E. of Anning-ho, 200 m. N. by W. Yünnan-fu. Baber, who visited the town in 1877, says that formerly it was situated more to the SW., where there is now a small lake. Alt. 5135 ft.

Ningyuen-chou, tn., Manchuria, prov. Liautung, 82 m. W. by S. Newchwang.

Ninh-binh, the ancient *Van-sang,* tn., Tongking, on a branch of the Songkoi delta, 55 m. S. Hanoi, cap. of prov. of same name; has a citadel on a river-arm accessible to boats of deep draught. The fortress was taken by stratagem in 1873.

Ninigo Group, or **Chessboard Islands,** cluster of coral isls., Pacific, N. of New Guinea, crossed by 1° 20′ S., 144° 10′ E.

Ninnian, vil., Manchuria, near the l. bk. of the Nonni, 45 m. NNE. Tsitsihar.

Ninove, comm., Belgium, prov. E. Flanders, on the Dender, arr. and 7½ m. S. Alost, with manufactures of lace, sewing cotton, gloves, &c. P. 6900.

Ninyuan, tn., central Asia. See **Kulja.**

Niobrara, vil., U.S., Nebraska, Knox co., at the junction of Niobrara R. with the Missouri, 150 m. NW. Omaha. P.<1500.

Niobrara, shallow rapid riv., U.S., Nebraska, in the N., rises in Sioux co., in the NW. of the state, close to the W. frontier, and to the Missouri, which it joins on the r. bk. at Niobrara. Length, 450 m.

Niolo, mountainous region, Corsica, W. of Corte, forming the upper basin of the Golo.

Niomañ bira, riv., Asiatic Russia. See **Bureya.**

Niopoli, seapt., Asia Minor. See **Ineboli.**

Nioro, or **Ghab,** tn., W. Sudan, cap. of Kaarta, about 170

m. ENE. of the French post of Medina, fortified and surrounded by high walls. The pop. consists chiefly of Fellata. Alt. 985 ft.

Niort, cap. dep. Deux-Sèvres, France, cap. arr. Niort, on the Sèvre, 35 m. ENE. La Rochelle, a very important station at the crossing of the line from Paris to Bordeaux, and from Poitiers to La Rochelle and Rochefort; has renowned nursery and market gardens, fellmongery (gloves, chamois skins, tannery), and large manufacture of blouses. The principal church dates from 1491 to 1534; the keep, formed of two large square towers united by a group of lower buildings, is attributed to Richard Cœur de Lion or his father, Henry II. P. (1872) 21,300; (1890) 23,200.

Nios, isl., Greece. See **Ios.**

Nipáni, municip., Brit. India, Bombay, dist. Belgáum, 73 m. NE. by N. Goa; has a large trade. P. 11,700; Hindus, 9400.

Nipe, Bahia de, bay, Cuba, N. ct., in 75° 33′-48′ W., forming the largest port of Cuba, in the prov. of Santiago; the principal traffic of the bay is done at Mayari.

Niphád, tn., Brit. India, Bombay, dist. Násik, 80 m. W. by N. Aurangábád. P. <5000.

Niphates, Turkish Armenia. See **Jebel Nimrod.**

Niphon, Nippon, or **Nipon,** a name properly applied to the whole Japanese empire, but frequently used (even officially) as that of the principal island of Japan (*q.v.*).

Nipigon, lake, Canada. See **Nepigon.**

Nipissing, large dist., Canada, Ontario, between the riv. Ottawa and the meridian of 81° W., and embracing in the SE. headwaters of the Bonnechere and Madawaska Rivs.

Nipissing, lake, Canada, prov. Ontario, is near the NE. side of Lake Huron, nearly midway between it and the Ottawa R.; shape irregular; shores bold. It contains many islands, and discharges itself into Georgian Bay (Lake Huron) by French R., the navigation of which is impeded by numerous rapids. Length, 50 m.; greatest breadth, 14 m.; alt. 599 ft.

Nippes, vil., Prussia, Rhine Prov., govt., circle, and 1 m. N. Cologne. P. 16,100.

Nipter, vil., Prussia, prov. Posen, circle and 3 m. SSW. Meseritz, 41 m. E. Frankfurt on the Oder; has lignite mines. P. <2000.

Nirgua, tn., Venezuela, Carabobo, 125 m. W. by S. Carácas, 40 m. WSW. Valencia.

Niriz, vil., Persia, prov. Kerman, 185 m. NW. Bender Abbas, 10 m. SE. of the SE. end of Lake Niriz.

Nirmal, fortified tn., India, Haidarábád, 118 m. N. Haidarábád.

Nirpura, tn., Brit. India, NW. Provs., dist. and 21 m. NW. Meerut. P. 5800; Hindus, 4000; Moham. 1500.

Nisa, riv., Sweden. See **Nissa.**

Nisab, tn., S. Arabia, 153 m. NE. by N. Aden.

Nisao, vil., isl. of Haiti, republic Santo Domingo, S. ct., 30 m. SW. by W. Santo Domingo, in 70° 13′ W.

Nisbet, hamlet, Scot., Roxburghshire, 3½ m. NNE. Jedburgh, on the riv. Teviot and the N. B. R.

Niscemi, tn., Sicily, prov. and 30 m. SE. by S. Caltanissetta. P. 12,200.

Nish (Servian spelling **Niš**), the ancient *Nissus,* tn., Servia, cap. prov. Nish, on the Nishava, 53 m. N. Vranja, and 130 m. SE. Belgrade, defended by several forts and a citadel. Birthplace of Constantine. Near the town is the famous 'Tower of Skulls,' a square building, the walls of which has been inlaid by the Turks with skulls of Christians killed since the Servian occupation. Here the Austrians defeated the Turks in 1689. P. 19,900.

Nishapur, tn., Persia, prov. Khorassan, 44 m. W. by S. Meshed; successively capital of the Taheride dynasty, of Mahmud of Ghazni, and of the Seljuk family, whose first sultan, Togrul Bey, resided here and brought it to the zenith of its splendour. The famous turquoise mines of Nishapur or Madan (*i.e.,* 'mines') lie 36 m. NW. The birthplace and burial-place of the poet Omar Khayyam.

Nishava (Servian spelling **Nišava**), riv., enters Servia from Bulgaria, and flows WNW. past Pirot and Nish to the Morava.

Nishi'bets, riv., in the E. of Yezo I., Japan, enters the Pacific NW. of Nemuro, in 43° 25′ N.; said to be the best salmon river in the island.

Nishinomiya, tn., Japan, Honshiu, 10 m. NE. by E. Kobe. P. (1887) 11,200.

Nisi, vil., Greece. See **Messčnč.**

Nisibin, the ancient *Nisibis,* tn., Turkey in Asia, vilayet and 75 m. SE. Diarbekir, sanjak Mardin, in the old Assyrian empire; seat of one of the four imperial officers; became under the Seleucidæ a flourishing Greek colony, *Antiocheia Mygdonia.* P. 10,000; Moham. 5000; Christians, 5000 (Cuinet).

Nisiro (**Nisyros**), isl., Turkey, on the SW. of Asia Minor, 12 m. S. of the middle of Ko I., forming a pyramidal mountain 2270 ft. high; an active fumarole. Area, 14 sq. m. See **Ko.**

Nisita, isl., S. Italy, in the Gulf of Naples, 3 m. SE. Pozzuoli. P. 1700.

Nisko, comm., Austria, crownland Galicia, circle Rzcszow, 53 m. SSW. Lublin (Poland). P. <4000.

Nissa, or **Nisa,** riv., S. Sweden, prov. (län) Jönköping, flows first N. then SSW. into Halland, and enters the Kattegat at Halmstad. Length about 120 m.

Nissan, tn., France, dep. Hérault, arr. Béziers, 6 m. SE. Capestang, between the Canal du Midi and the Aude. P. <3000.

Nissan, or **Sir Charles Hardy Islands,** group of isls. NW. of the Solomon Archipelago, and E. of the SE. end of New Ireland (Neu-Mecklenburg), crossed by 4½° S., and E. of 154° E.; the largest also called Nissan, forming with Barahun and Sirot a ring round a lagoon. P. <1500.

Nisserelv, *i.e.,* **Nisser River,** riv., S. Norway, rises in the Langefjeld, flows E. then S., expands into the lake, Nisservand, passes Arendal, and flows into the Skagerrack after a course of 105 m.

Nissum Bredning, the expansion at the W. end of the Lim Fjord, Denmark. **Nissum Fjord,** lagoon, Denmark, on the W. ct. of Jutland, in 56° 18′-27′ N.

Nissus, tn., Servia. See **Nish.**

Nistrul, riv., Austria and Russia. See **Dniester.**

Nisyros, isl., Turkey. See **Nisiro.**

Nitendi, isl. See **Santa Cruz Island.**

Nith, riv., Scot., rises in co. Ayr, flows through dist. of **Nithsdale,** in co. of Dumfries (*q.v.*), and after a SE. course of about 60 m. past New Cumnock, Kirkconnel, Sanquhar, Thornhill, and Dumfries, falls into the Solway Firth, 11 m. S. Dumfries, by an estuary 5 m. in width. Principal affluents, the Skarr and Cairn from the W.

Nith River, riv., Canada, Ontario, a l. bk. trib. of Grand R.

Niti Pass, pass, India, across the main Himalayan range, to the N. of Hardwár. Alt. 16,570 ft. See **Himálayas.**

Niton, par., Eng., Isle of Wight, 4 m. W. Ventnor, PMT.O. P. <1000.

Nitsa, riv., Russia, W. Siberia, r. bk. trib. of Tura, which belongs to the system of the Tobol; navigable up to Irbit. Length with Neiva about 300 m.

Nitshill, vil., Scot., W. Renfrewshire, 3½ m. SE. Paisley, on the C. R., PT.O. P. <1500.

Nittenau, vil., Ger., kgd. Bavaria, govt. Upper Palatinate, dist. Roding, on the Regen, 15 m. NE. by N. Regensburg. P. <2000.

Niuafu, or **Good Hope,** isl., Polynesia, NE. of the Fiji, and NW. of the Tonga Is., in 15° 34′ S., and 174° 40′ W.

Niuchwang, tn., Manchuria. See **Newchwang.**

Niue, or **Savage Island,** isolated isl., SE. of the Samoan Archipelago, in 19° 10′ S., 169° 50′ W. Inhabitants (whose savagery caused Captain Cook, the discoverer of the island, to give it its English name) Christianised by native teachers connected with the London Missionary Society.

Niulan-kiang, riv., China, in NE. of Yünnan, flows NE. and joins the Kinsha-kiang (upper Yangtse-kiang) in about 103° 20′ E.

Niumkorlo, mission station. See **Niamkolo.**

Niutao, or **Speiden,** isl., Pacific, Ellice group.

Niuteushan, isl., China, prov. Chekiang, at mouth of Sanmun Bay, crossed by 29° 2′ N.

Nive, riv., S. France, dep. Basses-Pyrénées, rises in the Pyrenees 10 m. S. St. Jean Pied-du-Port, joins the Adour close to Bayonne after a NW. course of 45 m.

Nivelle, riv., rising in Spain, prov. Navarra, near the abbey of Urdache, and flowing NW. 20 m. through the French dep. Basses-Pyrénées into the Bay of Biscay at St. Jean-de-Luz, near which the British army under Wellington crossed the Nivelle, after carrying the French posts, 1813.

Nivelles, Flemish **Nyvel,** tn., Belgium, prov. Brabant, 13½ m. NNW. Charleroi, cap. arr. Nivelles; has important railway-works, &c., and a magnificent Roman church, St. Gertrude, reconstructed in 1048. P. 10,600.

Nivernais, an old prov. of France, near its centre, now comprising the dep. Nièvre, and part of Cher. The **Canal of Nivernais,** 45 m. in length, connects the Loire with the Yonne and the Seine.

Niverville, stn., Canada, Manitoba, on the Emerson branch of the C. P. R., 20 m. S. by E. Winnipeg.

Nivestone Rock, Eng., dangerous rock off N. ct. of Northumberland, the most north-easterly of the Farne Is.

Nivilliers, vil., France, dep. Oise, arr. and 4 m. NE. by E. Beauvais. P. <2000.

Nivitsa, vil., Turkey in Europe, vilayet, sanjak, and 21 m. SW. Monastir, on neck of land between two lakes, Prespa.

Niwe, isolated isl., SE. of Samoan Archipelago, in 19° 10′ S. and 169° 50′ W.

Nixdorf, tn., Austria, Bohemia, dist. Schluckenau, in extreme N., 33 m. NNE. Leitmeritz. P. 6200.

Niya, oasis, Eastern Turkistan. See **Nia.**

Niza, tn., Portugal, prov. Alemtejo, dist. Portalegre, 52 m. NNW. Elvas. P. <4000.

Nizakzil, vil., Russian Central Asia, 130 m. N. by E. Tashkent.

Nizámpatam, seapt., Brit. India, Madras, dist. Kistna, 38 m. WSW. Masulipatam, with coasting trade; an important salt

station. The first port at which the English traded on the E. ct. of India. P. <5000.

Nizám's Dominion, India. See **Haidarábád.**

Nizhne-Kamchatsk, vil., Asiatic Russia, Maritime Prov., penin. Kamchatka, on lower Kamchatka R., in 56° 3′ N. P. <1000.

Nizhne-Kolymsk, tn., Russia, E. Siberia, prov. and 2000 m. NE. Yakutsk, on island of Kolyma R., 80 m. from its entrance into Arctic Ocean, 68° 32′ N., 160° 35′ E.; place of exile. Centre for administration of Tunguses, Koryaks, and Lamuts. P. <1000.

Nizhne-Taglisk, tn., Russia. See **Taglisk.**

Nizhneudinsk, dist. tn., Russia, E. Siberia, govt. and 360 m. NW. Irkutsk, on Uda R. and Great Siberian highroad; centre for gold-mines. P. 4000.

Nizhniy Lomov, dist. tn., Russia, govt. and 68 m. WSW. Penza. P. 8250.

Nizhniy Novgorod, a govt. of middle Russia, has Vladimir on W., Yaroslav and Vyatka on N., Kazañ and Simbirsk on E., Penza and Tambov on S.; one-third of it on l. bk. of Volga (Zavolzhiye) covered with forests, marshes, and lakes thinly peopled; the remainder hilly, cut up by ravines, and fertile in E. Watered by Volga, Oka, and tribs. Climate severe, especially in Zavolzhiye. Average temp. at Nizhniy, yr. 39°, Jan. 10.6°, July 64°. Agriculture (crops insufficient for population), cattle-breeding. Great variety of village industries; fabrics of all sorts of wooden wares exported in large quantities to the lower Volga, even to Persia and Bukhara, cutlery (Pavlovo and Vorsma being Russian Sheffields), woollen, leather, wire, felt goods, &c. Factories rapidly developing; machine, iron, steel, copper, and cutlery works, tanneries, steam flour-mills, naphtha distilleries, &c. Considerable trade and shipping; shipbuilding. Divided into eleven dists.: Nizhniy Novgorod, Ardatov, Arzamas, Balakhna, Gorbatov, Knyaginin, Lukoyanov, Makariev, Semenov, Sergach, and Vasilsursk. Pavlovo, Pochinki, and Vorsma are important towns. Area, 19,797 sq. m. P. (1880) 1,376,000; (1893) 1,586,800.

Nizhniy Novgorod, or simply **Nizhniy,** a city of Russia, cap. of above govt., at confluence of Oka and Volga, 276 m. by rail E. of Moscow. Occupies a most advantageous position where the cereals and various manufactured goods from the basin of the Oka meet with the metal goods of the Kama basin, the corn, salt, naphtha, and raw cotton shipped up the Volga, and the tea coming from Siberia, and whence all sorts of goods are shipped to central Asia, Caucasia, and Siberia. It consists of three parts: the city, including the Kreml, built on hills 400 ft. high, on the r. bk. of Oka and Volga, containing several very old churches (many times rebuilt) and monasteries; the lower town, which is the centre of a very lively commercial traffic, and contains the immense storehouses for grain, timber, salt, naphtha, &c.; and 'The Fair,' on the flat, sandy penin. between Oka and Volga, connected with the town by a wooden bridge, and having a huge cathedral and an immense Gostinyi Dvor, with 3000 shops, while 3000 more shops are temporarily built for the fair. Immense store-houses for metals, tea, and the steamboat companies—Nizhniy Novgorod being the chief centre of the steamboat navigation on Volga—are built on the flat river shores. The permanent population, almost entirely Great Russian, is only about 75,000, but it attains 300,000 during the fair. Nizhniy Novgorod has of late become a centre of local intellectual life, and has a library. Its manufactures are not of great importance, but a brisk trade is carried on all the year round. The Makarievskaya fair, which is held at Nizhniy Novgorod in Aug. and Sept. (it was formerly held at Makariev, whence its name), is of the very greatest importance in the industrial and commercial life of Russia, not only on account of the amounts of tea, metals, naphtha, cereals, oils, timber, and all sorts of manufactured goods brought to it (over £18,000,000 to £25,000,000 worth every year), and the number of merchants who come together, but especially on account of the transactions made. The crop of the year being known in August through the merchants who come from all parts of Russia, the production of all the cotton-mills of middle Russia, and all the iron and metal works of the Urals, is settled at Nizhniy for the ensuing year, as also the prices of tea, raw cotton imported from central Asia, naphtha, and wool, the stocks of which become known after the fairs of SW. Russia have been previously held. The total business transacted is estimated at nearly £40,000,000, while the credits opened to trade and industry greatly exceed this figure. The trade in Siberia and Russian Turkistan entirely depends on this credit. P. (1880) 50,000; (1891) 74,930.

Nizhnyaya Tunguska, riv., E Siberia, rises in govt. Irkutsk, near middle Lena, flows NNW. and W., joins Yenisei near Turukhansk. Length, 1680 m.

Nižniow, tn., Austria, Galicia, dist. Tlumacz, 17 m. E. by N. Stanislawow, near r. bk. of Dniester. P. <5000.

Nizvora, vil., Turkey in Europe, vilayet Salonica, 17 m. SSW. of the mouth of the Struma. P. 3000 (G.).

Norcross, vil., U.S., Georgia, Gwinnett co., 18 m. NE. Atlanta. P. <1500.

Nord, French and German, 'north.' See *Noord.*

Nord, dep., France, on Belgian frontier and North Sea, formed out of the old prov. of French Flanders in N., French Hainaut SE., Cambrésis S., with small portions of Artois and Picardy; divided into 7 arrs.: Lille (cap.), Avesnes, Cambrai, Douai, Dunkerque, Hazebrouck, Valenciennes. Shape very irregular, consisting of two unequal parts united by a narrow neck, about 4 m. wide. As regards surface, it comprises two very distinct regions—Flanders in the N. and centre, and the Ardennes in the SE., separated by the Schelde; the former is for the most part a monotonous plain, with a few low abrupt hills, highest Mont Cassel (535 ft.), and traversed by sluggish rivers. Towards the coast are the 'Wateringues,' rich lands reclaimed from the sea and protected by dykes. This region is the most productive, best cultivated, and, with the exception of the Seine, the most densely peopled in France. The Ardennes region presents a striking contrast to the former—surface diversified and picturesque, rising SE. into a plateau; highest point in dep. Bois de Saint Hubert (875 ft.). SW. are the bare undulating plains of the Cambrésis, traversed by intermittent streams ('riots'). About two-thirds of the dep. belong to the basin of the Schelde, which traverses it S. to N., receiving on l. bk. the Scarpe and Lys (the latter outside the dep.); the Sambre carries the drainage of the SE. to the Meuse, the Oise just touches the dep. on the frontier of Aisne, and the Yser and Aa drain limited tracts in the NW. Most of the rivers are canalised. The Canal St. Quentin connects the basins of the Schelde, Seine, Loire, and Rhone. Forests, chiefly in SE. Climate temperate, humid, and very variable. Agricultural products include cereals, principally wheat (in the production of which Nord ranks first) and oats; sugar-beet (chiefly in SE.) is very important, as are also flax, hops (Hazebrouck), forming nearly one-third of the total for France, tobacco colza, &c. In manufactures Nord takes the lead, supplying more than one-third of the iron, and about one-sixth of the steel, in the whole country (Denain, Anzin, Fourmies, Maubeuge, Dunkerque, Trélon, &c.); agricultural implements (Douai). The produce of the textile industries is more than one-third that of France; linen and cotton goods (Lille), damask (Armentières), fine linen, cambric, and lace (Cambrai and Valenciennes), jute (Dunkerque), hemp, woollen goods, alpaca, and fancy stuffs (Roubaix), furniture materials (Turcoing); other industries are sugar-refineries, breweries, potteries, &c. Area, 2229 sq. m. P. (1891) 1,736,300. See **France,** table.

Nordby, vil. and small port, Denmark, dist. and 17 m. WNW. Ribe, in Fanö Is., on a bay on the NE. ct. P. <3000.

Norderhov, comm., S. Norway, prov. Christiania, dist. Buskerud, between Tyri Fjord and Rands Fjord, 28 m. N. Drammen. P. 7000.

Norderney. 1. Isl., Ger., Prussia, prov. Hanover, circle Norden, crossed by 7° 15′ E., 8½ m. long by 1–1½ m. wide. P. 3615. **2.** Village, at the W. end of the island, with sea-bathing. Rfall. (11 yrs.), 36.61 in. P. <2000.

Nord Fjord, inlet, Norway, prov. N. Bergenhus, running E. for upwards of 60 m., in about 61° 50′ N. Its upper part is known as the **Ise Fjord,** and it opens into the sea by two mouths, one to the N. of Bremangerland, known as the **Faa Fjord,** the other, to the S., called the **Frøl Fjord.**

Nordgau, one of the large divisions of old Alsace, bounded N. by the Queich, E. by the Rhine, S. by the Thur, which separates it from Sundgau, and W. by the Vosges; for some time it had landgraves.

Nordhausen, tn., Prussia, prov. Saxony, cap. circle Nordhausen, 29 m. SSW. Halberstadt; has a large manufacture

of brandy, cotton and linen industry. Given to Prussia in 1803. P. (1816) 9600; (1871) 21,300; tn. (1890) P. 26,600; comm. P. 26,800.

Nordkujavien, circle, Ger., Prussia, in the E. of prov. Posen, crossed in the N. by 53° N., and in the E. by 18½° E.

Nordkyn, the most northerly point of the mainland of Europe, 45 m. E. of North Cape, in 71° 5′ N.

Nördlingen, tn., Ger., in the W. of Bavaria, govt. Swabia, cap. circle Nördlingen, 37 m. NE. by N. Ulm; has manufactures of agricultural instruments, machines, safes, &c. It is still surrounded by walls, and was probably a free town under King Rudolph I. In 1634 the Austrians and Bavarians defeated the Swedes and their allies here, and in 1796 the French here defeated the Austrians. P. 8000.

Nordmaling, comm., Sweden, prov. (län) Vesterbotten, 33 m. WSW. Umeå, on the Gulf of Bothnia. Public quay has 12 ft. alongside; good anchorage, depth 16–23 ft. P. 8000.

Nordmarsch, isl. of Halligen (N. Frisian) group, 6 m. from the W. ct. of Schleswig, Prussia.

Nordre, Norwegian, 'north.'

Nordstrand, isl., Prussia, prov. Schleswig-Holstein, circle Husum, one of the Halligen (N. Frisian) group, reduced from 50,000 ac. to 7000 by a terrible inundation in 1634, off the W. ct., crossed by 54° 30′ N. P. 2271.

Nordvic, city, Eng. See **Norwich.**

Nordwalde, vil., Prussia, prov. Westphalia, circle Steinfurt, 10 m. NW. by N. Münster. P. <3000.

Nore, riv., Ire., rises in co. Tipperary, about 13 m. N. Thurles, flows first NE. into Queen's co., then SE. through Queen's co. and co. Kilkenny, passing the town of Kilkenny, and joins the Barrow 2 m. above New Ross; navigable for barges to Inistioge.

Nore, The, a part of the estuary of the English riv. Thames, E. of Sheerness. The Nore light, which is often regarded as marking the mouth of the river, floats over the E. end of a sandbank 4 m. NE. Sheerness. Lat. 51° 29′ N., long. 0° 48′ E. Gave name to a celebrated naval mutiny (May 20th–June 13th, 1797).

Nörenberg, tn., Prussia, prov. Pomerania, circle Saatzig, 40 m. E. Stettin. P. <3000.

Norfolk, maritime co., Eng., SE. of the Wash, on the North Sea, with 90 m. of sea-coast; divided into the following parl. divs.:—

	Acres.	Pop. 1891.
North-Western	255,368	51,183
South-Western	256,292	46,560
Northern	205,349	51,072
Eastern	181,598	50,693
Mid	211,106	49,612
Southern	186,678	49,723
Parl. bors.	12,049	155,673
Total	1,308,440[1]	454,516[1]

[1] The administrative co. includes the part of Great Yarmouth co. bor., and the part of Thetford, urban sanitary dist., in the ancient co. of Suffolk. Area, 1,315,092 ac. P. 468,287.

The coast is flat, with low dunes, except at Cromer and Hunstanton, where there are cliffs. The surface inland is undulating, well wooded and well watered, with agriculture highly advanced, and excellent pasturage. For agricultural statistics, see **Appendix,** pp. 7–9. The manufactures are unimportant, though anciently this county was a chief seat of the cloth trade; large exports at Yarmouth, and famous herring fishery. The geological formation is mainly chalk, with drift deposits; near Norwich are bands of sand, clay, and shingle, containing fossils. The sea has encroached on the coast, especially near Cromer, and several villages are supposed to have disappeared since the Saxon period; at various points submarine forests are visible, *e.g.,* off Cromer and Happisburgh, and in Brancaster Bay. At Great Yarmouth, however, and in other parts, the sea has receded since the Roman period. The chief rivers are the Ouse, the Bure, Yare, and Waveney, the last three serving to unite the **Broads** (*q.v.*). The railways are the G. E. R. and M. & G. N. Joint Rly.; the rivers are also of great use for intercommunication. The county contains 696 pars., 4 mun. bors. (besides 4 bor. members), and constitutes 2 archdeaconries in the diocese of Norwich. See **England,** table.

Norfolk, co., Canada, Ontario, on Lake Erie, crossed by 80½° W.

Norfolk, tn., U.S., Connecticut, Litchfield co., 43 m. ENE. Poughkeepsie (N. Y.). Alt. 1220 ft. (R.R.). P. <2000.

Norfolk, co., U.S., Massachusetts, stretching 30 m. WSW. from Massachusetts Bay.

Norfolk, vil., U.S., Massachusetts, Norfolk co., 19 m. NW. by N. Taunton. P. <1500.

Norfolk, city, U.S., Nebraska, Madison co., 95 m. NW. by W. Omaha. P. <4000.

Norfolk, city and port, U.S., Virginia, N. co., on Elizabeth R., communicating with Hampton Roads, 80 m. SE. Richmond. Founded in 1705, incorporated in 1845; situation low; streets wide, but irregular; has a fine safe harbour, admitting the largest vessels, its entrance defended by Forts Calhoun and Monroe. Its trade is facilitated by eight railroads and two canals; large quantities of oysters, early fruits and vegetables are shipped to northern ports, and cotton, grain, and yellow pine lumber sent abroad as well as to home ports. Over two million tons of Pocahontas steam coal were shipped here in 1894. At Gosport, in the vicinity, is a U.S. navy yard, with marine hospital. The shoal at the mouth of Elizabeth R. has a depth of 26½ ft. at high water ordinary springs. Depth in harbour ordinary springs high water 28 ft., low water 25 ft. Mean temp., yr. 59.2° F., Jan. 40.7°, July 79.6°; rfall. (14 yrs.), 51.62 in. P. (1880) 22,000; (1890) 34,900.

Norfolk, New, name formerly applied to the coast-line of Russian America (now Alaska terr.) from Admiralty Bay to Baranof I.

Norfolk Bay, bay, SE. Tasmania, cuts into Tasman Penin. from N. See **Taranna.**

Norfolk Island, Pacific Ocean, between New Zealand and New Caledonia, in (S. ct.) 29° 4′ S. and 168° 0′ E., about 1200 m. ENE. Sydney, a dependency of New South Wales. Coasts high and steep; surface rises to 1000 ft. in Mount Pitt. Soil fertile, climate healthy. Norfolk I. pine grows to 200 ft.; a dwarf pine is known as Norfolk I. cabbage. Norfolk was formerly a penal settlement for New South Wales, but in 1856 was given to Pitcairn islanders. It is the headquarters of the diocese of Melanesia. Length, 5 m.; breadth, 2½ m.; area, 13½ sq. m. P. about 800.

Norfolk Plains, a name formerly given to the middle portion of the N. maritime dist. of Tasmania.

Norfolk Sound, bay, on the W. side of King George III. Archipelago, Alaska, on which is the town of Sitka, or New Archangel.

Norg, comm., Holland, prov. Drenthe, 10 m. SSW. Groningen. P. 5100.

Norge, the Norwegian name of **Norway.**

Northampton, parl. bor. (two members), mun. and (since 1888) co. bor., and market-tn, cap. of co., Eng., 62 m. NW. London, in the diocese of Peterborough, on the navigable Nen, with stns. on the L. & NW. R. and M. R., and communications by Grand Junc. Canal. The staple industry is boot and shoemaking, Northampton being the chief seat of that manufacture in England. It was anciently a fortified town and royal residence. The most interesting objects are the Knights Templars' Church, St. Peter's Church (rich Norman), the Town Hall, All Saints Tower, St. John's Hospital, the new Roman Catholic Cathedral, and a beautiful cross erected by Edward I. in memory of Queen Eleanor. The meadows were the scene of an important battle during the Wars of the Roses (1460), when Henry VI. was made prisoner. There are many fairs in Northampton. Market-days, W. and S. Mean rfall. (Northampton Reservoir, alt. 310 ft., 1866–80), 27 in. Mun. bor. P. (1801) 7000; (1851) 26,700; (1871) 41,200; (1891) 61,000; parl. bor. P. (1891) 70,900.

Northampton, city, U.S., Massachusetts, Hampshire co., 8 m. N. by W. Holyoke, 17 m. N. Springfield; manufactures of silk, cutlery, &c. Seat of Smith's College for women. P. (1880) 12,200; (1890) 15,000.

Northampton, co., U.S., N. Carolina, in the NE., on the N. frontier, W. of 77° W., bounded on the SW. by the Roanoke.

Northampton, co., U.S., Pennsylvania, S. of parallel 41°, on the Delaware.

Northampton, co., U.S., Virginia, at the S. end of the penin. on the E. side of Chesapeake Bay.

Northampton, post-tn., W. Australia, Victoria dist., 262 m. NNW. Perth. P. <1500.

Northamptonshire, or **Northants,** Midland co., Eng., divided into the parl. divs. named in the following table:—

	Acres.	Pop. 1891.
Northern	201,568	46,718
Eastern	64,992	65,501
Mid	195,573	48,794
Southern	171,613	46,627
Parl. bors.	8,246	94,543
Total	641,992[1]	302,183[1]

1 The administrative county includes also the part of Peterborough urban sanitary dist. in the ancient county of Huntingdon, but excludes the part of Banbury urban sanitary dist. in the administrative county of Oxford, the part of Market Harborough urban sanitary dist. in the administrative county of Leicester, and the part of Stamford urban sanitary dist. in the administrative county of Lincoln. Area, 639,541 ac. P. 299,508.

It mainly forms the watershed between the Wash and the Severn valley, having the riv. Avon in N. flowing W., the Nene flowing S., then E. and NE., the Welland flowing E., the Cherwell flowing S., and the Ouse flowing SE. and then E. Generally undulating or hilly, the surface is mostly well cultivated and richly wooded; the rounded heights culminating at Arbury (804 ft.), and Naseby (697 ft.), scene of the Royalist defeat during the Civil War, 1645. The geological basis is

chiefly lias, with oolite formations resting on it, such as the beds of sand near Northampton, the sandstone containing much oxide of iron. Besides Kettering, Northampton, Wellingboro', and Thrapston (which have also blast-furnaces), iron ore is dug at Blisworth, Brixworth, Desborough, Stamford, Irchester, &c. Weedon also has blast-furnaces, and stone is dug at Kettering. Besides the important iron industry, there is large manufacture of boots and shoes. For agricultural statistics, see **Appendix,** pp. 7–9. The railway communication is by L. & NW., G. N., and M. Rlys., with many local branch lines. The county is also served by the Grand Junction and Grand Union Canals. The county contains 335 pars., 5 mun. bors., and constitutes an archdeaconry in the diocese of Peterborough. P. (1871) 243,900; (1891) 302,200.

North Road, Old, stn., Eng., near Cambridge, on the L. & NW. R.

North Sea, or **German Ocean,** a body of water, which is virtually a great bay, in the NW. of Europe, lying between 51° and 61° N., and having England and Scotland on the W., and

Norway, Denmark, Prussia, Holland, and Belgium on the E. and SE. From E. to W. it measures 350 m., from N. to S. 600 m.; its area is nearly 150,000 sq. m., and its greatest depth, in 58° 12′ N., 9° 30′ E., 442 fathoms. It communicates with the Atlantic by the Straits of Dover (and English Channel) in the S., and by passages between the Shetlands and Orkneys, and the Orkneys and Scotland (Pentland Firth) in the NW.; with the Norwegian Sea (*q.v.*) to the N. it has uninterrupted continuity; and on the E. it connects with the Baltic by means of the Skager Rak and the Kattegat. In the SE. and E. where (except the Orkneys and Shetlands) are the only islands, the shores are low, in many parts even lower than the level of the sea itself; in the W. the shores are of moderate elevation, but rise in altitude towards the N. of Scotland, whilst on the opposite side the sea washes the steep and lofty cliffs of Norway. The principal rivers which pour their waters into the basin of the North Sea include several of the largest and most important streams of England and Scotland; but a much vaster volume of water is contributed by the rivs. Rhine, Weser, and Elbe on the E. side. Owing to these constant additions of fresh water, the salinity of the North Sea in its S. and central parts does not exceed an average of 33 to 34 per cent. In the N. the salinity is perceptibly increased by an inflow from the Norwegian Sea, and rises to 35 per cent., and this in spite of the outflow, by means of a surface current, of fresher water from the Baltic. The North Sea is a shallow sea; with the exception of a deep gully, which, generally speaking, follows the bend of the S. ct. of Norway and exceeds 400 fathoms in depth, the depth does not go beyond 100 fathoms. But the floor of the sea shows in its several parts great diversities of elevation, though on the whole it decreases in depth from N. to the S. Between the coasts of Norfolk and Norway lie two vast sandbanks, the Dogger Bank and the Great Fisher Bank, each less than 20 fathoms below the surface; but adjacent to them, as well as in other parts, there are deeper and precipitate depressions known as 'pits.' Furthermore, shoals and sandbanks, generally deposited as ridges, fringe the shores on both sides in the S. The irregularities of the sea-bed have been accounted for as being moraine deposits from the gigantic glaciers which successively filled the basin of the North Sea during the great Glacial Periods, during which periods England was probably more than once directly connected with the Continent. This conclusion is certainly borne out by the predominant character of the deposits—clay and sand mingled with finely comminuted particles of land rocks, algæ, foraminifera, molluscs, echinoderms, and diatoms. The tides are complex, and have not been thoroughly studied. It has only been ascertained (1) that they are inconspicuous in the Straits of Dover, where the entire volume of water is stated to oscillate in the mass in conformity with the changes in tidal level on both sides of it; (2) that one portion of the great Atlantic tidal-wave enters round the N. of Scotland. Navigation is very difficult during the greater part of the year owing to the extremely variable conditions of winds and currents, occasioned in great part by the shallowness and partially inclosed nature of the sea; and in addition to these difficulties, fogs and mists are at various times troublesome. The prevailing winds blow from the SW., and on the coast of Denmark and Schleswig-Holstein from the NW. as well. The difference between bottom and surface temperature of the water is in summer comparatively small over the shallower parts, but it increases as the depth increases up to a difference of 17° in the Norwegian Gully. In winter there is no doubt a greater difference between the temperature at the same two levels; but unfortunately there do not exist sufficient data to justify a comparative statement. In summer the surface water ranges from about 53° to 63°; whilst, so far as has been ascertained, the bottom temperature varies between 44° and 58°. Owing to its physical conformation the North Sea is peculiarly rich in vegetable and animal life—Algæ, Peridinias, Diatoms, Sponges. Foraminifera, Echinoderms, Worms, Molluscs, Polyzoa, Protozoa, Medusæ, and various other species of minute creature. This great abundance of food material attracts vast shoals of fish—cod, herring, haddock, halibut, sprat, sole, &c., as well as edible crustaceans like lobsters, crabs, and shrimps, and molluscs like the oyster, mussel, whelk, and periwinkle. The fisheries of the North Sea are beyond all question the most valuable in the whole world, and are carried on by all the nations which have direct access to its waters. See Prof. Mohn, in *Petermann's Mitteil.*, Ergänzungsheft, 79 (1885); *Scot. Geog. Mag.*, 1887, pp. 385, &c., and compare also the same magazine, 1894, pp. 281, &c.

North Sea and Baltic Canal, ship canal in the Prussian prov. of Schleswig-Holstein, constructed between 1887 and 1895. It commences at the mouth of the Elbe above Brunsbüttel, joins the Eider near Wittenbergen, and follows this river to Rendsburg, and from there, utilising wherever possible the Eider canal, terminates at Holtenau, 2½ m. N. of Kiel. The total length is 61 m., and the average depth 28 ft. There are two locks, one at either end, but that at the E. or Holtenau will be seldom closed, and the other will be open for 3–4 hours in every tide. The bed of the canal is so laid that there will be a slight current of saline water from the Baltic to the Elbe, thus diminishing the risk of freezing in that river. The advantages of this great undertaking are the direct connection between the German ports on the North Sea and Baltic, and the considerable shortening of the sea-route between the Baltic ports and the British E. coast S. of Newcastle. This canal was formally opened by the German emperor on the 20th of June 1895. The cost amounted to £7,800,000. [**H. G. S.**]

Northumberland, maritime co., Eng., on the German Ocean, extending from the Scottish border in N. and NW. to the riv. Tyne in the S., divided into the parl. divs. given in the following table:—

	Acres.	Pop. 1891.
Wansbeck	173,485	59,568
Tyneside	27,900	69,331
Hexham	703,891	51,570
Berwick-upon-Tweed	357,673	52,438
Parl. bors.	26,807	273,123
Total (anct. and admin. co.)	1,289,756	506,030

Its surface is a succession of hilly ridges descending eastward from the Pennine chain to a shelving sea coast. The Cheviots in the N. rise to 2676 ft., and Killhope Law in the Pennine range to 2208 ft. The chief rivers are the Aln, Blyth, Coquet, Tyne, Reed, and Till. Islands off the coast are Holy I., Coquet I., and the Fern Is. The geology of this county classifies the oldest rocks in NW. as Silurian, with Triassic and Permian beds as later formations near the coast; some upheavals of igneous rocks occur. The coal-measures occupy the SE., and lead-measures the SW.; the former to the extent of 250 sq. m., with an output of from 14 to 15 million tons. The Northumbrian section of the great coal-field extends N. to Warkworth, and W. to Acklington, Earsdon, Morpeth, Ponteland, and Heddon-on-the-Wall; the southern section passing under the Tyne to occupy a large part of the county of Durham. The mining centres in the area of the coal-field are too numerous to mention, nearly every village having one or more mines. Coal is also mined in the county beyond the area of the coal-measures proper, generally beneath beds of the so-called Mountain Limestone belonging to the Lower Carboniferous series, as at Alnwick, Belford, Berwick-upon-Tweed, and Wooler, in the N. of the county, Bellingham, Wark, and Otterburn, in the middle and W. of the county. The chief blast-furnaces are at Newcastle and Walker-on-Tyne; zinc ore is worked at Allenheads; lead ore at Fallowfield, Haydon Bridge, Newburgh, and Allenheads; alumina at Wallsend-on-Tyne; barytes at Hexham and Fourstones. Historically, this county has been important since the founding of the kingdom of Northumbria, and especially in the border warfare with Scotland, of which Bamborough, Dunstanborough, Hexham, Alnwick, Norham, Warkworth, and the ruins of other strongholds, are noted memorials. The great wall westward from the Tyne is the chief monument of the Roman period. The manufactures of this county are chiefly those in the Tyne region, arising from the working of coal, iron, &c. [**Newcastle.**] More than half the country is pastoral. See **Appendix,** pp. 7–9, for agricultural statistics. The railways of the county belong chiefly to the NE. R., but the N. B. R. has a line from Riccarton Junction crossing the Cheviots S. of Peel Fell, and branching to Hexham, Morpeth, and Rothbury. The county contains 512 pars., and comprises an archdeaconry in the diocese of Newcastle-on-Tyne. The chief towns are Newcastle, N. Shields, Berwick, Alnwick, Morpeth, and Hexham, besides the Tyne ports (rapidly joining together into one town), Walker, Wallsend, and Wellington Quay. Population, &c., see **England,** table.

For a general account of the **physical features** and **climate,** see **India.** It will suffice to add in this place that the NW. Provs. and Oudh belong entirely to the basins of the **Ganges** and the **Jumna,** and constitute one extensive and continuous plain, of great natural fertility, increased where necessary by irrigation through numerous canals—*e.g.*, the Upper Ganges, Lower Ganges, Ágra, Eastern Jumna, Dun, Bijnaur, and Rohilkhand, and Betwa. The principal exceptions to this general description are the dists. lying between 77° 45′ and 81°, which cross the Sub-Himalayan ridge [**Siwalik Hills**] and penetrate up to the main axis of the **Himálayas;** the marshy, forest-grown and notoriously unhealthy Tarai, at the foot of the submontane ridge; and the rocky and poor dists. of Bundelkhand, S. of the Jumna. On the whole the climate is hot and dry; but of course cooler and with a greater rainfall in the submontane regions of the NW. [See **Chakráta, Ránikhet, Dehra, Rurki, Meerut, Agra, Lucknow, Allahabad,** and **Benares.**] Fever is the most fatal disease; dysentery is also endemic. There are hill sanataria at Náini Tal, Masúri, and Landaur. These provs. are the great wheat-producing region of India. Other principal **crops** are rice, millets, grain, pulses, maize, indigo, cotton, sugar, oil-seeds, opium, tobacco, and tea (in the submontane dists. only). Valuable timber is felled, and gums and resins collected, in these last dists. The **trade** consists almost exclusively in the export of raw products and in the import of manufactured goods, and almost the whole of it, to the annual average value of nearly £30,000,000, passes through Calcutta, partly by river, partly by rail. Cawnpur and Agra are the most important trade-centres. The principal railway lines are the East Indian, the Sind, Punjab and Delhi, the Oudh and Rohilkhand, and the Rájputána State Rly. The **commercial industry** embraces manufactures of cotton (Benares and other towns), metal ware (Benares, Morádabád), pottery (Lucknow, Alígarh, Rampur), leather (Cawnpur and Saháranpur), carving, inlay, mosaics and similar fancy work (Agra, Lucknow, &c.), silk, calico, carpets, paper, soap, ale, and indigo. This part of India is particularly subject to **famines,** which occurred in 1803–4, 1837–38, 1860–61, 1868–69, 1873–74, and 1876–78, all with great severity. These provs. embrace the central seats of Hinduism, the people being predominatingly of Aryan speech and blood. Here are many large and several sacred cities and temples, some now ruined—Benares, Allahabad (the cap.), Agra, Bareilly, Meerut, Lucknow, Cawnpur, Sháhjahánpur, Morádábád, Farukhábád, Alígarh, Saháranpur, Gorakhpur, Mírzápur, Gházipur, Hardwár, Ajodhya, Kanauj, Muttra, Hastinapur, Indraprastha, Mahoba, and Kalinjár. It is to this dist. that the great epic the *Mahábháratá* belongs. Here reigned the Buddhist dynasty of Maragha, of which the greatest ornament was King Asoka (3rd century B.C.). In the 11th century the Mohammedan chiefs of Ghazni in Afghanistan invaded and conquered these provs., and in the following century fixed their cap. at Delhi, where their successors ruled as the Great Mogul down to nearly the middle of the 19th century. The first conquests of the British were made in 1775. It was here, too, that the Mutiny of 1857 broke out and raged with fiercest violence. The NW. Provs. were constituted in 1835. Until 1877 Oudh formed a totally independent administrative governorship.

North-West Territories, a name diversely applied to regions of the Canadian Dominion according to changing circumstances. In its widest sense it embraces the whole of the area N. and W. of Quebec, Ontario, and Manitoba. In the legislative assembly of the NW. T., created in 1890 (seat at Regina), the only parts at present represented are the dists. mentioned in the table below (frequently known as 'The Territories'); but in the widest sense the NW. T. comprise also the dists. of Athabasca (according to latest estimates 103,300 sq. m.), Kee-

watin (267,000 sq. m.), the NW. T. in the narrower and stricter sense, N. of Athabasca and Saskatchewan, and W. of Keewatin (859,600 sq. m.), terr. E. of Keewatin and S. of Hudson's Bay (194,300 sq. m.), terr. E. of Hudson's Bay (352,300 sq. m.); in all about 2,071,500 sq. m., to which 300,000 sq. m. may be added for the islands in the Arctic Ocean.

Districts.	Area in sq. m.	Pop. Aug. 1885.	Pop. April 1891.	Incr. per Cent.	Incr. per Cent. per Annum.
Alberta . .	105,355	15,500	25,300	63.2	6.9
Assiniboia . . .	88,534	22,100	30,400	37.6	1.6
Saskatchewan .	101,092	10,700	11,200	4.7	0.66
Total . .	294,981	48,300	66,900	38.5	5.1

Separate articles are given on the organised dists. Here only a few general facts need be mentioned. It may be pointed out that the last column of the table presents an interesting subject of comparison with the corresponding column in Table I. under **United States.** The rapid increase of population, especially in the southern parts of these dists. (Assiniboia and southern Alberta), has depended chiefly on the extension of agriculture and pasturage and the development of the railway system. These terrs. have in recent years, like the adjoining prov. of Manitoba (*q.v.*), shown a great increase of the area under wheat (in 1880, 5678 ac.; in 1890, 113,811 ac.), while the area under this crop in the eastern provs. has declined (Ontario, 1880, 1,949,000 ac.; 1890, 1,430,500 ac.; Quebec, 1880, 224,700 ac.; 1890, 191,600 ac.). Cattle-rearing is of special importance in Alberta. Outside of the three dists. mentioned in the table there is at present only a very scattered population, mainly composed of Indians and a few Europeans at the stations of the Hudson's Bay and other fur-trading companies. In the NW., E. of the Rocky Mts., the climate is certainly milder than in corresponding latitudes farther E., and vast deposits of coal, lignite, petroleum, and iron ore are known to exist. Favourable reports are given as to the future possibilities of this region, but little definite can yet be stated. Even in Athabasca the surface appears to be generally unfitted for the growth of cereals, though good crops of wheat and barley have been raised in favourable years in the river valleys (even as far N. as Fort Vermillion, on the Peace R., in about 58° 25′ N.). The principal railways are connected with the Canadian Pacific. The main line was completed in Nov. 1885, and there are now branches from Regina (Assiniboia) to Prince Albert (cap. of Saskatchewan), from near Medicine Hat to the coal-mining town of Lethbridge (Alberta), and thence SE. to the U.S. frontier, where it communicates with another line leading to Great Falls (Montana), and from Calgary, at the base of the Rocky Mts., (*a*) N. to Edmonton, and (*b*) S. to Fort Macleod (now Macleod). A line belonging to the Manitoba & NW. Rly. is now in progress from Portage to Prince Albert, which would thus be brought into more direct connection with Winnipeg.

Norwalk, tn., U.S., Connecticut, Fairfield co., on the coast, 12 m. WSW. Bridgeport; has an excellent harbour, carriage factories, shipyards, iron-foundries, and other manufactures; the lock-works and iron-works are among the largest in the country; oyster trade is extensive. Many New York families have their summer residence here. P. (1880) 14,000; (1890) 17,700. **Norwalk, South,** vil., 2 m. to the SSW. P.<1500.

Norwalk, city, U.S., Ohio, Huron co., 52 m. WSW. Cleveland; connected by electric tramway with Sandusky, about 16 m. N.; has two railway workshops, a large piano and organ factory, &c. P. 7200.

Norway, Nop-way, or **Swi-nong-tiao,** island group, Gulf of Tongking (W. side), opposite Allong Bay, in 20° 38′ N.

Norway, Norwegian *Norge,* the western division of the Scandinavian penin., lies between the extremities of 57° 58′ (Lindesnæs on the S. ct.), and 71° 11′ (Knivskjærodden on Magerö, near North Cape) N. lat., and between 4° 30′ (Utvær, off Sogne Fjord), and 31° 12′ (Hornöen near Vardö) E. long., and measures nearly 1200 m. in length by 70 to 280 in width. Its boundaries are the Skager Rak and North Sea on the S., the Norwegian Sea on the W., the Arctic Ocean on the N., and Russian Lapland and Sweden on the E. The area exceeds that of the United Kingdom by 4000 sq. m. The details are shown in the following table:—

Dioceses and Provs. (Stifter and Amter).	Area in sq. m.		Pop. in Thousands.			Per sq.m. 1891.

The W. **coast** is screened from the deep ocean by a submarine bank, and by a fence of rocky islands, the Skjærgaard. The larger of these islands are named (going N.) Karmö, Bömmelen, Stordö, Tysnäs, Soteren, Öster, Sulen, Böland, Bremangerland, Smölen, Hiteren, Fröyen, Vigten, Alsten, Dynnäs, the Lofotens, the Vesteraalens, Senjen, Kvalö, Hingvadsö, Vannö, Arnö, Stjernö, Sörö, Seiland, Magerö. Altogether her islands make nearly 7 per cent. of Norway's total area. Everywhere the W. ct. presents a lofty and precipitous face of rocky cliffs to the sea, and is cleft by numerous very deep and narrow trenches (the fjords), up which the salt-water flows for scores of miles into the heart of the country. The N. coast is steep, but less lofty. The S. and SE. coast is comparatively low. Both N. and S. coasts are broken by innumerable inlets. Proceeding from SE. to N. the larger fjords are Christiania (90 m. long), Bukken or Stavanger (50 m.), Hardanger (68 m. long, 2130 ft. deep), Öster, Sogne (106 m. long, 4020 ft. deep), Nord (2040 ft.), Stor, Molde, Trondhjem (80 m. long, 1800 ft. deep), Folden, Namsen, Alsen, Ranen (1410 ft.), Salten, Vest, Ofoten, Malangen, Bals, Ulfs, Lyngen, Kvænang, Alten (1350 ft.), Porsanger, Laxe, Tana, and Varanger (1380 ft.). The total length of coast-line exceeds 3000 m. The **surface** constitutes a long narrow plateau, running NE. to SW., and sloping towards the SE. Fifty-seven per cent. of the area lies 1000 ft. and more above sea-level. Norway is separated from Sweden by the Kjölen (Keel) Mts. (4000–6000 ft.); but about 63° N. lat. the main chain trends SW., and is known as the Dovrefjeld (2000–4000 ft.), and farther on bends S. under the names of the Lang, Justedal, Jotun, Fille, Halling, and Hardanger Fjelde (Fells). Peaks and groups of peaks rise above the level of this upland region, as Sulitjelma (6178 ft.), Snæhatten (7566 ft.), Galdhöppigen (8399 ft.), Glitretind (8366 ft.), Lodalskaupen (6790 ft.), Hallingskarvet (6440 ft.). The **rivers** are all comparatively short; of the longest, the Glommen (350 m.), Gudbrand Laagen (200 m.), Nummedal Laagen (140 m.), Otteren (140 m.), and Skien (130 m.), flow into Christiania Fjord, and the Tana (175 m.) into the Arctic Ocean. As the streams descend from the plateau they form numerous waterfalls, of which the most celebrated are Rjukan (800 ft.) in Thelemarken, Hönefos near Drammen, Vetti (900 m.) in Sogn, Vöring (475 m.), Skjæggedal (530 m.), Espeland and Lotefos in Hardanger. They also expand into long, narrow lakes, some of great extent, as Lakes Mjösen (60 m. long; area, 200 sq. m.; depth, 1483 ft., more than 1000 ft. below the level of the North Sea), Randsfjord (45 m.; 52 sq. m.), Tyrifjord (20 m.; 51 sq. m.), Fæmund (36 m.; 95 sq. m.), Rös (21 m.; 110 sq. m.), Bygdin (15 m.; 3620 ft. above sea-level), Tyin (10 m.; 3610 ft.). Lakes cover altogether 2.4 per cent. of the total area. The predominant **geological formations** are of Archæan age, mostly granite, quartz, and gneiss; these are in parts overlaid by Sparagmite and Silurian strata, and in part also broken through by masses of eruptive rocks. Evidences of former glacial action, as incised lines, striations, boulders, moraines, transverse ridges, giant kettles, glacial terraces, are very common, and exist as high as 5000 ft. above sea-level. The coast of N. Norway is estimated to have risen some 600 ft. in recent geological ages. At the present time some of the largest glaciers in Europe are still to be seen in Norway, as Justedal (580 sq. m.), Folgefona (108 sq. m.), Svartisen (nearly 400 sq. m.), Sulitjelma, Hallingskarvet, Seiland, Jökul. The **climate** of the W. ct. differs materially from that of the interior uplands, being modified by the sea, the prevailing SW. winds, and especially by the N. extension of the Gulf Stream. The annual mean of these maritime dists. varies from 36° F. (Tromsö) to 44.6° (Skudesnäs near Stavanger); that of January everywhere exceeds 32°, minimum 12°; that of July varies from 50.2° (North Cape) to 60.3° (Sogne Fjord), maximum 79°. In the interior the thermometer ranges from a summer mean of 63.5° (Christiania) to a winter mean of 11.3° (Röraas). The greatest extremes have been observed in Finmark, 96° and −58°, but the usual range in N. Nor-

way is from a winter mean of 2.5° to a summer mean of 57.2°. The rainfall on the W. coast averages 40–75 in., in the interior 12–16 (Christiania 26 in.). The **flora** consists chiefly of mosses, timber trees, wild berries, and cultivated plants. The pine, with the fir, birch, and oak, are the principal trees; willow, ash, elm, lime, alder, aspen, mountain ash, and bird cherry occur to a less extent. The commonest wild fruits are cloudberries, raspberries, bilberries, cranberries, and whortleberries. The **animal life** embraces the bear, lynx, wolf, glutton, elk, wild reindeer, lemming, fox, hare, numerous seafowl (especially the eider-duck), song-birds, waders, birds of prey, and game-birds (capercailly, woodcock), and in the sea, whales and seals. Gnats abound in N. Norway in summer. Only 2 per cent. of the total area is devoted to **agriculture,** fully 72 per cent. being barren mountain and moorland; oats, barley, and potatoes are the chief crops. The farms are mostly small, 94 per cent. being less than 50 ac. each; more than the half of the total number are farmed by their owners. Norway has in her **forests** one of her most valuable national resources. They cover 24 per cent. of her area. **Mining** products, mostly silver, copper, and sulphur pyrites, do not exceed £170,000 in annual value. Norway has another great resource in her **fisheries,** which give employment to little short of 100,000 men. Cod is the fish principally taken; it is mostly dried and sent to Spain. Next in importance come herring, ling, mackerel, salmon, sea-trout, and lobsters. Grayling and charr abound in certain lakes. The whale, walrus, seal, and shark are taken in the Arctic Ocean. Although not a **manufacturing** country, Norway has numerous saw-mills, machine shops, and foundries, spinning-mills, shipbuilding-yards, cellulose factories, brick-works, corn-mills, breweries, tobacco and match factories, and employs in all more than 50,000 operatives. **Communication** is principally maintained by steamboats, all the larger towns being either seaports or situated on navigable lakes. There are nearly 1000 m. of railways; the longest line connects Christiania with Trondhjem. Four separate lines connect Norway with Sweden, one in the extreme N. laid between Ofoten Fjord and Luleå. The driving roads, some of them fine pieces of engineering work, extend to 15,000 m.; and there are nearly 6000 m. of telegraphs. In respect of **shipping** Norway probably ranks next after Great Britain amongst the carrying nations of the world. She has a mercantile fleet of 7500 vessels, with an aggregate of 1,745,000 tons; and her shipowners earn 5½ millions sterling a year. Norway **exports** fish, timber and cellulose, oils and tar, minerals, paper, textiles, butter, &c., to the annual value of £7,000,000, fish alone to the value of 2½ millions, and timber to 1½ millions. Her **imports** reach an aggregate value of £11,000,000, and consist chiefly of grain, coffee, and other groceries, textiles, oils, minerals, ships, wine and spirits, timber (from Sweden), and coal. Trade is principally carried on with Great Britain, who takes 34½ per cent. of Norway's exports, and sends 26½ of her imports; with Germany (12½ per cent. of Norway's exports, 27½ imports); with Sweden (15½ per cent. exports, 13½ imports); and in a secondary degree with Denmark, the Netherlands, Russia, France, Spain, Belgium, and the United States. The **monetary** unit is the *krone*=1s. 1½d., divided into 100 *öre.* The metric system of **weights and measures** is employed. The **government** is nominally that of a constitutional monarchy, but virtually that of a republic, presided over by the king, who is also king of Sweden. The actual administration is in the hands of a minister, assisted by councillors (usually seven), who each take charge of a department. Besides, a second minister and two other councillors are always in attendance on the king when out of Norway. The parliament (Storthing), of 114 members, is elected indirectly by the people for three years, and divides itself into two chambers, the Odelsthing of 29 members and the Lagthing of the remaining 85. The **army** is made up almost entirely by conscription; all men of 23 years of age are bound to the colours for ten years, but are only called out for a few weeks' training every summer. The **fleet** embraces some 30 monitors, gunboats, torpedo boats, &c., in all. It is manned by the coast population, drawn by conscription from men between 22 and 35. The **population,** with the exception of 17,000 Lapps and 7400 Finns, are of Gothic (Teutonic) descent. The language is Danish, modified by dialectical words derived from the old Norse or Icelandic. From 11,000 to 20,000 persons emigrate every year, nearly all to the United States. The prevalent and almost universal creed is that of the Lutheran Church. For ecclesiastical purposes the country is divided into six dioceses—Christiania, Hamar, Christiansand, Bergen, Trondhjem, and Tromsö. Education is free, and compulsory upon all children between 7 and 14. There is one university, at Christiania. This city is the cap. of the country. Nine other **towns** have each a population exceeding 10,000, viz., Bergen, Trondhjem, Stavanger, Drammen, Christiansand, Fredrikstad, Fredrikshald, Larvik, and Christiansund. Five-sixths of the total population are classed as rural inhabitants. **History.**—The Germanic Goths, at some period which cannot be precisely fixed, crossed over into Norway and conquered or drove northwards the aboriginal Lapps and Finns whom they found there. From shortly after the middle of the 9th century down to the year 1319 Norway was ruled by native kings, and took an active part in the famous Viking expeditions to the British Isles and the Continent. From 1380 to 1814 Norway was virtually a prov. of Denmark, but at the latter date she was restored to independence, though united to Sweden. There is no adequate account of Norway in English; but see *Norway Illustrated* (Bergen, 1889), written in English by Norwegian scholars. There are ordnance maps on a scale of 1:100,000 and 1:400,000, but neither series is yet complete. [**J. T. B.**]

Norway, tn., U.S., Maine, Oxford co., 42 m. NW. Portland. P.<3000.

Norway, vil., U.S., Michigan, Menominee co., 3 m. E. Quinnence. P.<1500.

Norway House, stn., Canada, Keewatin, on an island in the E. branch of Nelson R., a little below the outlet of Lake Winnipeg, in 54° N., 98° W. Alt. 700 ft. Mean temp. (7 yrs.), yr. 29.8° F., Jan. −7.2°, July 63.5°.

Norwegian Sea, a name given by Professor Mohn of Christiania to the N. extension of the Atlantic Ocean which stretches between Norway and Greenland and between the Arctic Ocean and about 61° N. It is distinctly marked off from the main body of the Atlantic by a line of submarine ridges (average depth, 250 fathoms) extending from Scotland over the Færoe Is. and Iceland to Greenland. Between Spitzbergen and Norway the Norwegian Sea is divided from the Barents Sea by an elevation only 200 fathoms and less below the surface. In the extreme N., between Spitzbergen and Greenland, it communicates with the Arctic by a deep and wide trough, 2500 fathoms deep. The sea-bottom sinks by pretty regular gradients to 2000 fathoms in about 68° N. and 2½° W.; the greater part of the sea lies deeper than 1000 fathoms. Besides the islands already mentioned, it contains Jan Mayen and the island chains of Norway. A cold arctic current, coming from the direction of the North Pole, sweeps along the E. side of Greenland, carrying with it great masses of hummocky ice, which generally lies packed several miles wide against the coast of Greenland. In this part of the Norwegian Sea the prevailing wind comes from the NE. The E. side of the Sea presents a striking contrast to the W., in that the Gulf Stream traverses it from S. to N., entering between Scotland and Iceland, and clinging pretty closely to the coasts of Norway. Here the prevailing wind comes from the SW. The surface temp. ranges in summer from 60° F. in the S. to 47° in the N., and in winter from 46° in the S. to 36° in the N. As a general rule, the temp. at depths greater than 400 fathoms seldom if ever exceeds 32° F. This sea is the scene of busy fishings—seal and whale to the N., E., and W. of Jan Mayen; walrus and shark off Spitzbergen; cod, herring, mackerel, lobster, &c., off the coasts of Norway. Besides fish there are innumerable multitudes of sea-birds, as eider-ducks, gulls, guillemots, little auks, and others on Spitzbergen, the Norwegian islands, and the edges of the ice-floes. Compare **Atlantic Ocean.**

Norwich, vil., Canada, Ontario, Oxford co., 32 m. E. London.

Norwich (nŏr'ich; in Domesday *Noruic, Nordvic,* 'north place'), episcopal city, parl. bor. (2 members), mun. (since Henry II.) and co. bor., co. of itself, par., and market-tn., Eng., Norfolk, 114 m. NE. London, in the diocese of Norwich, on the Wensum, on the G. E. R. One of the earliest manufacturing towns, Norwich has declined in textile manufactures, the staple industries now being mustard and starch (employing over 2000 hands), brewing, and iron-works; also boots and shoes, vinegar, and agricultural implements. Norwich became a bishopric in 1094, and the castle dates still earlier. The diocese, P. (1891) 685,800, includes all Norfolk and the eastern half of Suffolk, with parts of three pars. in Cambridgeshire. There are interesting remains of the Romans and Normans, such as the Castle-keep, now converted into a museum, St. Andrew's Hall, the Devil's Tower, and portions of the old city wall. Nearly 200 ac. have been set apart for public recreation grounds. Fairs are held on Maundy Th., Easter M. and Tu., and 26th December. Market-days, W. and S. Alt. 42 ft. Mean temp. (20 yrs., 1861–80), yr. 49.4° F., Jan. 37.8°, July 62.4°. Mean rfall. (Cossey, 1866–80), yr. 27.2 in.; (Thorpe St. Andrew's, alt. 137 ft.) 29.2 in. Area of city same as parl. and mun. bor. (1891), 7558 ac. P. (1851) 68,200; (1871) 80,400; (1891) 101,000, nearly.

Norwich, city, U.S., Connecticut, co. and 12 m. N. New London, on both banks of the riv. Thames. The chief portion is on the sides and summit of the eminence between the Yantic and Shetucket Rivs., which here unite, forming the Thames; the business portion is at the base. W. Side or W. Chelsea is W. the Yantic. Greeneville, in the NE., contains one of the larges.

paper-mills in New England. The harbour is accessible by vessels drawing 10 ft. It has an important trade in coal, lumber, &c.; manufactures machinery, rolling-mill products, printing presses, and firearms. The manufacture of cotton goods is a leading industry. Settled in 1659, incorporated in 1784. P. (1880) 15,100; (1890) 16,200.

Norwich, vil., U.S., New York, cap. Chenango co., 41 m. N. Binghampton; has manufactures of hammers, silk ribbons, furniture, and gloves, and railway workshops. P. 5200.

Notre Dame Mountains, Canada, Quebec. See **Shickshock Mountains.**

Nottan, dist., New Guinea, in the W. of the extreme NW. penin.

Nottawa, vil., Canada, Ontario, Simcoe co., 4 m. S. by E. Collingwood.

Nottawasaga Bay, large bay, Canada, Ontario, in the S. of Georgian Bay; it receives at its head the **Nottawasaga R.** from the S.

Notte Canal, navigable canal, Prussia, Brandenburg, connecting the Dahme at Königswusterhausen with a small lake 25 m. S. of Berlin. Length, 16 m.

Nottingham (in Saxon times *Snottengaham,* 'home of caves,' referring to dwellings anciently hollowed out in the crags on S. side of the town on the banks of the riv. Leen), mun. bor. (since Saxon times), co. bor., and parl. bor. (three members), cap. of co., co. in itself, and market-tn., Eng., 110 m. NNW. London, in the diocese of Southwell, near the Trent, close to the S. end of the Yorkshire, Derbyshire, and Notts coalfield, on the M. R. and branches of G. N. R. and L. & NW. R. At one time it had a considerable woollen industry, but it has long been noted for its hosiery, which was first introduced about the close of the 16th century by one William Lee, who afterwards went to France on the invitation of Henry IV. Its staple industry at present is cotton hosiery, and Nottingham also is chief centre of net and lace manufacture. Nottingham occurs in Doomsday Book, a castle having been built by William I. Seat of a Roman Catholic bishop. It has excellent and extensive recreation spaces, *e.g.,* Bulwell Forest, 135 ac., and the public playgrounds, 150 ac. University College is a magnificent pile of buildings, including new technical schools. Nottingham Castle is now an art museum. There are many fairs. Market-days, M., W., and S.; the cattle-market occupying 7 ac. Parl. bor. P. (1891) E. div. 69,800, S. div. 62,000, W. div. 82,000; co., mun., and parl. bor. P. (1851) 57,400; (1871) 86,600; (1891) 213,900.

Nottinghamshire, or **Notts,** inland co., Eng., forming part of the Trent basin, divided into the parl. divs. mentioned in the following table:—

	Acres.	Pop. 1891.
Bassetlaw	205,389	51,572
Newark	183,963	50,035
Rushcliffe	89,128	64,603
Mansfield	50,337	65,736
Parl. bors.	10,935	213,877
Total (anct. and administrative co.)	539,752	445,823

Drained by the Trent and its tribs., the Erewash, Soar, Idle, &c., the surface varies from a flat alluvial valley as it rises through fertile and well-wooded land to Sherwood Forest in the W.

(600 ft. near Mansfield), and to the Wolds, or upland moors, in the extreme S. The geological basis consists of coal-measures (supplying over forty collieries), with some Permian rocks and New Red Sandstone and Lias. The coal-mines are at Nottingham, Eastwood, Basford, Bestwood, Kirby, Selston, Pinxton, Hucknall Torkard, Mansfield, and Shireoaks; blast-furnaces at Nottingham. Gypsum is worked at Nottingham, Gotham, Elton, and Newark. The soil is mostly gravel and sand, which, in the Trent valley, underlies a rich mould. For agricultural statistics, see **Appendix,** pp. 7–9. The chief manufactures are hosiery and lace, this county having for more than a century been the centre of the former trade. The M. R., G. N. R., L. & NW. R., and M. S. & L. R. cross this county in various directions. Many names of places are Danish, and several sieges and battles give the district a place in our history. The county contains 4 mun. bors., and comprises parts of the dioceses of Southwell and York. See **England,** table.

Notting Hill, W. suburb of London, Eng., 4 m. W. St. Paul's, with stns. on the District and Metropolitan Rly. (Notting Hill, Ladbroke Grove on the Outer Circle, **Notting Hill Gate** on the Inner).

Nova Friburgo ('New Freiburg'), German colony, Brazil, state and 53 m. NE. Rio de Janeiro. Alt. 2874 ft. Mean temp. (4 yrs., 1882–86), yr. 63.8° F., Feb. 68.6°, July 57.8°.

Novaia, Novaya, Slavonic, 'new.' See *Neu.*

Novara, the ancient *Novaria,* tn., Italy, Piedmont, cap. prov. Novara, 27 m. W. Milan. Its cathedral, dating from the 5th century, was rebuilt in the 11th century; the dome is of the 17th century. Ceded to the House of Savoy in 1735. Charles Albert was here defeated, March 23, 1849, and abdicated in favour of his son, Victor Emmanuel. P. 15,200.

Novara, tn., Sicily, prov. and 26 m. SW. by W. Messina. P. <4000.

Novar, stn., Scot., Ross-shire, on the H. R., on the Glass, 6 m. NE. by N. Dingwall.

Nova Scotia (with New Brunswick, the **Acadia,** or **Acadie,** of the early French settlers), penin. of N. America, on E. side, forming with the isl. of Cape Breton (*q.v.*) a prov. of the Dominion of Canada, stretching NE. and SW. between 43° 25′–47° N., 59° 40′–66° 25′ W., connected NW. with New Brunswick by an isthmus 14 m. across, separated on the N. from Prince Edward I. by Northumberland Strait, and by the narrow Gut of Canso from Cape Breton on the NE., having on other sides the Atlantic and the Bay of Fundy. Its position, farther E. than any other portion of the N. American continent except Labrador, marks it as the great natural highway for travel between Europe and America. Length about 300 m.; area about two-fifths that of England; cap. Halifax, on E. ct. Surface much diversified; highest in the N., where the Cobequid Mts. rise to 1200 ft. Rivers and lakes are numerous; the former are generally short, but usually navigable for a few miles by coasting craft; the principal rivers are Annapolis and Shubenacadie, flowing into the Bay of Fundy; St. Mary's, Musquodoboit, and La Have to the Atlantic; Rossignol, the largest lake in Nova Scotia proper (20 m. in length), and Ship Harbour lake (15 m.). Shores irregular, abrupt, and indented by numerous bays and harbours, with deep water close to land; principal inlets St. George's and Chedabucto Bays in NE., Halifax Harbour, St. Margaret's, and Mahone Bays in S., St. Mary's, Minas with Cobequid and Townsend Bays, and Pictou Harbour on N. ct. The forests of Nova Scotia abound in good timber, ash, beech, birch, maple, oak, pine, and spruce being the commonest. Among the native quadrupeds are the moose, caribou, bear, fox, marten, otter, minx, hare, racoon, beaver, &c.; feathered game is plentiful. Cattle are extensively reared for slaughter, but dairy-farming is limited. In the value of its fisheries Nova Scotia ranks first amongst the provs. of the Dominion; mackerel, herring, cod, haddock, halibut, pollock, gaspereau, salmon, and shad are taken in large numbers. Climate remarkably healthy, and more equable than that of any other prov. in the Dominion, but the Atlantic coast is subject to dense fogs. The W. half of the prov. is more fertile than the E. Around the head of the Bay of Fundy and its branch, the Bay of Minas, are extensive 'dyke-lands' or 'salt marshes,' tracts of marine alluvium deposited by the tides; these lands, which have been reclaimed and protected by broad mud dykes, produce enormous crops of 'salt hay' and cultivated grasses. Of cereals the most widely cultivated is oats, but wheat, barley, rye, maize, and buckwheat are grown, as also various root-crops. Much attention is paid to the cultivation of fruit (chiefly in Annapolis, King's, and Hants cos.), and the Annapolis valley especially is famous for the excellence of its apples, which are exported in considerable quantities. Peaches, plums, cherries, small fruit, pumpkins, melons, and tomatoes grow abundantly, and find a ready market in Boston and other towns on the E. ct. of the U.S. Minerals are very important; they include coal, worked chiefly in Cumberland, Pictou, and Colchester, and in Cape Breton; gold (Stormont, Oldham); iron (Londonderry and Ferrona); copper (Coxheath, &c.); gypsum (Windsor, Nova Scotia, Mabou, and Baddeck, in Cape Breton); excellent building-stone and grindstone, found chiefly at Amherst. Shipbuilding, formerly important, has declined since the introduction of iron ships, and manufactures generally are as yet little developed. The principal exports are fish, coal, and other minerals, and lumber. Besides the Intercolonial and C. P. Rlys., which afford direct communication with the Pacific coast, Nova Scotia is intersected by various lines, extending from Sydney to Yarmouth, and a ship railway across the isthmus of Chignecto is in course of construction. St. Peter's Canal unites the Bras d'Or lake with the Atlantic. Area, 20,600 sq. m. P. 450,396. See **Cape Breton, Canada, Dominion of,** table. (*Report on the Mines of Nova Scotia,* Halifax, 1893.)

Novaya Zemlya (**Nova Zembla,** 'New Land'), large isl. surrounded by many small ones, Russia, Arctic Ocean, 70° 30′–77° N., 52°–69° E.; has the shape of an elongated crescent, 600 m. in length, 60 m. average width, separates the Arctic Ocean (Barents's Sea) from Kara Sea. Its southern part appears as a continuation of Vaigach I., from which it is separated by Kara Strait. Novaya Zemlya is cut through about its middle by a narrow strait, Matochkin Shar. W. ct. much indented, with many islands along it, the chief bays being – Sakhanikha, Kostin Shar in S. and Möller Bay in N. of Goose Land, Marquis de Traversé Bay, and Nordenskjöld Bay. The N. end is named Barents's Land, and terminates in Cape Mauritius. Mezhdusharskiy, Gorbovyie, Pankratiev, and Gulfstream Is. along W. coast, and Pakhtusov I. near E. coast, are the chief islands. S. part occupied by a plateau, with parallel ridges about 2000 ft. high; middle part alpine highlands, with peaks 3200–4650 ft.; much lower and massive farther N., where it is covered by an ice-sheet. Built up of Archæan granites and schists, Silurian or Devonian limestones, and Jurassic clay-slates, which are covered in places with Eocene deposits testifying to a warmer climate. Climate colder than even that of Spitzbergen, the average yearly temp. on the W. coast being 17° near

Matochkin Shar (winter 4°, summer 36.5°), 15° at Kamenka further S. (70° 35′ N.), and 19.6° at Melkaya Guba (73° 55′ N.); still lower by about 2° in corresponding latitude on E. coast. The influence of a warm continuation of the Gulf Stream is felt on the W. coast. There are years when the island has been circumnavigated without difficulty. Vegetation very poor. The brown and white bear, the common and polar fox, the wolf, and various species of mice and lemmings, as well as several species of birds, stay in the island, while countless ducks, geese, swans, and sea-birds come to nest. Walruses, seals, and dolphins swarm along the coasts, and, together with the birds, attracted in the 16th century numerous hunters, who often wintered in Novaya Zemlya. The pursuit has fallen off lately, but still nearly 2000 hunters come together every year in the neighbourhood of Cape Voronov. Whale hunting was attempted lately. A permanent settlement of a few Samoyede families has been established of late at Karmakuly, in Möller Bay. Visited by Sir Hugh Willoughby (1553), Burrough (1556), and Barents (1594), and explored by Count Lütke (1821–24), and in recent years by several expeditions; crossed by Grinevetskiy (1878) in the E. of Karmakuly. Area, 35,163 sq. m.

Novgorod, govt. of NW. Russia, has St. Petersburg and Olonets in the W. and N., Vologda, Yaroslav and Tver in SE., and Pskov in SW. Its S. part is occupied by Valdai plateau, 800 to 1000 ft. high, which steeply descends towards Lake Ilmeñ in W., while in NE. it gently slopes towards Lakes Ladoga and Onega, and is dotted with over 3000 lakes (Byelo Ozero, the largest) and marshes, some of them 350 to 400 sq. m., covered with thin birch and elm forests. Built up of Devonian and Carboniferous deposits, covered with boulder-clay. Contains the upper parts of rivers flowing to the Caspian, the Baltic, and the White Seas, connected by canals. Chief rivs.: Volkhov, which flows from Lake Ilmeñ into Ladoga; Syas, trib. of Ladoga; Sheksna and Mologa, tribs. of Volga. Climate harsh, the average temp. at Novgorod being, yr. 39°, Jan. 14.5°, July 62.5°. Agriculture and cattle-breeding not very profitable; manufactures few; petty trades in villages; considerable fisheries in lakes. People, Great Russian. Divided into eleven dists.: Novgorod, Borovichi, Byelozersk, Cherepovets, Demiyansk, Kirilov, Krestsy, Staraya, Russa, Tikhvin, Ustyuzhna, and Valdai. Area, 47,236 sq. m. P. (1870) 1,011,500; (1890) 1,254,900.

Novgorod, cap. of above govt., 119 m. S. of St. Petersburg, on Volkhov, 2 m. below its issue from Lake Ilmeñ, 45 m. by rail from Chudovo stn., on St. Petersburg-Moscow Rly. Old city, which exercised a supremacy over the Russian town, in the 9th century. From 997 it was under the rule of its own *vyeche*, elected its own princes, and often refused to have any, remaining then under the rule of its elected mayor (*posadnik*). The city had in the 14th century a population of about 100,000 inhabitants, and carried on a considerable trade, entering into the Hansa, and maintaining its independence against the Germans and the Swedes. Was conquered and devastated by the Moscow Tsars in 1570. Consists now of the old Kreml and the city, on both banks of the river. The Kreml contains many historical relics (cathedral of St. Sophia, Yaroslav's Tower, &c.), dating from the 11th century. Mean temp., yr. 39.6° F., Jan. 17.0°, July 64.8°. P. 24,850.

Novgorod Bay, Russian Manchuria, in Gulf of Posiet; excellent anchoring place; some coal extracted at Russian port.

Novgorod Syeversk, dist. tn., Russia, govt. and 113 m. ENE. Chernigov, on r. bk. of the navigable Desna. Old town, of importance in 11th century, conquered by Lithuanians in 14th century, annexed by Russia in 1654. Trade in hemp, flax, and timber. P. 8120.

Nûba, vil., Palestine, perhaps the *Nebo* of Ezra xi. 29 and Nehemiah vii. 33, 31° 37′ N., 35° 2′ E., 7 m. NW. by N. El Khuíl (ancient Hebron).

Nuba, tribe, E. Sudan, principally S. of Kordofan.

Nubeena, post-tn., Tasmania, co. Pembroke, 25 m. E. Hobart. P. <1500.

Nubia (name probably derived from the Old Egyptian *naub* or *nub*=gold, on account of the ancient gold-mines of Nubia), country in NE. Africa, on both sides of the Nile (*q.v.*), between the Egyptian frontier and Khartum, and between the Red Sea and the Libyan Desert. The fertile parts of Nubia are limited to the Nile valley, the rest of the country consisting of deserts, viz., E. of the Nile the Nubian Desert, and W. of it the desert El-Jezira, and S. of the latter the Bayuda Steppe. Agriculture (durrah, maize, wheat, barley, beans, &c.) is of importance in the Nile valley; and pastoral pursuits (cattle, camels, horses, goats, &c.) form the occupation of the nomadic tribes on both sides of the Nile. The inhabitants are of Hamitic-Semitic origin—Berâbra, Shaikiyeh, Robatat, Jâlin, Ababde, Bisharin, Hadendoa, and Kababish tribes. Staple products are gum, dates, and ivory. The gold mines of Nubia, which were very productive in antiquity, have long since ceased to yield any output. Three caravan routes through the desert are of importance, viz.: (1) from Sawâkin (Suakin) to Berber; (2) from Korosko to Abu Hammed; (3) from Ed-Debbeh to Omdurman. Many ancient ruins are met with from the Egyptian frontier to Khartum. Principal towns: Omdurmán, Khartum, Shendi, Berber, Abu-Hammed, Old Dongola, Kasr Dongola, and Kaibar. Area estimated at 280,000 sq. m.; P. at 1,000,000. See **Egypt, Nile, Sahara.** [**H. G. S.**]

Ñuble, prov., Chile, just S. of 36° S., and crossed by 72° W.

Nubra, riv., Ladakh, flows SE. from the Karakoram range into the Shyok, which it enters in about 77° 38′ E. Its valley is ascended by the winter route from Leh to the Karakoram Pass. *Jour. R. G. S.*, 1878, pp. 175–76.

Nuratyn-tau, mts., Russian Turkistan, partly on frontier with Bukhara, shoot north-westwards from W. Tian Shan system between the lower Syr and Amu; named Mal-Guzar at their SE. extremity.

Nurbuddah, riv., India. See **Narbadá.**

Nuremberg, German **Nürnberg,** city, Bavaria, the commercial cap. and cap. circle, in a sandy but productive plain, prov. Mid Franconia, 95 m. NW. Munich; divided by the riv. Pegnitz (sub-trib. of the Main) into the Lorenzerseite and the Sebaldserseite, named from two principal churches (St. Lawrence and St. Sebald). It still retains its ancient walls and moat, with interesting remains of some of the old gateways and many of the old towers. The general architecture is Gothic, most of the private houses being of the 16th century, and some 15th century. The castle, on a picturesque rock to N., was a favourite residence of the emperors of Germany, the regalia being kept here from 1424 till the overthrow of the empire by Napoleon. Nuremberg was the seat of the 1st Diet in 938, and in 1525 was first of the imperial towns to embrace Protestantism. Public buildings—the Renaissance town-hall, the law courts, gymnasium (with statue of Melanchthon, the founder, in front), two museums, library of 80,000 vols. and 800 MSS. The history of Nuremberg contains much of the history of Germany; at the beginning of the 15th century its 'burggraves' ranked as princes of the empire. Its wealth was owing largely to the transit trade from Italy and the Levant to the N. of Europe, a monopoly greatly reduced by the discovery of the Cape passage to Asia, and afterwards by the Thirty Years' War. It is still important, however, from its manufactures of fancy articles in metal, ivory, carved wood, &c., 'Dutch' toys and clocks, lead pencils, railway plant, also brewing and lithography; chief hop-market on the Continent. Nuremberg exports largely to India and America, and imports colonial produce from the Netherlands. Communication by various railways, and by the Ludwig Canal, which joins the Danube to the Main and the Rhine. P. anciently said to be 150,000; (1840) 46,800; (1871) 83,214; (1892) 142,600, of whom 104,400 were Protestants.

Nyassa, or **Nyasa** (the Yao form of **Nyanja,** or **Nyanza,** from Bantu root *anza,* meaning 'lake,' 'a large sheet of water'), lake, SE. Africa, between 9° 30′ and 14° 25′ S.; length about 400 m.; average width, 25 m.; drained S. by the Shire into the Zambezi.

At the **N.** end shallow, and abounding in sandbanks owing to the large amount of sediment carried into it by six large rivers; further S. much deeper; in places no bottom found at 200 fathoms. Level highest in April and May, lowest in November and December; difference little more than 3 ft. If its surface were raised 100 ft. above its present level, its waters would fill the valley of the upper Shire, and flow into Lake Chilwa. Alt. 1570 ft. The Stevenson Road connects the N. end of the lake with the S. end of Lake Tanganyika. See **Nyassa-land.**

Nyassa-land, important part of Brit. Central Africa, comprising the terrs. round the S. and W. shores of Lake Nyassa, and thence to Lake Tanganyika and the upper Congo (Luapula). Extensive plateaux with mountains superimposed, rising to alts. of from 6000 to 10,000 ft., and broad valleys and plains, are the characteristic features of these vast terrs. The highest point, situated S. of Lake Nyassa, is the picturesque granite peak of Mount Mlanji (10,000 ft.). Other mountains of importance are the Zomba Mts. (Nyenyesi, 6900 ft.), in the Shire highlands; the Kirk range (Mount Deza, 7000 ft.; Mount Chongoni, 7000 ft.), near the SW. end of Lake Nyassa; the Nyika Plateau and the Konde Mts. (6000–7000 ft.), both near the NW. end of Lake Nyassa; Mount Sunzu (7000 ft.), S. of Lake Tanganyika; and the Mushinga Mts. (5000 ft.), which form the edge of the high plateaux on the western side of the Luangwa valley. Principal **rivers:** Shire (navigable all the year round from Chikwawa, below the Murchison Falls, to its mouth), Luangwa (tribs. of Zambezi), Luapula – Chambezi (upper Congo). Lakes: Nyassa (*q.v.*), Malombe, Chilwa, Tanganyika (*q.v.*), Mweru, Salt Lake Mweru, Bangweolo, and Moir. The **inhabitants** are all Bantu (*q.v.*) tribes: Manganja, Asenga, Angoni, Awemba, Atonga, and many others. The natural resources of the country are many, and capable of great development. As regards **minerals,** the country is known to be rich in iron ores, which occur at various places; coal is found on the NW. shores of Lake Nyassa; gold is known to be present in the mountainous region along the SW. border of the country, and also in the Marimba dist., on the SW. ct. of Lake Nyassa, and is said to exist in the Luangwa valley. Natives and Arabs affirm that much copper is found in the mountainous dists. between Lake Bangweolo and the Luapula R., as well as SW. of the latter, in the region where the Kafue R. takes its rise. Graphite exists in the hills W. of the lower Shire. The **fauna** is very rich, and the export of ivory and hides is of considerable importance, and capable of great development. Cattle-rearing and horse-breeding are of importance in all those parts of the country which are free from the tsetse fly (*q.v.*). According to H. H. Johnston, almost all terrs. above 3000 ft. alt. are free from this pest, and consequently fit for cattle-rearing. Goats and sheep (merino sheep introduced at Zomba) are likewise of importance. Agricultural products: The chief staples of native food-supply are maize, durrah, millet; sesamum, sweet potatoes, peas, and beans are likewise cultivated in large quantities. The sugar-cane is grown in most of the river valleys, and also on the shores of the lakes. The greater part of the country is admirably adapted by soil and climate to the cultivation of coffee, which has become of great importance in the Shire highlands. Ground-nuts are grown in some dists., and the greater part of the country is well adapted for their cultivation. Summing up, it may be said, according to Johnston, that the extensive range of temperature over this part of Africa permits of the cultivation of almost all the products of the temperate, sub-tropical, and tropical regions. European **settlements** have been made in this region with great success. British missionaries have established many stations in the Shire highlands, on Lake Nyassa, and in the terrs. W. of it. Steamers ply on the great lakes and on the riv. Shire; and carriage-roads have been constructed S. of Lake Nyassa. Blantyre (cap. of Nyassa-land; P. 4000), Zomba (seat of administration), Port Herald, Chiromo, Fort Johnston, and others, are flourishing settlements. Custom-houses and post-offices exist; and the country is governed (by an Imperial Commissioner) very much after the manner of a crown colony. Many forts have been built as far westward as the Luapula R. Principal **exports,** ivory, coffee, oil-seeds, strophanthus, indiarubber, bees'-wax, hippopotamus' teeth. Chief **imports,** textiles, provisions, hardware, machinery, agricultural implements. The climate, especially in the mountainous dists., is healthier than in many other parts of central Africa. Nyassa-land was declared to be within the British sphere of influence in 1889. Area estimated at 210,000 sq. m. P. estimated at 2½ millions. **[H. G. S.]**

Oaxaca (Spanish form of Aztec *Huaxyacac,* 'at the end of the acacias'), declining tn., Mexico, cap. of O. state, 230 m. SSE. Mexico, on the Rio Verde. First settled by soldiers of Montezuma in 1486, when they cleared part of the acacia forest and founded a regular town (Egli). P. (1889) 27,900.
Oaze Deep, channel in Thames estuary, 6 m. E. of the Nore.
Ob, ober, German, 'over;' Dutch, 'upper.'
Ob' (Tatar **Omar,** Ostyak **As,** or **Yag**), riv., W. Siberia, originates in Altai region from confluence of Biya and Katuñ, flows with great windings, generally speaking N., past Barnaul and Kolyvañ till its junction with the Tom', then NW. and W., receiving the Chulym and many other large tribs., till its junction with the Irtysh, and then N. and E., subdividing into several branches, till its entrance into the large Ob Bay. Its total length, taking the Katuñ for its source and adding the length of the Ob Bay, is 3235 m.; while its second branch, the Irtysh, has alone a length of 2310 m. The total area of its basin is 1,150,870 sq. m. This immense river is navigable throughout its length, steamers plying as far as Biysk in the Altai. At Barnaul it is free from ice for 198 days, from April 27 to Nov. 11. In its lower course it inundates its banks, attaining a width of 27 m. Considerable fishing, especially in lower course. Regular steamer navigation between Tyumeñ, Tomsk, and Biysk, and up the Irtysh (*q.v.*) and Ishim. The **Ob Bay** has a length of over 450 m., and a width of from 60 to 70 m.; depth from 2 to 15 fathoms. The Yalmal Penin. separates it from Kara Sea, and another penin. separates it from the Yenisei Bay, while the large Tazovskaya Bay joins it from the right.
Obama, vil., Japan, Honshiu, 35 m. N. Kyoto; much frequented on account of its mineral waters. P. 9600.
Oban, tp., New Zealand, on the NE. ct. of Stewart I., 35 m. S. by W. Invercargill. P. <1500.
Oban, parl. burgh [Ayr] and seapt. tn., Scot., Argyllshire, on the Sound Kerrera, 20 m. NW. Inveraray, on the C. R. It has an excellent harbour; the pier is 250 ft. long, and about 30 ft. wide, and the bay has a depth of from 12 to 24 fathoms water; great tourist resort. Parl. burgh P. <4500; tn. P. <5000.
Obarenes, mts., N. Spain, in N. of Old Castille, adjoining the Basque Provs., with the famous defiles of Pancorbo (*q.v.*).
Obbe, vil., Scot., Inverness-shire, Harris par., Outer Hebrides, PMT.O.
Obbo, former Egyptian post, E. Sudan, 78 m. SE. Lado.
Obdorsk, tn., Russia, W. Siberia, govt. and 1070 m. N. Tobolsk, on r. bk. Ob, 80 m. from its entrance into Ob Bay; centre for trade with Ostyaks; fishing. The whole region in the W. of it is known as O. region; it is intersected by the O. Mts., part of the Urals, which have a NE. direction, and attain a maximum alt. of 5286 ft. Mean temp., yr. 18.5° F., Jan. 14.8°, July 56.0°.

Obidos, vil., Brazil, Grão Pará, on the l. bk. of the Amazon, in 55° 32′ W. P. from 1000 to 4000.

Obidos, tn., Portugal, dist. and 31 m. SW. Leiria. P. <4000.

Obion, co., U.S., Tennessee, in the NW., on the N. frontier, crossed in the E. by 89° W.

Obir, peak of the Karawanken Alps, Austria, Carinthia, in 46° 30′ N., 14° 17′ E., 12 m. SE. Klagenfurt, with meteorological station on summit. Alt. (stn.) 6706 ft. Mean temp. (8 yrs., 1879–86), yr. 32.6° F., Jan. 19.2°, July 48.4°.

Obisary, Loch, very irregularly-shaped inlet, Scot., Inverness-shire, in the SE. of North Uist, opening N. into Loch Eford.

Obispito, small port or roadstead, N. ct. of Chile, prov. Atacama, in 26° 44′ S.

Obispo, tn., Venezuela, Zamora, 270 m. SW. Carácas.

Oblak, comm., Austria, Carniola, dist. Loitsch, 20 m. S. Laibach. P. <5000.

Obley, post-tn., New South Wales, Gordon co., 80 m. NW. Bathurst; has copper-mine near. P. <1500.

Obok, or **Obock,** French colony and protectorate, E. Africa, on the Gulf of Aden, taking its name from a village at mouth of the Gulf of Tajurra, N. side opposite Zeila, in 11° 57′ N., 43° 7′ E. Now serves as a military post and coaling station. Harbour safe, and easily accessible, though not spacious. It was ceded to France in 1862, but not actually taken possession of till 1881. Submarine cable to Jibuti proposed.

Oboop, settlement, Cape Colony, dist. Calvinia, on the l. bk. of the Orange R., 98 m. NE. by E. Ookiep.

Oborne, par., Eng., Dorsetshire, N. div., 1½ m. ENE. Sherborne, P.O. P. <250.

Obornik, tn., Prussia, prov. Posen, on riv. Warthe, 16 m. N. by W. Posen, cap. circle O. P. <3000.

Oboyañ, dist. tn., Russia, govt. and 42 m. S. Kursk; trade in hides and tallow. P. 9900.

Obra, riv., Prussia, prov. Posen, rises in the SE. of the prov., flows first on the whole W., traversing the **O.-Bruch,** a marshy tract about 31 m. long, 5 m. broad, and 127 sq. m. in area, drained 1850–60, and connected by different canals with the Warthe on the E. and the Faule Obra on the W., and then flows N. and NW., finally entering the Warthe at Schwerin. Navigable from Bentschen by boats, which, however, are prevented from entering the Warthe by the Warthe-Mühle (mill).

Obra, Faule, small riv., Prussia, enters the Oder on the r. bk. a little to the N. of 52° N.; navigable by boats from Ruden, 18½ m.

Obraje, vil., Mexico. See **San Felipe del Obraje.**

Obree, Mount, Brit. New Guinea, in the Owen Stanley range, in about 9½° S., 148° E. Alt. 10,246 ft.

O'Brennan, par., Ire., co. Kerry, bar. Trughanacmy, 5 m. NW. Tralee; 6547 ac. P. <750.

Obrenovac, tn., Servia, prov. Šabac, on the Kolubara, 16½ m. SW. Belgrade. P. <3000.

Obrez, tn., Servia, on the l. bk. of the Morava, prov. and 27 m. SE. by E. Kraguyevatz. P. <3000.

O'Brien, co., U.S., Iowa, crossed in S. by 43° N., and E. of 96° W.

O'Briensbridge, par. and tn., Ire., SE. co. Clare, bar. Lower Tulla, 4½ m. SSW. Killaloe, on r. bk. of the Shannon, 3 m. from Birdhill stn., P.O. (**O'Brien's Bridge**). Par. 11,369 ac., P. <2000; tn. P. <250.

O'Brien's Bridge, stn., Tasmania. See **Glenorchy.**

Obrighoven-Lackhausen, vil., Prussia, Rhine Prov., govt. Düsseldorf, circle and 119 m. SW. Rees. P. (comm.) <3000.

Obrovazzo, Slavonic **Obrovac,** vil., Austria, crownland Dalmatia, 23 m. E. by N. Zara. P. <2000; comm. P. 12,300.

Observation, Mount, coast eminence, Argentine Republic, E. Patagonia, landmark for sailors, in 50° 31′ S., where Lieutenant Skyring, a member of Fitzroy's surveying expedition, in the *Adventure* and *Beagle*, in Feb. 1828, established one end of his base-line.

Obshchiy Syrt, plateau, E. Russia, which stretches SW. from S. Urals, between the Volga and Ural Rivs. Its highest points are 1740 ft. and 2030 ft. above the sea.

Obstruction Island, small isl., U.S., Washington, at entrance to Puget Sound, with fixed white light.

Obstruction Sound, inlet in the S. of Chile, running S. from Worsley Sound, in 72½° W., between about 52° and 52½° S.

Obuñ, vil., E. Sudan, about 115 m. S. of Lado, 56 m. SSW. of Dufile.

Obukhov, tn., Russia, govt. and 27 m. S. Kiev. P. 5200.

Obva, navigable riv., NE. Russia, govt. Perm, r. bk. trib. of Kama; valley well peopled. Length, 150 m.

Oby, part of par., Eng., Norfolk. See **Ashby.**

Ocala, city, U.S., Florida, Marion co., 95 m. SSW. of the mouth of St. John's R. P. <3000.

O'Callaghan's Mills, tn., Ire., NE. co. Clare, bar. Lower Tulla, 10 m. WNW. Killaloe, 8 m. from Sixmilebridge stn., P.O. P. <250.

Ocampo, sugar-growing colony, Argentine Republic, terr. of the Chaco, on the r. bk. of Rio Paraná, 78 m. SW. by S. Corrientes. P. <2000.

Ocampo, Canal de, channel, Cuba. See **Nicholas Channel.**

Ocaña, tn., Colombia, Santander, 220 m. SE. Cartagena; picturesquely and healthily situated. Alt. 3820 ft. P. 8000.

Ocaña, tn., Spain, prov. Toledo, cap. dist. O., 7 m. SE. by S. Aranjuez. Here the Spaniards were defeated by the French, Nov. 19, 1809. P. (comm.) 6000.

Ocate, tn., U.S., New Mexico, Mora co., 70 m. NE. by E. Santa Fé. P. <1500.

Occhieppo Inferiore, tn., Italy, Piedmont, prov. Novara, 3 m. SW. Biella; the Elvo supplies water-power for cotton-mills and other works. P. <3000.

Occidental, Villa. See **Villa Hayes.**

Occimiano, vil., Italy, Piedmont, prov. Alessandria, 18 m. S. by E. Vercelli. P. <3000.

Occold, par., Eng., Suffolk, div. and 2 m. SE. Eye, P.O. P. <750.

Occum, settlement, U.S., Connecticut, New London co., 5 m. N. Norwich.

Ocean, Paanopa, or **Banaba,** isl., Gilbert Archipelago, in 0° 52′ S., 168° 24′ E.; shark fishing carried on. Area, 10 sq. m.

Ocean, small islet in the NW. of the Hawaiian (Sandwich) group, in the N. Pacific, in about 28½° N., 178° W.

Ocean, co., U.S., New Jersey, on Atlantic, crossed by 40° N.

Oceana, co., U.S., Michigan, on Lake Michigan, S. of 44° N.

Ocean Beach, vil., U.S., New Jersey, Monmouth co., on the coast, 35 m. S. Brooklyn; sea-bathing resort. P. <1500.

Ocean City, vil., U.S., New Jersey, Cape May co., at the entrance to Great Egg Harbour, 54 m. SE. by S. Philadelphia (Pa.). P. <1500.

Ocean Grove, tn., U.S., New Jersey, Monmouth co., on the coast, 35 m. S. New York; summer resort; noted place for Methodist camp-meetings. P. <3000.

Ocean Grove, post-tn., Victoria, Grant co., on riv. Barwon, in 38° 15′ S. and 144° 30′ E. P. <1500.

Oceania, the central parts of the Pacific, lying E. of Japan, the Philippines, the Moluccas, and Australia across to the American coast. In a wider, but little used, sense it includes Australia and New Zealand, and even the Antarctic lands.

Oceanic, vil., U.S., New Jersey, Monmouth co., 20 m. S. Brooklyn, on Navesink Bay. P. <1500.

Oceans, the largest divisions of the waters of the globe are not sharply distinguished from the smaller divisions known as seas. The *Antarctic Ocean* is bounded by the Antarctic Circle in 66½° S. lat., and occupies the whole submerged area within that circle [see **Antarctic Regions**]. From the Antarctic Circle three great arms extend northwards, the *Atlantic Ocean* between 10° E. and 60° W. long., the *Pacific Ocean* between 80° W. and 150° E. long., and the *Indian Ocean* between 110° E. and 40° E. long. The two former are continued to the Arctic Circle, where they are connected by narrow openings with the *Arctic Ocean*, and the last is bounded in about 20° N. lat. by the southern coast of Asia. It is for many purposes convenient to treat as a separate division the belt between the Antarctic Circle and 40° S. lat., in which the only land is the extremity of S. America; this is usually termed the *Southern Ocean*.

The great continental elevations are continued southwards from Africa, Australia, and S. America in the form of submarine ridges, over which the depth of water never exceeds 2000 fathoms. These ridges, separating the great oceanic basins, unite in the Antarctic elevation. Conversely, the channels at the northern extremities of the Atlantic and Pacific Oceans unite in the Arctic depression. In the Atlantic, and to a less marked extent in the Pacific, submarine ridges traverse the longitudinal median line of the main basin, and the greatest depths occur at each side near the continental coasts. The floor of the Indian Ocean slopes gradually down from the African-Antarctic ridge towards the NE., and is deepest in the angle between Java and Australia. Various estimates of the **area, volume,** and **depth** of the great ocean basins have been made by Murray, Supan, and Von Tillo, and the results differ chiefly through different assumptions of the angle of slope of the ocean bed.

	Arctic Ocean.	Atlantic Basin (with Arctic).	Pacific.	Indian.	Southern and Antarctic Ocean.	Total.

Employing a method originally applied by Krümmel, Karstens has recently obtained the following results:—

	Atlantic with Arctic.	Indian Ocean.	Pacific Ocean.	Ant-arctic.	Total.
Area (millions of sq. m.)	39.69	28.60	67.77	6.04	142.10
Volume (millions of cub. m.)	77.97	63.85	161.26	5.63	308.71
Mean depth (fathoms)	1728	1965	2094	820	1912

Murray found that 42 per cent. of the waters of the globe lie between the surface and 1000 fathoms, 56 per cent. between 1000 and 3000 fathoms, and 1 per cent. below the latter depth. Mill calculated that the volume of water below the level of 1700 fathoms (*mean sphere level*) is equal to the volume of land above it, and obtained the further remarkable result that the area above that plane is equal to the area below it. Von Tillo, who has computed the mean depth of the oceans in belts of 10° of latitude, points out that the greatest mean depths occur about 30° N. and S. of the equator, coinciding with belts of greatest atmospheric pressure and greatest salinity.

The **solids dissolved** in ocean water are nearly the same in all parts of the world, and their relative proportions are practically constant. About 88.3 per cent. consists of sodium and magnesium chlorides, 10.8 per cent. of sulphates, 0.3 per cent. of carbonates, and the remaining 0.6 per cent. of other salts in small quantities. The proportion of all these solids in a given weight of sea water varies within narrow limits, averaging about 3½ per cent. Atmospheric gases are dissolved to a considerable extent. The compressibility of sea water is at ordinary temperatures about 92 per cent. that of fresh water.

Under the attractive influence of the sun and moon a **tidal wave** is formed in the ocean, the influence of the moon being the greater of the two (approximately in the ratio of 11 : 5), inasmuch as the tide-forming power of the heavenly bodies depends on the difference between the attraction exercised on the side of the earth turned towards them, and on the side turned away, and so diminishes according to the cube of the distance, while it increases with the mass. Theory shows that in a narrow canal surrounding the earth at the equator (1) if there were no friction it would be low water under the attracting body, and high water in quadratures; (2) friction accelerates the times of high and low water; (3) a constant westerly current is produced by the attractive action, which (4) by friction tends to increase the period of the earth's rotation or the length of the day. The configuration of the land prevents the complete formation of the tidal-wave, except in the open Pacific and the zone of the Southern Ocean, and from these it is deflected northward. The tidal-wave moves fastest, is of greatest length and least amplitude in deep water. On entering shallow water its under side suffers the greatest retardation, and a *tidal surface current* is produced. In an open channel the flood-current continues to run for nearly three hours after high water, and the ebb for a similar time after low water. In proportion as the channel is obstructed at the further end, the current runs for a shorter time after high or low water; and in a closed creek the current turns with the tide. Spring tides, which have the greatest amplitude, occur at new and full moon; and neap tides, which have least amplitude, at quadratures. The interval by which high water follows the moon's transit on days of full and change is constant

for any given seaport, and its amount is called the 'establishment of the port.'

Oceanic currents are produced solely by atmospheric influences acting on the surface, and their directions are largely controlled by the configuration of the land and by the earth's rotation. Conditions of temperature, evaporation and rainfall, give rise to inequalities of density and level, but by far the most potent factor is the direct frictional action of the wind. When the prevailing wind is *towards* the shore, the surface water is heaped up and escapes laterally; when *from* the shore, the surface water is carried seawards, and water wells up from below to supply its place. About lat. 30°, both N. and S. of the equator, atmospheric pressure is invariably high in the ocean a little to the westward of all continents; hence around these regions the surface water circulates anti-cyclonically, *with* the hands of a watch in the N. hemisphere, *against* them in the S. hemisphere. On the equatorial sides of these areas the *N.* and *S. Equatorial Currents* move westwards until arrested by the land, and water is banked up on the eastern seaboards of the continents. On the polar sides the *West Wind Drifts* move eastwards. On the western sides warm currents move northwards in the N. hemisphere (the *Gulf Stream* (*q.v.*) in the Atlantic, and the *Kuro-shiwo* in the Pacific), and southwards in the S. hemisphere (the *Brasil* current in the Atlantic, the *E. Australian* in the Pacific, the *Mozambique* and *Agulhas* currents in the Indian Ocean). On the eastern side cold currents move southwards in the N. hemisphere (the *Canaries* in the Atlantic, the *California* in the Pacific), and northwards in the S. hemisphere (the *Benguela* in the Atlantic, the *Peru* in the Pacific, and the *W. Australian* in the Indian Ocean). Near the centres of the anti-cyclonic systems the circulating motion is extremely slow, and in the N. Atlantic the differential movement causes the aggregation of immense masses of weed, forming the *Sargasso Sea*. Where the heaping up of the water by the N. and S. Equatorial Currents is not fully relieved by the drainage to N. and S., a return current arises between them, as the *Guinea* in the Atlantic, and the *Equatorial Counter* in the Pacific. In the Indian Ocean the N. Equatorial is absent, and the S. Equatorial is relieved on its northern side by the *Indian Counter* moving eastwards along the equator, and by a complex system of *Monsoon Drifts* which vary with the seasons. Monsoon Drifts also occur to the W. of Central America. In the higher northern latitudes permanent areas of low atmospheric pressure lie over the oceans, and the surface circulation tends to be cyclonic, although greatly modified by the land. The polar side of the West Wind Drift is carried north-eastward, impinging on the coast of Alaska in the Pacific, but penetrating into the Arctic Ocean from the Atlantic. It is supposed that a current sets from the N. of Asia direct across the Arctic Ocean to N. America. On the western borders of the sea cold currents move southwards along the coasts of Greenland and Labrador in the Atlantic, and of Kamchatka and Sakhalin in the Pacific. Coming through the narrow Bering Strait the current in the Pacific is much smaller than the *Labrador*, but both penetrate southwards along the coast for a considerable distance, forming a 'cold wall' between the land and the Kuro-shiwo and Gulf Stream respectively. Little is known certainly about the currents of the Antarctic, but it seems probable that winds blowing outwards from a continental anti-cyclone give rise to currents moving northwards, which are ultimately absorbed by the *West Wind Drifts*.

The distribution of **Ice** in the Arctic and Antarctic regions is subject to great variations, but in the southern hemisphere the limit of heavy pack-ice roughly coincides with the Antarctic Circle, except to the S. of New Zealand, where it recedes to nearly 80° S. lat. In the northern hemisphere the distribution of land and sea, with the consequent differences in meteorological conditions, renders the arrangement much more complex; offshoots radiating from the main body of the pack-ice, and detached masses lying beyond its limits, are frequently met with. The E. ct. of Greenland is beset by masses of ice brought down by the E. Greenland Current as far S. as 60° N. lat., but the influence of warm Atlantic currents is felt as far N. as Spitsbergen, and as far E. as Novaya Zemlya. Novaya Zemlya and the Samoyed Penin. enclose the detached ice in the Kara Sea, and the northern Asiatic coast is pretty closely beset. The small warm current entering Bering Strait causes the ice to recede somewhat at this point, but the straits and sounds of the N. American Archipelago are choked with heavy ice. Detached packs are found in Hudson Bay, Fox Canal, and Hudson Strait. Smith Sound and Kane Bay are free, but Baffin Bay and Davis Strait are only clear close to the coasts. [**H. N. D.**]

Ocean Springs, tn., U.S., Mississippi, Jackson co., on the coast, 50 m. WSW. Mobile (Ala.); summer resort on the Gulf of Mexico, with saline-chalybeate springs. P. <1500.

Odense, tn., Denmark, Fyen I., prov. O., on the **Odense Aa,** 87 m. W. by S. Copenhagen. Depth at entrance to port (which is approached by a channel 4½ m. long, 40 ft. wide at bottom), 15 ft. The New Harbour has 1040 ft. of quayage; depth alongside 16 ft. Has an ancient cathedral (13th century) containing tombs of King Canute and other kings, a valuable archæological museum, tanneries, and distilleries. Is the see of the Bishop of Fyen, and birthplace of Hans C. Andersen. P. (1870) 17,000; (1890) 30,300.

Odenthal, vil., Prussia, Rhine Prov., circle Mülheim, 10 m. NE. Cologne. P. (comm.) <4000.

Odenwald, highland region, Ger. See **Baden,** gd.-duchy.

Ode Ondo, large tn., W. Africa, Benin, 64 m. NW. by N. Benin; well situated on a plain (alt. about 750 ft. above sea-level). P. 60,000.

Oder (ancient Roman *Viadus, Viadrus,* Bohemian and Polish *Odra,* probably connected with Slavonic *voda, oda,* 'water'), one of the principal rivers of Germany, rises in the Oder mountain in Moravia, about 12 m. ENE. Olmütz, not far from the town of Liebau, 2057 ft. above the level of the sea. It flows first SE. then NE., where it forms the boundary between Austria and Prussia. Near the little town of Oderberg it enters the prov. of Silesia, Prussia, and flows in a north-westerly and northerly direction through the provs. of Silesia, Brandenburg, and Pomerania. At Ratibor it becomes navigable for small vessels; at Breslau, where it enters the N. German plain, also for larger vessels. Below Frankfurt it flows through the 'Oderbruch,' an extremely fertile region. At Gartz (15 m. SW. Stettin) it divides into two arms; the eastern, known as the Reglitz, enters the head of Lake Damm (Dammscher-see), receiving the Parnitz arm on the W. from Stettin. The main arm traverses Stettin, and enters the upper end of the Damansch, or channel forming the outlet of Lake Damm, then, after changing its name successively to Streve and Papenwasser, it enters the Bay of Stettin (**Stettiner Haff**), which is separated from the Baltic by the two isls. of Wollin and Usedom, its main outlet being the Swine, between these two islands. The most important trib. of the Oder, on the r. bk., is the Warthe, with the Netze; on the l. bk. it receives the mountain streams Glatzer Neisse, Katzbach, Bober, and Lausitzer Neisse. The upper course of the Oder has a strong fall, and picturesque banks; the lower course is shallow, and not very suitable for navigation, because of its having sometimes only 3–4 ft. of depth. Very frequently there are inundations, caused by the rapid swelling of the Silesian mountain tribs. In order to preserve the Oder as a navigable stream the Prussian state has expended considerable sums, so that navigation has considerably increased since about 1885. The Oder is connected through the Finow Canal with the Havel, through the Frederic William's Canal with the Spree, and through the Netze and the Bromberger Canal with the Vistula. Sea-going vessels are able to ascend as far as Stettin, but those of large burden stop at Swinemünde (*q.v.*), the outport of Stettin, on the isl. of Usedom. The chief commodities carried on the Oder are coals, grain, timber, and stones; but navigation is at a standstill for the most part in the height of summer. Total length of river 552 m., of which 469 m. are navigable; area of river-basin 43,300 sq. m., of which 41,000 fall to Prussia.

Öderan, tn., Ger., kgd. Saxony, circle Zwickau, 8 m. SW. by W. Freiberg. P. 5700.

Odessa, vil., Canada, Ontario, Addington co., 11 m. WNW. Kingston.

Odessa, city and seapt., Russia, on a bay of N. ct. of Black Sea, govt. and 91 m. W. Kherson, 933 m. by rail from Moscow. 46° 22′ 49″ N., 30° 44′ 5″ E. (cathedral). The bay of O. being open to E. winds has three fine harbours protected by moles, which freeze but for a few days in winter. Climate extreme, the average temp. being, yr. 48.5° F., Jan. 23.2°, July 73.0°; yearly rainfall only 14 in. The city is built on a terrace, 100 to 150 ft. high, bordered by an embankment, from which a grand flight of steps descend to the sea; the central parts of the city have broad streets and squares, bordered with fine buildings. Beyond the city, surrounded by a boulevard, lie the suburbs Novaya and Peresyp' in the N., and Moldavanka in SW.; while the German colonies Liebenthal and Lustdorf are bathing-places. O. is the commercial and intellectual cap. of **Novorossiya,** and has a university, several scientific societies, and museums. Its population has increased rapidly since its foundation in 1794, and at present it is the third chief city of Russia proper, after the two

capitals. The population is chiefly Russian, but contains great numbers of Jews as well as of Roumanians, S. Slavs, Tatars, &c., and a large proportion of Italians, Greeks, Germans, and French. The industries of O. (chiefly flour-mills, biscuit-works, tobacco, and machinery works) are not of great importance. Trade, on the contrary, is rapidly growing, O. being not only the port of export for the two basins of Dnieper and Dniester, but also for many goods brought from Caucasia and S. Russia. Grain is exported in considerable quantities (from 1,000,000 to 2,500,000 quarters), also flour, wool, tallow, hides, cattle; while tea, manufactured goods, fruits, wine, and groceries are imported —the total value of exports and imports attaining to £15,000,000. Yearly visited by about 1500 foreign ships and 2500 coasting vessels. A Greek colony existed before the 3rd century at this spot. It disappeared later on, and the Turks founded here the fort Hajibey, which was taken by the Russians in 1789. Odessa forms with the surrounding villages a separate capitancy (*gradonachalstvo*). P. (1814) 25,000; (1850) 100,000; (1892) 338,690.

Oglethorpe, co., U.S., Georgia, intersected in N. by 34° N., and E. by 83° W.

Ogley Hay, par., Eng., Staffordshire, div. and 4 m. SW. Lichfield, 1½ m. SW. Hammerwich stn. P.<2500.

Ogliastra, dist. on the E. ct. of Sardinia, stretching about 39¾°–40° N.

Oglio, riv., Italy, rises in the Alps, and flows first SSW., passing through Lake d'Iseo, then SE. to the Po, which it joins on the l. bk. about 8 m. SW. of Mantua. Length, 175 m.; area of basin, 2565 sq. m.; discharge in cubic ft. per second, mean 4800, highest 19,400.

Ogmore and Garw, tn., Wales, Glamorganshire, 2½ m. SW. Bridgend; coal mined. PMT.O. (**Ogmore Vale**). P. 13,800.

Ogonnelloe, par., Ire., NE. co. Clare, bar. Lower Tulla, 4 m. N. Killaloe, on Lough Derg; 6573 ac. P.<1500.

Ogost, or **Ogustul,** riv., W. Bulgaria, flows E. then NE., and enters the Danube, in 23° 52′ E., a few miles above Rahova.

Ogowe, improperly **Ogove, Ogovai,** or **Ogobai,** riv., W. Africa, entirely within the terr. of French Congo; its source has not been traced out, but the river is supposed to rise a little S. of Ngango, in about 2½° S., 14½° E.; it flows N., NW., W., and SW., describing a wide curve, and then, shortly before entering the Atlantic in Nazareth Bay, E. of Cape Lopez, it curves up N. again. Its length up to the Falls of Pubara, a few miles above Franceville (alt. 1000 ft.), is 470 m. Its upper course, which passes through dense forests, is interrupted by numerous rapids. In about 11° E. it breaks through the Cristal Range, and from Njole, on the W. side of them, 208 m. from the ocean, becomes navigable for boats drawing 3 ft., though obstacles exist in the numerous islets and sandbanks. Besides the principal channel, known as the riv. Nazareth, which empties into the bay of that name, another arm, the Yombe or Yumbe, enters Lopez Bay, and a third, the Mexias or Animba, flows into the ocean S. of Cape Lopez. The entrance to the Nazareth is obstructed by a dangerous bar. The O. receives several tribs. through both banks; the largest seem to be the Ngunie and the Lolo (l. bk.), and the Ivindo (r. bk.), but very little is known about any of them. The river was almost unknown down to 1856, and it was first ascended as far as Franceville in 1875–79 by Savorgnan de Brazza.

Ogrugu, stn., Africa, belonging to Royal Niger Company, E. of the Niger, in about 6° 58′ N., 6° 55′ E.

Oguira, vil., Mexico, Sinaloa, on the W. ct., 140 m. NE. La Paz, in 25° 42′ N. **Oguira Bay** consists of an outer portion, sheltered by the isl. Santa Maria, and accessible to vessels drawing 16½ ft., and an inner portion, 9 m. by 4 m.

Ogulin, comm., Hungary, Croatia-Slavonia, O. co., 40 m. E. by S. Fiume. P.<5000.

Ogulin-Szluin, co., Croatia-Slavonia. See **Modruš-Rieka.**

Ogulla, par., Ire., co. and bar. Roscommon, 5 m. SW. Elphin; 6214 ac. P.<750.

Ogun, riv., W. Africa, flows SW. through Yoruba and S. through Egba into the Lagos lagoon behind Lagos; navigable to Abeokuta.

Ogurchinski Isle, Russian Transcaspian Terr., in the Caspian Sea, 60 m. S. Krasnovodsk.

Ogustul, riv., Bulgaria. See **Ogost.**

Oguta, stn., Africa, belonging to the Royal Niger Company, on **Lake Oguta,** in about 5° 45′ N., 6° 58′ E.

Ogwell, East and **West,** two adjoining pars., Eng., Devonshire, Ashburton div. East O., 6½ m. WSW. Teignmouth, 2 m. SW. Newton Abbot stn., P.O., P.<500; West O., P.<250.

Ogwen River, small riv., Wales, Carnarvonshire, issuing from Lake Ogwen and flowing NNW. into Beaumaris Bay at Bangor; cataracts, the Falls of Ogwen, at Nant Ffrancon.

Ogwr, riv., Wales, Glamorganshire, flows S. past Bridgend into the Bristol Channel. Length, 16 m.

Ohacawai, post-tn., New Zealand, North I., Bay of Islands co., 133 m. NW. by N. Auckland; has hot medicinal springs. P.<1500.

Ohanez, tn., Spain, prov. and 21 m. WNW. Almeria, dist. Canjayar. P. (comm.)<4000.

Ohashi, tn., Japan, on the N. ct. of Kiushiu, 93 m. NE. Nagasaki. P.<3000.

Ohaupo, post-tn., New Zealand, North I., Waipa co., 73 m. SSE. Auckland. P. <1500.

O'Higgins, prov., Chile, crossed in the extreme E. by 70° W., and through the middle by 34° S.; cap. Rancagua.

Ohinémutu (postal name **Rotorua**), New Zealand, North I., Rotorua co., 110 m. SE. Auckland; has hot sulphur springs. P. <1500.

Ohinimuri, co., New Zealand, North I., E. ct., crossed by 37° 25′ S.

Ohio (corruption of Iroquois *Ohionhiio*, 'beautiful river'), one of the most important rivers of the U.S., N. America, drains the NE. portion of the Mississippi basin, a fertile and populous region. It is formed by the junction of the Allegheny and Monongahela at Pittsburg, in the western part of Pennsylvania. Immediately below the junction it is a placid stream 600 yards wide; thence it flows NNW. as far as Beaver, where it turns and maintains a general SW. direction for the rest of its course, separating Ohio, Indiana, and Illinois on its right from West Virginia and Kentucky on its left. From Pittsburg it runs with a gentle current, uninterrupted by rapids except near Louisville, where it descends 27 ft. in 2½ m., and joins the Mississippi opposite Cairo, at 37° N., 89° 10′ W., 1097 m. from its mouth, and 189 m. below the mouth of the Missouri. It receives the rivs. Muskingum, Scioto, Miami, and Wabash from the N., and the Kanawha, Big Sandy, Licking, Kentucky, Green, Cumberland, and Tennessee from the S. The most important of these are the last two. The N. head of the Ohio, the Allegheny, rises in the N. of Pennsylvania, and flows S. to Pittsburg. The Monongahela takes its rise in Virginia, and flows N. On its banks are situated many important towns, among which are Steubenville, Wheeling, Marietta, Portsmouth, Cincinnati, Lawrenceburg, Louisville, and Evansville, all on the l. bk. except Evansville. Its width below Pittsburg varies from 1000 to 1250 ft., and at its confluence 3000 ft. The elevation of the various points at low water are: source of Allegheny, 1649 ft.; Pittsburg, 975 ft.; Portsmouth, 620 ft.; Cincinnati, 515 ft.; and at the mouth, 275 ft., making the average fall 13 in. to a mile. During flood its waters rise 45 ft. above low water mark at Wheeling, and 51 ft. at the mouth, at which time the largest vessels can navigate down from Pittsburg; but at its lowest stages its navigation is much interrupted by sandbanks, and the river can be forded at several places above Cincinnati. The importance of the Ohio navigation may be illustrated by the coal receipts at Cincinnati, which amount to about 2,000,000 tons or more, of which more than 90 per cent. is carried by river. In 1879 a single tow-boat started with 32 barges, with a total cargo of about 20,000 tons, from Pittsburg to New Orleans, expecting to do the distance in 14 or 15 days. The waters of this river and its tribs. present at least 5000 m. of navigation. In winter its upper courses are frozen for many weeks. Length 975 m., or from the source of the Allegheny, 1265 m.; area of basin, 214,000 sq. m.; mean discharge per second, 158,000 cubic ft.

Ohio, one of the United States, admitted 1802, present bounds since 1836, one-fourth larger than Ireland. Indiana lies to the W., and 230 m. of N. border is on Lake Erie. S. and chief E. boundary for 436 m. on navigable Ohio R. Ohio is netted with railroads, and crossed by chief trunk lines. Chief cities: Cleveland, on the lake shore, is gaining rapidly on Cincinnati, on the Ohio R.—both are iron centres, exceeding P. 250,000; Columbus, the cap., centrally situated, is much smaller; Toledo, second lake port, and Dayton, exceed 50,000; twenty-four others exceed 8000. The great watershed, with an average elevation of 1160 ft., crosses the northern half of the state from NE. to W. The slope N. to Lake Erie is rapid, and the only important river is the Maumee, noted for its fisheries, rising in Indiana, and entering Lake Erie at Toledo; but the gentle southern slope is watered by numerous Ohio tribs., more or less navigable, and available as power in making flour, the most valuable manufactured product. Like the Ohio, these have cut themselves deep valleys. Lake Erie steadies the climate in the N., so that orchards are common, and the grape crop important, especially on some of the lake islands [**Cleveland, Sandusky, Toledo**]. Southern Ohio, with a higher mean temp., is increasingly subject, with the destruction of the once extensive forests, to great and sudden changes of temperature and fog, which explain the ruin of the Ohio valley grape crop, and the very high death-rate from consumption [**Cincinnati, Columbus**]. Ohio has a high death-rate from nervous diseases. Nearly all the state is fit for agriculture, and the soil, especially in the river valleys, is very fertile. The S. slope raises large crops of corn, wheat (no state raises more), oats, potatoes, and tobacco; and the N. slope is well-fitted for grazing and dairy use. Carboniferous rocks cover the eastern half of the state, and older ones the western. The former yield bituminous coal (third state in rank), over more than one-fourth of Ohio, cement, pottery, and fireclays. Silurian and Devonian rocks yield much lime, petroleum (second state), natural gas (third), salt, building and grind stones, and there is a valuable gypsum bed at Sandusky, on the lake shore. Although mining under 1 per cent. of American iron ore, by importing largely Ohio is second only to Pennsylvania in iron and steel manufacture, and easily first in farm implements. Area, 41,060 sq. m. P. 3,672,316. [**W. S.**]

Ohio, co., U.S., Indiana, on the Ohio R., just to the S. of 39° N.

Ohio, co., U.S., Kentucky, N. of 37° N. and crossed in the W. by 87° W.

Ohio, co., U.S., W. Virginia, in the 'Panhandle,' between the Ohio and the E. frontier, just N. of 40° N.

Oil City, vil., Canada, Ontario, Lambton co., 46 m. W. by S. London. P. <1500.

Oil City, city, U.S., Pennsylvania, Venango co., on Allegheny R., at the confluence of Oil Creek, 52 m. S. by E. Erie; one of the most important oil centres in Pennsylvania; the oil is pumped through pipes to the seaboard. Manufactures oil-well machinery. Alt. 1010 ft. (R.R.). P. (1880) 7300; (1890) 10,900.

Oil City, South, bor., U.S., Pennsylvania, Venango co., on S. bank of Allegheny R., opposite Oil City; coal is extensively mined in the vicinity. P. <1500.

Oil Creek, small riv., U.S., Pennsylvania, in the NW., rises in the NE. of Crawford co., and flows S. to the Allegheny, which it joins on the r. bk. at Oil City.

Oil Island, Indian Ocean. See **Cosmoledo.**

Oil Rivers Protectorate, W. Africa. See **Niger Coast Protectorate.**

Oil Springs, vil., Canada, Ontario, 4 m. SE. Oil City.

Oil Valley, settlement, U.S., Pennsylvania, McKean co.

Oiry, vil., France, dep. Marne, on the l. bk. of the Marne, arr. and 5 m. ESE. Épernay. P. <2000.

Oisans, Massif d'. See **Alps,** SUBDIVISIONS, **I. B.**

Oise, the ancient *Isara,* riv., France, rises by two streams, one near Chimay in Belgium, the other near Rocroi in Ardennes (France), flows SW. past Guise, La Fère, Chauny (where it becomes navigable), Noyon, Compiègne, Pontoise, and joins the Seine on right above Conflans. Affluents, on left the Aisne, on right the Thérain. It communicates by canals with the Sambre, Scheldt, and Somme. Length, 186 m.

Oise, dep., N. France, traversed NE. to SW. by Oise R., formed of parts of Île-de-France (Île-de-France, Valois, Noyonnais, and Soissonnais) and of Picardie (Santerre and Aménois); divided into four arrs.: Beauvais (cap.), Clermont, Compiègne, and Senlis. Surface low, traversed by low ranges of hills; aspect on the whole monotonous, most varied in the S.; prevailing geological formations Cretaceous and Tertiary. The highest point (770 ft.) is in the Thille dist., the lowest (65 ft.) at the point where the Oise leaves the dep. With the exception of a few streams in the N., going to the Somme and to the English Channel, the dep. belongs to the basin of the Seine, mainly through the Oise, of which the principal tribs. in the dep. are r. bk., Thérain, l. bk., Aisne and Authonne. On the SW. frontier the Epte, and in the SE. the Ourcq, go direct to the Seine. The Oise is navigable throughout the dep. (in the N. by means of the lateral canal). Forests of magnificent trees cover considerable areas, chiefly in the S. and SE. (Compiegne, Ermenonville, Halatte, Laigue, &c.). The climate belongs to the sequanian region; rainfall below the average for France. Agriculture employs the greater number of the inhabitants. Of cereals, the most important is wheat, then oats, rye, and barley; sugar-beet is an important crop, and forage roots are extensively grown; apples for cider (Beauvais and Clermont). Peat, in the

supply of which the dep. ranks third in France, is obtained chiefly in the centre and SE. (Bresles, Sacy-le-Grand, Mello, &c.). In manufactures, metallurgical industries take the lead (Creil, Liancourt, &c.); next textiles, woollen and tapestries (Beauvais, &c.), cotton (Ourscamps), hemp (Breteuil). Chantilly is noted for lace, and optical instruments are manufactured at St. Pierre-les-Bitry and Sully. Area, 2272 sq. m. P. (1891) 401,800. See **France,** table.

Oisemont, vil., France, dep. Somme, arr. Amiens, 11 m. SSW. Abbeville. P. <2000.

Oissel, tn., France, Seine-Inférieure, arr. and 8 m. S. Rouen, on l. bk. of the Seine. P. <4000.

Oistins (aws'tinz) **Town,** tn., W. Indies, on O. Bay, in the SW. of Barbados I.

Oita, tn. and seapt., Japan, Kiushiu, 105 m. E. by N. Nagasaki, cap. of ken (a prefecture) O. Silk yarn produced in large quantities. Visited by the Portuguese adventurer Mendez Pinto in 1543, and by the Jesuit missionary St. Francis Xavier about 1550. P. 15,200.

Oitir Mhor Sound, bay, Scot., Inverness-shire, on the NE. of Barra, with several small islands on the SE. and NW.

Oitoz Pass, the chief pass across the Carpathians leading from the SE. of Transylvania into Moldavia (Roumania), summit (W. of the village of O.) 50 m. NE. by E. Kronstadt, 18 m. SW. Ocna. Alt. 2775 ft.

Oizulu Hills, range of hills trending nearly E. and W. in Portuguese E. Africa, between the Lujenda and Rovuma Rivs., crossed about the middle by 36½° E.

Ojców, vil. and castle, Russian Poland, govt. Kielce, dist. Olkusz, near Austrian frontier, 10 m. NW. Cracow, 2 m. from Skala town, in the picturesque valley of Pradnik R., renowned for its rich flora. In the Jurassic dolomites a great number of caverns are found, noted for the finds of Post-Pliocene mammals (mammoth, reindeer, &c.), together with remains of man, described by J. Zawisza and Dr. Roemer.

Öjer, or **Öyer,** vil., Norway, prov. Hamar, in Gudbrandsdal, nearly opposite the sanatorium of **Gausdal,** 100 m. N. by W. Christiania. P. <2000.

Öjestad, or **Öyestad,** vil., Norway, prov. Christiansand, 7 m. SW. Arndal. P. <2000.

Oji, vil., Japan, suburb of Tokyo, now containing paper and cotton mills, but still a favourite holiday resort on account of its picturesque scenery, and especially in certain seasons when flowering trees are in bloom. P. <3000.

Ojibways, or **Ojibbeways,** Indian tribe, U.S. See **Chippewas.**

Ojiya, tn., Japan, Honshiu, 36 m. S. by E. Niigata. P. 8400.

Ojo de Agua, tn., Argentine Republic, Santiago del Estero, 136 m. NNE. Córdoba. P. <2000.

Oka, one of the chief rivs. of Russia, r. bk. trib. of Volga, waters the most populous govts. of middle Russia, rises in dist. Orel, flows N. past Orel and Mtsensk, then, after junction with navigable Ugra, with great windings E. past Serpukhov, Kolomna, and Ryazañ, receiving Prona and Moskva, and then, after junction with large navigable Tsna, flows NE. to join the Volga at Nizhniy Novgorod. The traffic on the O. and its tribs. is immense, no less than 2,000,000 tons of corn, salt, metals, timber, &c., being loaded for shipping and unloaded in the river-ports of the O. basin. Area of basin, 93,207 sq. m. Length, 962 m.

Oka, riv., E. Siberia, govt. Irkutsk, l. bk. trib. of Angara, rises in Sayan Mts., flows NE. through a very wild mountain region, from which it issues at Ziminskoye, on the great Siberian highway, from there flows with great windings N. to join the Angara at Bratskiy Ostrog; receives many important tribs., of which the Iya has 300 m. Length about 600 m.

Okahandya, mission station, S. Africa, Damara-land, 80 m. ENE. Walfish Bay, in about 22° S., 17° E.

Okaihau, post-tn., New Zealand, North I., Bay of Islands co., 120 m. NNW. Auckland. P. <1500.

Okak, or **Okkak,** mission station, Canada, on the NE. ct. of Labrador, in 57° 31′ N., about 820 m. NE. Quebec. Mean temp. (3½ yrs.), yr. 21.2° F., Jan. 11.4°, July 47.5°.

Okanagan, vil., Canada, prov. Brit. Columbia, 176 m. ENE. Vancouver, at the head of **Okanagan Lake** (60 m. long), drained S. through several smaller lakes by **Okanagan R.,** which joins the Columbia at **Fort Okanagan** (Washington, U.S.); fruit-farming in dist.

Okanagans, or **Cutsanim,** semi-civilised tribe of Shushwap Indians, in Washington terr., U.S.

Okanda, tribe, W. Africa, French Congo Terr., on the middle course of the Ogowe R.

Ó-Kanizsa, comm., Hungary, co. Bács-Bodrog, dist. Zenta, about 20 m. E. Maria Theresiopel. P. 15,500.

Okanogan, co., U.S., Washington, on the N. frontier, bounded on the SE. by Columbia R., and on the E. by Okanagan R.

Okato, post-tn., New Zealand, North I., Taranaki co., 14 m. SW. by W. New Plymouth. P. <1500.

Okavango, riv., Africa. See **Kubango.**

Okayama, tn., Japan, Honshiu, 72 m. W. Kobe, cap. ken (prefecture) O. P. 45,900.

Okazaki, tn., Japan, Honshiu, 85 m. E. Kyoto. P. 13,200.

Okeadan, small negro state, W. Africa, 43 m. SW. Abeokuta.

Okechobee, lake, U.S., Florida, mostly in Brevard co.; its waters are discharged through the Everglades without any discoverable outlet. Length, 40 m.; width, 25 m.; max. depth, 12 ft.

Okefenokee Swamp, U.S., on S. boundary of Georgia, mainly between 30° and 31° parallels of N. lat. Nearly 300 sq. m. in area. Mostly cypress forest; the haunt of venomous snakes and alligators. About 80 m. long, and 50 m. wide. Penetrated by several canals for floating lumber to market. Natural drainage into the St. Mary's R. on the S.

Okeford Fitzpaine, par., Eng., Dorsetshire, N. div., 11 m. ESE. Sherborne, 1½ m. W. Shillingstone stn., PM.O. P. <750.

Okehampton, mun. bor. (since Charles II.), par., and market-tn., Eng., Devonshire, W. of Tavistock div., 21 m. W. and in the diocese of Exeter, on the Okement trib. of the Torridge, with stn. on L. & SW. R. O. is of great antiquity; returned two M.P.'s till 1832, when it was disfranchised. There is a large pannier market. Market-day, S., and especially first S. of each month. Copper ore mined. The keep (late Norman) and some early English ruins of O. Castle still survive. P. < 2000.

Okement, formerly called **Oke,** or **Ock,** riv., Eng., in the W. of Devonshire, flows N. to the Torridge, which it joins on the r. bk. to the NE. of Hatherleigh.

Okement Hill, Eng., in the W. of Devonshire, 18½ m. W. by S. Exeter, with the sources of the Okement and Tawe.

Okeover, par., Eng., Staffordshire, div. and 12 m. ESE. Leek, 2 m. NW. Ashbourne stn. P. <250.

Oker, riv., Ger., flows N. through duchy Brunswick and prov. Hanover past the town of Brunswick into the Aller about 20 m. above Celle. Length, 65 m.

Oker, vil., Ger., duchy Brunswick, circle and 19 m. SSW. Wolfenbüttel. P. <3000.

Ó-Kér, comm., Hungary, co. Bács-Bodrog, dist. and 17 m. NNW. Ujvidék (Neusatz). P. <4000.

Okhansk, tn., Russia, on the r. bk. of the Kama, govt. and 40 m. SW. by W. Perm.

Okhansk, dist. tn., Russia, govt. and 45 m. SW. Perm, on r. bk. Kama. P. <2000.

Okhotsk, dist. tn., Russia, E. Siberia, Maritime Prov., 59° 21′ N., 143° 11′ E., at mouth of Okhota R. (270 m. long); entrepôt for trade with Kamchatka. Average temp., yr. 22.8° F., Jan. -10.7°, July 55.2°; mean rfall. (6 yrs.), yr. 7.5 in., May-Oct. 6.6 in. P. <1000.

Okhotsk, Sea of, inlet of N. Pacific Ocean, from which it is separated by Kamchatka Penin., the crescent-shaped line of Kurile Is., which joins Matsmai I. of Japanese Archipelago and Sakhalin in W.; has the shores of NE. Siberia on N., 50°-62° N., 137°-163° E. Entered by La Pérouse Strait between Sakhalin and Japan, Tatar Strait between Sakhalin and mainland, and the many straits of Kurile Archipelago; has the Udskoi Bay, with Shantar Is., in W., Tausskaya Bay in N., Gizhiga and Penzhina Bays in NE., between Kamchatka and mainland. Receives Amur and many small rivers of Siberia; very foggy as a rule; N. shores frozen from November to April. Ports: Nikolaievsk, Ayan, Okhotsk, and Gizhiga.

Okhrida, by the Servians called **Okhrid,** sometimes **Orid,** tn., Turkey in Europe, vilayet and 28 m. W. by N. Monastir, charmingly situated on the slope of a hill overlooking Lake O. and rising 370 ft. above it, and on the SW. sinking down to it precipitously; has former cathedral, now a mosque. P. 18,000, of whom 11,500 Christian Servians, the remainder Mohammedans, Servians, Albanians, Osmanli, Zinzars, &c.

Okhrida Lake (**Yezero Okhrida**), lake, Turkey, below and W. of the town of O., said by the inhabitants of the dist. to be steadily rising in level for the last 70–80 years; many parts formerly dry now covered by water; 18 m. N. to S., by 4–7½ m. wide E. to W.; drained from its N. end by the Black Drin. Alt. 2265 ft.

Okhta, riv., Russia, joins Neva from right at St. Petersburg. O. powder-works of the crown on it. Length, 40 m.

Oki, isl., Japan, off the W. ct. of Honshiu, in 36° 10′ N., 133° E. Length, 10 m.; breadth, 5 m.

Oki, a kuni or old prov., Japan, now in Shimane ken.

Okinawa, the Japanese name of the Riukiu (Luchu) Is.

Okinawa, a ken or prefecture, Japan, cap. Shuri.

Okinoshima, inlet in Izumi Straits, Japan, SSW. of Kobe.

Okkak, Labrador. See **Okak.**

Okkan, vil., Burma, dist. and 56 m. NNW. Rangoon stn. P. <5000.

Oklahoma, city and rly. stn., U.S., O. terr., on the N. Fork of the Canadian R., 300 m. SW. by S. Kansas City. P. <5000.

Oklahoma, terr., U.S., formed from the W. half of the older Indian terr. in the NE. of Texas, borders Kansas to N. along 37th parallel, one-fourth larger than Scotland, acquired by

treaty and purchase from the Indians soon after the Civil War. Organised as a terr. in 1890, it took its name, meaning 'beautiful land' in speech of Chickasaws, from the central dist. of the old Indian terr. thrown open to white settlement on April 22, 1889, after a second purchase from the Creek Indians. The Cherokee outlet, the large oblong strip forming the northern portion of the terr., was further opened to white settlers and 'boomers' at noon on Sept. 26, 1893. Tens of thousands joined in the rush for land, and the city of Perry sprang up in a few hours. The large area in the SW. is still inhabited only by the Cheyennes and other Indian tribes. Beaver county, an extension to the NW., cut off from Texas by the parallel of 36° 30′ N., sloping in the W. up to 5000 ft., is thinly settled in the E. The terr. is fairly well-watered by the Red R., forming part of the S. boundary, the Arkansas and its branch, the Canadian R., and their various tribs. The climate is milder than that of Kansas, but subject to cold northerly winds. Most of the terr. has an elevation of over 1000 ft. Arid, almost treeless, regions are common in the W., and the ground slopes steadily down to the E., where green valleys and forests, chiefly of oak, are frequent. Carboniferous rocks cover most of the terr., and in the adjacent Indian terr. coal is mined extensively. Three lines of railroad cross Oklahoma in a general N. to S. direction, and the chief cities are naturally in the old Oklahoma dist. Guthrie, the cap., and Oklahoma, each, where the railroad crosses a river, have over 4000 inhabitants. This dist. has much fertile land, and corn and oats have so far been chief crops. P. 61,834 (including 5338 persons returned for Greer co., which is in dispute, being claimed by Texas). [**W. S.**]

Öland, an isl. in the Baltic, Sweden, prov. Kalmar, from which it is separated by the narrow Kalmar Sound; Ö. is 88 m. long by 4–10 m. wide, and has an area of 530 sq. m. It consists of a central barren plateau, 140–170 ft., surrounded by a low belt (2 m. average width) of cultivated soil. The chief occupations of the people are fishing, navigation, and the tending of their sheep and cattle. The breed of small horses is now practically extinct. Wind-mills form a conspicuous feature on the edge of the uplands. Alum is extensively mined near Möckelby, in the S. Principal town, Borgholm, the cap., on its W. side; with harbour 3 ac. in area; depth at entrance, 12 ft.; length of piers, 620 ft.; depth alongside, 11 ft. There is a lighthouse at each extremity of the island, in 57° 22′ N., 17° 6′ E., and 56° 12′ N., 16° 24′ E. respectively. P. 38,500.

Oldenburg, gd.-duchy, NW. Germany, about one-third of the size of Wales, composed of three separate sections, the largest (more than five-sixths of the whole) bounded on the N. by the North Sea, on all other sides shut in by the Prussian prov. of Hanover and the domain of the free imperial town of Bremen, the two other sections being the princips. of Lübeck (on Gulf of Lübeck) and Birkenfeld (an enclave in the Rhine Prov. of Prussia). O. proper is divided into six dists. and the baronies of Jever and Kniphausen, cap. O., situated on the navigable Hunte. The surface is very similar to that of Hanover—nearly all level land (chiefly cattle pastures), few forests, and consists for the most part of fertile arable land and rich marsh. The coast on the North Sea, which is deeply indented by the Jade-Busen, is little higher than the level of the sea, and is protected from overflowing by dams and dykes. The whole country is well watered. The most important river is the Weser, which forms the boundary towards the E. It receives the navigable Hunte, whose trib., Ollen, is likewise navigable for small vessels. Two other rivers, the Haase and Leda, flow into the Ems. The country is intersected by canals, which serve for drainage. Of special importance for navigation is the Ems-Jade Canal, connecting the Prussian naval station of Wilhelmshaven on the Jade with the Dollart by way of Aurich and Emden in Hanover. Geologically, the soil consists partly of sand and heath, marl, and vast peat-bogs. The climate is damp, and the marshy soil in many places produces ague. The mean temp. in the coldest month is 26° F., in the warmest 66° F. Manufacturing industry is progressing, especially the manufacture of cigars. Navigation and fisheries are important, but the chief industry is agriculture. The gd.-duchy is specially noted for its horses, the town of O. being the most important horse-market in the German Empire. Brake, on the Weser, the chief seaport, is a free port. The oldest inhabitants of O. were the Frisians and Saxons. The old counts of O. became imperial after the death of Henry the Lion in 1180. Their descendants reign in Denmark, Russia, and O. In 1803 O. acquired the princip. of Lübeck, in 1815 that of Birkenfeld, and in 1829 was raised to

the rank of a grand-duchy. The area of the O. proper is 2075 sq. m., that of the princip. of Lübeck 208 sq. m. The total pop. of the gd.-duchy is 355,000. See **German Empire,** table.

Oldenburg, tn., Ger., cap., gd.-duchy, and circle (amt), 25 m. W. by N. Bremen, on the Hunte, at the head of tide-water and terminus of the Ems-Hunte canal, with government pier 820 ft. long, depth alongside ordinary springs high water 34 ft., low water 23 ft. Tobacco factories and iron-foundries. P. (1871) 13,600; (1890) 21,300.

Oldenburg, tn., Prussia, prov. Schleswig-Holstein, circle O., 30 m. E. Kiel. P. <3000.

Oldfield Point Light House, U.S., New York, on N. side of Long I. Alt. 67 ft.

Old Ford, suburb of London, Eng., Middlesex, Tower Hamlets div., on the Lea, 3½ m. NE. by E. St. Paul's, London, on the N. L. R.

Old Grange, channel, Eng., in the middle of Morecambe Bay.

Oldham, par., mun. bor. (since 1849), co. bor., and parl. bor., Eng., Lancashire, 7 m. NE. Manchester, with three stns. (**Werneth, Central,** and **Mumps**) on the L. & Y. R., and two stns. (**Clegg Street** and **Glodwick Road**) on the L. & NW. R. It is a town of modern growth, not being mentioned even in Gough's edition of Camden's *Britannia* (1798), nor having the rank of a town at the time of the first census (1801). It has grown with the cotton industry of England, for which it has every advantage of climate and situation. Being situated immediately at the base of the Pennine chain, on the side exposed to the moist westerly winds, its atmosphere has the humidity requisite for the spinning of the yarn. It has extensive coal-mines in the neighbourhood (worked at least as early as 1611), an abundant water-supply, and it is in the vicinity of the commercial cap. of the cotton dist. Its chief industry is the spinning of cotton yarn, more particularly yarns of low and medium 'counts' (technically 6's-70's). The first mill driven by steam was erected in 1794. O. now has upwards of 12,000,000 spindles (including doubling and twining spindles), or nearly a third of those employed in cotton-spinning in the United Kingdom. Table II. in article England, besides showing the rapid growth of the town, shows how its growth, like that of the other towns chiefly engaged in cotton manufactures mentioned in the table (Bolton, Blackburn, and Preston), has been affected by the vicissitudes of that industry, the lowest rates of growth for all being in the period 1861–71, which includes the time of the cotton famine, and in 1881–91, which saw the rapid development of the cotton industry of India and Japan. Among textiles O. also manufactures calicoes, sheetings, cotton-velvets, &c. The manufacture of cotton-spinning and weaving machinery, and to a less extent of machinery for woollens, has also long been a leading industry. Formerly the manufacture of hats was also important. The corporation of O. possesses the water-works and gas-works, has a public park of about 60 ac. (opened in 1865), and the management of three cemeteries (Chadderton, Greenacres, and Hollinwood). Market-days, M., F., and S. Par. 4730 ac.; par. and mun. bor. and co. bor. 4730 ac. P. (1801) 12,000; (1811) 16,700; (1821) 21,700; (1831) 32,400; (1841) 42,600; (1851) 52,800; (1861) 72,300; (1871) 82,600; (1881) 111,300; (1891) 131,500; parl. bor., which includes also Chadderton, Crompton, Shaw, and part of Lees, P. (1891) 183,900.

Olmütz (Moravian **Olomouc**), tn., Austria, Moravia, cap. dist. O., on riv. March, 40 m. NE. Brünn. It is one of the strongest fortresses in the Austrian Empire, and the ecclesiastical capital of Moravia, with an archbishop's palace, a theological faculty (the only survival of a university which existed until 1858), the cathedral of St. Wenceslaus (14th century); and is, further, the commercial centre of the industrial and mining products of the region. A very ancient city, O. was long the cap. of Moravia (down to 1640), was captured by the Swedes in 1642, and besieged by the Prussians in 1758. Here in 1848 the Emperor Ferdinand abdicated. Alt. 740 ft. P. 19,800.

Olna Firth, inlet, Scot., Shetland Is., Mainland, in the W., stretching 3 m. E. from the mouth, in 60° 20′ N.

Olne, comm., Belgium, prov. Liège, arr. and 6 m. W. Verviers. P. <4000.

Olney, formerly **Oulney,** par., Eng., Buckinghamshire, Buckingham div., 10 m. W. by N. Bedford, on the Great Ouse, and the M. R. Formerly noted for its lace, but now chiefly engaged in brewing and the manufacture of boots and shoes. William Cowper, the poet, resided here from 1767 to 1786. PMT.O. Market-day, Th. P. <2500; eccles. par. (**O. with Warrington**) P. <2500.

Olomouc, Moravian name for **Olmütz** (*q.v.*).

Olona, riv., N. Italy, enters the canal Naviglio Grande near Milan. Under the French it gave its name to a department of the kingdom of Italy.

Olonets, govt., NW. Russia, extending from Lake Ladoga almost to White Sea, has Finland on W., Arkhangelsk and Vologda on N. and E., Novgorod on S. Its NW. part is hilly, and belongs geographically to Finland; the rest is a flat plateau sloping southwards, thickly covered with boulder-clay; marshy lowlands in S. Dotted with countless lakes and marshes, which cover about one-fifth of the aggregate area. Lakes Ladoga and Onega are connected by the Svir, and receive many tribs., of which the Vytegra is connected by canals with the Volga, and is an important channel for navigation. Forests cover seven-tenths of the land area. Climate harsh and moist, the average temp. at Petrozavodsk being: yr. 34° F., Jan. 12°, July 57°. Population consists of Great Russians, Finns, Karelians, and Tchudis; it is scattered in tiny villages, the inhabitants of which cultivate the higher parts amidst the marshes, and chiefly live by timber trade, hunting, fishing, and the navigation of vessels along the rivers and canals. Divided into seven dists.: Petrozavodsk (cap. of govt.), Kargopol, Lodeinoye Pole, Olonets, Povyenets, Pudozh, and Vytegra. Area, 57,439 sq. m. P. (1890) 352,600.

Omagh, market and civic tn., Ire., cap. co. Tyrone, bars. East O. and Upper Strabane, on the l. bk. of the Strule, 17 m. S. by E. Strabane, on the G. N. (Ire.) R.; has flax and corn mills, and leather manufactures. Market-day, S. Mean rfall. (1866–80, Edenfell, alt. 280 ft.), yr. 36.6 in. P.<4500.

Omagh, East and **West,** two bars., Ire., in the SW. and W. of co. Tyrone.

Omaha, tn., New Zealand, North I., Rodney co., in 36° 15′ S., and 174° 47′ E. P.<1500.

O'maha (named after an Indian tribe allied to the Sioux), city, U.S., Nebraska, Douglas co., on the r. bk. of the Missouri, about 20 m. above the confluence of the Platte R., here crossed by three iron bridges. It was laid out in 1854 on a plateau 80 ft. above the river, rising gradually into bluffs, and is provided with extensive parks. O. is an important distributing centre, and has large works for smelting and refining gold and silver, oil-works, steam-engine-works, breweries and distilleries, immense meat-packing establishments, and the workshops of the U. P. R. It is also the headquarters of the Platte army div., for the accommodation of which Fort Crook is now being erected in the vicinity. Alt. 967 ft. (R.R.); 986 ft. (R.R.); 1113 ft. (U.S. Signal Office). Mean temp., yr. 49.8° F., Jan. 21.1°, July 76.2°; rfall., yr. 36.64 in., April–October 31.43 in., May–July 17.61 in. P. (1860) 1900; (1870) 16,100; (1880) 30,500; (1890) 140,500.

Omaha, South, city, U.S., Nebraska, Douglas co. P. 8100.

Omaha Barracks, or **Fort Omaha,** military post, U.S., Nebraska, 3 m. N. Omaha.

Omahas, tribe of Indians, of Dakota stock, U.S., Nebraska, Blackbird co.

Omai-saki, promontory, Japan, SE. ct. of Honshiu, with lighthouse (visible 19 m.) in 34° 36′ N., 138° 13′ E.

Oman, an independent Arab state stretching along the NE. and SE. coasts of Arabia from Cape Mussendam, at the entrance to the Gulf of Persia, to the port of Mirbat, in about 17° 40′ N.; it is thus washed on the NE. by the Gulf of Oman, and on the SE. by the Indian Ocean. The Sultan of O. likewise claims authority over the coast-lands which stretch W. from Cape Mussendam to the Gulf of Bahrein, but his rule over them is merely nominal. The limits of his authority inland are uncertain and fluctuating, and nowhere perhaps exceed a distance of 120 m. from the coast. The principal physical feature is a chain of mountains beginning at Ras-al-Hadd, the extreme E. point of Arabia, and running NW. parallel to the coast to Cape Mussendam. Its mean elevation is 3000 ft., though one peak in the middle reaches 10,000 ft., and another towards the NW. 6800 ft. The E. portion, known as Jebel Fellah, presents steep escarpments to the ocean. The W. portion, Jebel Akhdar, recedes 50 m. from the coast, and not only embraces valleys rich in verdure, but shelters from the desert the mostly fertile coast plain of Batna. The climate is very hot, but tempered on the mountain slopes; tropical rains fall in December and January. The staple product is dates, to which must be added maize, indigo, wheat and barley, fruits, wine, coffee. Copper, sulphur, and salt are worked; and iron and lead occur. The dromedaries of O. are famous; but Maskat mules and donkeys are bred in Persia and Baluchistan. The fauna does not differ from that of Arabia (*q.v.*) in general. Cap. Maskat, on the coast. The cap. was in Portuguese hands for a century and a half from 1508. In the early part of the 19th century the sway of the sultan extended over parts of the S. ct. of Persia and Socotra, Zanzibar, and the adjacent parts of the African mainland. P. probably 1,500,000.

Oman, Gulf, or **Sea of,** part of the Indian Ocean between Oman and the S. ct. of Persia.

Omapere, tp., New Zealand, North I., Hokianga co., 127 m. NW. Auckland. P.<1500.

Onecote, par., Eng., Staffordshire, div. and 4 m. ESE. Leek, P.O.; 4936 ac. P. <500; eccles. par. (**O. with Bradnop**) P. <1000.

Onega, lake, NW. Russia, second in size in Europe, elongated from NW. to SE. like other glacial scorings in the region, has a length of 145 m., and an average width of 50 m. N. ct. indented by fjord-like bays, and dotted with many small islands and submerged rocks; S. ct. more regular. A considerable area in middle and S. over 26 fathoms deep; maximum depth, 123 fathoms. Discharges its waters through the Svir into Lake Ladoga, and receives Vodla, Andoma, Suna, and Vytegra, besides a great many smaller streams. The Vytegra being connected with the Volga by canals, considerable shipping goes on, and a canal has been built along the S. shore to permit boats to avoid the stormy lake, which remains free from ice for an average of 209 days. Petrozavodsk and many small villages on its shores and islands. Quarries of sandstone, largely exported to St. Petersburg, on SW. shore. Considerable fishing. Alt. 236 ft.; area, 3763 sq. m.

Onega, riv., NW. Russia, takes origin in Lake Lache, to the E. of Lake O., flows NNE. and NNW. into **O. Bay** of White Sea, which has a length of nearly 70 m. and a width of 35–50 m., is separated by Lyetniy Bereg Penin. from Dvina Bay, receives the Kem′ and Vyg, and is dotted by many small islands, the larger, **Solovetskiye Is.,** lying at its mouth.

Onega, dist. tn., Russia, govt. and 154 m. W. Arkhangelsk, on Onega R., 3 m. from its entrance into O. Bay; saw-mills. Exports timber. Ships stop 9 m. below the town. P. 2750.

Oneglia, tn., Italy, Liguria, prov. Porto Maurizio, on the coast, 15 m. ENE. San Remo; the harbour has an area of 26 ac. (width at entrance, 370 ft.; depth in fairway, 20 ft.). Length of loading quay, 170 ft.; depth alongside, 8 ft. A new loading quay, depth alongside 20 ft., will soon be ready (April 1894). P. 7400.

Onehouse, par., Eng., Suffolk, div. and 2 m. NW. Stowmarket. P. <500.

Onehunga, seapt. bor. and port of entry, New Zealand, North I., Eden co., 3 m. S. Auckland; O., the port of Manukau, is 22 m. from the bar. Bar and pig iron extracted from the O. iron-sand. P. <3000.

Oneida, co., U.S., Idaho, bounded N. by Montana, E. by Wyoming, and S. by Utah.

Oneida, tn., U.S., Illinois, Knox co., 92 m. NNW. Springfield. P. <1500.

Ontario, co., Canada, Ontario, extending from the E. of Lake Simcoe to Lake Ontario.

Onta'rio, prov. of the Dominion of Canada, lying W. of the prov. of Quebec, N. of the St. Lawrence and Lakes Ontario, Erie, Huron, and Superior, E. of Manitoba and Keewatin, and S. of Hudson's Bay. In area (181,800 sq. m.) it is more than twice as large as Great Britain, but its population in 1891 fell short of 2½ millions. The oldest settled region, in the S., between the great lakes, belongs to the great Canadian plain; its surface is gently undulating, without any great eminences, except that the low Laurentian Hills stretch W. towards Lake Huron and Georgian Bay. For the **geological** features, see **Canada.** The S. portion of the prov. is principally drained by the **rivers** St. Lawrence and Ottawa and their tribs., the latter river receiving the Nation, Rideau, Mississippi, Madawaska, Bonnechère, and Petewawa. The rivers Moira, Grand, Napanee, Trent, and Humber all flow into Lake Ontario; the Thames and Sydenham into Lake St. Clair; the Saugeen into Lake Huron; and the Nottawasaga, Severn, Muskoka, and French R. into Georgian Bay. In the N. extension of the prov. the principal streams are the Sturgeon into Lake Nipissing; the Montreal into the Ottawa; the Moose and the Albany, each with several feeders, into James Bay (Hudson Bay); Rainy R. into Lake of the Woods; the Mississauga into North Channel (N. end of Lake Huron); and Spanish R. into Georgian Bay. Besides the **lakes** already named there are countless others, of which it will, however, suffice to mention Lake Simcoe, between Lake Ontario and Georgian Bay; Lakes Tamagaming, Temiscamang, and Abittibi in the E. of the N. extension of the prov., and Lakes Nepigon and Rainy in the W. 'The **mineral deposits** are widely spread, varied in character, and cover almost the entire list of economic minerals, with the exception of coal. The counties of Leeds, Lanark, Renfrew, Frontenac, Addington, Hastings, Peterborough, the dists. of Nipissing and Algoma East and other portions of eastern and central Ontario, contain numerous [and extensive] deposits of magnetic and hematite iron ores. . . . In the Sudbury region enormous deposits of copper and nickel ore have been discovered, and mines on an extensive scale are being developed. In the township of Denison, between Sudbury and Lake Huron, rich specimens of gold-bearing quartz have been taken from the Vermilion and other mining locations, and promising deposits of copper and nickel have also been discovered. On the N. shore of Lake Huron, from Killarney to Sault Ste. Marie, and convenient to navigation, are found iron, copper, lead, and immense quarries of marble. . . . The Port Arthur silver dist., extending south-west from Port Arthur to the E. end of Arrow Lake, promises to be an argentiferous region of great richness. . . . W. of the silver range the Minnesota iron range, it is believed, projects into the terr. of O., and it seems certain that an iron region of large area exists, embracing Hunter's I. and the adjacent region. . . . On the various islands in the Lake-of-the-Woods, and over an unknown extent of country round that lake, gold-bearing veins are numerous.' (*Report of the Royal Commission on the Mineral Resources of Ontario:* Toronto, 1890.) In addition to the minerals named, productive petroleum wells and brine springs exist in the S. dist. near Lake Huron. The **climate** is healthy. Though the extremes of both winter and summer are severer than in Great Britain, yet, owing to the dryness and purity of the air, neither heat nor cold is felt as much as would be expected. The highest mean annual temps. are registered in the penin. between Lake Huron and Lakes Erie and O.; and they decrease as one goes W., NW., and N. [**Cornwall, Kingston, Woodstock, Stratford, Windsor, Goderich, Parry Sound, Port Arthur**]. In the S. div., between the great lakes, the average duration of winter is three months; in the N. div., four months. Both spring and autumn are of short duration. The rains generally fall in April and May. The soil is almost everywhere rich and fertile, producing good **crops** of oats, wheat, barley, pease, maize, turnips, potatoes, mangolds, clovers and grasses. Hemp, flax, and beetroot can be grown with profit; and tomatoes, peaches, and grapes ripen in the open air in the extreme S., especially near Niagara. Corn-growing was long the mainstay of the O. farmers; but of late they have devoted increasing attention to cattle-breeding, dairy-farming, and fruit cultivation. Cheese and butter are both exported in rapidly growing quantities. Cattle, sheep, swine (hogs), horses, and poultry make up the bulk of the **live-stock.** More attention is being given than formerly to the breeding of fine-woolled sheep. The government maintain an agricultural college and model farm near Guelph. The prov. possesses excellent means of **communication** in its magnificent lakes, rivers, and canals (Rideau, Welland, &c.), and in its extensive railway system, which, besides running (C. P. R.) through to the W., connects at nearly a dozen points with the U.S. lines [**Canada**]. O. is now a busy **industrial** region, water-power being here, as in Quebec, plentiful almost everywhere. The more conspicuous manufactures are the making of agricultural implements, railway rolling-stock, woollens, cottons, leather, furniture, paper, hardware, linen yarn, and soap. The more important manufacturing **towns** are Toronto, Hamilton, London, Kingston, Brantford, Guelph, and St. Catharine's. Ottawa, the seat of the Dominion government, is the centre of the lumber trade, the greater part of the N. div. of the prov. being still covered with primeval forest. In addition to the above, the following must be enumerated as amongst the towns of consequence: St. Thomas, Stratford, Chatham, Brockville, Peterborough, Windsor, Port Hope, Woodstock, Galt, Lindsay, Paris, and Port Arthur. The provincial cap. is Toronto. The prov. is under the **administration** of a lieutenant-governor, appointed for a term of four years by the governor-general in council. The executive is in the hands of a council of five ministers, responsible to the House of Assembly, which consists of ninety members. In the Dominion Senate the prov. is represented by twenty-four members, and in the Dominion House of Commons by about ninety members. For information with respect to **education, commerce, inhabitants, money,** and **history,** see **Canada.**

Ontario (from Iroquois *Oniatarijo,* 'beautiful lake'), lake, N. America, between Canada and New York state; it receives the waters of all the great lakes at its W. end. Its outlet, at its NE. extremity, is the St. Lawrence R. See **America, North.**

Oporto (**O Porto,** 'the port'), the ancient *Portus Cale* (or *Calecæ*) or *Gallorum Portucale, Castrum Novum,* the second town of Portugal, cap. of the old prov. of Minho, now cap. of a dist. on the l. bk. of riv. Douro, 3 m. from its mouth (the Foz), 206 m. by railway NE. of Lisbon, stretching for more than 3 m. along the river, and about 2 m. wide, with Villa Nova de Gaia as a suburb on the l. bk. of the river. The quarters around the cathedral (Sé) and the Ribeira are the old parts of the town, some dating from the Middle Ages. O. is the seat of a bishopric, of a military division, and of the N. naval department. It has a library of 200,000 vols., with many important MSS., a polytechnic college, colleges of medicine, commerce, and industries, school for sailors, academy of art; a large hall for exhibitions (*Palacio de Cristal,* an international exhibition in 1864) on a commanding splendid situation on the river; a famous Eiffel iron bridge (Maria Pia, 1877: an arch of 1150 ft. span, and 140 ft. pitch) connecting the S. with the N. railways of Portugal. O. is the emporium of the celebrated Douro (port) wines (warehouses in Villa Nova de Gaia for more than 6 million gallons). It is also the seat of important manufactures. The port is of a very difficult access (a sandbank, *Cabedello,* at 8 ft.), and the harbour not safe during the floods. An artificial harbour [**Leixões**] has been established N. of the mouth of the Douro. O. was rebuilt by the French in the 10th century (*Portus Gallorum*), gave its name to the kingdom of Portugal, and was one of the residences of her government to the end of the 12th century. Mean temp. (15 yrs.), yr. 59° F., Jan. 49°, July 69°; min. 34°, max. 37.4°; rfall. 60 in. in 115 days. P. (1878) 89,000. [**J. B. R.**]

Orange, anciently *Arausio,* city and comm., France, dep. Vaucluse, cap. arr., 18 m. N. Avignon, on l. bk. of the Aigue, trib. of the Rhone. There are two great monuments of the Roman period, a triumphal arch (72 ft. high), the finest in France, and the ruins of a theatre, 340 ft. long; the only modern building of interest is the cathedral. For five centuries (till 1531) O. was an independent principality ruled by its own sovereigns, the estates and title passing to the Count of Nassau, and thus to William III., afterwards king of Great Britain. In 1713 O. was for certain equivalents conceded to France by the King of Prussia, though the title of Prince has descended by the younger Nassau line to the kings and stadtholders of Holland. The dist. is very productive; manufactures silks, woollens, and fruits. Alt. 45 ft. Mean temp., Jan. 38.7°, July 72.9°. P. (1872) 6600; (1891) 9900.
Orange, postal-tp., New South Wales, Wellington co., 30 m. WNW. Bathurst; has gold and silver mining. Rfall. (16 yrs.), 35.84 in. P.<3500.
Orange, or **Gariep,** riv. of S. Africa, forming the N. boundary of the Cape Colony, which it separates from the Orange Free State, Griqualand West, British Bechuana-land, and Great Namaqualand on the N., rises near 29° S., 29° E., in Basutoland, on the S. face of Mont aux Sources, one of the peaks of the Drakenberg Range, at an alt. of more than 10,000 ft., flows generally W. with long undulations to N. and S., and enters the Atlantic in 28° 37′ S., 16° 30′ E. Principal tribs. on r. bk., the Caledon and Vaal; on l. bk., the Zeekoe or Zuku and the Hartebeest or Olifant. The depth of the channel in its valley basin prevents its utilisation for fertilising irrigation, and numerous obstructions (a bar at its mouth, rapids about 20 m. up, and the falls of George IV. some 20 m. E. of 20° E. long.), render it practically unnavigable. Length about 1000 m.; volume (at times) estimated at 50,000 tons per minute; area drained by it and its tribs. estimated at over 300,000 sq. m.
Orange, vil., U.S., California, Los Angeles co., 18 m. E. Wilmington, 12 m. N. Santa Ana. P.<1500.
Orange, tn., U.S., Connecticut, co. and 6 m. SW. New Haven. P.<5000.
Orange, co., U.S., Florida, in the E., bounded on the E. by the St. John's R., crossed in the N. by 29° N.
Orange, co., U.S., Indiana, between 38° and 39° N., and midway between E. and W. frontiers.
Orange, tn., U.S., Iowa, Sioux co., 39 m. NNE. Sioux City. P.<1500.
Orange, tn., U.S., Massachusetts, Franklin co., 35 m. W. Fitchburg. P.<5000.
Orange, city, U.S., New Jersey, Essex co., 4 m. NW. by W. Newark, picturesquely situated on rolling ground; chief industry, hat-making. Llewellyn Park, 750 ac., covers side of Orange Mt.; connected with Newark and New York by electric and steam tramways. P. (1880) 13,200; (1890) 18,800. **Orange, South,** bor., 2½ m. to the SW. P.<4000.
Orange, co., U.S., New York, on the S. frontier, bounded on the E. by the Hudson R.
Orange, co., U.S., N. Carolina, in the N., crossed in the NE. by 79° W., and in the S. by 36° N.
Orange, city, U.S., Texas, cap. O. co., on Sabine R., 106 m. E. Houston by rail. P.<4000.

Orange Bay, the westernmost bay of the N. ct. of Jamaica.
Orange Bay, Newfoundland, on the E. ct., in 50° 22′ N.
Orange Bay, Patagonia, in 53° 31′ S., 70° 25′ W. Mean temp. (1 yr., 1882–83), yr. 41.7° F., Feb. 48.0°, Aug. 37.4°.
Orange Bay, bay, Tierra del Fuego, E. ct. of Hardy Penin., in 55° 31′ S.
Orangeburg, city, U.S., S. Carolina, cap. O. co., 38 m. SSE. Columbia; seat of Claflin University and of Agricultural College. O. co. is bounded on the NE. by the Santee R. P.<3000.
Orange Cape, cape, French Guiana, marking the E. entrance of the estuary of the Oyapok R.
Orange Cape, cape forming the N. extremity of Tierra del Fuego, in 52° 30′ S.
Orange Court House, vil., U.S., Virginia, Orange co., 60 m. NW. by N. Richmond. P.<1500.
Orange Free State (in Dutch **Oranje Vrijstaat**), S. African Boer Republic, situated between 27° and 31° S. lat., and 24° 20′ and 29° 40′ E. long. Its surface consists of undulating plains and plateaux, sloping gradually towards W. In the NE. it borders upon the Kwathlamba Mts. (*q.v.*). Principal rivers, Orange (with Caledon) and Vaal. The climate of the O. F. S. is moderate and healthy. The vast plains in the W. and N. of the country afford excellent grazing, and pastoral pursuits (sheep and horse breeding and cattle-rearing) form the principal occupation of the inhabitants. A comparatively small portion of the country produces agricultural products. Diamonds are found near Jagers Fontein and Koffie Fontein, gold occurs in the Caledon dist., and iron ores and coal are met with in various parts of the country. Principal exports, wool, hides, diamonds, and ostrich-feathers; principal imports, textiles, and other manufactures. The legislative authority is vested in a popular assembly, the Volksraad (57 members), and the executive power in the President and the Executive Council (Uitvoerende Raad, 5 members). Principal towns, Bloemfontein (cap.), Harrismith, Smithfield, Ladybrand, Jakobsdal. A railway connects Bloemfontein with the Transvaal and Cape Colony. The money, weights, and measures are English. Area estimated at 48,300 sq. m. P. (1890) 207,503 (77,716 whites, 129,787 natives [Bechuanas, Korana, Griqua, Bushman]). [**H. G. S.**]
Orange Nassau, penin. forming the S. part of the NW. penin. of New Guinea.
Orangerie Bay, in the S. ct. of Brit. New Guinea, in about 149½°–149° 50′ E.
Orangeville, vil., Canada, Ontario, Dufferin co., 43 m. NW. by W. Toronto.
Orangewalk, vil., Central America, Brit. Honduras, 45 m. WSW. Belize.
Orang-Laut ('sea men'), Malay name for the Malays of the Eastern Archipelago who lead a sea-life.
Orango, the largest and southernmost of the Bissagos Is., off W. Africa, in 11° 10′ N., 16° 0′ W. Length, E. to W., 25 m.; breadth, 10 m.

Ord ('headland.' See *Ort*) **-of-Caithness,** a cliffy headland, Scot., on the coast of Caithness, in 58° 10′ N., 3° 30′ W. The **Ordhill,** 4½ m. SW. the cape, is in co. Sutherland. Alt. 2000 ft.

Ordos, a region of N. China, deriving its name from the Mongol tribe who inhabit it, and situated in the great N. bend of the Hwang-ho, which forms the E., N., and W. boundary, whilst the Great Wall of China forms the S. boundary. The region constitutes a plateau, with a mean alt. of 3300 ft., and its surface is for the most part covered with moving sands, though the hollows, where water is generally abundant, afford good pasturage for the cattle of the Ordos, and soil on which they grow buckwheat, millet, and hemp. The climate is dry, with continental extremes of heat and cold, and a wide daily range of temperature. The Ordos, who settled here in the 13th century, are divided into seven banners or tribes, and are subject to the Emperor of China. See **Gobi.**

Oregon, city, U.S., Oregon, Clackamas co., on Willamette R., which here falls 10 ft., affording immense water-power, 12 m. SSE. Portland. P. <4000.

Oregon, city, U.S., Illinois, Ogle co., 75 m. ESE. Dubuque (Io.). P. <2000.

Oregon, co., U.S., Missouri, on the S. frontier, E. of 92° W.

Oregon, a Pacific state of the American Union, separated to N. from Washington for 300 m. by Columbia R., from Idaho to E. largely by its trib., the Snake, and borders California and

Nevada to S. along the 42nd parallel; admitted 1859, fifth state in area, nearly twice the size of England. The steep cliffs of the 330 m. of Pacific coast are followed E. by plateau rising to the coast range, Umpqua and other hills reaching 2000 ft. The fertile valleys of the Willamette and Umpqua Rivs. lie between these hills and the great Cascade Mts., traversing the state from N. to S. These present many peaks of recently extinct volcanoes, and, like the coast plateau and most of the valleys, are thickly clad with trees, chiefly pines, furnishing an important lumber export. The two-thirds of Oregon E. of the mountains is a rolling tableland, with an average elevation of about 3000 ft. The valleys of the N. and E., watered by Columbia and Snake tribs., furnish fertile farm land, and the bunch grass of the central region yields abundant food for cattle. The S. is desert from lack of rain, forming part of the Great Basin (*q.v.*). Large lakes without outlet occur here. The Pacific gives W. Oregon a peculiarly mild and equable climate, with heavy winter rains [**Canby, Portland, Roseburg**]. E. of the mountains great extremes are common, the rainfall is low, and the death-rate from diphtheria high [**Umatilla**]. In 1880 no state had a higher proportion of deaths from typhoid. The basaltic valley of the Columbia trib., the Willamette, between the Coast and Cascade ranges, is the chief seat of population. Its fertile soil and grazing-land, added to that of the E., rank O. sixth in value of live stock, and second in farm products *per capita*. Here are Portland and Salem, the capital, much smaller. Fish abound in the rivers, and Columbia R. salmon canning is an important industry. Volcanic rocks cover most of O., and yielded $1,645,300 gold in 1893. In many valleys strata of comparatively recent age occur, and yield a little coal. Area, 96,030 sq. m. P. 314,000. [**W. S.**]

Oregon, vil., U.S., Missouri, Holt co., 24 m. NW. St. Joseph. P. <1500.

Oregon, vil., U.S., Wisconsin, Dane co., 75 m. W. Milwaukee, and 11 m. S. Madison. P. <1500.

Oregon Inlet, U.S., N. Carolina, in the E., connecting Pamplico Sound with the Atlantic, in 35° 50′ N.

Öregrund, seapt., Sweden, prov. (län) Stockholm, 44 m. NE. Upsala, opposite Gräso I. Two piers, with depths alongside of 13 ft. 9 in. and 9 ft. 10 in. respectively. Coaling station, with means to coal both at piers and from lighters. P. <2000.

Ore Hill, vil., U.S., Connecticut, Litchfield co., 30 m. NE. by E. Poughkeepsie (N. Y.). P. <1500.

Orejones, Indians of equatorial America, on the banks of the Marañon or upper Amazon, NE. Peru.

Ore Knob, vil., U.S., in N. North Carolina, Ashe co., about 20 m. SE. of NW. corner of the state; has rich copper-mines. P. <1500.

Orel, govt., middle Russia, has Smolensk, Kaluga, and Tula on N., Voronezh, Kursk, and Chernigov on S.; deeply trenched plateau (900 ft.); coal bearing deposits of the Moscow basin in NW., at great depth. Surface, boulder-clay and fertile loess; sandy in Desna region; watered by Don with Sozha, Oka with Zusha and Desna, all navigable. P. Great Russian. Extensive agriculture, cattle and horse breeding, bee culture; tobacco grown with profit. All sorts of domestic trades in vils. Manufactures rapidly increasing, especially at Maltsov's works; iron-works, machinery, railway engines and carriages, tanneries, hemp-carding, glass, &c. Considerable fairs in villages. Divided into twelve dists.: Orel, Bolkhov, Bryansk, Dmitrovsk, Karachev, Kromy, Livny, Maloarkhangelsk, Mtsensk, Syevsk, Trubchevsk, and Yelets. Area, 18,042 sq. m. P. (1870) 1,596,900; (1893) 2,140,130.

Orel, cap. of above govt., on Oka R., 238 m. SSW. Moscow; important railway junction for lines to Warsaw, Riga, Crimea, lower Volga, Urals, and Moscow. Hemp carding and rope making, steam flour-mills; great market for trade in corn, hemp, hempseed oil, ropes, and tallow, exported. Alt. 558 ft. Mean temp. (28 yrs., 1833–37, 1840–59, 1865–68), yr. 40.4° F., Jan. 13.4°, July 66.8°. P. (1875) 45,000; (1891) 79,200.

Orel, Orelya, or **Orlik,** riv., S. Russia, l. bk. trib. of Dnieper; waters Poltava and Ekaterinoslav; densely peopled. Length, 270 m.

Öreland, Norway. See **Örlandet.**

Orellana, a name which has sometimes been applied without any reason to the Amazon R. (*q.v.*).

Orellana, tn., Spain, prov. Badajoz, dist. Puebla de Alcocer, on the r. bk. of the Guadiana, 39 m. WNW. Almaden. P. (comm.) <3000.

Orenburg, a govt. of SE. Russia, has Ufa and Perm on N., the provs. Turgai and Uralsk on E. and S., and Samara on W. Crossed in middle portion by the South **Urals** (2500–5000 ft. high), which are skirted on both sides by fertile steppes (prairies), watered by Ural R., which also flows along its S. boundary, and its tribs. Sakmara and Ilek; the upper courses of Byelaya (Kama), Samara (Volga), and Tobol (Ob). Numerous salt lakes in Chelyabinsk dist. Want of water in part of the steppes. Forests in Urals. Climate severe and extreme (see **Orenburg,** town). Frosts of −38° F., and summer temperatures of 98° are not uncommon. Getting rapidly colonised by Russian immigrants, attracted to the fertile lands of the Bashkirs, which have lately been bought for next to nothing by speculators. Population mainly Great Russians, Bashkirs (25 per cent.), and about 5 per cent. Kirghizes. Extensive agriculture and cattle-breeding, large exports of cereals and animal produce, Rich mines, but mining in infancy. Crossed by two railways radiating from Samara to Siberia (*viâ* Chelyabinsk) and to Orenburg. Divided into 5 dists., Orenburg, Orsk, Chelyabinsk, Troitsk, and Verkhneuralsk. Area 73,816 sq. m. P. (1870) 900,550; (1881) 1,120,700; (1893) 1,406,310. The terr. of the **Orenburg Cossacks** extends as a narrow strip up the Ural, on the E. of the Ural mts., and joins by a line of posts the terr. of the Siberian Cossacks in the Gen.-Gov. of the Steppes. Area 35,820 sq. m. P. (1880) 290,800 Cossacks, 16,500 peasants, and 25,000 Bashkirs.

Orenburg, cap. of above govt., on r. bk. Ural R., 933 m. by rail SE. Moscow (261 m. from Samara). Has a fortress, 6300 yds. in circumference, a military school of cadets, and the usual educational institutions. Considerable trade in cotton, silk, furs, wool, hides, cattle and horses exported, and manufactured goods imported Mean temp. (15 yrs.), yr. 38.7° F., Feb. 3.3°, July 70.8°; rfall. (32 yrs.), 15.6 in. P. (1885) 35,600; (1891) 56,000.

Orenburgskoye, vil., Russian Central Asia, prov. Turgai, 220 m. SE. Orsk, on Kara-Turgai R. and highroad to Bukhara. P. <5000.

Orénoque, French name of the Orinoco (*q.v.*) R.

Orensay, isl., Scot., Ross and Cromarty, Uig par. P. 2.

Orense, tn., Spain, on the Miño, 44 m. E. by N. Vigo, cap. prov. and dist. O. Is noted for its bridge (1320 ft. long), its 13th century cathedral with a greatly venerated image, and hot springs similar to those of Carlsbad. P. (comm.) 14,200.

Oreos, vil., Greece, in N. of Eubœa I., 33 m. S. by E. Volos.

Orepuki, post-tn., New Zealand, South I., Wallace co., 30 m. W. by N. Invercargill. P. <1500.

Öre Sund, Danish name of the sound between Seeland and Sweden, given on account of the small, sandy tongue of land near Helsingfors (Elsinore), which bears the castle of Kronborg. See **Sound, The,** and *Ör.*

Orfa, tn., Turkey in Asia. See **Urfa.**

Orfani, or **Orphani,** tn., Turkey in Europe, prov. Drama, on Gulf of O. or Rendina (*q.v.*), 4 m. E. of the mouth of the Struma.

Orford, part of eccles. par., Eng., Lancashire, 2 m. N. Warrington, P.O. See **Padgate.**

Orford, a decayed bor., par., and fishing tn., Eng., Suffolk, on riv. Ore, Plomesgate dist., 6 m. SW. Aldeburgh; has a large ancient church; and fisheries, chiefly of oysters. The port was formerly of importance, but the sea has receded. The corporation was dissolved in 1886, and the municipal property is now administered by the O. Town Trust; until disfranchised by the Reform Act of 1832 O. sent two members to House of Commons. It has two lighthouses, well known as 'Orfordness lights,' in 52° 5′ N., and 10° 34½′ E. (visible respectively 15 and 6 m.), and remains of an old castle built to defend the port. PMT.O. P. <1000. See **Sudbourne.**

Orford, post-tn., Victoria, Villiers co., 28 m. ENE. Portland. P. <1500.

Oring-Nor, or **Norin-Nor,** China, lake at the source of the Hwang-ho, in 34° 40′ N., 97° 40′ E. Alt. 14,000 ft. (Przhevalsky).

Orinoco, one of the principal rivers of S. America, ranking in size and importance next after the Amazon and Plata; rises on the slopes (4000–5000 ft.) of Sierra Parima, below Peak Ferdinand de Lesseps, in about 2° 30′ N., 64° 25′ W. Down to its confluence with the Guaviare (left), a little W. of 68° W., it maintains for some 360 m. a general ENE. direction, and is joined on the left, in 3° 10′ N., 66° 17′ W., by the Casiquiare, which connects at its other (S.) extremity with the Rio Negro, a trib. of the Amazon, and on the right by the Ventuari. From its confluence with the Guaviare, in 4° 5′ N., it flows almost due N. for 350 m., receiving from the left the Vichada, Meta, and Apure, and descending from the highlands to the lowlands by the cataracts of Maipures (3000 yards wide, 660 yards long) and Atures (8700 yards wide, 6 m. long). Between the mouths of the Guaviare and the Meta it separates Venezuela from Colombia, otherwise its entire course runs through Venezuelan terr. From the confluence of the Apure (7° 36′ N., 66° 47′ W.) the main stream flows almost due E. across the llanos, or grassy plains, to the Atlantic Ocean, in 8° 20′ to 10° 0′ N. Along this part of its course its principal tribs., the Caura and the Caroni, come from the right or S. The delta begins in 62° 30′ W., 125 m. from the ocean, and covers an area of 8500 sq. m. Of its numerous mouths seven in all are navigable, the one principally used, lying between Nuima I. and Brit. Guaiana on the S., is known as the Boca de Navios. The water of the river is of a milky white colour, and is plainly distinguishable at a vast distance from land. The O. thus describes a huge semicircle, its estuary being only 500 m. distant (NNE.) from its source, whilst its entire course measures 1550 m., of which 900 m. below the great cataracts (Atures), and 600 m. above them (Maipures), are navigable. In its upper portion the river flows between the mountains and impenetrable forests of Venezuelan Guaiana on the E., and the wide llanos of Colombia on the W.; but after it reaches the lowlands, that is, below the confluence of the Apure, it has the mountains on its left (N.) side, and the plains on its right. At 150 m. from its source the river is only 270 ft. wide. Above the confluence of the Casiquiare (alt. 1000 ft.) it is 650 yards wide; below the confluence of the Apure (210 ft. alt.) 4–5 m. wide. During the flood season (April–September) after the rains, the lower course becomes an immense lake, covering the llanos for half a dozen miles and more to the E. of the Apure. Area of basin, 365,000–375,000 sq. m. See **Ciudad Bolivar.**

Orinoco, Alto, terr., Venezuela, partly bounded on the W. by the Orinoco, and crossed by 4° N.; cap. San Fernando.

Orissa, an ancient kgd. of India, now forming the SW. div. or commissionership of the lieutenant-governorship of Bengal, in all about half the size of England, physically, and for the most part politically, divided into two distinct terrs., one a fertile alluvial deltaic flat, on the Bay of Bengal, traversed by the interlacing waters of the Mahánadi, Brahmani, and Baitarani, composing the Brit. dists. of Purí, Cuttack, and Balasor, the other a wild mountainous region, mainly occupied by sparsely populated tributary hill states, which surround, however, the British dist. of the Angul and Kandh Mehals. The O. coast canal with the Hijili tidal canal forms an unbroken line of communication with Calcutta. The archives found in the temple of Jagannáth at Purí trace the history of the kingdom back to earlier than 3000 B.C. From about the middle of the 6th century B.C. to the latter part of the 5th century A.D. the kingdom belonged to the dynasty of the Yavanas, during most of which period the religion was Buddhism. The Yavana dynasty was succeeded by the Siva-worshipping Kesari line, and this again, in 1132, by a Vishnuite line from the Ganges basin. In 1567–68 the kingdom was conquered by a Mohammedan Afghan dynasty, but in 1578 it became part of the Mughal Empire, which it remained till 1751, when it came into the possession of the Maráthás. From these it was captured by the British in 1803. For area and population of dists., climate and products, see **Bengal.**

Oristano, tn., Sardinia, prov. Cagliari, on the Tirso, 41 m. N. Iglesias, 2½ m. from the **Gulf of Oristano,** the bay on the W. ct., in 39° 43′–55′ N.; enormous malarial death-rate. P. <3000.

Orkhon, riv., Mongolia, joins the Selenga a few miles SW. of Kiakhta, after a NE. course of 450 m.; chief affluent the Tola. Its banks are fertile, and skirted by grassy plains.

Orkhunor, lake, Chinese Empire, Dzungaria, believed to exist about 150 m. N. of Manas, in 46° N., just E. of 86° E.

Orkney Islands, anciently *Orcades* (probably from *Orc,* Gaelic, 'a large beast,' especially 'a whale,' possibly with the termination *innis,* 'island,' which may have got modified later into the Norse termination *ey,* 'island'), a group of 67 islands, Scot., separated from Caithness by the Pentland Firth, and extending 50 m. NNE. The largest are Pomona, or Mainland, 376 sq. m., and Hoy, 53 sq. m. The geological formation resembles that of the adjoining mainland, being almost entirely Old Red Sandstone, with some granite and gneiss near Stromness; and the surface, excepting Hoy, level and tame, varied by the fresh-water lochs which everywhere abound. Hoy has bold precipitous cliffs on W. 1000 ft. high, and Ward Hill 1564 ft. Besides the inhabited islands, 28 in number, and the 39 'holms' used for grazing, there are many 'skerries' or rocky islets. The ground under culture has more than doubled since 1850. For agricultural statistics, see **Appendix,** pp. 10–12. Fishing forms an important industry; the staple manufacture is knitted goods. Taken by Harold Haarfager in 875, the Orkneys continued under Scandinavian rule till 1468, when they were given to James III. as a security for the payment of his wife's dowry, being finally resigned to the Scottish throne in 1590, on the marriage of James VI. with the Princess Anne of Denmark. Stromness has become important as a rendezvous of the Davis Straits and Greenland whalers. The antiquities of Orkney are Picts' houses, consisting of many-chambered mounds and 'weems,' or underground houses, stone circles (see **Stennes**), the fortresses called 'brochs,' and the 'Maeshow,' a great sepulchral cairn. The only town is Kirkwall (*q.v.*), and the villages are Stromness and St. Margaret's Hope. Orkney (since 1889) no longer forms a county with the Shetland group of islands, but unites with it to return one member to Parliament; ecclesiastically, it belongs to the synod of Orkney, which meets at Kirkwall. Mean rfall. (1866–80), Pomona (Sandwich, alt. 78 ft.), yr. 37.8 in.; Shapinshay (Balfour Castle, alt. 50 ft.), yr. 32.3 in. P. (1801) 24,400; (1871) 31,300; (1891) 30,500; O. Main Isle, P. 16,500; parl. dist. (**O. and Shetland**) P. 54,800.

Ormstown, or **Durham,** vil., Canada, Quebec, Chateauguay co., 37 m. SW. Montreal.

Ormuz, Hormuz, or **Jerun,** an isl. in the Persian Gulf, on the N. side, near its entrance, NE. of the island of Kishm, 45 m. N. Cape Massandum (Arabia), now belonging to Persia; lat. 27° 5′ N., long. 56° 29′ E. It is about 13 m. in circumference, but important as having been formerly (14th to 17th century) one of the richest commercial emporia in the East. It has an extraordinary appearance from the sea, its mountains (S. half) being of variegated colours, from extensive impregnations of salt, sulphur, and other minerals. On the plain, which constitutes its N. portion, is the town, with a harbour now silted up, and a fort; but the place is sadly decayed, and contains few inhabitants — fishermen and salt-diggers. Salt and sulphur are the only products of the island. Originally the port of O. stood on the mainland, near the mouth of the Minau Creek, to the E. of the island; but this town having been destroyed by the Tatars about the end of the 13th century, the new town and port was built on the island. (See Yule's *Marco Polo*, i. 104–5.) O. was captured in 1507 by the Portuguese under Albuquerque, but taken from them by the British and Persians in 1622, when its trade as a depôt for the produce of India, China, &c., was transferred to Gombroon (Bandar Abbas). The **Strait of Ormuz** connects the Persian Gulf and the Gulf of Oman.

Ornain, riv., France, rises near Neuville (dep. Haute-Marne), flows NW. past Ligny and Bar-le-Duc, and joins the Saulx on r. bk. Length, 70 to 75 m.; ordinary discharge, 150 cubit ft.

Ornans, tn., France, dep. Doubs, arr. and 11 m. SE. by S. Besançon. P.<3000.

Ornavasso, vil., Italy, Piedmont, on the Toce, prov. Novara, 34 m. WNW. Como. P.<2000.

Orne, dep., NW. France, traversed S. to NW. by Orne R., formed in 1720 of parts of Normandy (Lower Normandy, Alençon, and Perche), divided into four arrs.: Alençon (cap.), Argentan, Domfront, and Mortagne. The dep. comprises two physically distinct regions, the W. and the E.; the former consists of Primitive rocks, granite, gneiss, and schists, rising into rugged hills, covered in places with extensive forest, and interspersed with stretches of pasture, but having little land suited for cultivation. In the E. (Perche) region Cretaceous and Tertiary (Miocene) formations predominate, forming fertile valleys and rich pasture-lands. The culminating point (1355 ft.) of the dep. occurs in the Forêt d'Ecouves, on a chain of hills which stretches E. and W. through the central part. The dep. belongs to three basins, the Loire, Seine, and English Channel, of which the first receives more than half the drainage by the rivs. Mayenne and Sarthe, both rising in the dep. and forming parts of the S. frontier; the Huisne, which drains the SE., joins the Sarthe outside the dep. To the basin of the Seine belong the short upper courses of the Eure and Rille in the NE. The principal coast river is the Orne, length in dep. (2 m.); others are the Dives and Tonques. The dep. contains over 300 rivers and streams, numerous small lakes ('étangs'), and several marshy tracts. Climate, Sequanian [**Alençon**]. East winds, known as the 'vingtaines' or 'ventaines,' prevail during May, and do much injury to fruit-trees. The principal objects of culture are cereals and apples for cider; of the former, wheat is the most important, then oats and barley. Textile fabrics (cotton, linen, and hemp) form the principal manufactures, carried on in Flers and surrounding towns. Vimoutiers has extensive bleachfields; Alençon is celebrated for its lace. Area, 2372 sq. m. P. (1891) 354,400. See **France,** table.

Orne, the ancient *Olina*, small riv., France, rises near Séez (dep. Orne), flows into the English Channel past Argentan, Ecouché, and Caen, where it becomes navigable for vessels of 10 to 12 ft. at spring tides. There is also a lateral canal from this point to the sea, admitting vessels of 13 ft. depth. Length 94 m.; basin, 992 sq. m.; ordinary discharge 4600 cubit ft., in flood 10,600 cubit ft.

Ornö, isl., Sweden, SE. of the entrance to the waterway leading to Stockholm.

Ornsay, isl., Scot., Inverness-shire, Sleat par., PMT.O. P. 64.

Örnsköldsvik, vil., Sweden, prov. W. Norrland, on an inlet on the E. ct., 54 m. NNE. Hernösand. Public quay 722 ft. long, 14 ft. 9 in. maximum depth alongside. Good anchorage, with a depth of 23–80 ft.

Osnabrück, formerly spelt in England **Osnaburg,** or **Osnaburgh,** tn., Prussia, prov. Hanover, cap. dist., on the Hase, 75 m. SSW. Bremen, and 70 m. WSW. Hanover. Important iron and steel works; manufactures machinery, gas-meters, chemicals, paper, and tobacco; formerly linen was the staple product, and gave name to 'osnaburgs.' Railway station of line from Hamburg to Münster. Charlemagne founded a diocese here, but after the Reformation and Thirty Years' War Osnaburg declined; the last bishop was the Duke of York, son of George III., the chapter being dissolved in 1802. In 1859 a Roman Catholic diocese was constituted, and the cathedral, with three towers, is the chief public building; the Marienkirche, a Gothic building of the 14th century, has finer architecture. The chief promenades, on the site of the ancient fortifications, separate the old town from its handsome modern extensions. Alt. 65 ft. P. (1871) 23,300; (1880)32,800, one-third being Roman Catholics; (1890) 39,900.

Oss, comm., Netherlands. See **Osch.**

Ossa. See **Greece,** surface.

Ossa, a name sometimes given to the coast lagoon stretching parallel to the N. shore of the Gulf of Guinea from Porto Novo (French Dahome) to the riv. Benin (about 2½°-5° E.), mostly very narrow, but expanding into large lakes in places between Lagos and Lekki.

Ossa, riv., W. Prussia, joins the Vistula near Graudenz, after a W. course of 45 m.

Ossabaw Island, isl., U.S., Georgia, forming part of Bryan co., 15 m. S. Savannah, at entrance of Ogeechee R. Length, 9 m.

Ossabaw Sound, bay, U.S., Georgia, between Chatham co. and Bryan co., 9 m. S. Savannah.

Ossana, vil., Austria,, Tirol, 34 m. WSW. Botzen, close to Fucine.

Ossau, large and beautiful valley of French Pyrénées, in dep. Basses-Pyrénées, S. of Pau, communicating with Spain (Huesca) by the Pass of Pourtalet or Aneu.

Osse, sometimes called **Losse,** torrent, France, rises on the confines of deps. Gers and Hautes-Pyrénées, and flows N., joining the Gélise 3 m. WSW. of Nérac. Whilst frequently dry in summer, it has a discharge of 8700 cubic ft. in flood. Length, 75 m.; area, 205 sq. m.

Os Sebastricum, tn., Africa. See **Massaua.**

Ossegor, ct. pool, France. See **Hossegros.**

Ossendyke, part of par., Eng., Yorkshire. See **Ryther.**

Ossero, fishing vil., Austria, Coast Prov., on SW. ct. of isl. Cherso, 29 m. SE. Pola. P. <2000. **Mount Ossero,** N. end of isl. Lussin, opposite village of Ossero; alt. 1900 ft.

Ossetes, or **Osses,** stem of Caucasians, Russia, provs. Terek and Tiflis. Osses is the name given to them by the Georgians, while they give themselves the name of Iron, and to their terr. Ironiston; Asses and Yasses of Russian chronicles. Most probably the Alans of ancient writers. Occupy now a special Ossetian dist. in the middle part of the main Caucasus range. Their number was estimated in 1886-90 at 127,430.

Ossett, mun. bor. (since 1890) and par., Eng., Yorkshire, W. Riding, S. div., 3½ m. W. Wakefield, in the diocese of Wakefield, on the Calder, and Calder and Hebble Canal, with three stns. on G. N. R. Staple manufacture is in woollen rags, and mungo, merino, and extract wools; extensive collieries; grammar school and mechanics' institution; technical school since 1884, enlarged 1890. Mun. bor. (1890) 3105 ac., P. (1871) 9200; (1891) 11,000 nearly; par. (**O. with Gawthorpe**) P. 11,000; eccles. par. (**South O.**) P. <5000.

Ossi, tn., Sardinia, prov. and 4 m. SSE. Sassari. P. (comm.) <3000.

Ossian, vil., U.S., Indiana, Wells co., 88 m. NE. by N. Indianapolis. P. <1500.

Ossian, vil., U.S., Iowa, Winneshiek co., 25 m. SE. Cresco by rail. P. <1500.

Ossian Loch, lake, Scot., Inverness-shire, in the extreme S., in 4° 38′-40′ W., 3 m. long; drained N. into Loch Gulbin. Alt. 1269 ft.

Ossington, par., Eng., Nottinghamshire, div. and 7½ m. NNW. Newark, 2 m. WNW. Carlton-on-Trent stn., P.O. P. <250.

Ossipee, tn., U.S., New Hampshire, Carroll co., 41 m. NE. by N. Concord. P. <2000.

Ossipee Lake, U.S., New Hampshire, in the E. of Carroll co., drained E. by the Ossipee R. into Saco R., 45 m. NNE. Concord.

Ossory, Roman Catholic diocese, Ire., SW. Leinster prov.; the bishop's seat is at Kilkenny.

Ossun, tn., France, dep. Hautes-Pyrénées, 12 m. NW. Bagnères-de-Bigorre, arr. and 7 m. SW. by W. Tarbes. P. <3000.

Ost, Ger., 'east.'

Ostashkov, dist. tn., Russia, govt. and 162 m. NW. Tver, on S. shore of Lake Seliger, at the head of Volga; fishing, considerable fabrication of boots and leather goods, as also scythes, hatchets, and other hardware as domestic industries. P. 12,030.

Oste, riv., Prussia, prov. Hanover, flows N. into the Elbe, which it enters about 12 m. E. of Cuxhaven; navigable from Minstedt, 48 m., and connected with the Hamme by canal.

Ostend (named from being the *east end* of a strip of land along the shore), seapt. tn. and watering-place, Belgium, prov. W. Flanders, on the German Ocean, 77 m. WNW. Brussels, and 60 m. E. of the Kentish coast, on a large plain below high-water level. It is a terminus of several railways and of the Bruges canal, besides being a station for the Dover mail-packets and for London steamers. The granite sea-wall, 3 m. long, and two piers, serve as excellent promenades. Other objects of interest are the tidal harbour, with two large floating basins, and important fish traffic; the school of navigation, the Cursaal, the lighthouse 175 ft. high, and the king's summer palace. The concourse of visitors in the season amounts to from 18,000 to 20,000, the extensive smooth sands being admirably adapted for bathing purposes. O. is the second Belgian port, and has 1148 ft. of quayage for merchant vessels, 574 ft. for government vessels. Exports butter, rabbits, oysters, nearly all for England. Manufactures sailcloth, tobacco, candles, &c., but these are unimportant. Raised to a stronghold by the Prince of Orange, it endured a siege by the Spanish of over 3 years,

1601–1604; from 1794 to 1814 it belonged to France. The walls were demolished in 1865. Mean temp., yr. 51.0° F., Jan. 38.8°, July 64.8°. P. (1866) 16,700; (1886) 22,600; (1890) 24,400.

Osteodes, ancient name of Medico (*q.v.*), isl., Sicily.

Öster, Östra, Östre, Scandinavian; *Öster* also found in Ger. place-names, 'east.'

Oster (Ostior), dist. tn., Russia, govt. and 61 m. SSW. Chernigov, on l. bk. Desna, near its junction with O. P. 5210.

Osterath, vil., Prussia, Rhine Prov., circle and 6 m. SSE. Krefeld. P. (comm.) <3000.

Osterbauerschaft, vil., Prussia, prov. Westphalia, govt. Münster, circle and 9 m. NW. Steinfurt. P. <3000.

Österbotten, Finland. See **Uleåborg** and **Vasa.**

Osterburg, tn., Prussia, prov. Saxony, on riv. Aland, 47 m. N. by E. Magdeburg, cap. O. circle. P. <5000.

Österdal ('eastern valley'), valley, E. Norway, traversed by the railway from Christiania to Trondhjem and the riv. Glommen. In the wider sense it designates the Glommen valleys from Röraas to Kongsvinger; in the narrower sense, it is confined to the upper part of the Glommen valley proper.

Oster Ems, strait, Prussia, prov. Hanover, forming the entrance to the Ems to the E. of the isl. of Borkum.

Osterfeld, tn., Prussia, prov. Saxony, circle Weissenfels, 18 m. NE. by E. Jena, 7 m. SE. Naumburg. P. <2000.

Osterfeld, vil., Prussia, prov. Westphalia, circle Recklinghausen, 6 m. NW. by W. Essen. P. <5000.

Östergötland, prov., Sweden (*q.v.*), between the Baltic and Lake Wetter; cap. Linköping.

Osterhofen, tn., Ger., kgd. Bavaria, govt. Lower Bavaria, circle Vilshofen, 21 m. WNW. Passau. P. <2000.

Osterholz, tn., Prussia, prov. Hanover, 10 m. N. Bremen, cap. O. circle. P. <2000.

Osterkappeln, vil. with certain rights of jurisdiction (*weichbild*), Prussia, prov. Hanover, 8½ m. NE. by E. Osnabrück. P. <2000.

Osterley, stn., Eng., Middlesex, Brentford div., on the District Rly., 11 m. W. by S. St. Paul's, London.

Österlöfsta, vil., Sweden, prov. (län) and 39 m. N. Upsala; has rich iron-mines. P. 4000.

Osternburg, comm., Ger., gd.-duchy and dist. Oldenburg, on the r. bk. of the Hunte, opposite Oldenburg. P. 5200.

Österö, one of the Faroe Is., to the E. of Strömö.

Österö, isl., W. ct. Norway, prov. Bergen, the largest of the isls. of S. Norway, separated by the Österfjord from the penin. on which Bergen stands. Area, 125 sq. m.

Osterode (am Harz), tn., Prussia, prov. Hanover, 18 m. NE. Göttingen; cap. O. circle. P. 6600.

Osterode (in Ostpreussen), tn., Prussia, prov. E. Prussia, 39 m. SE. by S. Elbing, on Lake Drewenz; cap. O. circle. P. 8900.

Österrisör, tn., Norway, prov. Nedenäs, on the S. ct., 26 m. NE. by E. Arndal. P. <4000.

Östersund, tn., Sweden, prov. Jemtland, on Lake Stor, 100 m. NW. by W. Sundsvall. Alt. 972 ft. Mean temp., yr. 34.8° F., Feb. 16.1°, July 57.1°. P. 5300.

Oster Weddingen, vil., Prussia, prov. Saxony, circle Wanzleben, 6 m. SSW. Magdeburg. P. <2000.

Osterwick, vil., Prussia, prov. Westphalia, govt. Münster, circle and 5 m. NNE. Koesfeld. P. (comm.) <3000.

Osterwieck, tn., Prussia, prov. Saxony, circle and 17 m. WNW. Halberstadt, 15 m. SE. by S. Wolfenbüttel. P. 5400.

Ostfriesland, dist., Prussia, prov. Hanover, between the NW. of Oldenburg and the Dollart.

Ost-Grossefehn, vil., Prussia, in NW. of prov. Hanover, govt., circle, and 6 m. SE. Aurich. P. (comm.) <3000.

Östhammar, tn., Sweden, prov. Stockholm, 40 m. NE. Upsala. P. <2000.

Ost-Havelland, circle, Prussia, in the middle of the prov. Brandenburg, crossed in the middle by 52½° N., and by 13° E., cap. Nauen.

Ostheim, tn., Ger., gd.-duchy Saxe-Weimar, circle Eisenach, 19 m. SSE. Dermbach. P. <3000.

Osthofen, market-tn., Ger., gd.-duchy Hesse, circle and 5 m. NNW. Worms. P. <4000.

Ostia (Latin, 'mouth'), vil., Italy, prov. and 13 m. SW. Rome, near the mouth of the Tiber; formerly port of Rome, now almost deserted on account of its unhealthiness. Here are a cathedral and an episcopal palace. During the 19th century the sand was cleared away from several of the ancient temples and streets. P. <2000.

Ottaguechee, riv., U.S., Vermont, in the E. It rises in the Green Mts., and flows E. to the Connecticut, which it joins on the r. bk. at North Hartland, in 43° 35′ N.

Ottakring, suburb of Vienna, Austria.

Ott'awa (named after an Indian tribe), river, Canada, one of the largest in British America, rises close to the watershed between the Hudson Bay and the St. Lawrence basin, nearly 300 m. N. of the capital, to which it has given its name, and after a 600 m. course (W. and SE.) reaches the St. Lawrence by two mouths, forming the island Montreal. The source is assigned to a Lake Ottawa (named 1887), in about 48° N., near which also rises the Gatineau, its chief trib. It receives four important tribs. on each bank, besides many smaller ones, forms numerous large lakes, and separates for a great part of its course Ontario and Quebec, the area of the country watered by this river system being 80,000 sq. m., and the quantity of timber floated on it in the 'lumber trade' unequalled. Upon approaching the capital the river narrows to 200 ft., forms the Chaudière Falls, 40 ft. high, and 2 m. further E., at the other extremity of the capital, the trib. Rideau. Half-way between those falls the Rideau Canal intersects the town to communicate by water with Lake Ontario.

Ottawa, episcopal city, Canada, cap. of the Dominion, seat of the supreme court, and residence of the governor-general, on the r. bk. of the riv. Ottawa (and therefore in province Ontario), about 90 miles above its junction with the St. Lawrence. It is 120 miles W. Montreal, or (by Canadian Atlantic Rly.) 116 miles. O. is also served by the Canadian Pacific Rly. Steamers ply to Montreal and for 200 m. up the river above the falls, as well as to Kingston, by the Rideau Canal. The city is regularly laid out in rectangular blocks, extending 2 m., from the Chaudière Falls to the Rideau Falls; and the Rideau Canal separates the higher town from the lower. On Parliament Hill, overlooking the broad river and much grand scenery, are built the Government Buildings, the central building 470 ft. long. Other public edifices are the Roman Catholic cathedral, 200 ft. high, the O. University, two hospitals, the Government Normal School, &c. The public library contains 140,000 volumes. On the l. (N.) bk. is the town of Hull. An eastern suburb, New Edinburgh, beyond the Rideau R., contains the residence of the governor-general. The industries are mainly connected with the lumber trade; some manufactures of flour, iron goods, leather, matches,

Alt. 300 ft. Rfall. (10 yrs.), 19.7 in.; snowfall (12 yrs.), 117.1 in. P. (1851) 7760; (1861) 14,700; (1871) 21,500; (1881) 27,400; (1891) 44,200, one-half being Roman Catholics, to which 15,000 may be added for the suburbs; about a third of the total population are French Canadians.

Ottawa, city, U.S., Illinois, La Salle co., on Illinois R., 73 m. SW. by W. Chicago; abounds in coal; manufactures agricultural implements, starch, and glass. The Fox R. affords great water-power. S. of Illinois R. are great mineral springs in a handsome park. P. (1880) 7800; (1890) 10,000.

Ottawa, city, U.S., Kansas, Franklin co., on Osage R., 35 m. SE. Topeka; has large manufactures. In June, place of meeting of the largest Chautauqua assembly in the west. P. 6200.

Ottawa, co., U.S., Kansas, crossed in S. by 39° N.

Ottawa, co., U.S., Michigan, in the SW., on Lake Michigan, crossed by 43° N., and traversed by the Grand R.

Ottawa, co., U.S., Ohio, in the NW., on Lake Erie, crossed by 83° W.

Ottawa, vil., U.S., Ohio, Putnam co., 52 m. SW. by S. Toledo. P. <2000.

Ottawas, tribe of Algonkin Indians, U.S., a small section are settled in Indian Terr., but a considerable number are with the Ojibways of Michigan.

Ottensen, W. suburb of Altona (since 1889), Prussia, prov. Schleswig-Holstein.

Ottensheim, comm., crownland Upper Austria, on the l. bk. of the Danube, dist. and 6 m. WNW. Linz. P. <3000.

Ottenstein, spa, Saxony. See **Schwarzenberg.**

Otter, vil., Canada, prov. Ontario, on the C. P. R., 694 m. by rail W. Montreal.

Otter, riv., Eng., in the E. of Devonshire, flows SW. past Honiton and Ottery St. Mary into the English Channel, 4½ m. E. Exmouth; much frequented by anglers. Total length, 24 m.

Otter, Otterelv, or **Torrisdalselv,** riv., S. Norway, flows S. into the Skager Rak, forming the E. port of Christiansand. Length, 140 m.; area, 1297 sq. m.

Otterberg, tn., Ger., Bavarian Palatinate, circle Kaiserslautern, 31 m. W. Mannheim (Baden). P. <2000.

Otterbourne, par., Eng., Hampshire, Andover div., 4½ m. SSW. Winchester, 1½ m. SW. by S. Shawford and Twyford stn., PMT.O. P. <1500.

Otterburn, par., Eng., Northumberland, on the Rede, div. and 18½ m. N. by W. Hexham, 4½ m. N. Woodburn stn.; coal mined. Here was fought the tough fight of Chevy Chase between the Scottish Earl of Douglas and Hotspur, Earl of Northumberland, on 19th August 1388. PMT.O. 8563 ac. P. <500. See **Elsdon.**

Otterburne, stn., Canada, Manitoba, on the Emerson branch of the C. P. R., 27 m. S. by E. Winnipeg.

Otter Creek, riv., U.S., Vermont, in the W.; rises in the SW., in the N. of Bennington co., and flows N. till it enters Lake Champlain, in 44° 13′ N.

Otter Creek, Big, Canada, Ontario, flows E. then S. into Lake Erie, about 80° 48′ W.

Otterden, par., Eng., Kent, on the E. border of the Medway div., 6 m. SW. Faversham, 3 m. N. Charing stn. P. <250.

Otterelv, riv., Norway. See **Otter.**

Otter Ferry, P.O., Scot., Argyllshire, on the SE. shore of Loch Fyne, 5 m. E. Ardrishaig.

Otterford, par., Eng., Somerset, Wellington div., on the S. border, 7 m. S. Taunton. P. <500.

Otterham, par., Eng., Cornwall, 3½ m. from the NW. ct., div. and 10½ m. WNW. Launceston, on the L. & SW. R., P.O. P. <250.

Otterhampton, par., Eng., Somerset, div. and 5 m. NW. by N. Bridgwater. P. <500; eccles. par. (**O. with Combwich**) P. <500.

Ottering Hythe, part of eccles. par., Eng., Norfolk. See **Methwold.**

Otterington, North and **South,** two adjoining pars., Eng., Yorkshire, N. Riding. North O., Richmond div., on the Wiske, 12½ m. N. by E. Ripon, 1½ m. N. by E. Newby Wiske stn., P. <250; South O., with a stn. (**Otterington**) on the NE. R., PM.O., P. <500; eccles. par. (**North O. with Thornton-le-Beans**) P. <750.

Otter Lake, lake, Canada, Ontario, Addington co., 70 m. NW. Kingston.

Otterndorf, tn., Prussia, prov. Hanover, 10 m. ESE. Cuxhaven, cap. circle Hadeln (formerly circle O.). P. <2000.

Oterö, isl., Norway, off W. ct. in 64° 30′ N. Another island of same name, but sometimes also spelt **Oterö,** off same coast, in 62° 45′, W. of Molde Fjord.

Ottershaw, eccles. par., Eng., Surrey, Chertsey div., 9 m. N. by E. Guildford, 2 m. WSW. Addlestone stn., PM.O. P. <1000.

Ottersleben, Gross, vil., Prussia. See **Gross-Ottersleben.**

Otterspool, stn., Eng., Lancashire, on the Cheshire Lines, to the SE. of Liverpool.

Ottersweier, comm., Ger., gd.-duchy and circle Baden, 2 m. SW. Bühl. P. <3000.

Otterswick, vil., Scot., Shetland Is., Yell I., Mid and S. Yell par., at the head of an inlet of the same name, 10½ m. SE. by E. of the N. end of the Mainland.

Otter Tail, vil., Canada, dist. Alberto, on the C. P. R., 980 m. by rail W. Winnipeg, 502 m. from Vancouver.

Ottertail, co., U.S., Minnesota, in the W., crossed in the W. by 96° W., N. of 46° N.,

Ottertail Lake, U.S., Minnesota, O. co., 142 m. NW. Minneapolis, 15 m. long by 3–5 m. wide. The Red R. of the N. issues from its W. end.

Otterton, par., Eng., Devonshire, Honiton div., 11½ m. ESE. Exeter, 3½ m. SW. by W. Sidmouth stn., P.O. P. <750.

Otterton Point, cape, Eng., in the E. of Devonshire, at the mouth of the Otter, 5 m. E. by N. Exmouth.

Otterville, vil., Canada, Ontario, Oxford co., 33 m. E. by S. London.

Otterville, vil., U.S., Missouri, Cooper co., 13 m. E. Sedalia by rail. P. <1500.

Ott'ery St. Mary, par. and market-tn., Eng., Devonshire, div. and 5 m. SW. Honiton, 11½ m. E. by N. Exeter, on the L. & SW. R. The town has an ancient church; manufactures of silk and ropes partly employ the population. Birthplace of the poet Coleridge (1772–1834). Market-day, Th. 10,008 ac. P. <4000.

Ottiglio, tn., Italy, Piedmont, prov. Alessandria, 18 m. S. by W. Vercelli. P. <2000.

Ottignies, vil., Belgium, prov. Brabant, arr. Nivelles, on the Dyle, 10 m. N. Ligny. P. <2000.

Ötting, Alt- and **Neu-,** two adjoining vils., Bavaria, near the r. bk. of the Inn, 31 m. SE. Landshut. Alt-Ö. P. <4000; Neu-Ö. P. <3000.

Öttingen, tn., Ger., kgd. Bavaria, govt. Swabia, circle and 9 m. NE. by N. Nördlingen. P. <4000.

Öttlaka, comm., Hungary, co. Arad, dist. Elek, 23 m. N. Ó-Arad. P. <4000.

Ottmachau, tn., Prussia, prov. Silesia, 45 m. S. by E. Breslau, circle Grottkau, on the Neisse. P. <4000.

Ottnang, comm., Upper Austria, dist. Vöcklabruck, 32 m. SW. Linz. P. <5000.

Otto, highest peak of Bismarck Range, German New Guinea, about 60 m. S. by W. Astrolabe Bay.

Ottobiano, vil., Italy, Lombardy, prov. Pavia, circle and 9 m. SSE. Mortara. P. <4000.

Ottone, vil., Italy, Lombardy, prov. Pavia, on the Trebbia, 24 m. NE. Genoa. P. <2000.

Ottringham, par., Eng., Yorkshire, E. Riding, Holderness div., 11 m. E. by S. Hull, on the NE. R., PM.O.; 4305 ac. P. <750.

Ottum'wa, city, U.S., Iowa, Wapello co., on both banks of the Des Moines R., 75 m. W. by N. Burlington, with extensive manufactures and linseed-oil mills. P. (1880) 9000; (1890) 14,000.

Ottweiler, tn., Prussia, Rhine Prov., 34 m. SE. Trèves, cap. circle O. P. <4000.

Ottynia, tn., Austria, Galicia, dist. Tlumacz, 14 m. SSE. Stanislawow. P. <5000.

Otumba, tn., Mexico, 31 m. NE. Mexico. P. (comm.) 9500.

Otuquis, riv., E. Bolivia, formed by the union of the Tucubaca (250 m. long), and the San Rafael or Lateriquiqui. All three flow SE., the O. either reaching the Paraguay between 19° and 20° S., or losing itself earlier in a series of marshes in about 19° 4′ S.

Ó-Tura, comm., Hungary, co. Nyitra, dist. and 7 m. W. by N. Vág-Ujhely (Neustadl); health resort. P. 6100.

Otuzco, tn., Peru, dep. Libertad, 320 m. NNW. Lima. P. <4000.

Otway, Cape, headland, Australia, Victoria, 80 m. SW. Port Philip, on which is a lighthouse. Alt. 300 ft. Mean temp., yr. 55.2° F., Feb. 61.5°, July 49.2°; rfall. (13 yrs.), 38.40 in.

Otway Bay, Chile, in 53¼° S., between Desolation and Santa Ines Is.

Otway Water, an inland sea of Tierra del Fuego.

Otymbinque, mission stn., German W. Africa, Damaraland, in about 18° 20′ S., 16° 3′ E.

Otyosazu, vil. and mission stn., S. Africa, Damara-land, in about 17° 58′ S., 17° 20′ E.

Ötzthal, Alpine valley, Tirol, drained by the Ötz, which flows N. and enters the Inn, 27 m. W. Innsbruck. This stream has its origin in the **Ötzthaler Alps.** See **Alps,** SUBDIVISIONS, **II. A.** (4). On them are the biggest glacier, Gepaatsch (7 m. long), in Austria, and Vent and Gurgl, the highest permanently inhabited villages in Europe.

Ouacha, lake, U.S., Louisiana, in the SE., 10 m. SSW. New Orleans.

Ouachita, or **Wash'ita** (the former spelling, originally French, is that recognised by the U.S. Board on Geographic Names, at least for the counties of that name in Arkansas and

Louisiana, though the latter gives the English pronunciation), riv., U.S., rises in the W. of Arkansas, flows E., SE., and S. through Arkansas and Louisiana till it joins the Red R. on the l. bk. in 31° 18′ N.; navigable 369 m. for steamboats from Camden, Ouachita co., Arkansas. Length about 500 m.

Ouachita, co., U.S., Arkansas, between 33° and 34° N., and crossed in the W. by 93° W., traversed by the Ouachita R.

Ouachita, par. (co.), U.S., Louisiana, crossed by 32½° N. and 92° W., traversed by the Ouachita R.

Ouareau Lake, Canada, Quebec, Montcalm co., drained S. by the riv. Ouareau into the St. Lawrence, at the confluence of the Ottawa.

Ouargla, oasis, Algeria. See **Wargla.**

Ouchy, vil., Switzd., cant. Vaud, on the N. side of Lake Geneva, 1½ m. S. Lausanne.

Oud-Beijerland, comm., Holland. See **Beijerlanden.**

Oudeberg ('old mountain'), mt., Cape Colony, near Graaff Reinet; alt. 5680 ft. On it is a health resort 3930 ft. above sea-level, 1500 ft. above Graaff Reinet.

Oudenarde, Oudenaerden, Belgium. See **Audenarde.**

Oudenbosch, comm., Holland, prov. N. Brabant, 9 m. W. Breda. P. <5000.

Ouderkerk, vil., Holland, prov. S. Holland, on the IJssel, 6 m. ENE. Rotterdam. P. (comm.) <3000.

Oudewater, tn., Holland, prov. S. Holland, on the IJssel, 12 m. WSW. Utrecht. P. (comm.) <3000.

Oudh, prov., India. See **North-West Provinces.**

Oudh, tn., India. See **Ajodhya.**

Oudon, vil., France, dep. Loire-Inférieure, arr. Ancenis, on the r. bk. of the Loire, 16 m. NE. by E. Nantes. P. <2000.

Oudshoorn, vil., Holland, prov. S. Holland, on the Old Rhine, 7 m. E. by S. Leiden. P. (comm.) <3000.

Oudtshoorn, tn., Cape Colony, cap. dist. O., on Olifant's R., 88 m. S. by W. Beaufort West; important agricultural centre; grain, wine, brandy, dried fruits, tobacco, &c. Alt. 1100 ft. Mean rfall. (13 yrs.), 9.6 in. P. <5000.

Oup, Aup, or **Ouob,** wadi or water-course, S. Africa, in Namaqua-land and Bechuana-land; bed slopes E. then SE. and joins the Nosob, about 25° 50′ S., 21° 0′ E.

Ouplaymoor, vil., Scot., W. Renfrewshire, 6½ m. SSW. Paisley, near Caldwell stn., PT.O. (**Uplawmoor**).

Ouray, mt., U.S., Colorado, 113 m. SW. Denver. Alt. 14,043 ft. (Hayden).

Ouray, city, U.S., Colorado, O. co., 100 m. NE. of the SW. corner of the state; silver and lead mined in the vicinity. P. <3000.

Ource, riv., France, deps. Haute-Marne, Côte d'Or, and Aube, joins the Seine near Bar-sur-Seine. Length, 60 m.

Ourcq, riv., France, rises in dep. Aisne, and after a SW. course of 49 m. joins the Marne near Lizy. The **Canal d'Ourcq,** which supplies Paris with water, branches from the O. at Senlis, and terminates in the basin of La Villette, NE. of Paris. Total length, 67 m.

Ourem, tn., Portugal, Estremadura, dist. and 29 m. N. Santarem. P. <4000.

Ourique, tn., Portugal, Alemtejo, dist. and 31 m. SSW. Beja. P. <4000.

Ournie, postal-tp., New South Wales, Selwyn co., 58 m. S. by E. Wagga Wagga; has gold-mining. P. <1500.

Ouro, in Portuguese place-names, 'gold.' See *Or.*

Ouro, isl. of Denmark, in the Ise-fiord, an inlet of Seeland, 29 m. WNW. Copenhagen. Length, 4 m.; breadth, 3 m.

Ouro, Rio de, bay, on W. ct. of Africa, a little to the N. of the Tropic of Cancer, penetrating nearly 40 m. NE., and taken by the Portuguese, A. G. Baldaya, who discovered it to be the estuary of a river, where he bartered for gold dust, hence the name of Golden River.

Ouro Preto, or in full, **Villa Rica do Ouro Preto** ('rich city of black gold'), and formerly known as **Villa Rica,** tn. and rly. stn., Brazil, cap. of state Minas Geraes, 180 m. N. by W. Rio de Janeiro. The city is overlooked by the double-peaked Itacolumi; it owes its origin to gold deposits discovered in 1698. Connected by a branch line of railway with Rio de Janeiro. E. of O. P., at the base of Itacolumi, are the gold-mines of Passagem and the town of Marianna, which, formerly rich like O. P., is now decayed in consequence of the exhaustion of the mines. P. 20,000.

Ourthe, riv., Belgium, trib. of the Meuse, rises in the prov. of Luxembourg, and flows W., NW., and N. through that prov. and the prov. of Liège, and joins the Meuse on the r. bk. 1 m. above Liège. Length 100 m., of which 35 m. is navigable.

Ourville, vil., France, dep. Seine-Inférieure, arr. Yvetôt, 11 m. E. by S. Fécamp. P. <2000.

Ousby, par., Eng., Cumberland, div. and 7½ m. ENE. Penrith, 3 m. E. by N. Langwathby; 7472 ac. P. <500.

Ousden, par., Eng., Suffolk, dist. and 6½ m. SE. Newmarket, P.O. P. <500.

Ouse (from Celtic *isca, use,* 'water'), riv., Eng., Sussex, rises near the source of the Arun, about 5 m. SE. Horsham, flows SE. then S. past Uckfield and Lewes, and cutting through the S. Downs, falls into the English Channel at Newhaven.

Ouse, riv., Eng., Yorkshire, formed by the junction of the Swale and Ure, near Boroughbridge, flows SE. past York, Selby, and Goole, and about 8 m. E. the latter town unites with the Trent to form the estuary of the Humber. Length about 57 m., navigable to Goole (*q.v.*), 8 m. up, for vessels drawing upwards of 21 ft.; to York, 43 m., for vessels of considerable size; and barges ascend to Ripon with the aid of a small canal, which joins the river about 2½ m. below the town.

Ouse, postal-stn., Tasmania, Cumberland co., on the Ouse, 41 m. NW. Hobart. P. <1500.

Ouse, Great, riv., Eng., rises in S. of Bedfordshire, and flows through cos. Norfolk, Northampton, Bucks, Bedford, Huntingdon, and Cambridge, and enters the Wash at King's Lynn. At Earith (a few miles below St. Ives), part of its water has been diverted from its old course (past Ely) by the Old and New Bedford canals, straight cuts 20 m. in length, rejoining the town above Downham Market. Chief affluents, the Ivel, Cam, Larke, Little O., Stoke, and Nar, all from the E. or S. Length, about 160 m., for the latter two-thirds of which, from Bedford downwards, it is navigable.

Ouse, Little, eccles. par., Eng., in the SW. of Norfolk and the adjoining part of Cambridgeshire, in the ancient pars. of Littleport, Hilgay, Feltwell Anchor, Feltwell St. Mary and St. Nicholas, and Redmore. P. <1000.

Ouse, Little, or **Brandon,** riv., Eng., joins the Great O. at the junction of the Stoke, New Bedford canal, and the Wisbech canal, which connects it with the Nen.

Ouseburn, Great and **Little,** two adjoining pars., Eng., Yorkshire, W. Riding. Great O., Ripon div., 7 m. ENE. Knaresborough, PMT.O., P. <500; Little O., P.O., P. <250.

Ousefleet, par., Eng., Yorkshire, W. Riding, Osgoldcross div., on the S. bk. of the Ouse, 5 m. E. by S. Goole, P.O. P. <250.

Ousel, or **Ouzel,** riv., Eng., Buckinghamshire, flows N., partly on the border of Bedfordshire, past Leighton Buzzard and Fenny Stratford, and joins the Great Ouse at Newport Pagnell.

Oust, vil., France, dep. Ariège, arr. St. Girons, 53 m. S. by W. Toulouse, 21 m. WSW. Foix. P. <2000.

Oust, riv., France, deps. Côtes du Nord and Morbihan, flows SE. and joins the Vilaine near Redon. In most part of its course it is accompanied by the canal between Nantes and Brest. Length, 93 to 99 m.

Ouston, par., Eng., Durham, Chester-le-Street div., 6½ m. S. Newcastle, 1 m. SW. Birtley stn., PM.O. P. <1000.

Ouston, par., Eng., Northumberland, div. and 9½ m. ENE. Hexham, 4½ m. N. by W. Prudhoe stn. P. <250.

Outagamie, co., U.S., Wisconsin, N. of 44° N., and W. of 88° W., traversed in the SE. by the Fox R.

Outardes Point, cape, Canada, Quebec, on the l. bk. of the riv. St. Lawrence, in 68½° W.

Outarville, vil., France, dep. Loiret, 22 m. N. by E. Orléans, arr. and 11 m. W. by N. Pithiviers. P. <2000.

Outchester, par., Eng., Northumberland, dist. and 2½ m. SE. Belford. P. <250.

Outeniqua Mountains, range of mts., Cape Colony, trending E. and W. about 10–20 m. from the coast, crossed by 23° E.

Outeragh, par., Ire., co. Tipperary, bar. Middlethird. P. <250.

Outer High, or **St. Paul,** eccles. par., Scot., Lanarkshire, in Glasgow city. P. 5900.

Outer Island, the north-easternmost of the Apostle Is., U.S., Wisconsin.

Ovid, vil., U.S., Michigan, Clinton co., 48 m. SW. by S. Bay City. P.<1500.

Ovid, vil., U.S., New York, Seneca co., 42 m. SW. by W. Syracuse. P.<1500.

Oviedo, prov. of Spain, between the Bay of Biscay (with about 200 m. of coast) and the Cantabrian Mts., principally formed by the basins of rivs. Nalon–Nora–Narcea, Sella, and Navia, in the middle of the old principality of Asturias (Asturia de Oviedo), in the 10th century a kingdom, afterwards absorbed in the kingdom of Leon. Very mountainous, with very fertile valleys (Mieres, San Bartholomé de Miranda, Grado, Villaviciosa) producing some of the fruits of the Mediterranean regions, and both wine and cider. Cattle-breeding extensively carried on. Very rich mining region. Abundance of very good coal (Nalon basin, Mieres, Langreo, connected by a railway with the port of Gijon) and peat, iron (Mieres), mercury, copper, manganese. Metallurgical industries being steadily developed, and important manufactures of other kinds also carried on. Mineral waters (Caldas de Oviedo). See **Asturias** and **Spain.**

Oviedo, anciently *Ovetum,* city, Spain, cap. prov. of same name, on a plain between the rivs. Nalon and Nora, 14 m. S. from the coast of the Bay of Biscay, and 72 N. by W. Leon. The prov. O. was anciently called *Asturias.* The plan is a central square, with four streets branching off N., S., E., and W. Public buildings are a noble Gothic cathedral, with tower 284 ft. high, and tombs of the early sovereigns of Asturias; a university, founded 1604; a fine aqueduct. O. is noted among Spanish towns for its healthy climate. Many iron-works, and 12 m. W. a great government factory for cannon, rifles, bayonets, &c. The mediæval scholars named O. *Civitas Episcoporum,* because many bishops and other priests took refuge here to escape the Moors. Alt. 738 ft. Mean temp., yr. 54·7° F., Jan. 45.1°, Aug. 65.4°; rfall. (14 yrs.), 36.73 in. P. (1877) 34,500; (1887) 42,700.

Oviglio, tn., Italy, Piedmont, prov. and 8 m. WSW. Alessandria. P.<3000.

Ovimbundu, tribe, Portuguese W. Africa, between Benguella and Bihe; enterprising traders.

Oving, par., Eng., Buckinghamshire, div. and 5 m. NNW. Aylesbury, 3 m. SE. by E. Grandborough Road stn., P.O. P.<500.

Oxford, vil., Canada, Nova Scotia, Cumberland co., on the riv. Philip, 57½ m. W. Pictou.

Oxford, co., Canada, Ontario, crossed in the S. by 43° N., and in the W. by 81° W.

Oxford, episcopal and university city, parl. (since Henry I.) and mun. bor., also (since 1888) co. bor., market and co. tn., Eng., Oxfordshire, 52 m. (63 m. by rail) WNW. London, in the diocese of Oxford, between the Thames (locally named Isis) on S. and W. and its trib. the Cherwell on E., on branches of the G. W. R. and NW. R., and on a canal connecting the Thames with Birmingham. The bishopric, dating from 1542, includes the whole of the counties of Oxford, Berks, and Bucks, with parts of the adjoining one. The main thoroughfare is High Street, a part of the London road, entered by Magdalen Bridge over the Cherwell, and ending at *Carfax* (=French *carrefour*, the 'cross-roads'), the centre of O. In 'the High,' much admired for its graceful curve, are Magdalen, All Souls, Queen's, and University Colleges, the Academical Schools, and the University Church. In St. Aldate's Street, running S. from Carfax, is Christchurch College and various municipal buildings, including a Free Public Library. In St. Giles's Street, running N. from Carfax, and forming a broad boulevard planted with trees, are the University Galleries and Taylor's Institution. In Broad Street, parallel to the High Street, and just without the line of the ancient city wall on the N., are Balliol, Trinity, and Exeter Colleges, the Ashmolean Museum, the Sheldonian Theatre (used for university assemblies), and the Clarendon Building; and in their neighbourhood the Bodleian and Radcliffe Libraries. Near Trinity College is a museum of natural science, with classrooms; and also the Clarendon Laboratory. The cathedral of O. has a central tower, with spire 145 ft. high, some of the building dating from the 12th century. There are many other fine ecclesiastical buildings, which, together with the imposing architecture of the colleges and halls and the surroundings generally, render O. one of the most beautiful towns in the world. O. was almost unknown till it became famous as a seat of learning. William I. besieged it, and in 1264 the Mad Parliament met here. From Saxon times there had been schools here, but it was not till the 12th century that a university was founded under Henry I., who in 1130 built Beaumont Palace, birthplace of Richard Coeur-de-Lion. Two centuries later O. was known over Europe as a centre of learning and instruction; and after the mendicant friars and other scholastic orders had settled there to found conventual classes the university became one of the greatest in mediæval times, producing such alumni as Roger Bacon and Friar Bungay. All was changed by the Reformation, and under Queen Elizabeth began the development of the modern university as a congeries of colleges. At present there are twenty-one colleges and two old halls, besides three private halls established under a statute of 1882. The colleges and old halls (which latter will become extinct on the next vacancy in the principalship) are: University College, founded 1249; St. Edmund Hall, 1260; Balliol College, 1268; Merton, 1274; Exeter, 1314; Oriel, 1326; St. Mary Hall, 1333; Queen's College, 1340; New, 1379; Lincoln, 1429; All Souls, 1437; Magdalen, 1458; Brasenose, 1509; Corpus Christi, 1516; Christ Church, 1546; Trinity, 1554; St. John's, 1555; Jesus, 1571; Wadham, 1613; Pembroke, 1624; Worcester, 1714; Keble, 1870; Hertford, 1874. The number of undergraduates has in recent years so increased that several hundreds now live in the town, in lodgings licensed by the university. Mansfield College and Manchester New College are two non-university institutions (founded 1886 and 1889), the former for the study of 'evangelical' theology, the latter with a 'free' faculty of theology. The revenue of the University has been estimated at £460,000. It has returned two M.P.'s since James I. The

city, as parl. bor., also returned two members till 1885, and now returns one. Market-days, W. and S. Alt. 210 ft. Mean temp. (20 yrs.), yr. 48.9° F., Jan. 38.4°, July 61.5°; rfall. (25 yrs.), 26.2 in. P. (1801) 11,700; (1851) 27,800; (1871) 34,500; (1891) 45,700.

Oxford Road, stn., Eng., Lancashire, Manchester (*q.v.*), on the L. & NW. R., and Manchester, S. Junction, and Altrincham Rly.

Oxfordshire, or **Oxon,** inland co., Eng., in the Thames valley or river-basin, l. bk. opposite Berkshire, on the r. bk.; divided into the following parl. divs.:—

	Acres.	Pop. 1891.
Northern or Banbury . . .	136,790	43,862
Mid or Woodstock . . .	196,530	50,134
Southern or Henley . . .	146,073	48,491
Oxford (city), part of (Mid div.) .	4,221	43,182
Total	483,614[1]	185,669[1]

[1] The administrative county includes also the part of the bor. of Banbury in the ancient county of Northampton, but excludes the part of Abingdon urban sanitary dist. in the administrative county of Berkshire. Area, 480,608 ac., P. 145,400, or including the co. bor. of Oxford (area, 4714 ac.), 485,322 ac., P. 191,191.

Besides the Thames, the county is also watered by the tribs. Windrush, Evenlode, Cherwell, Thame, and many smaller streams. The highest ground is in the Chiltern range, SE., nearly 700 ft. Another range immediately E. of the county town separates the Cherwell and Thame valleys, highest point Shotover Hill, 560 ft. Near the Thames the surface is varied with richly wooded heights and fertile dales, though flat and bare towards the N. and W. boundaries. The chief geological features are Lias in NW., yielding blue clays, a hard limestone ('Banbury marble'), and a valuable deposit of ironstone (largely worked near Banbury); beds of Oolite, with numerous fossils; Oxford clay; Upper and Lower Greensand. The Chiltern range is mainly chalk, and the 'forest marble' of Wychwood and Blenheim is due to the Oolite formation. The valleys of N. and E. show much drift accumulation, and those of the Thames and Cherwell alluvial deposits. Manufactures are unimportant, blankets at Witney, paper, agricultural implements, gloves; lace is still woven by hand in several villages. Communication by several branches of the G. W. R., also by the E. Gloucester and L. & NW. Rlys.; the Oxford and Birmingham Canal from NE. to the county town along the Cherwell. The ancient roads Icknield Street and Akeman Street crossed this county, and Oxford was a favourite residence of the Saxon kings of Mercia. Many events of the Civil War occurred here, such as the battles of Chalgrove Field (1643) and Cropredy Bridge (1644); and the whole district abounds in ecclesiastical and other antiquities. The county contains 5 mun. bors., Banbury, Henley, Chipping-Norton, and Woodstock, besides the county town. See **England,** table.

Ozail, or **Ozalj,** vil., Hungary, Croatia-Slavonia, co. Agram, dist. and 9 m. NW. Carlstadt. P. 7800.

Ozaka, or improperly **Osaka,** seapt. city, Japan, the commercial capital and one of the three 'imperial cities,' at the head of a gulf of the same name, at the mouth of riv. Yodogawa, covering an area of 8 sq. m., and intersected by many canals and river branches; the chief public building is its handsome castle, built 1583, with enormous walls of huge granite stones; till 1868 it contained a palace, described as the most magnificent structure in Japan. The largest Buddhist temple, covering an immense area, has a fine pagoda. Two other conspicuous temples have been converted into an hospital and public school by the government. There is a large mint and an arsenal; and O. is rapidly developing manufactures on a European scale, being one of the chief seats of the rapidly rising Japanese cotton industry, and manufacturing also woollen (as well as cotton) hosiery, felt and straw hats, glass, soap, iron and copper wares, as well as the old native products (paper, &c.). The chief thoroughfare is one of the busiest and gayest in the empire. Though O. is the headquarters of the rice and tea trade, its traffic is mostly inland, the harbour only admitting small craft; the neighbouring port of Kobe (*q.v.*) is the resort of large vessels. There is a dry dock for the iron-works, 250 ft. by 33 ft., with 14 ft. depth on sill at high water. There is a railway to Kyoto. Alt. 10 ft. Mean temp. (6 yrs., 1881–86), yr. 57.7° F., Jan. 37.9°, Aug. 80.2°; rfall. (4 yrs.), 52.42 in. P. (1872) 272,000; (1877) 284,100; (1889) 361,700; (1890) 473,500.

Ozama, riv., Haiti I., flows SE. then SSW. into the Caribbean Sea at Santo Domingo.

Pabo, stn., Wales, Denbighshire. See **Mochtre.**

Pabstberg, or **Pabststein,** eminence, Ger. See **Königstein.**

Pacaca, vil., Costa Rica, 14 m. SW. by W. San José.

Pacajaz, or **Pacaja,** riv., Brazil, state of Para, joins the estuary S. of the Marajo I., in about 51° W. Length, 190 m.

Pacaltsdorp, vil., Cape Colony, dist. and 5 m. S. George. P.<1500.

Pacaraima, Sierra, low mt. chain, S. America, extending for about 200 m. W. to E., in 4° N., and between 60° and 63° W., separating the basin of the Orinoco from that of the Rio Branco, and Venezuelan Guiana from Brazil.

Pacasmayu, vil., Peru, dep. Lambayeque, on the W. ct., in about 7° 25′ S. P.<2000.

Pacaudière, La, vil., France, dep. Loire, arr. and 14 m. NW. Roanne. P.<2000.

Pacawa, lake, U.S., Wisconsin, co. and 2 m. W. Green Lake. Length, 8 m.

Paceco, tn., Sicily, prov. and 4 m. SE. Trapani. P. (comm.) 6100.

Pacentro, tn., Italy, Abruzzi e Molise, prov. Aquila, 3 m. E. Solmona. P.<5000.

Pachacamac (the name of the Supreme Being among the

ancient Peruvians, a name of Quichua origin, meaning 'he who sustains the universe'), isl., off the coast of Peru, in 12° 19′ S. lat., 20 m. SE. Lima.

Pachachacaca, riv., Peru, flows ENE. then N. into the Apurimac, which it enters in 13° 25′ S.

Pachambá, tn., Brit. India, Bengal, Hazáribágh dist., in 24° 12′ N., 86° 18′ E.; headquarters of mission to the Santáls. P. <5000.

Pacheca, isl., Colombia, one of the Archipelago de las Perlas, off S. ct. Panama, in 8° 40′ S.

Pacheco, river-port, Paraguay. See **Puerto Pacheco.**

Pacheco, tn., Spain. See **Torre Pacheco.**

Pacheco, vil., U.S., California, Contra Costa co., 5 m. SE. Martinez. P. <1500.

Pachham, isl., India, Cutch, in the Great Rann of Cutch, crossed in the E. by 70° E.

Pachin, vil., Siam, 60 m. ENE. Bangkok.

Pachino, tn., Sicily, prov. and 26 m. SSW. Syracuse. P. 5800.

Pachitan, tn., Java, 60 m. ESE. Jokjokarta.

Pachite'a, riv., Peru, flows N. then E. and joins the Ucayali, in about 8° 40′ S.; navigable to Mayro, in 10° 55′ S., 75° 40′ W. *Proc. R. G. S.*, 1892, p. 388.

Pachmarhí, plateau and sanatarium, Brit. India, Central Provs., Hoshangábád dist., surrounded by the Chauradeo Játa Pahár and Dhúpgarh Hills, 2500 ft. above Sohágpur. Alt. 3528 ft. Mean temp., yr. 69° F., Jan. 58°, July 71°; rfall., yr. 78.0 in., June–Sept. 72.9 in. P. <5000.

Pachora, vil., Brit. India, Bombay, dist. Khándesh, 57 m. N. by E. Aurangábád. P. 5400; Hindus, 4000.

Pachou, tn., China, Süchwan, 150 m. N. by E. Chungking.

Pachpadra, vil., India, Rájputána, 53 m. WSW. Jodhpur. A few miles to the W. are the P. salt-pits, to which there is a rly.

Pachuca, mining tn., Mexico, Hidalgo, 56 m. NE. by N. Mexico. Silver mines were worked here before the Spanish conquest, and silver has been extracted almost continuously ever since. The mines of P. and the neighbouring **Real del Monte** produce one-sixth of the aggregate silver mined in the year in all Mexico. Here in the year 1557 Bartolomeo Medina discovered, and for the first time used, the patio, or cold amalgamation, process for extracting ore by the help of sulphide of copper, salt, and mercury. P. (1868) estimated 12,000; (1889) 32,800.

Pacific, glacier, Alaska. See **Glacier Bay.**

Pacific, tn., U.S., Missouri, Franklin and St. Louis cos., 30 m. WSW. St Louis; has iron, lead, copper, and glass-sand in the vicinity. P. <1500.

Pacific, co., U.S., Washington, on the W. ct., bounded on the S. by Columbia R.

Pacific Grove, tn., U.S., California, in Monterey co. and township. P. <1500.

Pacific Junction, vil., U.S., Iowa, Mills co., 15 m. S. by E. Omaha (Neb.). P. <1500.

Pacific Ocean, the largest of the great oceans, extends from 40° S. lat., where it communicates with the Southern Ocean, to the Arctic Circle, and from the W. ct. of America to the E. boundaries of Asia, Malaysia, and Australia. Its length from N. to S. is over 7000 m.; its greatest breadth (in about 5° N. lat.), over 10,000 m.; and total area 55.6 millions of sq. m. (Murray), exceeding by about 4 millions the whole land surface of the globe. At its southern limit the Pacific is about 7000 m. across, but to the N. it is almost land-locked, the only communication with the Arctic Ocean being through Bering Strait (*q.v.*), a channel 36 m. wide, and nowhere more than 30 fathoms deep. The eastern and western portions of the Pacific present in many respects a remarkable contrast. Except in Alaska, where the coast is low and swampy, and at the extreme S. of South America, where bays and islands are numerous, the American coast is rocky and mountainous, and it is broken by only three openings of importance, the Gulfs of California, Panama, and Guayaquil. In the eastern half continental islands are represented chiefly by such examples as Tierra del Fuego, Vancouver, Queen Charlotte, and Kadiak Is.; volcanic islands in the ocean are rare, the Galapagos group, 600 m. off the coast of Ecuador, being the only one of importance; and coral islands are absent. On the western side, except in Australia, the coast is irregular, and for the most part low and fertile; there are numerous large gulfs, and detached seas are enclosed by mountain ranges, which, although for the most part submerged, frequently rise above the surface, and form chains of continental islands. Thus the Bering Sea is cut off from the main Pacific basin by the Aleutian Is., the Sea of Okhotsk by the Kurile Is., the Sea of Japan by the Japan Is., the China Sea by Formosa, the Philippines, Palawan, and Borneo; while the islands of the Eastern Archipelago enclose the Sulu, Celebes, Java, Banda, and Arafura Seas. The Coral Sea is bounded by Australia (NE. coast), New Guinea, New Britain, Solomon Is., New Hebrides, and New Caledonia. Oceanic islands, although their total area is small, are almost innumerable, and they are in all cases either volcanic or coral; the chief groups are the Sandwich Is., Bonin Is., Ladrone Is., Caroline Is., Marshall Is., Gilbert Is., Solomon Is., New Hebrides, Fiji Is., Friendly Is., Samoa Is., Society Is., and Paumotu Is. The mean depth of the Pacific is estimated at 2500 fathoms; the floor of the eastern basin is level, or undulates uniformly at between 2000 and 3000 fathoms, and that of the western is very irregular, large patches of shallow water amongst the islands being found in close proximity to the greatest known depressions. The American vessel *Tuscarora* obtained 4655 fathoms (nearly 5½ m.) between the Kurile Is. and the coast of Japan. As is to be expected from so wide a range of level, the floor of the Pacific is covered with every variety of deposit, red clay in the abysmal depths, Globigerina and Pteropod ooze at higher levels, and in the enclosed basins blue mud and other terrigenous deposits. Notwithstanding its vast extent of coast-line, the land area drained by the Pacific is comparatively small, probably not more than 7½ millions of sq. m., or less than half the drainage area of the Atlantic. A consideration of the position of the Rocky Mountains and the Andes shows that by far the greater part of the drainage-area is Asiatic, America contributing only one large river—the Yukon, in Alaska—while on the western side the Amur, Hwang-ho, and Yangtse-kiang alone drain over two million sq. m. The Pacific Ocean was made known to Europeans by Balboa, a Spaniard, in 1513, but was not navigated by a European vessel till 1520, when Magellan gave it its present name. The first English vessel to cross the Pacific was the *Golden Hind*, under Drake, in 1578. The distribution of temperature and salinity and of animal life in the Pacific has been very fully investigated of recent years by such expeditions as those of the *Challenger*, *Tuscarora*, and *Vitiaz*. No submarine cable has as yet been laid across the Pacific, although various schemes are at present under consideration. For prevailing winds, currents, tides, &c., see **Oceans.** [**H. N. D.**]

Packerort, cape and lighthouse, Russia, S. ct. of Gulf of Finland, at entrance to Baltisch Port, 59° 29′ N., 24° 3′ E. Mean rfall. (16 yrs.), yr. 19.3 in., June–Nov. 13.4 in.

Padstow, par. and tn., Eng., Cornwall, St. Austell div., on the l. bk. of the riv. Camel, 11 m. NW. by W. Bodmin. The harbour is 100 ft. wide at entrance, depth ranging from 10 ft. neaps to 18 ft. springs (14 ft. ordinary springs); quayage, 1160 ft.: with lifeboat. PMT.O. P. <2000.

Padua, Italian **Padova,** tn., Italy, Venetia, cap. prov. P., on the canalised part of the Bacchiglione. The university, said to have been founded in 1222, has forty-six ordinary, and eight extra-ordinary professors. One of the most ancient cities of Italy, P. has several memorable buildings, *e.g.,* the cathedral (16th–18th century), baptistery (13th century), church of Il Santo (*i.e.,* St. Anthony, the patron saint of the city, finished in 1307), church of St. Justina (16th century), of the Hermits (13th century), of the Annunciation (14th century), the halls of justice (13th century), and the Renaissance town-hall (12th–13th century). An observatory occupies the tower of the palace of Ezzelino da Romano, tyrant of P. in the 13th century. A botanical garden has existed here since 1343. A magnificent equestrian statue by Donatello stands in front of St. Anthony's Church. P. was conquered by Rome (8th century B.C.), and sacked by Alaric the Goth and Attila the Hun. It is the birthplace of Livy, the Roman historian, and the painter Mantegna (1431–1506). Mean temp., yr. 55.1° F., Jan. 35.4°, July 75.4°; rfall. (1725–91), 33.7 in. P. (1871) 44,600; (1881) 47,300.

Paducah, city, U.S., Kentucky, McCracken co., on the l. bk. of the Ohio and Tennessee Rivs., 165 m. SE. St. Louis (Mo.); large shipping port for lumber, and important manufactures of hard wood. P. (1880) 8000; (1890) 12,800.

Painters Lane End, P.O., Eng., Cornwall, 2 m. from Portreath.

Paipa, vil., Colombia, dep. Boyaca, 25 m. NNE. Tunja, very important at the time of the Spanish conquest. Two miles to the S. a warm sulphur spring.

Paisley, vil., Canada, Ontario, Bruce co., on a trib. of the Saugeen R., 54 m. W. by S. Collingwood. P. <1500.

Paisley, originally **Passeleth,** mun. and parl. burgh, manufacturing tn., Scot., W. Renfrewshire, on both sides of White Cart Water, 6½ m. W. by S. Glasgow, with stations on the G. & P. Joint R. (**P. Gilmour Street**), on the G. & SW. R. (**P. Canal**), and on the C. R. (**P. St. James's**); has coal. The manufactures of linen and muslin, which appear to have been established in the 17th century, had attained to considerable importance in 1710; in 1786 the value of linens yearly manufactured amounted to £165,000. Linen sewing-thread, introduced in 1722, had an exceedingly prosperous course, but towards the end of the century it was replaced by cotton thread, which now forms a staple industry, employing over 7000 persons. Silk gauze, also largely produced during the 18th century, was replaced by muslins, still manufactured to a small extent. The manufacture of beautiful shawls, for which P. has been famous, was established towards the end of the 18th century, but has declined owing to change of fashion; plaid and various fancy goods are, however, extensively produced. Other industries are manufactures of starch, flour, carpets, chemicals, machinery, soap, bleaching, printing, and dyeing, &c., and shipbuilding. P. has fine public buildings, especially the town hall, Coats Memorial (Baptist) Church, library and museum, infirmary and grammar-school (the last two building in 1895); three public parks—the Fountain Gardens, 6 ac.; Brodie Park, 22 ac.; and St. James's Park, 40 ac.; and the Dunn Square, a small public garden, with statues of Burns, and of Thomas Coats and Sir Peter Coats. The Collegiate Church occupies the nave of the abbey, founded originally in 1163, and rebuilt in the 15th century. The Cart, 18 ft. deep, is navigable to P., and joins the Clyde 3 m. below the town. The harbour has an area of 5¼ ac., with 1920 ft. of quayage, and a depth of 18 ft. at high water, and 8 ft. at low water. Christopher North (Professor Wilson) and the poet Tannahill were natives of P. Statues to Tannahill and Alexander Wilson (ornithologist) adorn the Abbey burying-ground, and one of G. A. Clark stands in front of the town-hall. Alt. 46 ft. Market-days, M. and Th. Mean rfall. (Stanely Reservoir; alt. 190 ft.; 1866–80) 47.7 in.; Springside (6 m. S. Paisley, alt. 532 ft.) 56.3 in. Tn. P. 66,400; parl. burgh P. (1871) 48,300; (1891) 66,400.

Paitan, a large bay in the N. of Brit. N. Borneo, in 117¼° to 117½° E.

Paltas, lake, N. Sweden, prov. Norrbotten. Length, W. to E., 31 m.; breadth, 2½ m.; drained E. by the riv. Kalix.

Paithan, tn., India, Haidarábád, on riv. Godávari, 29 m. S. by E. Aurangábád, one of the oldest cities in the Deccan, believed to have been known to Ptolemy. The silk of P. once fetched fabulous prices; good work is still done, but the demand is small. P. (1881) 10,900.

Paiva, a small riv., Portugal, Beira, flows W. then NW. to the Douro, which it joins about 8° 20′ W.

Paiyenching, or **Poyentsin,** vil., in SW. of Chinese prov. Süchwan, about 135 m. NE. by N. Tali-fu (Yünnan); important brine-springs. See *Proc. R. G. S.*, 1886, p. 376.

Pajares, vil., Spain, prov. and 23 m. S. by E. Oviedo. P. <2000.

Pajaros (Spanish corruption of Latin *passer*, 'a sparrow,' 'any bird'), isl., Chile, off the W. ct., in about 29° 36′ S.

Pajaros, guaniferous islets, Chile, in 21° 6′ S.

Pajaros, islet, Peru, in Samanco Bay, in 9° 15′ S.

Pajilan, pass across the Elburz Mts., in the NW. of Persia, about 40 m. W. by S. Resht. Alt. 7050 ft. (Curzon).

Pajonal, maritime vil., N. Chile, prov. Atacama, 24 m. SSW. port Copiapo, in 27° 44′ S.

Pálanpur, tn., Brit. India, Bombay, cap. P. state, 83 m. N. Ahmadábád, lies low, commanded by a circle of hillocks; has a wall 3 m. in circuit. P. (1872) 17,200; (1891) 21,100.

Palaos, or **Palau,** Pacific. See **Pelew Islands.**

Palapye, or **Palachwe,** cap. of the Bamangwato, Brit. Bechuana-land, 88 m. S. by W. Tati, in 22° 37′ 30″ S., 27° 18′ E. It is rather a group of villages than a town; the villages, each under a sub-chief, being scattered over an area of some 16 sq. m. at the W. base of the Chupong Hills. It was only laid out in 1889, when Shoshong was abandoned on account of the lack of water. Unhealthy. Alt. 3150 ft. (Swan, *ab.*). P. about 15,000.

Pálár ('Milk River'), S. India, rises in Mysore, flows SE. into the Bay of Bengal a few miles S. of Sadras; largely used for irrigation. The P. anicut, near Arcot, is 2600 ft. long, the head of a system irrigating about 3800 ac. Length, 230 m.

Palas, Welsh, 'palace.' See *Palatium.*

Palas de Rey, comm., Spain, Galicia, prov. and 20 m. SW. Lugo, dist. Chantada; chief village, San Tiso. P. 8600.

Palaskenry, PMT.O., Ire. See **Pallaskenry.**

Palata, tn., Italy, Abruzzi e Molise, prov. and 24 m. NNE. Campobasso, 45 m. SE. Chieti. P. <4000.

Palatia, vil., Turkey in Asia, vilayet and sanjak Aidin, on the l. bk. of the Menderes, 61 m. S. by E. Smyrna, close to the ruins of the ancient Miletus.

Palatinate, Upper, govt., Ger., in E. of Bavaria (*q.v.*).

Palatinate of the Rhine, in Ger. **Die Pfalz** (from Latin *palatium,* 'palace'—referring to the number of royal palaces that once existed here, at Ingelheim, Kreuznach, Worms, Spires, &c.), part of Bavaria (*q.v.*), situated in SW. Germany, W. of the Rhine, and separated from Bavaria proper by Hesse-Darmstadt and Baden. The E. of the Rhine Palatinate belongs to the Rhine Plain, the W. is mountainous: Hardt Mts. towards the S., separated from the more fertile Rhenish Schiefergebirge (Slate Mts.) in the N. with the Donnersberg (2255 ft.) by the depression known as the Landstuhler Bruck (W. of Kaiserslautern) and the small valley of the Pfrimm. Principal river, the Rhine, which here has numerous small tribs. Climate mild and healthy. The Rhine Palatinate is principally an agricultural country, and large quantities of cereals, fruit, tobacco, and hemp are grown. Excellent wines are produced at many places (Deidesheim, Dürkheim, Ungstein, Wachenheim). Timber is plentiful, large tracts of land being covered by forests (oaks, beeches, conifers). Manufacturing industries are of importance in various parts of the country, the principal manufactures being cigars, paper, leather goods, chemicals, pottery, and iron-ware. The railways belong to the state. The cap. of the Rhine Palatinate is Spires (Speier). Other towns of importance are Kaiserslautern, Landau, Neustadt, Ludwigshafen. Four-sevenths of the inhabitants are Protestants, three-sevenths Roman Catholics. The history of the Rhine Palatinate is very interesting, owing to its situation W. of the Rhine. The oldest inhabitants were the Allemans; then followed the Franconians. The Rhine Palatinate was often the seat of war between Germany and France; its fate in 1688, when it was devastated by the French, is well known. It was an electorate until 1801. Since 1815 it has belonged to Bavaria. See **German Empire,** table.

Palatine, tnld., Ire., S. co., bar. and 3½ m. NE. by E. Carlow, P.O. P. <250.

Palatine, vil., U.S., Illinois, Cook co., 26 m. NW. Chicago. P. <1500.

Pale, The, portion of Ireland first colonised by the English, and divided by King John into the twelve counties palatine of Dublin, Meath, Kildare, Louth, Carlow, Kilkenny, Wexford, Waterford, Cork, Kerry, Tipperary, and Limerick.

Palean, vil., Siam, Malay Penin., in about 7° 22′ N.

Palembang (from the Javanese word *limbang,* 'to filter,' 'drain away'), seapt. and cap. of residency of P., Sumatra, on the Musi R., 60 m. above its mouth, in 2° 59′ S., 104° 45′ E. The town stretches 5 m. along the river. All the houses are built of bamboo, many on rafts, there being frequently a difference of 10–16 ft. between ebb and flood. There are a fort (1780), a handsome mosque (1740), the palace and tombs of the princely dynasty. Mean temp. (6 yrs., 1850–53, 1855–56), yr. 80.4° F., Jan. 79.7°, July 80.0°. P. 55,000, including Malays, Chinese, Arabs, and Dutch.

Palena, tn., Italy, Abruzzi e Molise, prov. and 26 m. S. Chieti. P. <4000.

Palencia, the ancient *Pallantia,* tn., Spain, cap. prov. P., 27 m. N. by E. Valladolid; has important manufactures of blankets and baize, as well as other industries. Seat of a bishop suffragan to Burgos. Cathedral founded in the 14th and completed in the 17th century. Celebrated in Roman

times; destroyed in the wars of the Visigoths and Arabs, but restored in 1035. Made in 1208 seat of a university, afterwards transferred to Salamanca. P. (comm.) 15,100.

Palenque, cape, isl. of Haiti. See **Punta Point.**

Palenque, vil., Mexico, Chiapas, 70 m. ESE. San Juan Bautista. Here are remains of four ancient temples and a group of stone-roofed houses (usually called the temple)—all formerly lavishly ornamented with figures and inscriptions in hard stucco. P. (comm.) <3000.

Palermo (anct. *Panormus, i.e.*, 'perfect harbour'), city and seapt., Sicily, on a bay of the same name on N. ct., towards the NW. corner; formerly cap. of the Sicilian kingdom, 120 m. W. Messina (with which it is now (1894) being connected by rail); picturesquely situated at the mouth of a fertile valley called the 'Golden Shell.' The chief buildings are of the Norman period. The cathedral of St. Rosalio (1170), with tombs of the archbishops and two emperors; the royal palace, containing a famous Norman hall and chapel; and the university (since 1805) with thirty-seven ordinary and eighteen extraordinary professors and about 1200 students. There are also a national museum and library (110,000 vols.) and the city library (141,000 vols.), and other important institutions. The *Marina* forms a pleasant promenade to W. To the N., on Mount Pellegrino, is a celebrated grotto. Chief exports, fruits (principally oranges and lemons), grain, oils, wine, sulphur. The N. basin is 102 ac. in area, with depth of 24½–59 ft.; S. basin 42 ac., with depth of 24½–36 ft.; alongside quay 9.8–19.6 ft. There is a dry dock 563½ ft. long and 56⅝ ft. broad at entrance; also a slip 232½ ft. long. Of Phœnician or early Grecian origin, P. was long a stronghold of the Carthaginians, and underwent many sieges from 276 B.C. till 1071 A.D., when it became the Norman cap., after being that of the Moslems. Much of the city walls still remain, with the sites of the ancient gates, such as Porta Nuova, built to commemorate the return of Charles V. in 1534. The court here under Frederick II. was reckoned the most polished in Europe. P. is cap. of one of the seven provs. of Sicily, and is frequented for its excellent climate. Mean temp., yr. 63.6° F., Jan. 52.2°, July 76.5°. P. (1871) 186,400; (1881) 205,700, 245,000 with the comm.; comm. (estimated 1891) P. 272,000; the fifth of Italian towns in size.

Palma, tn., Spain, Majorca. The principal buildings are the old royal palace, the cathedral (14th century), the fine Gothic bourse (15th century), the town-hall (16th century), and the Balearic Institute, replacing the university (suppressed in 1840). The harbour is protected by a mole. Docks are (1894) in process of construction. Trade in fruits, especially oranges and almonds. Two and a half miles SW. the mediæval castle (13th century) of Jayme, King of Aragon and Majorca, crowns a commanding eminence. Mean temp., yr. 64.0° F., Jan. 51.5°, Aug. 79.8° F.; rfall. (14 yrs.), 17.05 in. P. (1869) 53,000; (1887) 60,500. The **Bay of Palma,** on the SW. of the island, is 8–12 m. wide, and 10 m. deep.

Palma, or **La Palma,** isl., in Spanish group of the Canaries, 15 m. WNW. of Teneriffe. Length, 30 m.; breadth, 17 m.; area, 280 sq. m. Maximum alt., a peak on the rim of a huge crater in the N. of the isl., 11,000 ft. P. (1887) 39,600. Chief town **Santa Cruz de la Palma,** on middle of E. ct., P. (comm.) 6700.

Palma, La, vil., Costa Rica, 10 m. NE. by N. San José.

Palma, La, tn., Spain, Andalusia, prov. and 24 m. ENE. Huelva, cap. dist. P. P. (comm.) 5900.

Palma del Rio, tn., Spain, prov. and 30 m. WSW. Córdoba, dist. Posadar, on the l. bk. of the Guadalquivir. P. (comm.) 7700.

Palma di Montechiaro, seapt. and tn., Sicily, prov. and 13 m. SE. by E. Girgenti; exports fruit, especially almonds, besides sulphur and soda. P. 11,700.

Palmanova, tn., Italy, Venice, prov. and 12 m. SSE. Udine. P. <4000.

Palmar, comm., Spain, prov., dist., and 3 m. SSW. Murcia. P. 6000–7000.

Palmar, tn., Venezuela, Miranda, on the N. ct., 15 m. W. Carácas, in about 67° 10′ W.

Palmares, vil., Brazil, state and 60 m. SW. Pernambuco, with which it is connected by rail. P. 5000.

Palmaria, islet, N. Italy, in the Mediterranean, near the promontory of Porto Venere, bounding the Gulf of Spezia on the SW. Length, 1 m.

Palmarinyas, Cape, cape, Portuguese W. Africa, in about 9° 10′ S., 22 m. SW. of St. Paul de Loanda.

Palmarola, isl., Italy, off the W. ct., one of the Pontine group, in 40° 57′ N.

Pálmas, Spanish and Portuguese, 'palms.'

Palmas, isl., off the coast of dep. Cauca, Columbia, in 3° 54′ N.

Palmas, Cape, low promontory of Liberia, W. Africa, in the Atlantic, in 4° 22′ N., 7° 44′ W. American mission station.

Palmas, Las, tn., Canary Is., on NE. ct. and cap. of Great Canary I., the most important town of the archipelago. Has a cathedral, a citadel, and a theatre; and a trade in wine and cochineal. The harbour (under construction in 1894) is to have an area of 287 ac., a depth at entrance, high water, ordinary springs, 60 ft., and alongside quays, high water, ordinary springs, 42 ft. (low water 35 ft.); length of quayage, 1200 ft. Mean temp. (5 yrs.), yr. 69.6° F., Feb. 65.0°, Aug. 74.6°. P. (comm.) 19,100.

Palma Soriano, vil., Cuba, 20 m. NW. Santiago de Cuba.

Palmas Suergiu, vil., Sardinia, prov. Cagliari, 16 m. S. by E. Iglesias. P. <2000.

Pamiers, tn., France, dep. Ariège, cap. arr. P., on the Ariège, 34 m. S. by E. Toulouse, 12 m. N. Foix. P. 8200.

Pamirs, wide terr., situated between Russian Turkistan in N., the Bukharian and Afghan independent khanates in W., the Hindu Kush in S., the Himálayas in SE., and Chinese Turkistan in E., 36° 50′ to 39° 40′ N., 71° 30′ to 75° 30′ E. It is a massive swelling, connecting the highlands of the Hindu-kush and Himalayas with the Tian-Shan highlands, and having on both sides the depressions of the Amu and of E. Turkistan. It is fringed on three sides by very high snow-clad border ridges: (1) the Trans-Alai on the NW., which reaches 23,000 ft. in Kaufmann Peak, and 21,700 ft. in Kizyl-aghyn (Kizylart Pass, 16,560 ft.), and is continued SW. in the Kojar Mts. (Söl-tau) and Periokh-tau (peak Syevertsov, 24,500 ft.); (2) the Kashgar Mts. on the NE., reaching 25,800 ft. in the Mustagh-ata peak, also gently sloping towards the Pamirs, and abruptly towards the Kashgar depression; they correspond to the **Bolor-tagh** of Humboldt, who erroneously gave it a meridional direction; and (3) the Hindu-kush on the SE., attaining 25,600 ft. in the peak of Lunkho, and 25,400 ft. in Tirach-mir. Towards the SW. there is no border ridge, the P. falling abruptly to the valley of the Panj, or upper Amu; and it remains an open question, whether the highlands enclosed between the great bent of the Amu to the N., and a line drawn from the Goran to Kulab, thus including Lake Shiva (11,000 ft.), ought not to be added to the P. This massive swelling is intersected by several river-valleys flowing mostly SW. and NE., at the high levels of from 13,000 to 10,000 ft., this last altitude being only attained as they approach the Panj which flows, even in its N. course, in a narrow gorge, at alt. of from 8700 ft. (Ishka-shem) to 6000 ft., while in its upper course it also flows (under the name of Wakhan-daria) in a high valley: 13,720 ft. at its source in Lake Oi-kul, and 10,000 ft. near Kala-i-Panj. The next large river of the P., the Murghab, which also issues from the same lake, and, after flowing NE. and NW., bends W. towards the Amu, has its valley at the same high altitude, descending below the 10,000 ft. level only about Tash-kurgan, 37 m. from the Panj. The same is also true of the rivers flowing along the Kashgar Mts. before they pierce them to descend to the Kashgar depression (Rang and Muzha forming the Ghöz and upper Yarkand-daria), whose valleys also are at an alt. of 10,000 ft. to 13,000 ft. Several lakes lie on this high swelling: Great Kara-kul, in N. (13,300 ft., no outflow); Rang-kul, in middle (13,000 ft.); Yashil-kul, (12,370 ft.), which receives the Alichur streams and sends out the Gund to the Amu; Zor-kul, or Victoria, in S. (13,900 ft.), whose outlet, the Pamir R., is a trib. of the Panj; and Oi-kul, or Chakmaktyn-kul, in SE., at the source of both the Ak-su (source of Murgh-ab) and the Wakhan-daria, (Panj). The valleys have the characters of flat, open spaces, from which the very name of *pamirs* is derived, and they are separated from each other by mountain ridges rising only from 3000 to 4500 ft. above the levels of the high plains, but attaining 16,000 to 17,000 ft., and from 18,000 to 19,000 ft. in their highest summits. Of these high plains the following are the chief: Khargoshy P., in the N., round Great Kara-kul, between the Trans-Alai in N. and Karasak Mts. in S.; Rang-kul P., between N. and S. Rang-kul Mts. and Kashgar Mts.; Alichur P., between Alichur Mts. in N. and Pamir Mts. in S.; the Great P., round Zor-kul, between these last mountains and the Wakhan Mts.; the Little P., around Oi-kul and valley of Ak-su, separated by the E. Hindu-kush from Tagh-dumbash P. Though the climate of the Pamirs is extremely severe, yet they are visited in the summer by nomad Kirghizes, while the valleys towards the W. are occupied by a settled population. The North P. have been taken possession of by the Russians; the W. parts of them are occupied by the independent khanates of Darwaz (at N. bend of Amu; forts Vanch, Kala-i-khum; vassal to Bukhara); Roshan (in the S. of lower Murghab; forts Tash-kurgan, Kala-i-Wamar); Shugnan (in the S. of Gund R.); Goran or Garan (at S. bend of Amu; fort Ishkashan on l. bk. Amu); Wakhan (along l. bk. of Wakhan-daria; fort Kala-i-Panj). The E. portion of the P., including the Kashgar Mts. and the valley of Sari-kol immediately to the W. thereof, belongs to China, and, under an agreement concluded between the British and Russian governments in March 1895, these two governments are to abstain from exercising any political influence or control, the former to the N. and the latter to the S. of a line starting at the E. end of Lake Victoria (Zor-kul) and running more or less E. to the Chinese frontier, and nowhere passing N. of the latitude of the starting-point (about 37° 25′ N.), the precise line to be determined by a delimitation commission. This agreement thus assigns to the sphere of British influence the greater part of the khanate of Wakhan, but this terr. is to form part of that of the Amír of Afghanistan, and not to be annexed by the British.

Pamisos, comm., Greece. See **Messênê.**

Pamlico, co., U.S., N. Carolina, on P. Sound, crossed in the extreme S. by 35° N.

Pamlico River, U.S. See **Tar River.**

Pamlico Sound, lagoon in the E. of N. Carolina, U.S., bounded on the E. by several long and narrow islands, on one of which is Cape Hatteras, and communicating with the Atlantic by Oregon, Loggerhead, Hatteras, and Ocracoke Inlets (here mentioned in the order from N. to S.). Length, 80 m.; width, 8–30 m.

Pamouscachou, lake, Canada, Quebec, Chicoutimi co., crossed by 70° 45′ W. and 49° 30′ N.

Pampacolca, vil., Peru, dep. Arequipa, 100 m. NNW. Mollendo. P. (dist.) <5000.

Pampanga, prov., Philippine Is., Luzon I., on the Gulf of P.

Pamparato, vil., Italy, Piedmont, prov. and 20 m. ESE. Cuneo. P. <2000.

Pampas, tn., Peru, dep. Huancavelica, 160 m. E. by S. Lima. P. <2000.

Pampas (Quichua, 'plains'), the wide treeless plains of the Argentine Republic, stretching W., NW., and SW. of Buenos Aires, the city of Córdoba being in about the middle of them. They rise gradually from the ocean up to the feet of the Andes. The soil consists of sands and clays, deposited by wind and river inundations, the crumbled remains, according to some authorities, of the moraines of former Andean glaciers or of granite, gneiss, and other primitive rocks *in situ;* and this theory finds support in the analogical origin of the steppes of Russia and the *loess* formations of Turkistan. The P. are covered with grass in the E., and support large herds of cattle, sheep, and horses; but in the W. they are mostly sterile, and frequently intermingled or covered with saline deposits.

Pampas, Rio, riv., Peru, flows N. then ESE. and enters the Apurimac in about 13° 10′ S., 74° 50′ W.; part of its course forms the boundary between deps. Ayacucho and Apurimac. Length, 250–280 m.

Pampelonne, tn., France, on the N. border of dep. Tarn, on the Vaur, arr. and 15 m. NNE. Albi. P. <2000.

Pampeluna, city, Spain. See **Pamplona.**

Pamplemousses, tn., in the N. of the isl. of Mauritius.

Pamplico, a spelling formerly used for **Pamlico** in U.S., but the latter is the spelling adopted by the U.S. Board on Geographical Names, at least for the county in N. Carolina.

Pamplona, decayed tn., Colombia, Santander, 210 m. NNE. Bogotá ; seat of a bishop ; has abandoned gold-mines ; suffered severely from earthquakes in 1644 and 1875. Alt. 7550 ft. P. (including dist.) 11,000.

Pamplona, formerly also **Pampeluna,** fortified city, Spain, cap. of prov. P., on trib. of the Ebro, 111 m. NW. Saragossa, and 50 m. S. by W. Bayonne. Chief features are its citadel, Gothic cathedral (dating from 1397), vice-regal palace, museum, and bull-ring for 8000 spectators. Supplied with water by a handsome aqueduct of 97 arches, built at the end of the 18th century. The Roman *Pompeiopolis*, built by Pompey, 68 B.C. From about 905 A.D. Pamplona was cap. of Navarre, and from its position has always been the chief fortress of that province. The French held it from 1808 till 1813, when Wellington took it after a siege of four months. Alt. 1380 ft. P. (1860) 22,900 ; (1887) 26,700.

Pamunkey River, U.S., Virginia, formed by the junction of N. and S. Anna Rivs., flows SE., and with the Mattapony forms York R. Length, 75 m.

Panagiurište, in Turkish **Otlu-köl,** tn., Bulgaria, Eastern Roumelia, prov. Tatar-Pazardžik, 38 m. NW. Philippopolis. Alt. 1835 ft. P. 8800.

Pánágur, tn., Brit. India, Central Provs., dist. and 9 m. N. Jabalpur ; has trade in iron from the neighbouring mines. P. <5000.

Panahat, tn., Brit. India, NW. Provs., dist. and 30 m. SE. Agra. The old fort is a station of the Trigonometrical Survey. P. <5000.

Panama, the general name of Central American isthmus, from Costa Rica to Colombia, of which it forms a dep. (466 m. long, 31–120 m. wide) ; in a more special sense the name of the central part of this isthmus. It is a continuous chain of mountains (from Chiriqui, 11,260 ft. ; Veraguas, 9270 ft. ; Trinidad, 3430 ft. ; Capira, 3000 ft. ; to Mali and Pirri, with passes from 8200 ft. in the W. down to 285 ft. ; Culebra, 465 ft. at Tihule) of different geological ages (San Blas Mts. the oldest). Archæan rocks form the N. slopes, with Palæozoic in the extreme W. (Permian) and centre (Carboniferous), where there is also a large extent of Tertiary formations. Volcanic rocks (Chiriqui, Veraguas, Centre), some of which point to the existence of ancient submarine volcanoes, also occur. The Atlantic and Pacific seem to have once met through two points of the present isthmus, in the centre and at the E. end. Very dense forests, with very good timber, cover the isthmus. The principal rivers are in the centre and E. (Chagres, Bayano, Chepo, Tuyra-Chucumaque). The Atlantic slopes receive most rain, and have the richest flora. Many, and some of them magnificent, bays (N., Bahia del Almirante, Laguna or Gulf of Chiriqui, Puerto Bello, Limon or Navy Bay, San Blas, Caledonia, Anachucuna ; S., Dulce, David, Honda, Montijo, and P.). All the bays are protected by numerous islands and keys (*cayos*), the coasts presenting many coral reefs. The railway from Colon (on Limon Bay) to Panama town, by Col de Culebra, follows the general line of the projected canal. Many canals (open, level, through tunnels, with locks) were planned (they would reduce by 8700 m. the voyage between Europe and the Pacific) from Gulf of San Blas to the mouth of riv. Bayano (the narrowest part in all Central America, 31 m.), Acanti (on Gulf of Uraba) to Gulf of San Miguel, Darien del Norte (a more southerly point on Gulf of Uraba) to Gulf San Miguel (Darien del Sur), and from Limon Bay to P. by the Chagres and Rio Grande. To carry out this last plan (with a level and open canal of 46 m., 72 ft. at bottom, 131 ft. at water surface, 29 ft. deep, afterwards modified so as to include locks) a company was formed (1881), but became bankrupt (1891). Capital invested, £53,000,000. Nineteen miles were prepared ; the Culebra, 300 ft. high, has still to be pierced. Total cost, with locks, estimated at £120,000,000. See **Colombia.** [**J. B. R.**]

Panama, tn., and free port, Colombia, cap. of P. dep., on NW. ct. of the Gulf of P., 287 m. WSW. Cartagena, in 8° 57′ N., 79° 31′ W., connected by rail with Colon (on the Caribbean Sea). It consists of a fortified port, though the walls are now ruinous, and suburbs, and, in spite of numerous destructive fires, still presents the appearance of a large town, chiefly in consequence of its fine cathedral, numerous monasteries, and tall buildings. The anchorage is at the isl. of Taboga, 11 m. S. of P. Passengers land by boats or flat-bottomed steam-launches. The Panama hats of commerce are made in Ecuador. The mines of **Old Panama,** founded in 1518, and destroyed by the buccaneer Morgan in 1671, lie 4 m. ENE. of the existing town. Mean temp. (3 yrs., 1883-85), yr. 80.2° F., Feb. 78.6°, Aug. 81.8°. P. 25,000.

Panama, Gulf of, at the extreme NW. of S. America, Colombia, and on the S. side of the Isthmus of Panama. Its width between Punta Mala, on the W., and Punta Caracoles, on the E., is 120 m., and its maximum length or depth 100 m. On the W. it penetrates deeper into the Bay of Parita, and on the E. into the Gulf of San Miguel. It is dotted with several small islands, including the Archipelago of the Pearl Is.

Panamint Mountains, mts., U.S., California, Inyo co., on the W. of Death Valley.

Panao, vil., Peru, prov. and 12 m. E. Huanuco. P. <5000.

Panaon, one of the Philippine Is., in the Surigao passage, between Leyte and Mindanao. Length, 18 m.

Pánápur, agricultural tn., Brit. India, Bengal, dist. Sáran. P. <5000.

Panaria, one of the Lipari Is., Italy, 11½ m. NE. by N. of the middle of Lipari I. Alt. 1380 ft.

Panaro, riv., Italy, rises in the Apennines, and flows N. and NE. past Finale to the Po, which it joins on the r. bk. 12 m. WNW. of Ferrara. Length, 60 m. ; area of basin, 885 sq. m. ; discharge, mean 1300 cubic ft. per second, highest 24,400 cubic ft. per second.

Panars, tribe, Assam. See **Khási and Jaintia Hills.**

Panatinani, or **Joannet Island,** one of the Louisiade Is., Pacific, crossed by 11° 15′ S., 153° 10′ E.

Panavia Bay, large bay on the W. ct. of Africa, Kamerun Terr., in 3° 2′–20′ N.

Panay, one of the Philippine Is. (the easternmost of the Visayas), formed by a central ridge (Bosoc, Antique, 2660 ft.), continuation of the Cagayan Cavili ridge, divided on the N. into two diverging ones. Principal settlements in the bays of Antique, Capiz, Iloilo ; very fertile. Area, 4728 sq. m. P. 734,000.

Panayanos, tribe, Philippine Is., isl. Negros.

Panbride, par., Scot., Forfarshire, 5½ m. SW. by W. Arbroath, close to Carnoustie stn. ; 5199 ac. P. <2000.

Pancalieri, tn., Italy, Piedmont, on the Po, prov. and 17 m. S. by W. Turin. P. <3000.

Panch Mahals ('five subdivisions'), dist., Brit. India, in N. of Bombay Presidency, composed of two sections, one W. and one E. of the native state of Rewá Kantha, the E. section, bordering on Central India, mainly rugged and barren (chief town Dohad), the W. section mainly level and fertile, though containing a hilly forest-clad section in the SW. (Páwagarh Hill, 2500 ft.) ; chief town, Godhra, which is cap. of dist. Both Dohad and Godhra are now connected with the Bombay, Baroda, and Central India Rly. (junction about midway between Baroda and Ahmadábád). See **Bombay,** Presidency.

Panciu, tn., Roumania, prov. Putna, 59 m. NW. by W. Galatz. P. <3000.

Pancoast, coal-mining vil., U.S., Pennsylvania, Jefferson co., 18 m. E. Brookville by rail. P. <1500.

Pancorbo, vil., Spain, Old Castille, prov. and 35 m. NE. by E. Burgos, on the margin of the dist. of La Bureba, and at the base of the Montes Obarenes, a defile in which, known as the Garganta de Pancorbo, is here traversed by the railway from Madrid to the NE. of Spain. P. <2000.

Pancrasweek, par., Eng., Devonshire, Tavistock div., 13⅜ m. N. by W. Launceston, 4 m. W. by N. Holsworthy stn. ; 4639 ac. P. <500. See **Bradworthy.**

Pancsova, municip., Hungary, co. Torontál, 10 m. ENE. Belgrade. Mean temp., yr. 52.6° F., Jan. 30.4°, July 74.0.° P. (1850) 11,000 ; (1869) 13,400 ; (1890) 17,900.

Pandaman, one of the Philippine Is., off the SW. end of Palawan, in 8° 18′ N., 117° 11′ E. (middle of island).

Pan de Azucar, Spanish, 'sugar-loaf.'

Pan de Azucar, ct. isl., N. Chile, in 26° 9′ S.

Pan de Azucar, summit of Colombia, in the central Cordillera, 26 m. SE. Popayan. Alt. 15,320 ft. (Reiss and Stübel).

Pan de Azucar, summit of the Sierra Nevada de Merida, Venezuela, NE. of Merida. Alt. 13,575 ft.

Pan de Azucar, vil., Uruguay, dep. Maldonado, 65 m. E. by N. Montevideo. A large vineyard has been planted near.

Pandeme, tn., Africa, in the interior of the Brit. colony of Sierra Leone, in about 8° 8′ N., 10° 38′ E. ; cap. of state of Bunde.

Pandharpur, municip., Brit. India, Bombay, dist. Sholápur, on Bhímá R., 63 m. N. by W. Bijápur, one of the most frequented places of pilgrimage in the Presidency. In honour of the god Vithoba three fairs are annually held, at which the attendance varies from 20,000 to 150,000. The foundation-stone of the orphanage, the only one in the Presidency, was laid in 1878. P. (1872) 16,800 ; (1891) 20,000 ; Hindus, 18,300.

Pándhurna, municip., Brit. India, Central Provs., dist.

Chhindwárá, 50 m. NW. by W. Nágpur; much cotton grown around. P. 8200; Hindus, 7500.

Pandi, vil., Colombia. See **Bogotá.**

Pandita, isl., Eastern Archipelago, SE. of Bali.

Pando, vil., Uruguay, dep. Canelones, 23 m. NE. Montevideo.

Pandora, or **Charlotte,** reef, Pacific, in about 12° S., 172° E.

Pandora's Pass, gap in the Liverpool Range, New South Wales.

Pandpur, tn., Brit. India, Bengal, dist. Sáran, 15 m. NW. by W. Patna. P. <5000.

Panduah, municip., Brit. India, Bengal, Húglí dist., in 23° 4′ N., 88° 19′ E.; has a tower 120 ft. high, said to be the oldest building in Bengal, built to commemorate a victory gained by the Mohammedans in 1340. P. <5000.

Panduah, or **Paruah,** deserted tn., Brit. India, Bengal, dist. Maldah, 73 m. E. Bhágalpur. The fortified city extended for 6 m. N. within the ramparts. It contains the Adína Masjíd (14th century), the most celebrated building in this part of India, and the most remarkable example of Pathán architecture. A Mohammedan *melá* is held here every year.

Pándu Mehwás, group of twenty-six petty states which form a territorial div. of Rewá Kántha, Bombay, Brit. India.

Pandy, stn., Eng., Monmouthshire, N. div., on the G. W. R., 13 m. NW. by W. Monmouth, PM.O.

Pandy, P.O., Wales, Merionethshire, 12½ m. NE. Dolgelly, on the r. bk. of the Dee, close to Llanuwchyllyn stn.

Pándya, one of the three great divisions of Drávida, or S. India, including Madura dist. and all S. of it, believed to have been founded in the 6th century B.C., overthrown in the 11th century, afterwards restored by the Náyaks. Cap. first at Kolkai, afterwards at Madura.

Panephysis, tn., Egypt. See **Menzaleh.**

Panfield, par., Eng., Essex, Maldon div., 1½ m. NW. Braintree. P. <500.

Pangal, tn., India, Haidarábád, 78 m. SSW. Haidarábád.

Pangani, seapt., Ger. E. Africa, 70 m. N. Bagamoyo, in 5° 25′ S., at the mouth of the Pangani R.

Pangani, or **Ruvu,** riv., Ger. E. Africa, rises on Mount Kilimanjaro, and flows S. then SE. into the Indian Ocean at P., forming during part of its course the N. boundary of the German Protectorate.

Pangasinan, Malay tribe, on W. ct. of Luzon I., Philippine Is., on W. and S. shores of the Gulf of Lingayen.

Pangbourne, par., Eng., Berkshire, Newbury div., on the Thames, 5 m. WNW. Reading, on the G. W. R., PMT.O. P. <1000.

Pang-hu, isls., W. Pacific. See **Pescadores.**

Pangkong ('up and down'), lakes, in E. Kashmír (Ladak) and W. Tibet, SE. of the Karakoram Mts., in 33½° N., 78½°–80° E. Length nearly 100 m.; 14,000 ft. above sea-level. It consists of three lakes connected by small streams, and measuring 30, 35, and 25 m. respectively in length. See *Jour. R. G. S.,* 1877, p. 91.

Pangkor Islands, Straits Settlements, Indo-Chinese Penin. See **Dindings.**

Pango-pango (*ng* as in sing), in the spelling of the missionaries **Pago-pago,** admirable natural harbour on the S. ct. of Tutuila (Samoan Is.), in 14° 19′ S., 170° 31′ W. Formerly used by the United States as a coaling station, now used for that purpose by the British.

Pangritz, colony, Prussia, prov. W. Prussia, govt. Danzig, circle and N. of Elbing. P. <3000.

Pangulpulli, lake, Chile, prov. Valdivia, in the basin of the Calle Calle.

Pangultan, Punta, Philippine Is. See **Tinaca, Punta.**

Pangultch, vil., U.S., Utah, Garfield co., 105 m. NE. from the SW. corner of the terr. P. <1500.

Pangutarang, one of the Sulu Isles, Pacific, in 6° 24′ N., 120° 30′ E. (north end).

Panhandle, name of unorganised tract in NW. of Texas, U.S., between Indian Terr. and N. Mexico.

Panhandle, name in W. Virginia, U.S., of a long narrow tract of land in NW. of state, divided into the counties of Hancock, Brook, Ohio, and Marshall.

Paniála, agricultural vil., Brit. India, Punjab, dist. and 32 m. N. Dera Ismáil Khán. P. <5000.

Pánipat, municip., Brit. India, Punjab, dist. Karnál, 51 m. NW. by W. Meerut, of great antiquity. The modern town is built on a small promontory, round which runs the former bed of the Jumna. It is enclosed by an old wall, with an ancient fort at its highest point; manufactures copper utensils. Thrice the scene of decisive battles; in 1526 Bábar gained a great victory, and his grandson, Akbar the Great, in 1556. This second victory led to the foundation of the great Mughal empire, which continued to exist, nominally, till 1857. In 1761 Ahmad Sháh Durání shattered the Maráthá power. P. (1868) 25,300; (1891) 27,500; Hindus, 8100; Moham. 18,700.

Panizo, vil., Turkey in Europe, on Sea of Marmora, sanjak and 5½ m. SW. Tekirdagh (Rodosto), 54 m. NE. Gallipoli.

Panjab, prov., India. See **Punjab.**

Panjan, vil., Brit. India, Punjab, dist. Gujrat, 77 m. SE. Ráwal Pindi. P. <5000.

Panjang, isl., French Cochin-China. See **Pulo-Panjang.**

Panjdeh, vil., Russian Transcaspian Terr. See **Penjdeh.**

Panjim, central quarter of New Goa, Portuguese India, on the W. ct., 11 m. WNW. (Old) Goa, and at the NW. angle of the isl. of Goa, and at the mouth of the Goa R.; since the viceroyalty of Count Ega (1756–65) seat of govt. of the Portuguese terr. of Goa.

Panjkhora, or **Panjkora,** riv., Afghanistan, r. bk. trib. of the Swat (l. bk. trib. Kabul).

Panjnád, riv., Brit. India, Punjab, joins the Indus nearly opposite Mithankot, in 28° 57′ N. lat., after a SW. course of about 60 m.

Panjshambe, tn., Russian Turkistan. See **Peishambe.**

Panjshir, riv., Afghanistan, rises in the Hindu Kush Mts., and flows SW. through the narrow P. Valley, thence S. to the Kabul R., which it joins 22 m. E. by N. Kabul. (*Proc. R. G. S.,* 1879, pp. 116–17.)

Paprovnik, city, Austria. See **Ragusa.**

Paps, The, mts., Ire., SE. co. Kerry, 10 m. ESE. Killarney. Height, 2268 ft.

Papua and **Papuans.** See **New Guinea.**

Papua Islands, a name sometimes given to the isls. Waigéu, Salawati, Misol, and others of lesser note lying off the NW. extremity of New Guinea. See the separate articles.

Papudo, maritime vil., N. Chile, prov. Aconcagua, 37 m. NNE. Valparaiso, on a small open bay in 32° 31′ S.

Papworth Everard, par., Eng., Cambridgeshire, Chesterton div., 11 m. WNW. Cambridge, 5 m. SE. Offord and Buckden stn., P.O. P. <250.

Papworth St. Agnes, par., Eng., partly in the Chesterton div. of Cambridgeshire, and partly in Huntingdonshire, 12½ m. WNW. Cambridge, 3½ m. SE. Offord and Buckden stn. P. <250.

Par, eccles. par., Eng., Cornwall, Bodmin div., on the G. W. R., 3½ m. SSW. Lostwithiel; has pilchard fishery. The harbour is 150 ft. wide at entrance, has 13 ft. at high water ordinary springs, and 9 ft. ordinary neaps, and 1800 ft. of quayage. There is also a dry dock 120 ft. long, 24 ft. 7 in. wide at entrance, and a depth of 7 ft. 10 in. on sill at high water ordinary springs. PMT.O. P. <2000.

Para, Quichua word meaning 'rain,' 'water,' 'lake,' 'river.'

Para, Slavonic, 'a marsh or swamp,' *e.g.,* in Parchim.

Pará, one of the N. littoral states of Brazil (coast-line 700 m.), occupying the E. third of the Amazon valley S. of the Guianas (1000 m. W. to E., 1100 m. N. to S.); the higher grounds of the state, between the Guiana Mts. and the Brazilian plateau, almost desert. Yields cacao, sugar, cotton, and exports Amazonian forest products (caoutchouc, Brazil nuts, piassaba, &c.). See **Brazil,** table.

Para, officially **Belem,** or **Nossa Senhora de Belem,** tn. and seapt., Brazil, prov. Grão Para, at the mouth of the Capim, a r. bk. trib. of the estuary of the Para or Tocantins, 80 m. from the Atlantic; has a handsome cathedral, government and episcopal palaces, military and naval arsenals, and a spacious harbour 3 m. long by 1 m. wide, with ½ m. quayage, from which project 17 piers. There is 30 ft. of water in port at ordinary springs high water, and 22 ft. low water. There are a steel slip, 250 ft. long by 138 ft. wide, and five gridirons, four each 150 ft. long, and one 200 ft. long. Vegetation grows with great luxuriance in and around the city. Leprosy is prevalent. P. 40,000.

Para ('Father of Waters'), the name originally applied to the Amazon R., S. America, but now employed to designate its S. arm, which receives the Tocantins and Anapu Rivs., and bounds Marajo I. on the S. On its E. side is Para city. Width at entrance, 40 m. Mean temp. (3 yrs., 1848–50), yr. 80.6° F., Jan. 80.1°, July 81.5°. See **Amazon.**

Para, or **Nossa Senhora da Piedade do Para,** tn., Brazil, Minas Geraes, 155 m. NW. Ouro Preto. P. about 3000.

Para, riv., Dutch Guiana, l. bk. trib. of the Surinam, which it joins about 4 m. above Paramaribo.

Parabel, riv., W. Siberia, govt. Tomsk, l. bk. trib. of Ob, flows NE. about 250 m., joins Ob at Parabelskoye village.

Parabelskoye, vil., W. Siberia, govt. and 195 m. NW. Tomsk. P. <5000.

Parabiago, tn., Italy, Lombardy, prov. Milan, circle and 11 m. SE. Gallarate. P. <3000.

Parabita, tn., Italy, Apulia, prov. Lecce, 20 m. WSW. Otranto. P. <4000.

Parabuty, comm., Hungary, co. Bács-Bodrog, dist. Hódság, 23 m. SE. Zombor. P. <5000.

Paracas, penin., united to the coast of Peru by an isthmus of sand, crossed by 13° 50′ S., to the N. of which is a long narrow bay, in which the army of San Martin landed, Sept. 8, 1820.

Paracatu, riv., Brazil, in state Minas Geraes, flows N. and NE., and joins the São Francisco near 16° 20′ S. Length, 280 m.

Paracatu, tn., Brazil, Minas Geraes, in 17° 17′ S., about 47° W., 455 m. NW. by N. Rio de Janeiro; formerly celebrated for its gold-washings, now unimportant. P. 10–15,000.

Paracels, group of islets and reefs of the China Sea, mostly between 16° and 17° N., 112° and 113° 30′ E., 150 m. E. Cochin-China. They yield edible birds' nests, turtles, and fish.

Paraćin, tn., Servia, prov. Morava, E. of riv. Morava, on the Belgrade-Salonica Rly., 27 m. SE. by E. Kraguyevatz. P. 5500.

Paradise, vil., U.S., Utah, Cache co., 65 m. NE. Salt Lake City. P. <1500.

Paradise Sound, long and narrow bay, Newfoundland, on the W. of Placentia Bay.

Paragau, riv., Bolivia, flows N. by San Ignacio into the Guapore, in about 13° 30′ S. Length, 286 m.

Paragould, tn., U.S., Arkansas, Greene co. P. <2000.

Paragua, isl., Eastern Archipelago. See **Palawan.**

Paragua, riv., Venezuela, flows N. then E. into the Caroni (r. bk. trib. Orinoco), which it joins in about 7° N. Length about 435 m.

Paraguacu ('great water'), riv., Brazil, prov. Bahia, rises on the E. slopes of the Sierra da Chapada, flows E. and SE. into All Saints Bay; navigation prevented greatly by cataracts. Length, 320 m.

Paraguana, penin., Venezuela, state Zulia, 22 m. NW. Coro, extending into the Caribbean Sea, in 12° N., 70° W. Length and breadth about 40 m. each.

Paraguari, vil., Paraguay, 33 m. SE. by E. Asuncion, on the railway to Villa Rica.

Paraguay, a republic, S. America, between Brazil and the Argentine Republic, having E. and S. the Paraná, W. the Paraguay, N. the Apa (trib. of P.) with its affluent the Estrella, NE. the Sierra Amambay (N. and S.), and the Sierra de Mbarcay (W. and E.). P. also claims part of the **Gran Chaco** (*q.v.*). The greater part of the **surface** consists of undulating plains, varied by ranges of low hills, richly wooded, and interspersed with open plains. The principal mountains, none of which exceed 1500 ft., are the Cordillera de las Quinze Puntas (E. and W.) in the N.; the frontier ranges already mentioned in the NE.; the Cerro Nogues at the junction of these, and the Cordilleras Urucuty, Caaguassu, &c., which, starting from the Cerro Nogues, trend SE. to about 54° 50′ W., and then SW. to Villa Rica, forming the water-parting between the basins of the P. and Paraná Rivs. In the SW. a broken hilly region extends S. and SE. from the P. in about 25° S., to the Paraná in about 56° 30′ W. The principal tribs. of the P. (N. to S.), one of the two great frontier **rivers,** are, Apa, Aquidaban, Ypane, Jejuy, with its affluents (r. bk.) Aguaray-guassu, (l. bk.) Carruguaty and Capiiguary, Manduvira-Tobatiry, Piribeby, and Tibicuary with its (r. bk.) affluent Negro. Of these, by far the most important as affording means of communication with the interior, are the Jejuy and the Tibicuary; on the other rivers regular navigation is impracticable. The principal tribs. of the Paraná are (N. to S.) Piratiy, Iguerey, Santa Teresa, Acaray, Monday, Pirapyta, Gyrapa-y, and Pirapo; the lower courses of all are obstructed by rapids and falls, though the upper courses of some, as the Monday and Acaray, are used for transport. The P. is navigable along the whole frontier, and the Paraná, though with difficulty, to Tacuru-pucu. In the extreme SW. of the country is the Neembucu region, a tract of marshes ('estero'), 12 to 36 m. in breadth, extending along the N. border of the Paraná, and forming a natural line of defence. In the W., between the Jejuy and Tibicuary, are several lagoons, of which the largest are Ypoa, Camba, Ipacaray, Mandiyú, Aguaracati, and Ypta. The **fauna** is abundant, and generally similar to that of the neighbouring state of Matto Grosso; a large water-serpent, called by the natives 'mboy-gazua,' is found in the rivers, as are also several species of voracious fish armed with formidable spines. The **flora** is exceedingly rich; the greater part of the country is covered with primeval forests, which yield in great variety wood of remarkable durability and hardness (quebracho, algarrobo, araucaria, Brazil cedar, timbo, &c.), with many beautifully veined cabinet woods; other trees of special economic value are yerba-maté, or Paraguay tea (which is now obtained only in a wild state between 22° and 29° S., and E. of 57° W.), coca, and the orange, besides many tropical fruits, medicinal, dye, and fibre plants. **Climate.**—The three summer months (Dec. to Feb.) are hot, temp. ranging from 55° to 100° F., but even during this period the air is often freshened by storms from the S. The remaining nine months are spring-like, with, occasionally, slight frosts at night [**Asuncion**]. The rainfall is abundant; greatest in Sept. and Oct. Epidemic diseases are rare, almost the only one being smallpox, now much less virulent than formerly; an intermittent fever ('chicho') is prevalent in the E.; rheumatic affections are common, owing chiefly to neglect of hygienic precautions. The prevailing **geological** formation is a (Tertiary) red sandstone. The soil is described as consisting of four different kinds—sand, red earth, cleared forest land, and black earth. The most important deposit is the 'red earth,' a true loess, well suited for the cultivation of tobacco, cereals, coffee, cotton, &c.; the forest soil is also exceedingly fertile; the 'black earth,' an alluvial deposit of compact clayey mud, affords abundant pasturage, and is also cultivable. Cattle are reared in large numbers, almost entirely for slaughter; dairy-farming is little practised, and butter almost entirely unused by the people generally. **Agriculture.**—The cereal chiefly cultivated is maize, which forms the staple food of the inhabitants; rice, about Asuncion and a few other places in the W.; manioc supplies the common farina for bread; the sugar-cane is used largely in the distillation of caña, or native rum, and to a less extent for sugar; coffee has been successfully introduced; tobacco of excellent quality forms an important crop; tomatoes, beans (haricots), and onions are almost the only vegetables as yet grown for market; the vine is cultivated, though not as formerly for the production of wine. The **mineral resources** are still imperfectly known; iron is abundant in the S.; manganese and pyrites are widely distributed; coal is said to occur, besides ochre and other pigments, kaolin, marble, &c. **Means of communication** are throughout a great part of the country entirely wanting. The first railway from Asuncion to Villa Rica (about 45 m.) was begun in 1859, but owing to the war which soon after broke out, no further progress was made until 1886; the line has since been opened to Caazapa (90 m.), and it is proposed to continue it to Encarnacion; concessions for other lines have been granted. Under the dictator Lopez four or five roads were opened from the cap. along the Paraguay R. and into the interior, and these are connected by several rough tracks ('picadas') used by the 'yerbateros' (maté collectors). Navigation on the interior rivers is confined to native boats, which are slowly worked up stream with long bamboos. The time occupied in ascending the Jejuy from San Pedro to Ygatimi (the distance between which in a direct line is about 100 m.) is 20 days, while the descent can be made in 3 or 4 days. The most important **industry** is the collection and preparation of the yerba-maté, or Paraguay tea, in the forests, or 'yerbales,'

where the tree grows wild. (The principal yerbales are Jésus, Parana, San Estanislao, Ygatimi, San Pedro, and Concepcion.) The distillation of an essence from orange leaves is carried on at Yaguaron and other places; flour, cigars, beer, caña, soap, and leather are manufactured chiefly for home consumption. **Foreign commerce** is very limited; the principal exports are maté and oranges, tobacco, and skins; others are cattle and essence. The exports go chiefly to the neighbouring states, but nearly half of the imports (mainly textiles) are supplied by Britain. The only direct maritime outlet is through Buenos Aires. **Money, Weights, and Measures.**—The money is the same as in the Argentine Republic, and there is also a paper currency. The old Spanish weights and measures (quintal, arroba, fanega, and sino = 69/8 sq. yds.) are still legal. The **population** is mainly of Spanish descent, and Spanish is the language of the state. **Immigration** is encouraged by the government. Agricultural colonies have been founded at Villa Hayes, San Bernardino, Nueva Germania, and Leipzig, the last two by Germans, and one near Villa Rica by Australians. **Government.**—The present constitution dates from 1870. The government consists of three departments—the Legislative, comprising a Chamber of Deputies and a Senate, the members of both elected by universal suffrage; the Executive, vested in the President, elected for four years, and assisted by five responsible ministers; and the Judicial, exercised by a Supreme Court of three members and by five judges 'of first instance.' The national government is represented in the provinces by 'prefects' and justices of the peace. Local administration is freely enjoyed by the 'partidos' (small municipalities or communes), which form the administrative units of the political system. The 'partidos' are, for electoral purposes, grouped into the 23 dists. which form the state. A small standing army is maintained for the preservation of internal order; every citizen between 20 and 35 years of age is liable to service. As to **revenue**, &c., see **Appendix**, pp. 3–5. Education is still backward, though since 1881, when it was declared compulsory, great efforts have been made for its improvement. The principal institutions for higher education are the National College and the Normal Training School. The support of education is provided for by a special tax and government grants. The principal towns are Asuncion (cap.), San Pedro, Concepcion, Villa Rica, and Encarnacion. Area, 89,000 sq. m. P. 329,600 (official estimate for 1887); 500,000 (De Bourgade la Dardye) (*Le Paraguay*, par E. de Bourgade la Dardye, Paris, 1889). [**E. J. H.**]

Paraguay, a large riv. of S. America, the principal trib. of the Paraná (*q.v.*), rises by numerous heads in the Brazilian state Matto Grosso, near the sources of the Guapore, Tapajos, and Xingu tribs. of the Amazon, and in 13° 30′ S., between 55° and 58° W. It thence flows mostly S., between Bolivia on the W. and Brazil and Paraguay E.; and near Corrientes, in 27° 20′ S., it unites with the Paraná. Total course to this point, 1420 m. It receives from the E. the rivs. São Lourenço, Taquari, and Mondego; from the W. the Sipotuba, Jauru, Pilcomayo, and Bermejo (Vermejo). Between 16½° and 17½° N. the region on its r. bk. is a vast lake in the rainy season, known as Xarayes. Similar marshy tracts extend along the l. bk. from 17° to 22° N. It is navigable from the influx of the Jauru, and Brazilian steamers ascend by the São Lourenço and the Rio Cuyaba to Cuyaba, 2360 m. above Buenos Aires. In 1858 its navigation was opened to ships of every flag.

Parah, place named in O. T. See **Fárah.**

Parahiba, or **Parahyba** (the two forms occur in all cases of the same or similar names), tn. near the E. ct. of Brazil, and near the mouth of the Rio P., cap. state P. do Norte, 70 m. N. Pernambuco; founded in 1579. The old town is on the heights overlooking the riv.; the new town is in a plain communicating by the river with its port Cabedello. P. (with dist.) 40,000.

Parahiba (**P. do Norte**), one of the littoral states of Brazil (coast-line 100 m.), naturally separated (S.) from Pernambuco by the Araripe-Caïriris highlands, and conventionally formed by the valleys of P., Mamanguape, Camaratuba, and the higher part of Rio Piranhas valley. Lies in the region of the great periodical droughts. Iron and coal (anthracite) have been seen. See **Brazil,** table, &c.

Parahiba, riv., Brazil, rises in the state of São Paulo, in about 22° 45′ S., flows first SW. to the E. of the Serra do Quebra Cangalha, then turns NE. and flows between that range and the Serra da Mantiqueira and other ranges, enters the state of Rio de Janeiro, and empties itself into the Atlantic in about 21° 40′ S. Length, variously reckoned, 410 to 570 m.

Parahiba do Sul, tn., Brazil, on the l. bk. of the Parahiba, state and 52 m. N. by W. Rio de Janeiro. P. (including dist.) <10,000.

Parahibuna, Parahybuna, or popularly **Juiz de Fóra,** tn., Brazil, 85 m. NNW. Rio de Janeiro, on the P. (trib. Parahiba); chief agricultural centre of the state of Minas Geraes. Alt. 2300 ft. P. (with dist.) 15,000.

Paraiso, vil., Costa Rica, 17 m. E. San José.

Para-limnē ('along the lake'), lake, Greece, nomos Attica and Bœotia, E. of Lake Lykeri, and the former Lake Kopais, 6 m. long. Formerly 115 ft. above sea-level, but raised to 180 ft. by the works for the drainage of Lake Kopais; formerly communicating with the Euripos (channel of Atalantē) only by an underground outlet, but now by a canal rather less than a mile long.

Paramakúdi, tn., India. See **Parmagúdi.**

Paramaribo, cap. of Dutch Guiana, on l. bk. of the Surinam, 20 m. above its mouth, in 5° 50′ N., 55° 10′ W.; almost all the houses are of wood. Two forts defend the entrance of the river. Nearly all the trade of the colony is centred here. See **Guiana.** There is a depth of 20–21 ft. on the bars at the mouth of the river at ordinary springs high water. There are three wharves, with a total length of 520 ft., having a depth of 20 ft. high water, and 11 ft. low water ordinary springs, and a fourth wharf, 200 ft. long, with 23 ft. depth high water, and 15 ft. low water ordinary springs. But during the rainy season (May–July) the depths are uncertain. Mean temp., yr. 81.7° F., Jan. 79.3°, Aug. 83.7°; rfall. (12 yrs.), 107.95 in. P. 28,000.

Paramé, tn. and sea-bathing resort, France, dep. Ille-et-Vilaine, arr. and 2 m. ENE. St. Malo. P. <2000.

Paramo, name of the high plateaux of the Andes in all S. America.

Páramo, comm., Spain, Galicia, prov. and 12 m. S. Lugo, dist. Sarria. P. <4000.

Paramushir, isl., Japan. See **Horo-Musiro-shima.**

Paramythia, tn., Turkey in Europe. See **Aïdonat.**

Paraná ('kinsman of the sea'), riv., S. America, one of the principal streams which contribute to form La Plata, rises in the mountains which separate the Brazilian states Goyas and Minas Geraes, 16°–17° S. Its upper course, stretching S. and SW. down to 20° S., is known as the Paranahiba. At the latter point it is met by the Rio Grande, which rises about 100 m. NW. of Rio de Janeiro, and flows NNW. and W., its lower portion separating the state of São Paulo from Minas Geraes. The united stream then assumes the name of the Paraná, and flows SSW. as far as about 27½° S., separating the Brazilian state Parana from Matto Grosso and the republic of Paraguay, as well as the last named from the Argentine prov. of Corrientes, between which the river takes a W. course. It joins the Paraguay near Corrientes, and confers its own name on the united stream. For several miles after the union the two rivers flow on side by side without mingling, a line of white foam separating the yellowish brown waters of the Paraguay from the dirty green current of the Paraná. Thenceforward its course is generally S. to within 50 m. N. of Buenos Aires, where it unites with the Uruguay R. to form the estuary of La Plata. Total course at least 2000 m., of which 670 m. lie below the falls of Guaira. The principal tribs. on the l. bk. are the Rio das Velhas above the confluence of the Rio Grande, and the Rios Tieté, Parana-Parema, Ivahy, and Iguassu below, all in Brazilian terr.; on the r. bk. are the Rios Corumba, Meta Ponte, and Turvo above the confluence of the Rio Grande, and the Racuri, Verde, Pardo, Ivinhema, Iguatemy, Acaray, and Monday, the last two in Paraguay. Just before quitting Brazil the river descends the celebrated Fall of Guaira or Sete Quedas (Seven Falls), dropping 50 ft. in twenty-one distinct channels; but there is an even grander spectacle to be witnessed in the Iguassu, 16 m. from its confluence with the Paraná; the river passes over some thirty falls, having a breadth of 1 to 2 m., and a descent of 200 ft. Below the rapids it is continuously navigable upwards only to the Paraguayan port of Tacuru-Pacu, a few miles above the confluence of the Iguassu, and about 1120 m. from Buenos Aires. Vessels drawing 16 ft. can ascend to Rosario, and vessels drawing 10 ft. to the confluence of the Paraguay, and up that river to Asuncion. The navigation is difficult, and is apt to be impeded by shifting sandbanks, on which vessels often ground. The voyage from Buenos Aires to Asuncion (1040 m.) generally takes about six days. In 1892 a new entrance to the Paraná was discovered near the Uruguay shore, having a minimum depth at low tide of 15 ft., and admitting usually vessels drawing 19 ft.; dredging is being carried on to deepen the channel for vessels that draw 21 ft. Few towns border the P. in its upper part. In the southerly part of its course it passes Corrientes, Goya, La Paz, Paraná, Diamante, Rosario, and other towns, which mostly stand on the higher bank of the river, the opposite bank being low and marshy. The left or E. bank is the higher as far S. as Diamante, and even has the form of a cliff, except in one part beginning a little to the N. of Goya, about 29° S., and ending at La Paz, in 30¾° S. Cliffs begin to appear on the opposite bank to the N. of Rosario, and thence downwards the r. bk. is the higher.

Paraná, tn., Argentine Republic, Entre Rios, on the l. bk. of the Rio P., on a bluff 130 ft. above the surface of the river, 245 m. (375 m. by water), NW. by N. Buenos Aires, 12 m. SE. by E. Santa Fé. Mean temp. (8 yrs., 1875–82), yr. 65.4° F., Feb. 76.7°, July 55.0°; rfall. (6 yrs.), 36.78 in. P. 18,000.

Parana, one of the S. littoral states of Brazil (coast-line 100 m.), surrounded (W., N., E.) by the Rio Paranapanema, Rio

Iguassu (S.), and the Atlantic (SE.), towards which the lands are mountainous. Towards the interior (as far as the Rio P.) P. is an inclined plane (from 2000 to 600 ft.). Large and excellent bay at Paranagua. Great exportation, notably of maté. To a large extent almost desert. Minerals, iron, gold, mercury, diamonds (at Tibagy), limestone (Paranagua Bay). Some Italian and German colonies. See **Brazil,** table.

Paranaguá, seapt., Brazil, on the bay of P., E. ct. of Brazil, state Parana, 233 m. SSW. Therezina, on E. shore of Lake P., in 25° 35′ S. P. 3000.

Paranahiba, riv., Brazil. See **Paraná,** riv.

Paranan, Ensenada de, bay, Philippine Is. See **Palanan, Ensenada de.**

Parana-Panema, riv., S. Brazil, rises in state of São Paulo, flows NW. then W. on the frontier between the states of São Paulo and Parana (to the S.), and enters the Paraná a little to the S. of 20° S. Its l. bk. trib., the Itavure, forms another part of the boundary between the two states named. Total length of P.-P. 466 m., exclusive of small windings; navigable by small cargo-boats 170 m. from mouth (to Anhumas).

Párang La, pass, Brit. India, Punjab, dist. Kangra, 105 m. NNE. Simla, in 32° 31′ N., 78° 1′ E.; practicable for *yáks* and ponies. Alt. about 18,500 ft.

Parántij (Prantej, census), tn., Brit. India, Bombay, dist. and 31 m. NNE. Ahmadábád; manufactures soap. P. (1881) 8400; (1891) 8800; Hindus, 5800.

Paraskevi, or **Hagios Paraskevi.** See **Tsagkarades.**

Párasnáth, place of Jain pilgrimage, Brit. India, Bengal, in E. of Hazáribágh, in 23° 58′ N., 86° 11′ E. The summit, *Samet* or *Sikhar,* 'The Peak of Bliss,' is flanked by small temples; 10,000 pilgrims flock annually to this spot. For a few years P. was used as a sanitarium. Alt. 4488 ft.

Paratau, tn., western Sudan, in about 8° 55′ N., 1° 0′ E.; cap. of Chayo, a small state N. of Togo-land. Alt. 1200 ft.

Parattah, post-tn., Tasmania, Monmouth co., 38 m. N. by E. Hobart. P. <1500.

Paratwara (Paratwada, census), cant. and civil stn., Brit. India, Berar, Ellichpur dist., 32 m. NW. Amráoti; not healthy. P. 9600; Hindus, 6600; Moham. 2900.

Paraty, tn., Brazil, 105 m. WSW. Rio de Janeiro, on W. shore of the fine bay of Angra dos Reis.

Paravadi, comm., Bulgaria. See **Provadia.**

Páravúr, tn., India, Travancore, on the estuary of the Alwaye R., 17 m. N. Cochin. P. (1871) 5000.

Paray-le-Monial, tn., France, dep. Saône-et-Loire, 28 m. SW. by S. Le Creuzot, arr. and 7 m. W. by N. Charolles. The church is one of the most characteristic types of Burgundian art at the beginning of the 12th century. Numbers of pilgrims visit the chapel of the Visitandines, where lived, in the reign of Louis XIV., Marguérite Marie Alacocque, whose visions have given origin to the cult of the Sacred Heart. P. <4000.

Parbaini, tn., India, Haidarábád, 104 m. SE. by E. Aurangábád, cap. dist.

Párbati, riv., Brit. India, Punjab, dist. Kángra, rises in Wazírí Rúpi, flows W. into the Beas below Sultánpur, in 31° 54′ N., 77° 11′ E. Length, 90 m.

Párbati, fordable riv., India, rising in the Vindhya Hills, flows N. into the Chambal, in 20° 50′ N., 76° 40′ E. Length, 220 m.

Parbold, par., Eng., Lancashire, Chorley div., 6½ m. NW. by W. Wigan, on the Leeds and Liverpool Canal, with stn. (**P. for Newburgh**) on the L. & Y. R., PMT.O. P. <750.

Pariña Punta, cape, Peru, W. ct., in about 4° 40′ S.

Parinari, vil., Peru, dep. Loreto, on the r. bk. of the Marañon, 440 m. ESE. Guayaquil, 45 m. W. Nauta. P. <2000.

Paris, tn. and port of entry, Canada, Ontario, Brant co., on Grand R., 45 m. ENE. London, a railway junction. P. <4000.

Paris (Low Latin *Parisia,* from the Roman names *Parisii* and *Lutetia Parisiorum*), city, France, cap. of the French Republic, and of dep. of the Seine, on both banks of the riv. Seine, near the confluence of the tribs. Yonne, Marne, and Oise, in the centre of the fertile plain of Île-de-France, or the so-called Paris basin, surrounded by a line of Jurassic heights. Paris is a meeting-place of railways, rivers, canals, and highways, 124 m. from the mouth of the Seine (107 m. in a straight line), 210 m.

SSE. London, 560 m. WSW. Berlin. In the Middle Ages a principal focus of European civilisation, Paris is still esteemed the chief city of the world for monuments and public buildings, for general elegance, as well as for scientific, literary, and educational institutions. From its **history,** since 53 B.C., when Julius Cæsar founded a town on the island still called La Cité, Paris has had a relation to the whole kingdom which (according to Freeman) differs from that of any other great capital, being 'strictly the birthplace of the French nation.' The site was chosen for strategic reasons, and the **Roman town** soon became a populous centre. A temple was built where Notre Dame now stands, and among the existing remains of the Roman period are the Palais des Thermes, and some excavations in a public park which has recently been opened. In the 6th century Clovis had a palace in Paris, but owing to the incursions of the Northmen it did not become the permanent capital till the reign of Hugh Capet (A.D. 990). King Philip Augustus (1180–1223) was the second founder; he built the first Louvre, instituted the University (1220), and greatly extended the capital on both banks of the river. On the N. he formed a ring of fortifications, which, though demolished by Louis XIV., are still marked by the Grands Boulevards. For ages Paris consisted of *La Cité,* on the islands in the Seine, *La Ville,* on the r. bk., and *L'Université,* on the l. bk. The **University,** becoming the most famous in Europe for theology and philosophy, attracted scholars from all lands. Under Louis XIV. was completed the Louvre of Francis I.; Richelieu built the original Palais Royal, and rebuilt the Sorbonne, still containing his magnificent tomb. Great improvements were made under the first and still greater under the third Napoleon, who completed the present Louvre, and in 1860 extended the city to its present limits—the walls erected in 1840. Between the Grands Boulevards, which mark the extent of mediæval Paris, and the present city boundary, there lies a third ring formed by the Outer Boulevards, showing the line of the old *octroi* barrier, where municipal dues were levied before the extension to the fortifications. The Inner Boulevards, called *the* Boulevards, form one of the **leading features** of the capital, a world-famous promenade, lined with trees, gay with handsome shops, crowded cafés, and theatres, extending in a curve of 3 m. length from the pillared Madeleine in the W. to the lofty 'July Column' on the site of the Bastille in the E. The Rue de Rivoli, N. of the Tuileries gardens, the Louvre, and the Hotel de Ville, leads from the Place de la Concorde straight towards the Place de la Bastille just named, and is prolonged on W. by the avenue of the Champs Elysées; the latter being continued by another straight avenue beyond the great Arc de Triomphe, and past the Bois de Boulogne to cross the distant Seine at Neuilly. The chief *places* or **squares** are Place de l'Étoile, at the head of the Champs Elysées, with twelve avenues radiating in all directions; Place de la Bastille, one of the busiest parts of Paris, with a column commemorating the 'July' Revolution, 1830; Place du Carrousel, separating the Tuileries from the Louvre; Place de la Concorde, between the Tuileries' gardens and the Champs Elysées; Place Vendôme, with a lofty bronze column in the centre, which was built to commemorate Napoleon's victories. Besides two triumphal arches on the Grands Boulevards, built by Louis XIV., there is that of the Place de l'Étoile, the largest in the world, 152 ft. high, and that in the Place Carrousel, an imitation of one at Rome. The chief **public buildings** are the cathedral, Notre Dame, on the Cité Island, built 1163, with two square towers 218 ft. high, spire 312 ft., five naves 426 ft. long, the principal façade being admired as a rare monument of mediæval art; the Palais de Justice, on the same island, a massive pile (partly 14th century) with clock tower, containing Courts of Cassation, Appeal, Police, &c.; the Louvre, on the site of an ancient castle, a masterpiece of art in architecture and sculpture, 576 ft. on N., but over 2200 ft. on the river side (with its extensions to the Tuileries), and on E. a façade of 548 ft., including the famous colonnade of Perrault; the Louvre contains noted fine art collections, especially of the Italian, Flemish, and Spanish masters, with galleries for the sculpture and antiquities of ancient nations and the Renaissance; the Palace of the Tuileries, founded 1566, nearly ¼ m. long from N. to S., was entirely destroyed in 1871; the Palais Royal (rebuilt under Louis XV.), including the Théâtre Français; the Palais Luxembourg, on l. bk., containing the Chamber of Senate and a national gallery for living artists; the Palais Bourbon, also l. bk., once the 'hôtel' of the Condé family, and now the Chamber of Deputies of France. Other 'palaces' are the Elysée, Champs Elysées, residence of the President of the Republic; the Institute, l. bk., with a handsome dome, where the French Academy and other learned bodies meet; the Trocadéro, with rotunda, a music-hall seated for 15,000, and a colossal organ; the Palace of the Legion of Honour (time of Louis XIV.). From the Champ de Mars, l. bk., opposite the Trocadéro, rises the colossal Eiffel Tower, 985 ft. high, its iron material weighing nearly 7000 tons. Other conspicuous buildings are the Madeleine (built 1806–42), a beautiful Corinthian temple 328 ft. long, with fifty-two columns, and an elaborately adorned interior, intended by Napoleon I. to memorialise the Grande Armée; the Panthéon (1764), 360 ft. above the river, with fine frescoes, and tombs of Voltaire, Rousseau, Victor Hugo, &c. Three interesting churches are St. Sulpice, nearly as large as Notre Dame, of marvellous classical architecture, La Trinité, and St. Augustin, remarkable for their façade and dome respectively, and as specimens of recent art. The various **quarters** noticeable are the commercial, between the river and the Grands Boulevards, always full of stir and traffic; the St. Germain quarter, l. bk., full of aristocratic families and those who claim kinship to the *ancienne noblesse;* the successful artists' quarter, in the pleasant neighbourhood of Parc Monceau; the Russian quarter, NW. of Champs Elysées; the quartier Marbœuf, for English and American families, occupying the large houses near the Champs Elysées, and further W. towards the Bois de Boulogne, Passy, and Autenil. The Quartier Latin, or that of the university, is a large district, l. bk., grouped about the Sorbonne and other **educational institutions.** The Sorbonne, as seat of the ancient university of Paris, is still in a certain measure centre of the whole national system. Free courses in the higher education are given in the new building (finished 1889), and the graduation of the university of France [**France,** Education] takes place there annually. Library of 100,000 volumes. There are also special schools in medicine and law which prepare for graduation. The Collège de France, with thirty-seven chairs, qualifies in all university work, and the 'École des Hautes Études' supplements theoretical instruction by practical training. The Upper Normal School prepares teachers for secondary instruction and for graduation; the Polytechnic trains military and naval engineers as well as civil. St. Cyr is another state school for officers in infantry and cavalry. There are thirty-two **libraries** (six being public), the chief of which, the National Library, is second only to that of the British Museum; others are St. Geneviève, Mazarin, the Arsenal, Museum, Opera, University, City of Paris, &c. Besides the museums of the Louvre, there are the Musée Carnavalet, illustrating the development of the municipality; the Hôtel de Cluny, that of France since B.C. 53; the Palace of the Fine Arts, &c. Of the forty **theatres,** the largest, said to be the finest in the world, is the Grand Opéra (built 1861–75, at a cost of £1,120,000, exclusive of the site), seated for 2156; the Théâtre Français (or Comédie Française), which has been since Molière the typical playhouse of France; the Odéon and the Opéra Comique. Those four are subsidised by the state, but many others are in repute, there being a dozen on the Inner Boulevards alone, including the Grand Opéra. Of open spaces or **recreation grounds,** the two largest are beyond the fortifications, viz., the Bois de Boulogne on W., and Bois de Vincennes on E. The former contains 2158 ac., one quarter of which is turf and more than half clumps of trees, and includes two race-courses, and the gardens of the 'Acclimatisation Society,' a favourite resort. The Bois de Vincennes is larger and similarly adorned, affording from the Gravelle Plateau a splendid view over the Seine and Marne valleys. The Tuileries Gardens cover 74 ac., the Luxemburg Gardens rather more. The Jardin des Plantes is a large botanical garden, with classes supported by government. The **government** of the capital was before the Revolution administered by two Prévôts, the Prevôt de Paris and the Prévôt des Marchands; and afterwards as a dep. by the prefect of the Seine. It consists of twenty arrs., with one mayor for each, assisted by two assistant councillors. The fortifications (built in 184c under Louis Philippe) are 22½ m. in circuit, and contain fifty-six gateways, nine openings for railways, and four for the river and canals. Outside are two lines of detached forts, first those built before the war of 1870–71, of which the most conspicuous is Mont Valérien (650 ft. high), towering on the W. beyond the Seine; second, new forts such as those protecting Versailles and St. Germain, at distances from town varying from 6 to 10½ m. These now render Paris the most formidable entrenched camp in Europe. The water-supply is now adequate, as well as the lighting and paving arrangements: licensed abattoirs have long been a regular institution. The drainage is chiefly by a system of cesspools (67,000 in number), built water-tight and communicating with the air by a pipe higher than the surrounding houses—the cesspools being regularly emptied by night. The chief manufacturing and industrial activity is in the suburbs and neighbouring towns; the Parisians proper producing besides the 'articles de Paris' (a large class requiring taste and special skill), clothes, artistic furniture, jewellery, bronzes, paper, chemicals. The **railway termini** are at least 1¼ m. from the centre of Paris, but it is proposed to join them by a new line to the Grands Boulevards and the Halles Centrales (chief market). There are eight great termini, the chief being the Nord, Orleans, and St. Lazare. Of the **prisons** of Paris, the Conciergerie in the Palace de Justice is famous historically; La Force is the largest; the Nouvelle Bicêtre, for life servitude; St. Pélagie, for political offences; St. Lazun, for females; Clichy, debtors; and Madelonnettes, for juvenile criminals. Of **hospitals,** the chief are the Hôtel Dieu, on the Cité I., rebuilt at a cost of £1,800,000; Hôtel des Invalides (built 1671), for soldiers, one of the best

institutions of Louis XIV., conspicuous by its dome at the head of its esplanade (l. bk. Seine); Salpêtrière, for old women, the largest asylum known; the Bicêtre, the Foundling Hospital; the crèches, for rearing the infants of work-women; and many others—*e.g.*, the Quinze Vingts (=15 × 20), where, since its foundation by St. Louis, 300 blind persons are kept, besides outdoor assistance to 1500 others. To improve the **port** of Paris, a government scheme has been proposed for deepening the river-channel or constructing a ship canal to the English Channel. There are fifteen landing-places, *e.g.*, the Port du Bercy, with 115 vaulted cellars; the Port aux Vins, near the chief wine-market, &c. The port now admits 500–800 ton vessels, and the customs (distinguished from the *octroi* levied by the municipality on goods entering the fortifications) amount to over £4,500,000, the chief imports being wine, sugar, cloths, fruits, paper, &c. The river is widest at Pont Neuf (961 ft.), which joins the Cité I. to both banks, and is famous for its statue of Henry IV., the original builder. There are twenty-eight bridges in all, the most striking perhaps being the viaduct of Auteuil, which is crossed by three roads, one for a railway, and is therefore double, the lower part of five arches and the upper of forty-two. The climate of Paris shows a somewhat greater range of temp. than that of London, the mean for 72 yrs. being 51.4° F., Jan. 36.3°, July 66°. The Seine was frozen in 1819, 1829, 1879, and partially so in 1840, 1853, 1857, and 1870; average rfall. 19.68 in. The death-rate 2.55 per cent., against 2.17 for the whole of France. The present area is 18,410 ac. (30 sq. m.). Alt. of Seine valley in the district, 100–130 ft., but Montmartre is 345 ft., Belleville 320 ft., and Mont St. Geneviève 190 ft. The movement of **population** for 600 years is shown in the following table, in which the population is given in thousands:—

Date.	Pop.	Date.	Pop.	Date.	Pop.	Date.	Pop.
1292	216	1784	660	1841	935	1872	1852
1553	260	1817	714	1851	1053	1881	2269
1718	509	1831	786	1861	1697	1891	2448

Of the population over 180,000 are foreigners. The total population in 1891, including suburbs outside the walls, was nearly 2,713,000. [**R. E. A.**]

Parma, Finnish for 'woody plateaux.'

Parma, tn., Italy, Emilia, cap. prov. P., on the riv. Parma (length, 56 m.; area of basin, 666 sq. m.; mean discharge, 1000 cubic ft. per second; highest discharge, 14,100 cubic ft. per second), 30 m. WNW. Modena, with a fort on the S. Surrounded by a circular wall, with five gates and a castle on the S. The principal street coincides with the ancient Via Æmilia. The public edifices embrace the cathedral, built in the Romanesque style (between 1106 and the present time), an ancient baptistery (12th and 13th centuries), the former ducal palace, containing a museum of antiquities, picture-gallery with paintings by Correggio, academy of fine arts, library of nearly 150,000 vols., archives, and a fine ruined theatre. P. possesses also a university, botanical garden, natural history museum, &c. Of Etruscan origin, P. became a Roman colony in 184 B.C., was plundered by Alaric the Goth and Attila the Hun, and occupied by the Byzantine generals Belisarius and Narses. In the Middle Ages it was a republic, then became (1303) subject to the noble families of Correggio, Este, Visconti, Sforza successively. Having been ceded to the Popes in 1512, they in 1545 gave it to the house of Farnese, making it the cap. of a duchy. In 1807 Napoleon made the city the cap. of a dep. of Italy. Birthplace of anti-pope Giberti, of the painter Mazzuola, and of the sculptor Spinelli. P. (1871) 45,000; (1881) 44,500.

Parma and Piacenza, Duchy of, created in 1545, held by the Farnese family down to 1731, then by the Bourbons down to 1860, except during the years 1807–47. In 1860 it was united to the crown of Italy. With P. and P. was associated Guastalla.

Parmagúdi (Paramakúdi, census), weaving tn., Brit. India, Madras, dist. and 40 m. SE. Madura, on Vaigai R. P. 10,000; Hindus, 8900.

Parmer, co., U.S., Texas, in the NW., on the W. frontier, N. of 34° N.

Parnahyba, tn. and seapt., Brazil, Piauhy, near the mouth of the P., 175 m. E. by S. Maranham. The harbour at **Amoraçao,** 10 m. NE. of P., has an area of 2 ac., and a depth at high water, ordinary springs, of 16 ft., ordinary neaps, of 12 and 14 ft. The depth on the bar at ordinary springs is 16 ft. high water, 5 ft. low water. Vessels are loaded and discharged by lighters. P. 12,000. The **Parnahyba R.** flows on the whole NE., on the borders of the states Maranhão and Piauhy, and enters the Atlantic by several mouths, some E. and some W. of 42° W.; length 450 m.

Parnassus, bor., U.S., Pennsylvania, Westmoreland co., on the Allegheny R., 15 m. ENE. Pittsburg. P. <1500.

Parnassus, Mount, famous mt., Greece, prov. (nomos) Phthiotis and Phocis, its culminating point in 38° 36′ N., 22° 27′ E. Alt. 8065 ft.

Parndon, Great and **Little,** two adjoining pars., Eng., Essex, Epping div. Great P., 6½ m. SE. Ware, 1½ m. SSW. Burnt Mill stn., P.O., P. <750; Little P. P. <250.

Parnell, mun. bor., New Zealand, North I., co. Eden, a suburb of Auckland. P. <4000.

Parramatta ('head of the water'), tn., New South Wales, Cumberland co., 10 m. NW. by W. Sydney, on Parramatta R. The oldest town in Australasia next to Sydney, originally called Rosehill; with fruit-growing, especially oranges. Rfall. (15 yrs.), 38.95 in. P. 11,700.

Parras, tn., Mexico, prov. Coahuila, 84 m. W. Saltillo. P. 13,500.

Parres, comm., Spain, prov. Oviedo (N. ct.), dist. Cangas de Onis. P. 8300.

Parret, riv., Eng., Somerset, formed by the union of the Isle and Yeo, flows NW., receives the Tone on the l. bk., passes Bridgwater, and enters Bridgwater Bay by an estuary.

Parrott, vil., U.S., Colorado, La Plata co., 60 m. ENE. of the SW. corner of the state, with gold and silver mines near. Alt. 8611 ft. P. <1500.

Parrsborough, seapt. tn. and port of entry, Canada, Nova Scotia, Cumberland co., on Minas Basin, 66 m. NW. by N. Halifax. The harbour, an area of over 50 ac., has a depth at entrance in ordinary springs of 20 ft. high water, low water nil; one wharf, 700 ft. long, has 15 to 20 ft. at high water ordinary springs, nil at low water. There are several other private wharves. Between high water ordinary springs and high water ordinary neaps there is a difference of 4 ft. West Bay, 1 m. W., which is sheltered against all except SE. winds, affords good anchorage for the largest vessels, but loading and discharging are done by lighters. P. <2000.

Parry (named from the Arctic navigator, W. E. Parry, died at Ems near Wiesbaden in 1855), cape, Brit. N. America, is on the Arctic Ocean, near 70° N., 123° 35′ W., and terminates a promontory bounding Franklin Bay on the E.

Parry, cape, W. ct. Greenland, near N. extremity of Baffin Bay, in 77° 2′ N., 71° 23′ W.

Parry, co., New South Wales, crossed in the extreme NW. by 31° S., and in the middle by 151° E.

Parry Island, isl., Canada, Ontario, in Parry Sound.

Parry Islands, a group in the Arctic region of N. America, between 75° 0′ and 77° 30′ N., and 93° and 119° W., consisting of Prince Patrick, Melville, Bathurst, Cornwallis, Grinnell Land, and many smaller islands.

Parry Sound. 1. Bay, Canada, Ontario, on the E. side of Georgian Bay, in 45° 15′ to 25′ N. **2.** Dist. extending E. from Georgian Bay to Nipissing dist. (touching 79° W.), and bounded on the N. by French R. and Lake Nipissing. **3.** Village in that dist., on P. S., in 45° 20′ N. Alt. 641 ft. Mean temp., yr. 40.3° F., Jan. 14.2°, July 65.8°; mean rfall. (1879–88, 10 yrs.), 26.41 in.; snowfall, 105.2 in. P. <1500.

Parryville, bor., U.S., Pennsylvania, Carbon co., on the Lehigh R., 40 m. S. Scranton; has iron manufactures. P. <1500.

Parrywood, stn., Canada, prov. Ontario, on the C. P. R., 1250 m. by rail W. Montreal, 174 m. E. Winnipeg.

Parsa, tn., Brit. India, Bengal, dist. Sáran, 26 m. NW. by N. Patná. P. <5000.

Parschnitz, tn., Austria, Bohemia, dist. and 2 m. ENE. Trautenau. P. <3000.

Parsees, called also **Guebres,** descendants of the ancient fire-worshippers of Persia, or followers of the creed of Zoroaster.

There are from 70,000 to 80,000 in Brit. India, mostly at Bombay, and about 9000 in Persia, chiefly settled in the provs. of Yezd and Kerman. The ancestors of the Parsees in India emigrated there after the Mohammedan invasion of Persia in the 7th century. The name signifies natives of Pars or 'Fars,' that is, Persia.

Parsler Spitze, mt., Austria, Tirol, 1 m. NW. Landeck, on N. side of Inn valley. Alt. 9650 ft.

Parskoye, vil., Russia, govt. Kostroma, dist. Yurievets, on Parsha, trib. of Tesa; a variety of domestic trades (textiles, tiles, &c.); great fair for cottons and sheep-skins. P. <3000. Berezniki on opposite bank of Parsha.

Parsley Hay, stn., Eng., Derbyshire, near Hurdlow, on the L. & NW. R.

Parsnip, riv., Brit. Columbia, one of the two headwaters of the Peace (*q.v.*), rises to the E. of the most northerly point of the Fraser R., and flows NW.

Parson Drove, par., Eng., Cambridge, Isle of Ely, div. and 4½ m. W. Wisbech, 1½ m. W. by N. Wisbech St. Mary stn., PM.O.; 4096 ac. P. <750.

Parsons, city, U.S., Kansas, Labette co., 43 m. NW. by W. of the SE. corner of the state, on a high prairie; has machine and car works. P. 6700; (local census, 1894) 8700.

Parsons, coal-mining bor., U.S., Pennsylvania, Luzerne co., on the N. Branch of the Susquehanna, 14 m. SW. Scranton, adjoining Wilkesbarre on the E. P. <3000.

Parsonsfield, tn., U.S., Maine, York co., 35 m. W. Portland. P. <1500.

Parson's Green, suburb of London, Eng., Middlesex, Fulham bor., 5 m. SW. by W. St. Paul's, London, on the District and Metropolitan Rly.

Parsons Heath, P.O., Eng., Essex, 3 m. SW. Colchester.

Parsonstown, or **Birr,** civic tn., Ire., W. King's co., bar. Ballybritt, 21 m. SW. by W. Tullamore, on the G. S. & W. (Ire.) R. Market-day, S. Mean temp. (19 yrs.), yr. 48.3° F., Jan. 39.9°, July 59.0°; rfall. (25 yrs.), yr. 32.9 in. P. <4500. **Birr Castle,** seat of the Earl of Rosse, noted for the great Rosse telescope, 52 ft. long, with speculum 6 ft. in diameter.

Parsonstown, par., Ire., co. Louth, bar. Ferrard, 5 m. SE. Dunleer. P. <250.

Partábgarh, ancient fortress, Brit. India, Bombay, dist. Sátára, 8 m. SW. Mahábaleshwar, commanding the Par Ghát. The W. and N. sides of the cliffs are almost vertical, 700 to 800 ft. high. Alt. 3543 ft.

Partábgarh, tn., Central India, cap. P. State, 120 m. NW. by N. Indore; has a loopholed wall. SW. is a small fort. Celebrated for enamelled work of gold inlaid on glass. Alt. 1660 ft. P. (1881) 12,800.

Parwich, par., Eng., Derbyshire, W. div., 8 m. WSW. Matlock, 5 m. NNE. Ashbourne stn., PMT.O. P. <500.

Parys Mountain, Wales, co. and on N. side of Anglesey I., 2 m. W. Amlwch; long famous for its copper mines.

Pas, vil., France, dep. Pas-de-Calais, arr. and 16 m. SW. by W. Arras, 7 m. E. Doullens. P. <2000.

Pasadena, city, U.S., California, co. and 10 m. NNE. Los Angeles. P. <5000.

Pasajes, or **Pasages,** seapt., Spain, prov. Guipúzcoa, dist. and a short distance E. of town of San Sebastian, on the Bay of Biscay, not far from the French frontier; considerable improvement recently effected in the port.

Pasangan, Puerto, bay, Philippine Is., on the E. side of Samar, in 12° 20'-26' N., 125° 20' E.

Pasargadæ, ancient ruined city of Persia, near the riv. Polvar, about 55 m. NE. Shiraz. Here Cyrus the Great was buried.

Pascagoula, riv., U.S., Mississippi, in the SE., formed by the confluence of the Chickasawha and the Leaf; it flows S. into Mississippi Sound at P.

Pascagoula, city and port, U.S., Mississippi, Jackson co., on an inlet of the Gulf of Mexico, with a lighthouse at entrance, at the mouth of the Pascagoula R., 38 m. SW. by W. Mobile (Ala.); has several shipyards, lumber, and other mills; good anchorage. P. <1500.

Pasco, tn., Peru. See **Cerro de Pasco.**

Pasco, co., U.S., Florida, on Gulf of Mexico, crossed by 28° 15' N.

Pasco, settlement, U.S., Washington, Franklin co., 40 m. W. by N. Walla Walla, on the l. bk. of the Columbia R.

Pascoag, vil., U.S., Rhode I., co. and 18½ m. NW. by W. Providence; has woollen-mills. Alt. 396 ft. P. <1500.

Pascoe's Inlet, small bay on the N. ct. of Queensland, in 139° 40' E. long.

Pascua, isl., Pacific. See **Easter Island.**

Pas de Calais, strait, Eng. and France. See **Dover, Strait of.**

Pas-de-Calais, maritime dep., N. France, formed in 1790, chiefly from Artois, with a small part of Picardy; divided into six arrs.: Arras (cap.), Béthune, Boulogne, Montreuil, St. Omer, and St. Pol. The surface, of slight elevation, consists mainly of monotonous plains and narrow valleys. Highest point (695 ft.) SW. of Douvres. Geological formations include Mesozoic (Oolitic and Cretaceous), Tertiary (Miocene and Pliocene), and alluvium. The dep. has a coast-line of 65 m., bordered by sand-dunes (now being planted with fir-trees), and rocks; principal indentations, Bay of Authie and estuary of the Canche, in the S.; further N. are the ports of Boulogne and Calais, and Cape Gris Nez—the nearest point in France to England. Stretching inland between Calais and Gravelines is the dist. of the 'Wateringues' or 'Wattergands' (Flemish, 'water-courses'), formerly a vast marsh of which the greater portion has been reclaimed, and now forms rich cultivable land. Other marshy tracts occur near St. Omer and Béthune, and in the Clairmarais dist. The last named was in former times a large shallow lake, supporting numerous floating islands (at one time said to number 300) covered with herbage, on which cattle were pastured. The islets gradually became fixed to the sub-soil; the last floating ones disappeared only in the beginning of the 19th century. The dep. is drained to the sea by seven small rivers, of which the largest are the Aa, Canche, and Authie; the eastern part is drained to the Scheldt by the Lys, Sensée, and Scarpe, and a small dist in the S. belongs to the basin of the Somme. Climate [**Arras.**] The soil is of exceeding fertility, and agriculture very advanced. Of cereals the most important is wheat, in the production of which, as of oats and barley, the dep. ranks second in France; sugar-beet is also a very important crop, and forage roots are extensively grown; tobacco (St. Pol, Montreuil, St. Omer), flax (Béthune), mustard (Lille). In coal production the dep. takes the lead, contributing about one-third of the total of France. It contains part of the Valenciennes and the whole of the Boulonnais coalfields. The principal mining centres are Noeux and Douvres, Grenay, Courrières, Bruay, Hardinghem,

&c.; peat is also worked. Of manufactures, metallurgical industries are the most important; forges and foundries (St. Laurent, Sens, Guines, &c.), blast-furnaces (Marquise, &c.), copper and zinc refining (Biache-St.-Vaast); textile manufactures include lace and net for curtains (St.-Pierre-les-Calais); shipbuilding is carried on at Calais, Boulogne, and other coast towns. Area, 2606 sq. m. P. (1891) 874,400. See **France,** table.

Pa-se, vil., Siam, on the S. ct., 103 m. SE. Bangkok, in about 101° 40′ E.

Pasque Island, U.S., off the S. ct. of Massachusetts, Dukes co., in 41° 27′ N., 70° 49′ W.

Pasquia Hills, Canada, Saskatchewan, stretching nearly parallel to and about 25 m. S. of the Saskatchewan R., in about 102°–105½° W.

Pasquotank, co., U.S., N. Carolina, in the NE., on the N. of Albemarle Sound, W. of 76° W.

Pasquotank, navigable riv., U.S., N. Carolina, rises in Dismal Swamp, flows S. and SE., entering Albemarle Sound by a broad estuary.

Pasrúr, tn., Brit. India, Punjab, dist. Siálkot, 47 m. N. by W. Amritsar. P. 9200; Hindus, 2400; Moham. 6400.

Passage, tn., Ire., E. co. and 6 m. E. by S. Waterford, bar. Gaultiere, on Waterford Harbour, PMT.O. (**Passage East**). P. <750.

Passage Island, a name of the W. India isl., Culebra.

Passage Island, islet, W. Indies, Leeward Is., in 18° 8′ N., 63° 28′ W., 20 m. W. of the W. end of Anguilla.

Passage Island, reef, off NE. ct. of Viti Levu I., Fiji Is.

Passage Islands, two groups of the Malay Archipelago, one off the W. ct. of Sumatra, near 2° 30′ N., the other between Celebes and Sangir.

Passagem, vil. and rly. stn., Brazil, on the r. bk. of the Rio Parahiba, state and 106 m. NE. Rio de Janeiro.

Passagem, gold-mines, Brazil, close to town **Ouro Preto** (*q.v.*).

Passage West, tn., Ire., S. co. Cork, bar., Kerrycurrihy, on the W. side of Cork Harbour, on the estuary of the Lee, opposite Great I., 2 m. NW. Queenstown, with a stn. (**Passage**) on the Cork, Blackrock, and Passage Rly.; bathing resort; port of Cork for large shipping. PMT.O. P. <2000.

Passaic, riv., U.S., New Jersey, in the NE., flows NNE. then E. past Paterson, then S. past Newark into Newark Bay.

Passaic, city, U.S., New Jersey, P. co., on Passaic R., 4½ m. SSE. Paterson; has considerable manufactures. P. (1880) 6500; (1890) 13,000.

Passais, vil., France, dep. Orne, 17 m. S. Tinchebrai, arr. and 8 m. SW. Domfront. P. <2000.

Passáman, tn., Sumatra, in the W., on the coast, 85 m. NW. by N. Padang.

Passamaquoddies, tribe, Indians, U.S. See **Penobscots.**

Passamaquoddy, riv., U.S., Maine. See **St. Croix.**

Passamaquoddy Bay, inlet of the Bay of Fundy, between the prov. of New Brunswick, Canada, and Maine (U.S.). It is well sheltered, deep, never closed by ice, and contains several good harbours in Deer and Campobello Is. Tide rises from 25–33 ft. Length, 12 m.; width at entrance, 8 m.

Passandava Bay, Madagascar, in the NW., in about 13° 30′–45′ S.

Passani, tn., Baluchistan, on the S. ct., 230 m. W. by N. Karáchi.

Passarge, riv., Ger., E. Prussia, flows N. into the Frisches Haaf, navigable from Braunsberg, 6 m.

Passaro, Cape, Sicily, terminates the penin. at the SE. corner.

Passarowitz, old spelling of Požarevać (*q.v.*), Servia.

Passatempo, tn., Brazil, state Minas Geraes, 71 m. WSW. Ouro Preto. P. 5000.

Passau, tn. and episcopal see, Bavaria, circle P., on the Danube, r. bk., at the junction of the Inn, close to the Austrian frontier, 72 m. SE. Ratisbon. The position is pleasantly surrounded by hills and connected by iron bridges with suburbs on l. bk., the whole forming one of the most picturesque scenes on the Danube. P. was formerly fortified with two strong citadels; and the prison still marks the position of the Oberhaus on a hill 300 ft. high, l. bk. It was joined to Bavaria in 1803. Manufactures unimportant; considerable trade in iron and timber, the latter being floated down the Ilz; graphite mines near. Alt. 960 ft. Mean temp., yr. 46° F., Jan. 27.2°, July 64.8°. P. (1871) 13,400; (1890) 16,600.

Passchendaele, comm., Belgium, prov. W. Flanders, arr. and 11 m. NE. Ypres. P. <4000.

Pass Christian, tn., U.S., Mississippi, Hancock co., on Mississippi Sound, 52 m. ENE. New Orleans. P. <2000.

Passeierthal, valley, Austria, Tirol, opening from the NE. into that of the Etsch at Meran; separates the Oetzthal Alps from the Sarnthal Alps; connected by the Jaufen P. (bridle-path) with the valley of the Eisack at Sterzing.

Passeleth, original name of **Paisley** (*q.v.*), Scot.

Passenham, par., Eng., Northamptonshire, dist. Potterspury, on the Ouse, 3 m. SW. Wolverton. P. <1500; eccles. par. (**Passenham with Denshanger**) P. <1500.

Passenheim, tn., Prussia, prov. E. Prussia, circle Ortelsburg, 67 m. SE. by E. Elbing. P. <2000.

Passero, Capo, cape, Sicily, in the extreme SE., in 36° 40′ N.

Passingford Bridge, PM.O., Eng., Essex, on riv. Roding, 6 m. N. Romford.

Passing Place, stn., Wales, near Swansea, on the Swansea and Mumbles Rly.

Passir, tn., near the E. ct. of Dutch Borneo, NE. Banjermasin, 155 m. NE.

Passir, tn., Sumatra, in the N., on the coast.

Pass Island, Newfoundland, at entrance to Hermitage Bay, on S. ct.

Passmore, riv., S. Australia. See **Wilpena Creek.**

Pass of Kilbride, par., Ire., co. Westmeath, bar. Fartullagh; 4032 ac. P. <500.

Passos, vil., Brazil, in the W. of the state Minas Geraes, to the S. of the Rio Grande, in 20° 35′ S., 175 m. W. by S. Ouro Preto. P. <5000.

Passow, vil., Prussia, prov. Brandenburg, 26 m. SW. Stettin, about 1 m. from the r. bk. of the Randow. P. <2000.

Passy, dist., W. Paris, France, lying between the Seine and the Bois de Boulogne.

Pastaça, riv., Ecuador, rises in the Andes, and joins the Amazon 50 m. W. the influx of the Huallaga, after a SE. course of 400 m.

Pasto, tn., Colombia, Cauca, 130 m. NE. Quito. Alt. 8655 ft. P. (with dist.) 13,000.

Pasto, volcano, Colombia, WNW. Pasto. Alt. 13,990 ft. (Reiss and Stübel).

Paston, par., Eng., Norfolk, E. div., 1 m. from the NE. ct., 8 m. SE. Cromer, 3½ m. NE. North Walsham stn. P. <500.

Paston, par., Eng., N. div. of Northamptonshire, 2½ m. N. and in administrative co. of Soke of Peterborough, 1 m. E. Walton stn. P. <250; eccles. par. (**Paston with Dogsthorpe, Gunthorpe, and Walton**) P. <1000.

Paston, par., Eng., Northumberland, Berwick-upon-Tweed div., 7½ m. E. by S. Kelso, 1 m. SE. Mindrum stn. P. <250.

Pastoriza, comm., Spain, Galicia, prov. and 22 m. NNE. Lugo, dist. Mondonedo. P. 7800.

Pasubio, mt., Tirol, on SE. frontier, 9 m. SE. Rovereto. Alt. 7310 ft.

Pasuruan, tn., in the E. of Java, on the N. ct., in about 112° 50′ E., 30 m. SSE. Surabaya. P. 26,000.

Pasvig, riv., Norway, emerges from Lake Enare in Russian Lapland, forms the frontier between Russia and Norway, and empties itself into Varanger Fjord. Length, 78 m. Area of basin, including Lake Enare, 6000 sq. m. (Strelbitsky).

Pásztó, comm., Hungary, co. Heves, 28 m. ENE. Waitzen. P. 5100.

Pata, or **Patta,** vil., Brit. E. Africa, on the E. side of Pata I., in 2° 10′ S. A noted centre of trade when held by the Portuguese during most part of the 16th and 17th centuries; traces of a Portuguese fort.

Patabang, or **Battambang,** tn., Siam, on the Nam Sangke 180 m. E. by S. Bangkok, near the frontier of Cambodia, about 25 m. from N. end of Lake Tale Sap.

Pata Cuddapah, suburb of Cuddapah tn., Brit. India, Madras.

Patagones, riv. port. See **Carmen de Patagones.**

Patagonia, region of S. America, forming the S. part of the Argentine Republic S. of the Colorado R.; divided into four governments, Rio Negro, Neuquen, Chubut, and Santa Cruz. The country E. of the Cordilleras consists of vast plains or plateaux, often sterile, traversed by low ranges of hills and by easterly-flowing rivers. The principal rivers N. to S. are Colorado, Negro, Chubut, with r. bk. trib. Sengel or Senger, draining Lakes Musters, Deseado (in the upper basin of which is Lake Buenos Aires), Santa Cruz, with l. bk. trib. Chico, and Gallegos. Between the Colorado and the Negro several ranges of hills (1200 to 1500 ft.) stretch NW. and SE.; the intervening surface is covered with stony layers alternating with sand dunes. Similar deposits prevail over a great part of the country. In the dists. of Chubut and Santa Cruz large areas are covered with volcanic dust. Fresh water is scarce, but many salt or brackish lakes and pools occur. Towards the Straits of Magellan the country is more fertile and wooded. The substratum consists of Tertiary formations, characterised by abundant fossil remains of large extinct animals. The hills ('mahuida') are of granite and porphyry, and there are besides many volcanic mounds. The stony and sandy layers consist chiefly of the débris of primary rocks [see **Pampas**]. The western or Andean region presents a marked contrast to the eastern; the country is fertile, with extensive forests and large lakes [see **Andes, Patagonian**]. Climate [see **Argentine Republic**]. NW. winds, sometimes of great violence, prevail during the spring and summer. The valleys and coast region afford tracts suitable for tillage and pasture; excellent wheat is grown in the Chubut valley. Vegetation is sparse on the plains. Thorny, salt-impregnated shrubs, a cactus with formidable spines, coarse-tufted grass and in some parts the calafate (a species of *berberis* valued for its fruit) are the characteristic forms. Trees (willow, quebracho, chañar) are found chiefly along the rivers and in a few hollows. In the Andean region are extensive apple-groves, sprung from plants introduced by the Jesuits. The Patagonians, now rapidly decreasing, are a fine race, tall and well-built; they are peaceably disposed, and have many noble traits. The principal tribe is the Tehuel-che. A railway about 46 m. in length connects the Chubut settlements with Port Madryn. Other places are Port Deseado, St. Julian, and Santa Cruz (the chief ports), Gallegos, and Cape Virgin. [**E. J. H.**]

Pataholm, maritime vil., Sweden, prov. and 18 m. N. Kalmar, on the E. ct.

Pâtaliputra, ancient tn., India. See **Patná.**

Patalung, vil., Siam, Malay Penin., on W. side of Singgora lake, in about 7° 34′ N.

Patam, Sanscrit, 'a city,' *e.g.*, Viziapatam, 'the city of victory.'

Pâtan (Pattan, census), tn., India, Baroda, 62 m. NNW. Ahmadábád; surrounded by a wall. One of the oldest and most renowned towns of Gujarát, with extensive Jain libraries, consisting mostly of palm-leaf manuscripts. Manufactures swords and spears. P. (1871) 31,500; (1891) 32,600.

Pâtan, India, Káthiáwár. See **Somnath.**

Pâtan, tn., India, Oudh, dist. Unao, on the banks of Son R.; has two annual fairs, one of which is attended by 300,000 persons. P. <5000.

Pâtan, tn., India, Rájputána, 60 m. N. by E. Jaipur. P. (1881) 11,900.

Pâtan, or **Keshoral Pâtan,** tn., India, Rájputána, on the Chambal, 110 m. S. Jaipur. P. (1881) <5000.

Pâtan, tn., Nepál, 4 m. SSW. Khátmándu, with which it is connected by a bridged road. Built 299 A.D. P. about 30,000.

Patangata, co., New Zealand, North I., E. ct., crossed in the N. by 40° S.

Patani, riv., Siam, Malay Penin., flows NE. then N. into the Gulf of Siam, in about 6° 55′ N. A silver-lead mine formerly worked in its valley by an English company.

Patani, tn., Siam, Malay Penin., cap. P. state, on the E. ct., in about 6° 51′ N.

Patapedia River, riv., Canada, Quebec, partly on the N. frontier of New Brunswick, flows SE. to the riv. Restigouche.

Patapsco, riv., U.S., Maryland, flows E. through Baltimore into Chesapeake Bay.

Patara, ruined city, Asia Minor, celebrated in antiquity as a principal seat of the worship of Apollo. Its remains, on the coast, 12 m. S. the ruins of Xanthus and 27 m. SSE. Makri, comprise Greek tombs, parts of small temples, a triple arch, a theatre, and ruins of large churches.

Patoka River, U.S., Indiana, rises in Orange co., flows W. into the Wabash R., nearly opposite Mount Carmel. Length, 125 m.

Patos, small isl., U.S., Washington, in Haro Strait (SE. of Vancouver I.) with lighthouse.

Patos, Boquete de los, pass in the Chilean-Argentine Andes. See **Andes.**

Patos, Lagoa dos ('duck lake,' so called from the quantities of wild fowl which frequent its waters), Brazil, state Rio Grande do Sul, is an enlargement of the Rio Grande, or Jacuhy, near its mouth in the Atlantic. It receives at its N. end the Jacuhy, further S. the Camacuam, and near its S. end, at Pelotas, the surplus waters of Lake Mirim; shores generally low. At its N. point is Porto Alegre, and at its S. end the city of Rio Grande do Sul. It is separated from the Atlantic by a narrow neck of land, and a bar at its mouth, 6 m. below Rio Grande do Sul (*q.v.*), prevents the entrance of large vessels. Its greatest depth is under 30 ft.; length about 165 m.; breadth, 36 m.

Patras, Greek **Patrai** (Patras, the name which has become current outside of Greece, being the accusative case of the proper name), fortified seapt. tn., Greece, the chief on the W. side, prov. (*nomos*) Argolis and Corinthia, on the N. ct. of the Peloponnesus, on gulf of same name, which opens out of the Gulf of Corinth, 70 m. WNW. Corinth, with terminus stn. on railway to that town and Athens; it has a modern look, having been rebuilt since the War of Liberation (1821). The main features are the citadel, castle, and cathedral, and its handsome harbour (defended since 1880 by a breakwater). P. is the chief export port of Greece, the great bulk of the currants grown on the mainland being despatched thence. P. (1870) 26,200; (1889) 33,500; comm. P. 45,000.

Pechelbronn, petroleum well, Lower Alsace, near Sulz-unterm-Walde.

Pechenyeghi, tn., Russia. See **Novo-Byelgorod.**

Pecherskaya Lavra (Kievo-Pecherskaya), monastery and fortress, Russia, in S. part of Kiev, on a cliff on r. bk. Dnieper. The Lavra is divided into four separate monasteries, the oldest of which dates from the 11th century. It was destroyed by the Mongols in 1240, renewed in 1470, and has since become one of the holiest spots of Russia; the churches and the catacombs in the cliffs, which have been inhabited by monks since the 11th century, are now visited every year by numerous pilgrims. The Pecherskaya Lavra was also the seat of one of the earliest printing-offices in Russia, and a centre of learning as well as of a widely-spread school of painting holy pictures.

Pechili, or **Chili,** prov., in NE. of China, touches Mongolia on the N., and the Gulf of P. on the E. Mountains in the N. and W., containing extensive beds of anthracite, not extracted. The remainder of the prov. is fertile, being well watered by the rivs. Pei-ho, Hun-ho, Huto-ho, and Shang-ho, as well as traversed by the Imperial Canal. Millet, maize, wheat, cotton, tobacco, and fruit are the most important products. The climate is, on the whole, moderate (see **Peking**). Goitre is endemic in the mountainous dists.; inundations in the riverine plains and violent dust storms cause serious damage at times. A terrible famine visited the prov. in 1842, and its population suffered terribly during the Taiping revolt. Cap. Peking. See **China.**

Pechili, Gulf of, NE. China, a shallow but wide basin, connected with the Yellow Sea by the Strait of P.; it sends off a N. extension, known as the Gulf of Liautung.

Pechina, comm., Spain, Andalusia, prov., dist., and 7 m. N. Almeria; has thermal spring. P.<4000.

Pechora, riv., NE. Russia, govts. Perm, Vologda, and Archangel; rises on the W. slopes of Urals, in 62° N., flows, generally speaking, N. till near the Arctic Circle, where it suddenly bends SW. and W. to meet the Tsylma, whence it again bends N. and NE.; it divides into many wide branches in its lower course, and forms a broad delta; enters the Arctic Ocean in the **P. Bay,** which is protected on the N. by a narrow promontory, Russkiy Zavorot, and has on the S. the Bolshezemelskiy Bereg (Bereg coast), formed by the *tundra* of same name. The P. receives many tribs., the largest of which are Ussa (r. bk.), and Izhma and Tsylma (l. bk.). Total length 983 m., out of which 700 m. are navigable. Its large basin, 127,230 sq. m., known as **P. Region (Pechorskiy Kraĭ),** is covered to nearly one-half with virgin forests, and to one-third with moss marshes, and has not more than 30,000 inhabitants, chiefly Zyryanes, Samoyedes, and about 7500 Russians, who are grouped only at Ust-Tsylma and Pustozersk in the delta. The P. is free from ice for 175 days in its upper course (62° 48′ N.), and 127 days at Pustozersk (67° 32′ N.). An active navigation is carried on, the centre of which is Cherdyñ, on upper Dvina, whence corn and various goods are transported by land to the upper P., and thence shipped down the river to the *tundras;* while furs, partridges, reindeer skins, &c., are shipped from the Arctic coast the other way, and transported to Cherdyñ.

Pechovo, or **Petyovo,** vil., Turkey in Europe, vilayet Kossovo, sanjak Ushkub, 70 m. S. by W. Sofia. P. 2250; Christians, 1150; Moham. 1100 (G.).

Peebles, co. tn., par., and royal burgh, Scot., on both banks of the Tweed, 22 m. S. Edinburgh, at the junction of the Eddleston, with stn. on the N. B. R. and C. R. There is a fine bridge over the Tweed, and two smaller ones over the Eddleston. The chief buildings are the parish church, the Chambers' Institution, with library and museum, occupying an ancient residence of the Yester and Queensberry families. P. has become

a favourite summer resort, from its climate and the Tweed fishings. The early Scottish kings often resided here when hunting in the Ettrick Forest. Tweeds and other woollen stuffs manufactured. Alt. 550 ft. Market-day, Tu. Par. 16,597 ac., P. (1871)<3200; (1891) 5300; tn. P.<5000; royal burgh P.<3500; parl. dist. (**P. and Selkirk**) P. 19,100.

Peeblesshire, or **Tweeddale,** co., Scot., entirely in the upper part of the Tweed basin, except a small part on the N. border, which drains towards the Firth of Forth. The surface is mainly a succession of rounded pastoral hills, on both sides of the riv. Tweed, which rises in the extreme S. and flows NNE. and E., with many tribs., especially Biggar, Lyne, Manor, and Eddleston. The chief heights are Broadlaw (2754 ft.), Hartfell (2651 ft.), Cramalt (2723 ft.), and Dollarlaw (2680 ft.). Geologically, P. belongs to the Silurian system of S. Scotland, and shows some igneous rocks, such as trap and felspar. The only fossils are near Traquair. Coal is dug at Lamancha. Limestone, marl, slate, and ironstone occur. For agricultural statistics, see **Appendix,** pp. 10–12. The antiquities are British and Roman camps, and the castles of Neidpath and Drochil. This county belonged to the kingdom of Northumbria till 1088, when it became part of Scotland. Manufactures woollen cloth and shawls at the county town, Innerleithen, and Walkerburn. P. (1801) 8700; (1871) 12,300; (1891) 14,800. See **Scotland,** table.

Peedee River, U.S. See **Pedee.**

Poe Ell, settlement, U.S., Washington, Lewis co., 45 m. SE. Olympia.

Peekskill, vil., U.S., New York, W. Chester co., 40 m. N. New York; has extensive iron-works and brick kilns. P. (1880) 5600; (1890) 9700.

Peel, Celtic, 'a small stronghold or tower,' *e.g.,* Peel, in the Isle of Man.

Peel, the largest of the Bonin Is., Pacific, middle group, with Fitton Bay, a considerable inlet, at its NE. extremity.

Peel, co., Canada, Ontario, on Lake Ontario, crossed in the W. by 80° W.

Peel, eccles. par., Eng., Lancashire. See **Hulton, Little.**

Peel, seapt. tn., Isle of Man, on the W. ct., 10 m. NW. by W. Douglas, on the Isle of Man Rly.; the town, sheltered from E. winds and with a fine beach, is a favourite health resort. Its cod, plaice, &c., fisheries are productive, but those of herring and haddock have declined. Near P. is St. Patrick's Isle, joined to the mainland by a causeway; it contains ruins of Peel Castle and Cathedral, the former described in Scott's *Peveril of the Peak.* P.<4000.

Peel, riv., Brit. N. America, rises in 64° N., 132° W., flows mostly N., and joins the Mackenzie at the commencement of its delta. In the country through which it flows alum and coal are met with, and furs are brought by the Indians of the region around it to Fort Good Hope, on the Mackenzie. Fort Mackenzie is on its r. bk.

Peel, riv., New South Wales, rises in co. Parry, on N. slope of Liverpool Range, flows NW., and joins the Conadilly to form the Namoi or Peel R.

Peel, post-vil., New South Wales, Roxburgh co., 10 m. NE. Bathurst. P.<1500.

Peel, co., W. Australia, between 32° and 34° S., to the W. of 118° E.

Peel, De, an extensive marsh in the E. of Netherlands, provs. N. Brabant and Limburg, between the Maas and the Aa Rivs. Area, 60 sq. m.

Peel Causeway, stn., Eng., Cheshire, on the Cheshire Lines and M. S. & L. Rlys., close to Bowdon.

Peele, part of par., Eng., Cheshire. See **Horton.**

Peel Fell, hill, Eng., Hexham div. of Northumberland, partly in Roxburghshire, Scot., 13¾ m. S. by W. Jedburgh. Height, 1975 ft.

Peel Green, P.O., Eng., Lancashire, 1 m. NW. Patricroft.

Peel Road, stn., Isle of Man, on the Isle of Man Rly., 2½ m. SE. Peel.

Peels, par., Eng., Northumberland, dist. and 7½ m. NW. Rothbury. P.<250.

Peene, riv., in the W. of the Prussian prov. of Pomerania, flows NE. then E. into the Stettiner Haff, another branch, sometimes distinguished as the **Peene-strom,** 28 m. long, flowing N. on the W. side of Usedom I.; navigable from Dahmen, 104 m. At Demmin it receives from the left the Trebel, navigable from Tribsee, 17 m.; and from the right the Tollense, navigable for 6¼ m.

Peetmagan, lake, Quebec, Chicoutimi co., crossed by 70° 15′ W., and 49° 40′ N.

Pegalajar, tn., Spain, Andalusia, prov. and 11 m. ESE. Jaën, dist. Mancha Real. P. (comm.)<5000.

Pegasus Bay, large bay on the E. ct. of South I., New Zealand, N. of Lyttelton, crossed by 43° 30′ S. lat.

Pegau, tn., Ger., kgd. Saxony, circle and 13 m. SSW. Leipzig, dist. Borna. P. 5300.

Pegli, seapt., Italy, Liguria, prov. and 6 m. W. by N. Genoa. P. 4000.

Pegnitz, riv., Ger., Bavaria, flows S. through a valley of the Franconian Jura, then W. past Nuremberg to Fürth, where it unites with the Rezat to form the Regnitz; not navigable.

Pego, tn., Spain, prov. and 40 m. NE. by N. Alicante, cap. dist. P. P. (comm.) 6500.

Pegswood, par., Eng., Northumberland, Wansbeck div., 2 m. NE. Morpeth, 1½ m. SW. Longhirst stn., PM.O. (**P. Colliery**). P.<1500.

Pegu, tn., Burma, dist. P., 44 m. (46 m. by rail) NNE. Rangoon, on Rangoon R. Two-thirds in value of the exports of Burma are shipped, and all but a small fraction of the imports are received, at this port, which ranks third among the seaports of Brit. India. Described by European travellers in the 16th century as a place of great size, strength, and magnificence. P. 10,800; Buddhists, 8500.

Pegu, riv., Lower Burma, dist. Hanthawadi, rises on E. slopes of the Pegu Yoma Mts., flows SSE. then SSW. into the Rangoon, near Rangoon; its lower course irrigates; can be ascended by large vessels to Pu-zon-daung. Length, 180 m.; breadth, 1 m.

Pegu Yoma, mts., Lower Burma. See **Yoma.**

Pegwell Bay, bay, Eng., on the E. ct. of Kent, to the S. of Ramsgate; it receives the Stour. The landing-place of St. Augustine. Noted for its shrimps.

Peho, tn., central Africa, in about 11° 55′ S., 20° 3′ E.

Pe-ho, riv., China. See **Pe-kiang.**

Pehoa, or **Pihewa,** tn., Brit. India, Punjab, dist. and 32 m. SSW. Ambála, place of pilgrimage on the sacred riv. Saraswatí; has a large annual bathing fair, which attracts from 20,000 to 25,000 pilgrims. P.<5000.

Peh-tang, fortified tn., China, prov. Pechili, on the Gulf of Pechili, at the mouth of the San-ho, 98 m. SE. Peking.

Pei, Chinese, 'white.'

Peiching, tn., China. See **Peking.**

Pei-ho, or **Tientsin-ho,** riv., China, prov. Pechili, rises beyond the Great Wall, flows SE., passing E. of Peking, 60 m. below which it receives several tribs., Hun-ho, Huto-ho, Shang-ho, and the Imperial Canal; then passes the treaty port of Tientsin, and enters the Gulf of Pechili near the Taku forts, in 38° 8′ N. It is navigable for boats to opposite Peking, 100 m. from its mouth. Length, 280 m.; mean volume, 7800 cubic ft. (Guppy).

Pei-ho ('white river'), riv., China, l. bk. trib. of the Han-kiang, which it joins opposite Siangyang-fu, after a S. course of about 124 m.; navigable from Nanyang-fu.

Pei-hsien, tn., China, in the N. of prov. Kiangsu, 168 m. N. by W. Nanking.

Pei-kiang, riv., China. See **Pe-kiang.**

Peitz, tn., Prussia, prov. Brandenburg, circle and 7½ m. N. by E. Kottbus. P.<4000.

Pekalongan, tn., Java, on the N. ct., in about 109° 40′ E., 75 m. NW. by N. Jokjokarta. P. 34,000.

Pekan', tn., Malay Penin., cap. state of Pahang, near the mouth of the Pahang R., in about 3° 33′ N., 103° 23′ E.

Pekia, tn., Turkey in Europe. See **Ipek.**

Pe-kiang, Pe-ho, or **Pei-kiang** ('North river'), riv., China, Kwangtung, rising by two headwaters near the N. frontier of the prov., the NE. headwater leading to the Meiling Pass and into Kiangsi, the NW. headwater leading to the Cheling Pass and into Hunan; navigable from near the source of either of its headwaters to its entrance into the Si-kiang, about 25 m. W. Canton.

Pekin, city, U.S., Illinois, Tazewell co., on l. bk. of Illinois R., 9 m. S. by W. Peoria; has extensive pork-packing, and several important manufactures; coal mined. P. 6300.

Pekin, coal-mining vil., U.S., Maryland, Allegany co., 29 m. ESE. of the NW. corner of the state. P.<1500.

Pekina, post-tn., S. Australia, Dalhousie co., 52 m. ESE. Port Augusta. P.<1500.

Peking, or, according to a spelling originally French, **Pekin,** sometimes **Peiching,** according to the pronunciation of the mandarin dialect of P., *i.e.,* 'the northern court' or capital, as distinguished from Nanking, imperial city, China, cap. of the empire, on a sandy alluvial plain between the riv. Pei-ho and its trib. the Hun-ho, nearly equidistant from both, 36 m. SE. Great Wall, at the head of the Great Canal. Its plan or out-

line is geometrical, consisting of an exact square (4½ m. each way) with a rectangle applied to the S. side. The longer side of the rectangle projects 270 yds. beyond the square on E. and W., and the breadth of the rectangle is 2⅝ m. The square or N. part of this double capital is the Tatar or Manchu city, technically *Neiching*, 'the Interior City,' or *King-ching*, 'City of the Court,' and occupies about two-thirds of the site of the ancient city, called by the Mongols *Taidu*, *Taitu*, or *Daitu*, remains of the N. wall of which are still in existence. The S. part outside the square is the Chinese city, and partly includes the ancient *Yenking* or Old Cambaluc. Both parts are surrounded by high walls, those of the Manchu city being 50 ft. high and 60 to 40 ft. thick; while those of the Outer or Chinese city are 30 ft. in height, and in thickness 25 ft. at base to 15 ft. at the top. The present N. wall of the Manchu city dates from 1437, the S. wall of the Chinese city from 1544. There are sixteen gates in all, surmounted by imposing towers 100 ft. high. The S. wall of the Manchu city serves to separate both parts. Before 1100 B.C. the capital of Yen was on this site, and in 936 A.D. P. again attained the rank of capital, and in 1151 became the court residence of the Kin dynasty. From Kubla Khan (1280–94), who rebuilt it with great magnificence, this capital obtained the Mongol name of *Khanbalik* ('city of the khan,' the *Cambaluc* of Marco Polo). In the 14th century the seat of sovereignty was transferred to Nanking, and restored to P. in 1421. Within the square Manchu city is another walled enclosure, called the 'Imperial City,' in the heart of which is a third enclosure, called the Sacred, Forbidden, or 'Purple City.' The latter contains the palaces of the imperial family, and must never be entered except by the court and high state officials; there is also a magnificent temple of the imperial ancestors, gardens, and a lake, &c. For splendour and gorgeous decoration, some of the galleries and reception rooms in these palaces are said to be unsurpassed. In the 'Imperial City,' to N. of the Sacred or Forbidden City, is a height with five conspicuous temples, and near it the residence of the governor of the city; also the 'Bell Tower,' noted for its huge bell, weighing 120,000 lbs., and the 'Drum Tower,' with quaint astronomical appliances for the measurement of time. The 'Imperial City' also contains a large arsenal, the public granaries, the residences of the leading dignitaries of the empire and government offices, including the Examination Hall. Other institutions are the observatory, founded by Kubla Khan, the great lamasery, a square building enclosed in gardens, with over 1000 Mongol and Tibetan monks, and a huge gilt statue of Buddha; the temple of Confucius, a circular pagoda with marble staircases. In 1863 a college was organised for training interpreters, which has since become an Imperial university on the European model, with library and printing-presses attached to it. Besides many conspicuous native temples and pagodas, there is a large and handsome Roman Catholic cathedral, completed 1888, a Greek church and convent, &c. The southern part of P., or the Chinese city proper, is more commercial, being intersected from side by four broad thoroughfares, with busy shops and bazaars. These streets are noticeable by large arches at the crossings, but the roads are unpaved, and the houses are meaner than in the Tatar or northern city. The chief building here is the 'Temple of Heaven,' where on the morning of the winter solstice the emperor performs religious rites at an open altar. The area of P. being large in proportion to the population, there are gardens and open spaces in all directions. The finest thoroughfare is the 'Avenue of Tranquillity,' 66 yds. broad, passing E. and W., immediately S. of the Imperial residence. The government of the capital is by an Imperial superintendent, a mayor, and other officers. The police are assisted by 10,000 militia soldiers. Though in the prov. of Pechili, P. is not its cap., the governor residing at Paoting. P. has a healthy climate, there being an excellent water supply, and no marshes in the neighbourhood. Alt. 35 ft. Mean temp., yr. 53.3° F., Jan. 23.4°, July 79.3°. P. (1880–90) under 1,000,000 (estimate of Professor Legge, from personal observation, confirmed by Dr. Williams of the U.S.A. legation). The estimate of Lockhard (1866) was 1,500,000; and Zakharof (1845) 1,649,000; Du Helde (two centuries ago) 3,000,000.

Pekinye, tn., Turkey in Europe, vilayet Scutari, on the Shkumbi, 24 m. SE. by S. Durazzo.

Pelican Lake, Canada, Manitoba, 11 m. long by 1 to 2 m. broad, about 115 m. WSW. Winnipeg, drained SE. into the Pembina R.

Pelican Point, cape, German W. Africa, Kamerun Terr., in 4° 28′ N., 8° 54′ E.

Pelican Point, cape, W. Africa, in the W. of Walvisch Bay, 22° 54′ S.

Pelican Rapids, vil., U.S., Minnesota, Otter Tail co., 22 m. N. of Fergus Fall. P. <1500.

Peling Islands, group of isls., Eastern Archipelago, off the E. of Celebes, in the N. of the Gulf of Tomori.

Pelion, mt., Greece. See **Greece,** surface.

Pella, tn., Cape Colony, Namaqua-land, on the l. bk. of the Orange, 90 m. ENE. Ookiep. Alt. 1804 ft. Rfall. (13 yrs.), 2.5 in. **Little Pella,** 15 m. to the W.

Pella, site of ruins, Turkey in Europe, vilayet and 24 m. WNW. Salonica, near the modern Ala-Kilisa, ancient cap. of Macedonia, and birthplace of Philip II. and Alexander the Great.

Pella, tn., South African Republic, Rustenberg, dist. and about 100 m. W. by N. Pretoria. P. <200.

Pella, city, U.S., Iowa, Marion co., 37 m. ESE. Des Moines; seat of the Central University of Iowa. P. <3000.

Pellane, comm., Greece. See **Georgitsion.**

Pellaro, tn., Italy, Calabrie, on the Straits of Messina, prov. and 7 m. S. Reggio. P. <2000.

Pellegrino, Ciza, mt., Italy, in the SW., near the W. ct., 65 m. NW. by N. Catanzaro. Alt. 6515 ft.

Pellegrue, tn., France, dep. Gironde, arr. La Réole, 32 m. E. by S. Bordeaux. P. <2000.

Pellerin, Le, tn., France, dep. Loire-Inférieure, arr. Paimbœuf, on r. bk. of the Loire, 9 m. W. by S. Nantes. P. <2000.

Pellestrina, tn., Italy, prov. and 11 m. S. Venice, in the middle of Pellestrina I., between the lagoon of Venice (length, 9 m.; breadth, 656 ft.) and the Adriatic. P. <5000.

Pellon, stn., Eng., Yorkshire, on the G. N. R., near Halifax.

Pellworm, isl., Prussia, prov. Schleswig-Holstein, govt. Schleswig, in the North Sea, 5 m. NW. Nordstrand. Soil fertile. It was the highest portion of the former island Nordstrand, before the inundation of 1634. Area, 15 sq. m. P. (1871) 2224.

Peloponnesus, or **Morea,** the part of Greece (*q.v.*) S. of the Isthmus of Corinth.

Pelorus, reef, Pacific, in the S. of the Tonga group, in about 23° S., 176° W.

Pelotas, tn. and seapt., Brazil, Rio Grande do Sul, in SW. of Lake Patos (*q.v.*). Here are huge meat-curing establishments; and in addition to preserved beef, P. exports hides, bones, and artificial manure. Vessels have to cross the bar of the Rio Grande (fluctuating depth) and the bar of the riv. São Gonzalo, usually with 10 ft. of water, to reach P., and then they can only load or discharge a part of their cargo by means of lighters. Mean temp. (3 yrs., 1875–77), yr. 64.0° F., Jan. 75.6°, July 53.5°; rfall. (6 yrs.), 38.20 in. P. 33,000.

Pelplin, vil., Prussia, prov. W. Prussia, circle Dirschau, 30 m. S. Danzig. P. <3000.

Pelsall, par., Eng., Staffordshire, Handsworth div., 4 m. N. by E. Walsall, on the L. & NW. R.; has coal. PMT.O. P. <3500.

Pelton, par., Eng., Durham, div. and 2 m. NW. Chester-le-Street stn. on NE. R., 7 m. S. Newcastle, PM.O., and PM.O. (**P. Fell**), and P.O. (**West P.**). P. <4500.

Pelusium, a city of ancient Egypt, the remains of which, consisting of 'mounds and a few broken columns,' are near the Mediterranean coast E. of Lake Menzaleh. The Pelusiac, or easternmost arm of the Nile, at its delta, enters the sea at Tineh, after a NE. course of 120 m.

Pélussin, tn., France, dep. Loire, arr. St. Étienne, 12 m. SW. by W. Vienne. P. <2000.

Pelvoux, mt., France, between deps. Hautes-Alpes and Isère, in 44° 54′ N., 6° 24′ E. Alt. 13,460 ft.

Pelym, riv., W. Siberia, govt. Tobolsk, l. bk. trib. of Tavda, flows 230 m. SSE. through Lake Tuman (55 m. long), in a marshy region sparsely inhabited by Voguls. **Pelym,** vil., at junction of Pelym R. with Tavda, 223 m. NW. Tobolsk; place of exile of the Romanoffs, Duke Biron, and Field-marshal Münnich; now centre for administration of **Pelym Region.**

Pelynt, par., Eng., Cornwall, div. and 11 m. SE. Bodmin, 6½ m. SSW. Liskeard stn., P.O.; 4676 ac. P. <750.

Pelzer, tn., U.S., S. Carolina, Anderson co., 92 m. NW. by W. Columbia. P. <2000.

Pemaquid, port. See **Bristol,** Maine, U.S.

Pemaquid Point, cape, U.S., Maine, in the S. of Lincoln co., 37 m. SSE. Augusta.

Pemba, isl., off E. ct. of Africa, 30 m. N. Zanzibar I., and belonging to the British protectorate of Zanzibar, lat. of E. point 4° 54′ S., long. 39° 53′ E.; it produces excellent timber, and plentiful supplies for shipping. Length, 35 m.; area, 227 sq. m. P. estimated at 10,000.

Pemberton, settlement, Canada, prov. Brit. Columbia, on the N. side of Lake Lillooet, 68 m. N. by E. Vancouver.

Pemberton, par. and tn., Eng., Lancashire, Ince div., 2 m. SW. Wigan, on the L. & Y. R.; has collieries and cotton-mills. P. 18,400.

Pemberton, vil., U.S., Florida, Sumter co., on the Withlocoochee R., 135 m. SSW. of mouth of St. John's R. P. <1500.

Pemberville, vil., U.S., Ohio, Wood co., 18 m. SSE. Toledo. P. <1500.

Pembina, vil., U.S., N. Dakota, cap. P. co., 145 m. N. by W. Fargo. Alt. 791 ft. signal station (U.S. Signal Office). Mean temp., yr. 35.2° F., Jan. 3.0°, July 66.6°. P. <1500.

Pembina, Little, settlement, Canada, on a branch of the C. P. R., 125 m. WSW. Winnipeg.

Pembrey, par., Wales, Carmarthenshire, E. div., 5 m. W. by N. Llanelly, with a stn. (**P. and Burry Port**) on the G. W. R.; coal mined. PM.O. 14,928 ac. P. 6300; eccles. par. (**P. with Llandary**) P. 6300. See **Burry Port.**

Pembridge, par., Eng., Herefordshire, div. and 7 m. W. Leominster, on the G. W. R., PMT.O.; 7074 ac. P. <1500; eccles. par. (**P. with Moor Court**) P. <1500.

Pembroke, tn., Canada, Ontario, cap. Renfrew co., on the r. bk. of the Ottawa (Lake Allumette), 73 m. WNW. Ottawa. Alt. 389 ft. Mean temp., yr. 40.6° F., Jan. 10.4°, July 68.3°; mean rfall. (6 yrs., 1882–87), 28 in.; snowfall, 80.0 in. P. < 1500.

Pembroke, parl. and (since King Stephen) mun. bor., par., seapt., and market-tn., Wales, Pembrokeshire, on S. side of Milford Haven, 42 m. W. Swansea, in the diocese of St. David's, with stn. on Pembroke and Tenby Rly., forming with Haverfordwest, Milford, Tenby, Narberth, Fishguard, and Wiston the Pembroke and Haverforwest dist. of parl. bors. Ancient castle, rebuilt by Strongbow, 1109, when created Earl of Pembroke; here Henry VII. was born, and here his mother, Catherine Beaufort, took refuge after the battle of Tewkesbury; besieged and taken by Cromwell, 1649. There are many fairs. Market-day, S. Mean temp. (19 yrs.), yr. 49.8° F., Feb. 42.5°, Aug. 59.4°; rfall. (20 yrs.), yr. 35.8 in. Mun. bor. (which includes P. Dock) P. (1891) 15,000 (of which about 4500 belongs to P. proper); parl. dist. of bors. (Pembroke and Haverfordwest) P. (1891) 34,900.

Pembroke, civic tn., Ire., co. and bar. Dublin, Donnybrook par., just outside the mun. boundary of Dublin, on the SE. P. 24,300.

Pembroke, post-tn., New Zealand, South I., Lake co., 92 m. WNW. Oamaru, on S. shore of Lake Wanaka. P. <1500.

Pembroke, co., Tasmania, on the SE. ct., crossed by 43° S.

Pembroke, tn., U.S., Maine, Washington co., on Lubeck Bay, 11 m. NW. Eastport. P. <2000.

Pembroke, tn., U.S., Massachusetts, Plymouth co., 19 m. NE. by E. Taunton. P. <1500.

Pembroke, tn., U.S., New Hampshire, Merrimac co., 2 m. from Suncook, on Merrimack R. P. <4000.

Pembroke, Cape, Patagonia, 51° 41′ S., 57° 47′ W. Mean temp. (9 yrs., 1859–68), yr. 43.7° F., Jan. 49.1, July 37.0°.

Pembroke Dock, formerly **Pater,** eccles. par. and market-tn., Wales, on S. side of Milford Haven, and on Pembroke and Tenby Rly., included in the mun. bor. of Pembroke, but separated by a small hill and a creek from Pembroke proper. The govt. dockyard, removed to this place from Milford in 1814, covers 60 ac., and in it some of the largest ships of the navy have been constructed. The govt. dock, 404 ft. long by 75 ft. wide at entrance, has a depth of 24 ft. 9 in. on sill at high water ordinary springs. There are also two private docks, one 245 ft. long, 44 ft. 9 in. wide at entrance, and 13 ft. 8 in. deep on sill at high water ordinary springs; the other 185 ft. long, 38 ft. 3 in. wide at entrance, and 14 ft. deep on sill at high water ordinary springs. Its arsenal is protected by fortifications. Market-day, F. P. 10,500.

Pembrokeshire, co. in the SW. of Wales, washed on three sides by the ocean, returning one member to Parliament. The surface is bare of trees, and generally uninteresting, except on the coast; on N. the rounded hills reach a height of 1754 ft. at Cwm Cerwyn, in the Preseley Range. The rivers are the Teifi and the Cleddau, flowing into Milford Haven. The G. W. R. traverses the county, with terminus at New Milford or Neyland. Geologically, coal-bearing strata pass from E. to W., connecting this county with the S. Wales coalfield, and igneous rocks are found at Preseley and near St. David's Head; Llandeilo flags characterise much of the area, especially in the northern portion. The soil in S. is good, owing to the limestone and Old Red Sandstone formations. Coal at Begelly, Saundersfoot, and Landshipping; lead-mine at Llanfyrnach, containing silver. Zinc ore is also dug there. After the Celtic period this dist. was held by the Scandinavians, as the place-names prove; under Henry I. and Henry II. many Flemings settled here. The antiquities are St. David's cathedral and several castles of the Middle Ages. Area 395,151 ac., P. 89,133 (parl. co. exclusive of parl. bors. 379,092 ac., P. 54,264; parl. bors. Pembroke, and Haverfordwest dist., 16,059 ac., P. 34,869). The administrative co. excludes the part of Cardigan urban sanitary dist. in the administrative co. of Cardigan, area 392,710 ac., P. 88,296. See **Wales,** table.

Pembrokestown, electoral div., Ire., co. Waterford, dist. Kilmeadan.

Pembuang, riv., Dutch Borneo, flows S. into the Java Sea, W. of Sampit Bay, by a large estuary, in about 112° 30′ E. Length more than 310 m.

Pembury, par., Eng., Kent, div. and 3½ m. SE. by S. Tunbridge, 3 m. WSW. **Paddock Wood Junction,** PMT.O., and PM.O. (**Pembury Lower Green**). P. <2000.

Pemigewasset, riv., U.S., New Hampshire, rises on Mount Lincoln, Grafton co., and flows S., taking the name of the Merrimack after its confluence with the Winnipiseogee.

Pemiscot, co., U.S., Missouri, in the extreme SE.

Penang, Pulo-Penang (= Areca-nut Island), or **Prince of Wales Island,** off W. ct. of the Malay Penin., ceded to Great Britain in 1785 by the Rájah of Kedah. It is 15 m. long by 5 m. broad, considerably less than the Isle of Wight. The hilly dist. reaches a height of 2922 ft. at 'the peak,' but nearly one-half is level and fertile. The high ground is covered with forests of palms and other tropical plants, and the flat lowlands show fields of rice and rich plantations of cocoa-trees, bananas, and sugar-canes. After Singapore, it is the most important of the 'Straits Settlements.' Products—coco and areca nuts, sugar, coffee, rice, pepper, cloves, nutmegs, &c. Tin ore is dug at the base of the mountains. The only town is George Town (or Penang), on E. ct., with busy port on the strait which divides the island from the mainland. There is a dock 330 ft. by 50 ft., with 15 ft. on sill at high water ordinary springs, and a pontoon 200 ft. by 80 ft.; quayage, 5000

ft. George Town has a town-hall, several hospitals (especially one for lepers on a small island), and schools—P. 20,000 to 55,000. Mean temp. (2 yrs., 1885–86), yr. 82.5° F., Jan. 82.6°, July 82.6°; rfall. (1882), 126.5 in. P. (1871) 61,800; (1881) 90,950, of whom 45,100 Chinese, 21,800 Malays, and 15,700 Indians.

Peña Palomera, mt., Spain, Aragon, 75 m. S. by W. Saragossa.

Peña Prieta, mt., Spain, Cantabrian Mts., 52 m. SW. by W. Santander.

Peñaranda de Bracamonte, tn., Spain, prov. and 25 m. E. by S. Salamanca, cap. dist. P. P. (comm.) <5000.

Pen Argyl, bor., U.S., Pennsylvania, Northampton co., 46 m. SE. by S. Scranton. P. <3000.

Penarth, par. and seapt. tn., Wales, Glamorganshire, S. div., on the E. ct., 2½ m. S. Cardiff, with stns. (**P.** and **P. Dock**) on the Taff Vale Rly.; seaside resort. The dock (2900 ft. by 370 ft.) covers an area of 23 ac., and gives 6125 ft. of quayage, with 36 ft. depth over sill at ordinary springs, and 26 ft. at ordinary neaps. The tidal harbour, nearly 2½ m. long by 200 yds. wide, gives 15,000 ft. of quayage, with 30 ft. depth at ordinary springs, and 20 ft. at ordinary neaps. In the riv. Ely there are 600 ft. of additional quayage, with 32 ft. depth at ordinary springs, and 20 ft. at ordinary neaps. There are, moreover, a patent slipway, 870 ft. long, and a gridiron, 384 ft. long. Par. P. 9600; tn. P. 12,400; eccles. par. (**P. with Lavernock**) P. 9700.

Pennington, vil., U.S., New Jersey, Mercer co., 8 m. N. by W. Trenton. P.<1500.

Pennington, co., U.S., S. Dakota, on the W. frontier, crossed in the middle by 44° N., bounded on the E. by the S. Fork of the Cheyenne R.

Pennington River, one of the mouths of the Niger, entering the Gulf of Guinea in about 4° 44′ N., 5° 33′ E.

Pennocrucium, Eng., Staffordshire. See **Penkridge.**

Penns, stn., Eng., Warwickshire, on the M. R., 2½ m. SE. Sutton Coldfield.

Pennsboro, vil., U.S., W. Virginia, Ritchie co., 70 m. NNE. Charleston. P.<1500.

Pennsburg, vil., U.S., Pennsylvania, Montgomery co., 30 m. NW. Norristown. P.<1500.

Penn's Grove, vil., U.S., New Jersey, Salem co., on the Delaware, 20 m. SW. by W. Philadelphia (Penn.). P.<1500.

Pennsylvania, one of the U.S., bounded W. by Ohio, N. and NE. by New York, E. by New Jersey, S. by Delaware and Maryland, SW. by W. Virginia; one-tenth smaller than England; would be rectangular, but that the Delaware R. forms an irregular E. boundary, and in the NW. a small area of New York has been added, giving the state 45 m. of coast on Lake Erie. The only one of the original thirteen states without sea-coast. Twelve cities exceed 25,000, largest Philadelphia (1,047,000); cap. Harrisburg (39,400). The surface is very varied. The SE. is comparatively level and low-lying, and well suited for agriculture, in which one-fifth of the population are engaged. The state ranks first in rye, partly owing to its large population of German origin, second to New York alone in hay, buckwheat, potatoes, and orchard products, and fourth in tobacco. Proceeding NW. we cross a series of parallel ridges 1500 to 2500 ft. high, forming part of the Appalachian Chain, with finally a gentle slope to the Ohio Valley. This valley and the SE. suffer from hot summers; in the central and northern uplands the winters are long and cold, with occasional summer frosts; the Susquehanna Valley, to the S., has a more equable climate **[Erie, Philadelphia, Pittsburg].** The proportion of deaths under both 1 and 5 years is the lowest in any state, while the death-rates from respiratory and nervous diseases are rather high. Second to New York alone in wealth, manufactures, and population, P. owes its position to its extraordinary mineral wealth. The carboniferous rocks, covering large areas, yield the larger half of the coal and most of the petroleum of the Union. Coal is mined almost everywhere but the SE. Nearly three-fourths of the product is anthracite, this from the E. central districts; the W. and N. yield bituminous coal, centering in the SW. Iron ores are mined in nearly every part of the state, and P. ranked first in 1880, but the rapid development of the Michigan, Minnesota, and Alabama mines has since placed it third. P. manufactures half the iron and three-fifths of the steel of the U.S. The other chief products in order are flour, foundry and machine products, woollen goods, tanned leather, refined sugar and molasses, men's clothing, lumber, and cotton goods. P. ranks first in tanned leather, glass, bricks, tiles, and slate. **[W. S.]**

Pennville, vil., U.S., Indiana, Jay co., 12 m. W. Bryant. P.<1500.

Penn Yan, vil., U.S., New York, Yates co., at the NE. end of Lake Keuka, 45 m. SE. by S. Rochester, centrally situated in the lake regions of W. New York; has brisk trade. P.<5000.

Pennycross, par., Eng., Devonshire, Plympton St. Mary dist., 2 m. NW. Plymouth. P.<1000.

Pennyghael, PMT.O., Scot., Argyllshire, on the S. shore of Loch Scridain, in the SW. of Mull I., 18 m. S. Tobermory.

Pennymoor, P.O., Eng., Devonshire, 6 m. W. Tiverton.

Pennys, stn., Canada, prov. Brit. Columbia, on the C. P. R., about 121° 20′ W., 1263 m. by rail from Winnipeg, 219 m. from Vancouver.

Penobscot, riv., U.S., Maine, rises in the W. of the state, flows E. into Chesuncook Lake, SE. through Chesuncook and Twin Lakes, and finally S. into the Atlantic through **P. Bay,** which is 30 m. in length and breadth at its entrance, where are several islands, amongst which is **Penobscot I.** It contains many good harbours. Large vessels can ascend to Bangor (55 m.), and small steamers many miles higher. Higher up numerous falls afford a considerable amount of water-power; it is an important salmon stream. The E. Branch of the P. issues from several small lakes to the E. of Chamberlain Lake, and joins the main stream in 45° 36′ N.

Penobscot, co., U.S., Maine, crossed by 45° and 46° N., and 68° and 69° W., traversed by the Penobscot R.

Penobscot, tn., U.S., Maine, Hancock co., 25 m. S. by E. Bangor, on a branch of the estuary of the Penobscot R.; has excellent granite, widely used for building. P.<1500.

Penobscots, tribe of Algonquin Indians, U.S., Maine, residing chiefly on Indian I. The Passamaquoddies, an allied tribe, reside on the W. shore of Passamaquoddy Bay. P. of each tribe about 500.

Penobsquis, post-vil., Canada, New Brunswick, King's co., on the riv. Kennebecasis, 48 m. NE. St. John. P.<1500.

Penokee Iron Range, a range of mts., U.S., Wisconsin, in Ashland co., stretching E. and W., in about 46° 20′ N., between 90° and 91° W., with large deposits of red hematite.

Penola, tp., South Australia, Grey co., 205 m. SE. by S. Adelaide, on the railway to Mount Gambier. P.<1500.

Penompenh, Cambodia. See **Pnompenh.**

Peñon de Velez, or **Peñon de Velez de la Gomera,** the Arab *Mersa el Muemma,* military post and Spanish *presidio,* on the Mediterranean coast of Morocco, 78 m. ESE. Ceuta, on a rocky islet separated from the coast by a narrow and shallow channel. Held continuously by Spain since 1554.

Penrydd, par., Wales, Pembrokeshire, Newcastle in Emlyn dist. P.<250.

Penryn, parl. and (since James I.) mun. bor., seapt., and market-tn., Eng., Cornwall, almost adjoining Falmouth on NW., at the head of Falmouth Harbour, in the diocese of Truro, with stn. 2 m. NW. Falmouth on G. W. R.; trade in shipping granite and landing coal, timber, &c.; paper, leather, and gunpowder manufactured. There are five fairs. Market-day, S. Mun. bor. P. (1891)<3500; parl. bor. P. (**P. and Falmouth**) 17,500. See **St. Gluvias.**

Pensaco'la, city, U.S., Florida, Escambia co., on P. Bay, 177 m. W. Tallahassee. P. is one of the chief lumber-ports of the United States, pitch-pine forming more than five-sixths of the value of the exports (total annual value £600,000 to £1,000,000).

Climate usually healthy, but has occasional visitations of yellow fever. Founded by the French in 1696. Rfall. (5 yrs.), 68.56 in. P. (1880) 6800; (1890) 11,800.

Pensacola Bay, inlet, Gulf of Mexico, in 30° 20′ N., 87° 17′ W., divided into three basins, Escambia, Yellow-water, and Blackwater Bays, receiving the rivers of same names. The bay is sheltered by Santa Rosa I., and connected on the E. with Chactawhatchee Bay by Santa Rosa Sound, navigable for 50 m. On P. Bay, 7 m. below P. City, is the site of a U.S. navy yard, formerly very important, but partly destroyed during the Civil War, 1861–64. The entrance is defended by Forts Pickens, McRee, and Barrancas; near the last-named are the lighthouse, extensive barracks, and the naval hospital. About 1 m. wide at entrance, where the bar has 21 ft. at low water, 24 ft. at high water; it expands within into a capacious harbour, entirely landlocked, of about 200 sq. m. Length, 25 m.; breadth, 15 m.; and affording good anchorage for 10 m. Length of quayage 600 ft., with 21 ft. depth at high water, and 18 ft. at low water ordinary springs. Here are also two floating sectional docks, one 165 ft. long, the other 36 ft. 9 in. long each section, and a marine railway, 190 ft. long.

Pentedaktylon, mt., Greece. See **Greece,** Surface.

Pentelikon, Mount, Greece, Attica, 10 m. NE. Athens; contains quarries of white marble, greatly renowned in antiquity, which are still worked. At **Pikermi,** on the slope of this mountain, important mammalian remains have been discovered. Also called **Mendell.** Alt. 3640 ft.

Pentenisla, group of islets in the Gulf of Ægina, Greece, 10 m. NW. Ægina.

Penterry, par., Eng., Monmouthshire, S. div., 4 m. N. by W. Chepstow, 1½ m. W. Tintern stn. P. <250. See **St. Arvans.**

Pentewan, seapt. vil., Eng., Cornwall, 4 m. S. St. Austell; has stone quarries. The entrance to the harbour is 40 ft. The dock, which is available for vessels drawing 13 ft., but dry at low water, has 860 ft. of wharfage, and a width at entrance of 26 ft. Outside the dock there are 400 ft. of additional quayage. PMT.O.

Penthièvre, former prov. of France, Brittany, now forming the middle of dep. Côtes du Nord, cap. Guingamp.

Pentire Point, cape, Eng., on the NW. ct. of Cornwall, in 50° 35′ N.

Pentir with Glasinfryn, eccles. par., Wales, Carnarvonshire, Arfon div., 4 m. S. by W. Bangor, 2½ m. W. Bethesda stn., P.O. (**P.**). P. <750.

Pentland (formerly **Betts Creek**), gold-mining tp., Queensland, Davenport co., 65 m. WSW. Charters Towers, in about 20° 40′ S. P. <1500.

Pentland Firth, a sound, dividing the Scottish mainland from the Orkney Is., and connecting the Atlantic Ocean and the North Sea. Length, E. to W., 14 m.; breadth, from 6 to 8 m. Its navigation is the most dangerous of the Scottish seas; a current flows from W. to E. with a velocity of 6 to 10 m. an hour, which at the change of tides is met by opposing currents, causing dangerous eddies and whirlpools. The **Pentland Skerries** comprise two islets and some contiguous rocks; the larger, about 4½ m. N. Duncansbay Head, has a lighthouse, with a higher and a lower light, visible respectively 19 and 18 m. P. 14.

Pentland Hills, a range in Scot., extending for about 14 m. NE. from the E. borders of Lanarkshire, through the NW. corner of Peeblesshire, and the centre of Midlothian, to within 3 m. SW. Edinburgh. Highest summits, Scald Law (1898 ft.) and Carnethy (1890 ft.), two adjacent peaks, 8–9 m. SSW. Edinburgh. They are composed chiefly of porphyry and greenstone; the sides and valleys are under cultivation, and the remainder in pasture. From springs in these hills above Penicuik water of superior quality is brought into Edinburgh. On the SE. side, in 1666, Sir Thomas Dalzell defeated a force of Covenanters at Rullion Green.

Pentland Rows, vil., Scot., Midlothian, Lasswade par. P. <1000.

Penza, govt. of E. Russia, has Nizhniy Novgorod on N., Simbirsk on E., Saratov and Tambov on S. and W. Undulating plateau, 600–900 ft. of alt.; cut by deep ravines; soil fertile, black earth; sandy in broad river valleys; forests in N.; watered by Moksha (system of Oka), Sura (Volga), and Khoper (Don). Climate severe; average temp. at P. being, yr. 39.8°, Jan. 12°, July 68°; yearly rfall. (13 yrs.), 19.3 in. P. Great Russians, Mordves (about 150,000), much Russified, Meshcheryaks (about 40,000), and about 60,000 Tatars. Cereals grown and exported; hemp-seed grown for oil. Considerable variety of domestic industries, especially in woody dists. Active navigation on rivers. Factory industries rising (flour-mills, woollen factories, tanneries, glass, paper, and soap works). Divided into ten dists.: Penza, Chembar, Gorodishche, Insar, Kerensk, Krasnoslobodsk, Mokshan, Narovchat, Nizhniy Lomov, and Saransk. Area, 14,997 sq. m. P. (1881) 1,356,000; (1890) 1,596,500.

Penza, tn., Russia, cap. of above govt., 440 m. by rail SE. of Moscow, at confluence of Penza and navigable Sura; imperial botanical garden; paper and steam flour-mills; fairs, especially in cattle. Mean rfall. (13 yrs.), yr. 19.3 in., May–Dec. 14.4 in. P. (1891) 49,100.

Penzance', mun. bor. (since James I.), seapt., market-tn., and health resort, Eng., Cornwall, St. Ives div., 65 m. WSW. Launceston, and 9 m. from Land's End, in the diocese of Truro, at the head of Mounts Bay, the terminal stn. of the G. W. R. There is considerable trade in exporting tin and copper ore, china clay, and fish, P. being a centre of mackerel and pilchard fisheries. Imports timber, iron, hemp, and tallow. The Celtic name, meaning Holy Head, was due to a chapel on a headland. [Camden says, 'head of the sand,' to which Bishop Gibson adds, 'rather head of the saint.'] P. is noted for its scenery and interesting surroundings, such as St. Michael's Mount, Land's End, the Logan Stone, &c. The harbour has two piers, forming a basin of 22 ac., with lighthouse; quayage, 3300 ft.; dock, 245 ft. long and 40 ft. broad at entrance; wet dock, 450 ft. by 370 ft., with 1400 ft. quayage. There are four fairs. Market-days, Tu., Th., and S. Alt. 67 ft. Mean temp. (20 yrs., 1861–80), yr. 51.9° F., Jan. 43.9°, July 61.9°. Mean rfall. (1866–80), yr. 45.1 in. Mun. bor. P. (1801) 3400; (1851) 9200; (1871) 10,400; (1891) 12,400.

Penzberg, vil., Ger., kgd. Bavaria, govt. Upper Bavaria, circle Weilheim, 27 m. S. by W. Munich. P. <3000.

Penzhina, bay, Russia, N. extremity of Sea of Okhotsk, between Kamchatka and Taigonos Penin. Length, 170 m.; width, 13–53 m. Rekinskaya and Mamechinskaya Bays on its E. ct. Receives Penzhina R., 200 m. long.

Penzig, vil., Prussia, prov. Silesia, circle and 7 m. NNE. Görlitz. P. <5000.

Pequop, settlement, U.S., Nevada, Elko co., 60 m. SSW. of the NE. corner of the state.

Pera (Greek, 'on the far side, opposite side'), suburb of Constantinople, Turkey, on N. shore of the Golden Horn, the European quarter inhabited by the aristocracy of Constantinople, the English, German, French, Austrian, Russian, and Persian ambassadors.

Pera, Cabo de, cape, Spain, NE. extremity of Majorca I., in 39° 43′ N., 3° 27′ E.

Peradeniya, vil., Ceylon, Central Prov., 3 m. SW. by S. Kandy. Seat of the government botanic gardens.

Perak, a protected British state in the Malay Penin., lying S. of Siamese Kedah and prov. Wellesley, N. of Selangor, W. of Pahang and three Siamese trib. states, and has the Strait of Malacca on its W. P. is traversed by two chains of mountains (7000 ft. and higher); is well watered, chiefly by the riv. Perak; produces tin (at Kinta and Larut), rice, maize, fruits (durian, mangosteen, &c.), vegetables (sweet potatoes, yams, cassava, &c.). In addition to tin there exist also gold, lead, zinc, tungsten, copper, bismuth, kaolin, marble, granite, arsenic, mercury, manganese, and plumbago. The climate is healthy, though the mean of the day in the low regions is 87° F., that of the night 70°; at 3000 ft. alt. the day mean is 73°, the night mean 65°. Rfall. is unequal, about 90 in. taking the average. Annual trade, imports, £880,000; exports, chiefly tin, sugar, indigo, cocoanuts, tanning barks, ratans, &c., £1,180,000. Area, 8000 sq. m. P. 214,260, of whom 73 per cent. males; Malays and Chinese, in nearly equal numbers, amount together to 191,100. There are good metalled roads (700 m.), and half a dozen short railways. Port Weld, the principal seaport, is connected by a short railway with Taipeng, the chief mining centre and seat of government.

Perak ('silver,' so called from the plentiful supply of tin found in this region, and mistaken by the natives for silver), a riv., Malay Penin., rises in Patani dist. (Siamese terr.), flows S. through the British protectorate of P. to Durian Sabatang, then W. into the Strait of Malacca, which it enters just N. of 4° N. Navigable by steamers of 300–400 tons 40 m. up, by cargo-boats 160 m.

Peralta, tn., Spain, Navarre, prov. and 34 m. SSW. Pamplona, dist. Tafalla. P. (comm.) <4000.

Pergusa, the ancient *Enna,* lake, Sicily, prov. Caltanissetta, 3 m. SSE. Castrogiovanni, an old crater about 4 m. round.

Periakulam (Periyakulam, census), municip., Brit. India, dist. and 44 m. WNW. Madura. P. 16,400; Hindus, 14,000.

Periana, tn., Spain, Andalusia, prov. and 17 m. NE. Malaga, dist. Colmenar. P. (comm.) <5000.

Peribeby, vil., Paraguay. See **Piribeby.**

Peribonca, riv., Canada, Quebec, Chicoutimi co., flows SW. into Lake St. John, about 72° 6′ W. Near its mouth it receives from the N. the **Little Peribonca R.**

Perico, riv., Colombia, flows N. and joins the Atrato about 5° 37′ N., connected by a small cutting with the San Juan, so that at the time of the torrential rains of the winter season light pirogues can pass by this trench from the Atlantic to the Pacific without portage.

Perico, isl., Gulf of Panama, Republic of Colombia, 3 m. SSE. Panama.

Perico del Carmen, vil., Argentine Republic, prov. and 18 m. SSE. Jujuy. P. <2000.

Perie, vil., Cape Colony, dist. and 15 m. NW. King William's Town, in a well-timbered region.

Périers, tn., France, dep. Manche, 27 m. NNE. Granville, arr. and 10 m. N. by E. Coutances. P. <3000.

Périgord, former prov. of central France, forming part of the govt. of Guyenne, cap. Périgueux.

Périgueux, cap. dep. Dordogne, France, cap. arr. P., on the Isle, 42 m. SE. Angoulême; the city consists of two distinct quarters, the poorer 'city' proper beside the river and on the slopes of the plateau, and the commercial and administrative centre, Puy St. Front, on the plateau, united together in 1240. In the former are the remains of a Roman amphitheatre, of the old city walls, and of an ancient temple (Vesunna's tower), as well as the church of St. Stephen, which served as the cathedral down to the 16th century. In the upper town are the existing cathedral of St. Front, built 984–1047, in the style of St. Mark's at Venice, and several curious old houses. The archæological museum is especially rich in inscribed stones. The industries embrace iron-foundries, railway workshops, agricultural implement works, manufactures of furniture, hats, liqueurs, and widely-known pâtés-de-foie gras and pâtés of partridges and truffles. P. is the ancient *Vesunna* of Cæsar's time. Birthplace of General Daumesnil. Mean temp., yr. 53.5° F., Jan. 40.3°, July 68.0°. P. (1872) 21,300; (1891) 28,000.

Peril Strait, between Chichagoff and Baranoff Is., Alaska; strong tidal currents at two narrows.

Perim, *Baiônes* of the *Periplus,* isl., India, in the Gulf of Cambay, in 21° 36′ N., 72° 24′ E., with lighthouse; surrounded by a reef on all sides except the S. Length, 1800 yds.; breadth, 300–500 yds.

Perim, isl., in Straits of Bab-el-Mandeb, 10–11 m. from the African coast, and not more than 1½ m. from the Arabian, under the govt. of and 95 m. from Aden, with lighthouse, visible 22 m.; fortified, and having a small garrison. Temporarily occupied by the British in 1799 and 1801, and permanently taken possession of by them in 1857. Area about 7 sq. m. Alt. (highest point) 245 ft.; length, 3½ m.; average width, 1¼ m. There is good anchorage in coral and sand, in 25–30 ft. of water. Vessels load and discharge by means of lighters and dhows. There is a rise and fall of 7 ft. at springs, and 3 ft. at neaps.

Perindurai, group of hamlets, Brit. India, Madras, dist. and 46 m. ENE. Coimbatore. P. <5000.

Periokh Tau, mts., Bukhara. See **Peter the Great.**

Peristeri, tn., Turkey in Europe. See **Shar-köl.**

Perithia, vil., Greece, in the N. of Corfu I.

Perlepe (Turkish, Slavonic **Prilep**), tn., Turkey in Europe, prov. and 24 m. NNE. Monastir. Alt. 1985 ft. P. estimated at 15,000, of whom perhaps 11,000 Servians, the rest Moham. (Turks and Albanians), Greeks, and Zinzars (Wallachians).

Perlethorpe, par., Eng., Nottinghamshire, Bassetlaw div., 6½ m. SE. by S. Worksop. P. <250.

Perm, govt., E. Russia, on both slopes of the middle Urals, which traverse it from N. to S. as a low and wide range of hills, clothed with forests, sloping gently westwards, and abruptly toward the E.; their maximum alt. is 3600 ft. in N., 5135 ft. (Konzhakovskiy Kameñ) and 5027 ft. (Denezhkin Kameñ) in middle; they are crossed in S. by the Siberian highroad and railway at an alt. of 1400 ft. A plateau, about 500 ft. high, spreads on the W. of the Urals, low lands on the E. joining those of the middle Ob. The govt. of Perm is the chief mining region of Russia, and contains numerous silver, platinum, copper, nickel, lead, and iron mines; gold extracted, both from rocks and alluvial deposits; rare metals, such as iridium, osmium, &c. A great variety of precious and semi-precious stones (sapphires, jacinths, beryls, topazes, jade, malachite, &c.) are collected and cut, chiefly at Ekaterinburg and the neighbouring villages. Well watered by Pechora, Kama (trib. of Volga), and Tobol (trib. of Ob), and their numerous affluents, of which Chusovaya, Sylva, and Kolva are channels for shipping of metals to Russia; Tura, on which stands Tyumeñ, the head of navigation in Siberia, and many others. Numerous small lakes and marshes, and over 40,000,000 acres of forests. Climate severe, the average temp. being from 29.3° to 34° while those of Jan. are 2°-4.5°, and July 62°-65°. Pop. Great Russians, Bashkirs (about 100,000), Permyaks (65,000), Tatars (25,000), Cheremisses, and Voguls. Agriculture, especially in S., is carried on extensively; cattle-breeding, especially with Bashkirs. Considerable shipbuilding; manufacture of all sorts of wooden goods, and preparation of pitch and tar as village industries, as also various petty trades; carpets about Tyumeñ, boots at Kungur, &c. The transport trade is a considerable branch of income. Mining occupies over 100,000 persons; and over 2,688,000 oz. of gold, 650 tons of copper, 250,000 tons of pig iron (150,000 of iron and steel), and nearly 200,000 tons of salt are obtained. Manufactures on increase, flour-mills, distilleries, tanneries, machinery works, producing an average value of £2,260,000 in 1886-91; very active trade; important fairs (Irbit). Divided into twelve dists.: Perm, Cherdyñ, Kungur, Krasnoufimsk, Okhansk, Osa, and Solikamsk in Europe; Ekaterinburg, Irbit, Kamyshlov, Shadrinsk, and Verkhoturiye in Asia (on E. slope of Urals). Several iron-works are more important than dist. towns: Nizhne-Tagilsk, Neviyansk, Kyshtym, Kushva, Revdinsk, Turinsk, Nazepetrovsk, Verkh Isset, Bogoslovsk, and Usoliye (salt-works). Crossed by N. Siberian Rly. from Perm and Berezniki (near Solikamsk), both on Kama, to Chusovaya stn., and *viâ* Kushva and Nizhne-Tagilsk to Ekaterinburg and Tyumeñ, a branch being projected from Ekaterinburg to Chelyabinsk on the S. Siberian railway Samara to Omsk. Alt. 328 ft. Area, 128,211 sq. m. P. (1881) 2,520,100; (1893) 2,941,300.

Perm, tn., Russia, cap. of above govt., on l. bk. Kama, starting-point of N. Siberian Rly., 901 m. E. of Moscow; in regular steamer communication with Nizhniy Novgorod. Chief prison depôt for transport of convicts and exiles to Siberia. Mechanical works, flour-mills, rope, candle, soap, and china works. Depôt for goods sent to, and imported from, Siberia; brisk trade; important river-port. Mean temp., yr. 33.9° F., Jan. 2.3°, July 65.3°. P. (1891) 38,261.

Permians, or **Permyaks,** Finnish stem, NE. Russia, now inhabiting the govts. Perm and Vytka. Their terr. was in Viking times known as *Biarmia* or *Bjarmeland*, and occupied a wide area on the Kama, to E. and NE. of (the Volgan) Bulgaria. Christianised by the Novgorodians in 12th century; conquered by Moscow in 15th century. Nearly 75,000 Permians have still maintained their national characteristics.

Pernakan, name given to the descendants of the Chinese immigrants in some islands of the Malay Archipelago, notably in Java and Sumatra.

Pernambuco (from Indian *parana mbuc*, 'arm of the sea'), or **Recife,** tn. and seapt., Brazil, cap. state P., on the coast of the Atlantic, in 8° 5′ S., consists of the Recife, on a sandy island lying parallel to the coast, the commercial quarter with narrow streets; São Antonio, on another reef between Recife and the mainland, the real centre of the town, with the government palace, the arsenal, parliament house, observatory, &c.; and Bôa Vista, a newer residential quarter. P. is the outlet for a country rich in sugar and cotton, though coffee, tobacco, hides, dye-woods, &c., are also exported — total annual value, 1½–6 millions sterling. The imports, chiefly textiles, provisions, and minerals, average 1–2 millions sterling. The harbour, with an area of 1½ sq. m., affords good anchorage, but vessels have to cross the bar, which has a depth of 33 ft. at high water ordinary springs, and 24 ft. low water, as well as a sandbank, with 22 ft. at high water ordinary springs, and 14 ft. at low water. P., originally a Spanish creation, was successively in English (1595), Dutch (1630), and Portuguese (1654) hands, and was greatly enlarged by Count Maurice of Holland. P. (estimate) 130,000. Mean temp. (8 yrs., 1876-84), yr. 79.2° F., Feb. 82.4°, July 74.3°; (2½ yrs.), yr. 78.2° F., Jan. 80.5°, July 75.0°; rfall. (8 yrs.), 117.00 in.

Pernambuco, one of the littoral E. states of Brazil (coastline 150 m.), naturally formed by the lower part of the basin of the Rio São Francisco (with the exception of Alagoas) in its W. to E. course. The W. regions are almost desert. Port of Recife ('reef') at the mouth of rivs. Capibaribe and Beberibe. The isl. of Fernando de Noronha (341 m. off NE.) belongs to this state. See **Brazil,** table.

Pernau, Russian **Pernov,** dist tn., Russia, govt. Livonia, on l. bk. Pernau R., near its entrance into Gulf of Riga, 155 m. N. by E. of Riga, 58° 23′ N., 24° 30′ E. Founded in 1255, fortified and flourishing till 16th century; annexed by Russia in 1710. Well built; floating bridge over Pernau R. There is an average depth of 12 ft. on the bar, and good anchorage in the roads in 18-20 ft. depth. Exports, chiefly of flax and linseed; imports, fish and coal. Mean temp., yr. 41.1° F., Feb. 21.8°, July 64.0°. P. 13,600.

Pernegg, vil., Austria, Styria, on the Mur, 12 m. E. Leoben. P. <2000.

Pernes, vil., France, dep. Pas-de-Calais, arr. Boulogne, 20 m. SSE. St. Omer. P. <2000.

Persante, riv., Prussia, Pomerania, flows NW. into the Baltic at Kolberg; not navigable, but used for floating timber from Valm. It receives on the right the Radüe, used for floating timber from Zeblin, 93 m. above Kolberg, and from the left the Damitz, which is also used for a short distance for floating timber.

Persberg, iron-mines, Sweden, prov. Vermland, 31 m. N. Christinehamn.

Persenbeug, vil., Lower Austria, on the l. bk. of the Danube, opposite Ybbs, 38 m. E. by S. Linz.

Persepolis (called by the modern Persians **Takhti Jamshid**), the ancient cap. of the Achæmenian sovereigns of Persia, now a collection of ruins situated on a lofty terrace overlooking the little riv. Polvar, 30 m. NE. Shiraz. It was burned by Alexander the Great in 330 B.C. On the opposite side of the river, 8 m. further to the NE., are the rock-hewn tombs of Darius the Great and others of his dynasty, the spot being known as **Naksh-i-Rustam.** Those parts of the city which survived the destruction of Alexander were known subsequently as **Istakhr;** the chief ruin exists at Haji Abad, on the riv. Polvar, a few miles above P.

Pershore, market-tn., Eng., Worcestershire, beautifully situated on the r. bk. of the Avon, div. and 6 m. W. by N. Evesham, 1½ m. S. of its stn. on the G. W. R. Chief industry, manufacture of stockings; has engineering and machine works, fairs for cattle, horses, &c., a market for fat stock, and a fine abbey church, lately restored, belonging to monastery founded 689. Market-day, Tu. In two pars., P. Holy Cross, 4594 ac., P. <3000, and P. St. Andrew, P <1000; eccles. par. (**P. with Pinvin, Wick, and Bricklehampton**) P. <4500.

Persia, kgd. of W. Asia, bounded W. by Turkish Armenia, Kurdistan, and Mesopotamia, SW. by the Persian Gulf, S. by the Arabian Sea (Gulf of Oman), E. by Baluchistan and Afghanistan, and N. by the (Russian) Transcaspian Region, the Caspian Sea, and (Russian) Transcaucasia. A portion of the E. frontier, about 27° 30′ to 29° 45′ N., is still undefined; and on the W. the boundary is not precisely fixed in more than one district. The longest line that can be drawn across the country measures 1450 m., and stretches NW. to SE.; the shortest, running almost due S. from the Caspian, measures 450 m. **Orography.**—Broadly speaking, P. is an arid, treeless plateau, 6000–8500 ft. in average alt., with an undulating surface, which slopes gradually from the W. to the E. In many parts the valleys between the mountain chains are almost choked with detritus, which has crumbled and rolled downwards into them. N. and S. the plateau is edged with steep, bold escarpments, along the foot of which stretch narrow maritime plains. Near its N., W., and SW. margin the plateau rises into lofty mountain ranges, 10,000–13,000 ft. in alt. As a rule, their axes lie NW. to SE., trending due E. along the S. escarpment; and the ranges radiate from the Armenian and Kurdistan Highlands in the W. In the prov. of Azerbaijan, W. of the Caspian, the principal ranges are the Kara-Dagh, lying E. and W. on the S. side of the Aras R., and the Talish Mts., which run up the W. side of the Caspian. Here several peaks tower above the prevailing plateaux and short ranges which lie between these two chains and the Armenian Highlands in the W., viz., Ararat (17,000 ft.), the extinct volcano Savalan (15,800), Sahend (11,800 ft.), Kosha-Dagh (10,300 ft.), and Kamki (10,000 ft.). This highland region is continued E. along the N. edge of the great plateau by the sharply defined chains (14,000 ft.) of the Elburz system, which reaches its culminating point in the volcanic, snow-clad Demavend (19,400 ft.). Striking off from the SE. corner of the Caspian, the Kopet-Dagh separates P. from the Transcaspian Region. Further S., and parallel to it, lie the Ala-Dagh and Binalud-Kuh, which may be considered as continuations of the Elburz Mts. Behind them again (S.) lie the Jagatai Mts. and several minor chains. The average elevation of all these ranges is 9000–11,000 ft., and nearly all are rugged, sterile, and stony, with deep valleys between, connected by transverse gorges, through which the rivers have forced their way. They are prolonged still farther to the E., beyond the confines of P., by the Paropamisus Range and the Hindu Kush. In SE. Khorassan, in the dist. of Birjand, a series of SE. to NW. chains rise up steeply from the desert and attain an alt. of 7000 to 11,000 ft. in their highest parts (middle). From the Kurdistan Highlands, sometimes called the Zagros Mts., and lying S. of the Armenian Highlands, numerous inter-connected and mostly parallel ranges strike off in a SE. direction. Of these the best defined are perhaps the Zardeh-Kuh, Kuh-i-Gerra, Sebz-Kuh, and Kuh-i-Dinar, ranging from 10,000 to 13,000 ft., and inclosing valleys 7000–8000 ft., and crossed by passes but little inferior in altitude. The S. escarpment of the plateau, fronting the Gulf of Oman, has a more W. to E. direction and a lower elevation; and behind it lie several parallel chains parted by shallow valleys. The prevailing **geological formations** in the mountains of the S., W., and NW. are Cretaceous and Tertiary (nummulitic) limestones, the latter lying next the Euphrates-Tigris valley; but metamorphic and crystalline, as well as volcanic rocks, also occur, though generally in subordinate positions. The Elburz system and its E. continuations are built up of the same geological systems, but differently arranged. The main mass is believed to consist of metamorphic and crystalline rocks, overlaid by Devonian and Carboniferous strata, while in this quarter the Cretaceous and Tertiary take subordinate rank. **Minerals.**—The right to extract minerals, in which P. is reputedly rich, has been granted to an English company for a term of years. The only mines worked, however, are turquoise at Madan, NW. of Nishapur in Khorassan, coal on the Elburz slopes, near Teheran, alum on the Elburz, lead in prov. Ispahan, marble in Azerbaijan, and naphtha in Kishm I. But the following have been ascertained to exist—iron, lead, copper, and coal in Azerbaijan, the Elburz Mts., Khorassan, and provs. Ispahan and Kerman; salt in all the desert regions; manganese and asbestos in provs. Kerman and Ispahan; mercury and saltpetre in this last and in Azerbaijan; besides gold, antimony, nickel, cobalt, sulphur, borax, zinc, and bitumen. The **rivers,** with the single exception of the Karun (properly Kuran), are short, and unsuitable for navigation. Nearly all those on the plateau lose themselves eventually in salt marshes, or rapidly desiccating saline lakes. The **climate**

of P. varies very greatly in its different regions. The exceptional features of the Persian Gulf provs. and of the Caspian provs. will be dwelt upon lower down. The climate over the greater part of the plateau is characterised by great severity of cold in winter and excessive heat in summer, especially in the desert parts. But owing to the remarkable dryness and purity of the atmosphere, the heat in summer is not felt so much as might be expected; and for the same reason this region is fairly healthy. The spring and autumn are both delightful seasons, and places like Ispahan and Shiraz enjoy a high reputation on this account. Meteorological observations are sadly lacking. There is, however, a great range of daily temperature during the hot months (May–Oct.), even at places on the Bushire-Teheran route, viz., 56°–87° F. in June, 29°–49° in Oct., and 52°–72° (in Sistan) in Dec. The prevailing winds blow from the NW. and the SE., their directions being partly determined by the trend of the mountain ranges, and partly by the relative positions of the Black Sea and the Indian Ocean. The rainfall over the plateau is exceedingly low; St. John considers the average to fall between 5 in. and 10 in. At Teheran (conjoined with Sergende, 8 m. N. of Teheran) the average precipitation for four years was 11.5 in. The rain falls principally in winter, with smaller quantities during spring and autumn, but none at all during the summer. In the mountains of the W. the winter precipitation generally takes the form of snow, and lies stored up in that form until the heat of summer melts it and it runs down to the valleys, where it is used for irrigation during the hot season, thus preserving a large proportion of P. from barrenness. Irrigation is extensively practised, chiefly by means of underground channels (*kanats* or *karizes*), in all parts of P. which are inhabited, especially in provs. Ispahan, Irak-Ajemi, Khorassan, and Kerman; but it might be employed much more extensively. As it is, local famines are not unknown; three have been recorded since the middle of the 19th century, viz., in 1860–61, 1869–72, and 1879–80. Amongst the **natural products** of P. the first place must be given to wool—sheep's wool, lambskins, and goat's wool, produced in Kurdistan, Arabistan, Luristan, Ardelan, Khorassan, and Kerman. The towns of Tabriz, Kermanshah, and Kerman are the principal emporia for the trade in this commodity, and Kerman and Meshed for the trade in shawls. Wheat is grown up to alt. of 9000 ft., the best in NW. Persia and in Khorassan. Rice grows up to 4000 ft., the largest crop in the Caspian provs. Cotton, cultivated up to 6500 ft., is yielded most largely in N. Persia, Ispahan, Yezd, and Kerman. Fruits are plentiful everywhere—apricots, peaches, olives, pears, plums, pistachio nuts, oranges, lemons, quinces, almonds, pomegranates, and figs and dates in the S. Grapes (for raisins) ripen up to 7500 ft. Wine is made at Shiraz, Ispahan, Kazvin, Kuchan, and Hamadan. Sugar is grown in Mazanderan and Khuzistan; opium in Kermanshah, Burujird, Ispahan, Azerbaijan, Arabistan, Yezd, Kerman, and Shiraz; tobacco in the central provs. and in Gilan; and silk in Khorassan and the Caspian provs. Barley and drugs and dyes are other important products of the soil.

In a country so vast as P., the area of which, estimated at about 628,000 sq. m., is more than seven times that of the United Kingdom, there is of course considerable diversity of surface, climate, and productions. The **shore of the Persian Gulf,** W. from Jask (57° 40′ E.), just outside the Strait of Ormuz, to the Shat-el-Arab, the conjoint estuary of the Tigris and the Euphrates, is low, sandy, and mostly barren, forming a narrow strip 15 to 30 m. wide between the water and the edge (3000–8500 ft. high) of the plateau. It is subject to such intense (moist) heat in summer, that the inhabitants frequently spend the greater part of the day in apartments built underground, and ventilated by lofty perforated towers. This region is unhealthy, principally through fevers, malaria, and cholera. The annual mean of rainfall at Bushire (12 yrs.) is 12.96 in.; but the quantity varies greatly from year to year (4.86 in. in 1878, 23.65 in. in 1885). In spite of these drawbacks P. has here her principal seaports—Bunder-Abbas, Lingah, and Bushire, besides others of minor rank. Off the coast lie the islands of Ormuz, Kishm, Larak, Henjam, Farur, Keis, Hinderabi, Sheikh Shuaib, Bushire, Kharak, and Khargu. The first four are in the Strait of Ormuz. Adjacent to the N. end of the Persian Gulf are the well-watered plains of the lower basin of the Karun R., comprised within the governorship of **Arabistan,** or **Khuzistan.** The soil of this prov., which is of great fertility, produces all the staple products of the country, and large quantities of dates. Mules and horses are numerously bred; and sheep, goats, and asses are kept, wool being one of the most valuable products of the dist. Here, near the confluence of the Karun with the Shat-el-Arab, and 40 m. above the mouth of the latter, is the new port of Mohammera. Besides the Karun (*q.v.*), there are two other considerable streams in Arabistan, the Ab-i-Diz, which, after passing Dizful, runs into the Karun, in about 31° 40′ N., and the Kerkha, which flows SE. and S. through the mountains, and, unless it reaches the Tigris, loses itself to the W. of Ahwaz. Petroleum is present near Shushter (P. 8000), the cap. of the prov., and near Ram Hormuz. The fauna includes the lion, wild boar, lynx, jackal, wild goat, antelope, deer, ibex, francolin partridge, pigeon, and waterfowl. P. of prov. 170,000 to 200,000, mostly of Arabian, or mixed Arabian and Persian blood, and in great part nomad. Fifteen miles SW. of Dizful lie the ruins of Shushan, the cap. of the ancient kingdom of Elam, and inseparably associated with the prophet Daniel and Esther the Jewess. Other ruined sites of ancient cities exist in the same locality, and in the upper Karun valley, E. of Shushter. The mountainous dists. which surround Arabistan from the NW. to the SE. are the headquarters of the semi-independent nomad tribes of the Lurs, people ethnographically allied to the Kurds, their immediate neighbours on the N. The tribes of the Feilis lie next to the Turkish frontier; E. of them are the Bakhtiaris, and S. of them the Kuhgelu and Mamasennis. These last belong, however, to the prov. of Fars; the rest are counted as belonging to the prov. of **Luristan.** These nomads (Ilyats) are a hardy race, fine riders and keen sportsmen. Their women go unveiled, and weave carpets. P. of Luristan estimated at 421,000. It is in this alternating mountain and valley region that the numerous streams originate which flow into the Persian Gulf; hence the rich pastures, on which the people feed their sheep, goats, horses, mules, and cattle. And the same cause explains the presence of the exceptional forests (principally of oak, mingled with ash, walnut, plane, elm, poplar, willow, ilex, wild rose, briar, hawthorn, maple, fig, vine, and hops), in which the people gather gall-nuts and prepare charcoal. Wild liquorice and almonds grow plentifully. The animals of the chase embrace the bear, ibex, deer, gazelle, and francolin partridge. The Persian governor of Luristan resides at Khorremabad. The powerful, semi-independent chief of the Feilis usually pitches his tent on the W. slopes of the Pusht-i-Kuh, close to, and sometimes across, the Turkish frontier. Bakhtiari Land is a region of rugged mountains, precipitous gorges, and many rivers; within its confines, below (NE.) the Kuh-i-Gerra and elsewhere, are some remarkable natural hill-forts. N. of Luristan stretch the Kurdish provs. of **Kermanshah** and **Ardelan,** which, in their physical aspects, resemble Luristan, except that they are not so well wooded. The Diala, a trib. of the Tigris, forms the frontier line for a short distance, between about 34° 35′ and 35° 10′ E. Kermanshah is famous for its wheat and barley, and both provs. for their wool. Carpets are woven throughout the dist. P. 230,000 in Kermanshah, 120,000 in Ardelan, all Kurdish nomads. In addition there is a considerable settled population, gathered principally in the towns of Kermanshahan, cap. of Kermanshah, and Sinna, cap. of Ardelan. Rock monuments and inscriptions of the ancient Achæmenian and Sasanian kings of Persia exist at Takht-i-Bostan, 4 m. NE. Kermanshahan, and at Behistun (Bisitun), 20 m. E. of the same town. The orographical features of the prov. of **Azerbaijan,** a square compact terr. of some 40,000 sq. m., lying between the riv. Aras (*Araxes*) in the N., and the Sefid Rud (Kizil Uzun) in the S., both contributory to the Caspian, have been already indicated. Besides these two rivers, there are the Kara-Su, a large r. bk. trib. of the Aras, and the Aji Chai, which flows W. into Lake Urumia, the largest lake in Persia (84 m. by 20–30 m.; alt. 4100 ft.). Owing to its elevation, the winters of this prov. are very rigorous, and the summers extremely hot. Rainfall (at Urumia tn., 4600 ft. alt.), 1 yr., 21.51 in. The upper slopes of the valleys afford good pasturage; the lower slopes are studded with villages embosomed amid orchards and gardens. Wheat and barley, dried fruits, carpets, opium, and tobacco are the principal products. P. about 2,000,0000, mostly Turkish, except 250,000 to 450,000 Kurds. This prov. contributes about 40,000 of the best troops to the Persian army. Tabriz (200,000), the cap., is the most important commercial town in Persia, its annual trade reaching the aggregate of 1 to 1½ million sterling. The other larger towns are Ardebil (10,000 to 20,000), Khoi (20,000), Mianeh, Maragha (15,000), Miandoab (Marhametabad), Suj Bulak (15,000), and Urumia (30,000), the last two Kurdish. The Caspian shores (about 400 m. Persian), divided between the provs. of **Gilan** (SW.), **Mazanderan** (S.), and **Astrabad** (SE.), are low and marshy, with a warm, moist climate. Rainfall probably 40 to 50 in. annually, fully five times the quantity which falls S. of the Elburz Mts. Lagoons and sandbanks stretch along the shores, which are intersected by several small streams, the largest being the lower Sefid Rud in Gilan, and the Gurgan and Atrek in Astrabad. The greater part of this low maritime plain, 20 to 60 m. wide, is densely wooded, the forests climbing far up the slopes of the Elburz Mts. The trees embrace nearly all the common European varieties, except Coniferæ, including the fig, laurel, rose, honeysuckle, &c. In addition to the animals already mentioned in the W. provs. of P., these forests harbour the tiger, leopard, wild boar, hyæna, wild ass, fox, and numerous water birds, and the waters teem with fish (sturgeon, salmon, mullet, trout, carp), and reptiles, while insects and mosquitoes swarm everywhere. Malaria is endemic, the climate being fatal to all except the indigenous population, some 150,000 to 250,000, who are believed to be the

descendants of the ancient Medes. Their villages are generally hidden in the depths of the forests. They cultivate rice, sugar, cotton, fruits (mulberry, orange, lemon, citron, pomegranate, peach, apricot, melon, quince, olive), wheat and barley, attar of roses, and in Gilan, silk. Chief towns—Resht (25,000), cap. of Gilan, and Enzeli, its port; Amol (8000), cap. of Mazanderan, Barfurush (40,000), Sari (8000), and the ports of Meshed-i-Ser and Mahmudabad; Astrabad (8000), and its port Gez (Bunder-Gez). The whole of the NE. of Persia is included in the large and important prov. of **Khorassan** (200,000 sq. m.). Its orographical features have been already described. Of the fertile valleys amongst the mountains in the N., the most important are Bujnurd and Kuchan, the latter inhabited by 100,000 Kurds, transplanted hither by Nadir Shah (18th century). The E. frontier is in part formed by the Tejend or Heri-Rud, which receives from the W. the Keshef-Rud and other streams. This prov. is rich in minerals, and produces wheat and barley, cotton, opium, fruits, tobacco, and rice. Wool is an important article of export. Wine is made in Kuchan. Carpets are manufactured at Meshed (45,000), the cap., and at Birjand (14,000), Kain, and Turshiz. Meshed is also famous for its shawls. Other notable towns are Nishapur, Kuchan (12,000), Sebzewar (18,000), Bujnurd, Sarakhs, Turbat-i-Haideri, Sultanabad, Tun, and Tabbas. Meshed, containing the tombs of the Imam Riza and of the caliph Harun-ar-Rashid, is the holy city of P., as well as an important trade centre with Russian Transcaspian Terr., Bukhara, and Afghanistan. Close to Nishapur is the tomb of the poet Omar Khayyam. P. about half a million, embracing Tajiks (Iranians), Kurds, Baluchis, Mongols, Tatars, Arabs, and Armenians. In the extreme SE. of Khorassan lies its dependency, the dist. of **Sistan,** with an area of 95,000 sq. m., and a population of 50,000, of whom 6000 are pastoral nomads of Baluchi race. Cap. Sekuha; principal town, Nasratabad. This dist. is watered by the Helmund, which at certain seasons overflows wide areas of the country. Between Sistan and the Arabian Sea (Gulf of Oman) are the dists. of **Persian Baluchistan,** comprising an area of 60,000 sq. m., and a population of a quarter of a million, mostly Baluchis. The coastal belt, 60 to 70 m. wide, known as Mekran, consists of barren, parallel sand-ridges, inclosing shallow, but often productive, valleys, in which wheat, barley, and dates are grown. The plateau behind it, 3000 to 6000 ft., grows little, except the tamarisk, camel-thorn, and asafœtida plant. In Sarhad, the N. dist. next Sistan, is the active volcano Kuh-i-Tuftan or Kuh-i-Naushada (12,680 ft.). Cap. of prov., Kasrkund; other towns, Jask, Chahbar, and Gwetter on the coast, and Bampur, Dizak, and Washt inland.

On the SW. and S. Khorassan is almost entirely shut off from the rest of Persia by two vast and terrible deserts—Dasht-i-Kavir (the Great Salt Desert) and the Dasht-i-Lut (the Great Sand Desert), which stretch NW. to SE. for more than 650 m.—from 52° to 61° E. The general elevation of this region, which is probably the bed of an ancient sea, now desiccated, does not exceed 2000 ft., the Dasht-i-Lut, in the SE., being relatively the lower. Between these deserts and the mountain provs. of the W. are the plateau provs. of **Teheran** (with dependencies)—**Irak-Ajemi, Ispahan, Fars,** and **Laristan,** and to the E. of the last three, and SW. of the Dasht-i-Lut, lie **Yezd** and **Kerman.** Throughout this extensive region the surface is hilly and rolling (6000 to 8500 ft.), and in parts mountainous, especially to the NW., W., and SE. In Kerman the limestone mountains are stated to reach an alt. of 15,000 ft. Wherever water exists, or can be procured by irrigation, the soil is fertile. The prov. of Yezd is, however, a flat, sandy expanse, diversified by bare black ridges and scanty scrub; and the greater part of Laristan and parts of Ispahan partake of much the same character. Salt swamps occur in the extensive Lake Niriz or Bakhtegan, and Lake Maharlu in Fars, in Gav Khane between Ispahan and Yezd, and in other places. Besides the Zainde-Rud at Ispahan, the more important rivers are the Kur, flowing into Lake Niriz, and the Kara-Su, into a lately-formed lake, Hauz-i-Sultan, between Teheran and Kum. Apart from the orchards, of which the Persians are very proud, and the tamarisk and camel-thorn scrub, these plateau provs. are almost destitute of trees. The principal products are wheat and barley, opium, cotton, fruits, tobacco, wool, attar of roses (Fars), and madder (Yezd), with liquorice, asafœtida, gums, and manna. The wealth in live-stock, grazed chiefly in the valleys of the western mountains, embraces sheep, cattle, goats, camels, donkeys and mules—these last particularly in Irak-Ajemi and Fars. Chief town Teheran, the cap. of P. E. of it, on the route to Meshed, lie Semnan, Damghan, Shahrud, and Bostam, each the cap. of a dependent dist. NW. of Teheran, on the road to Tabriz, are Kazvin, Sultanieh, and Zinjan. S. of Teheran are Kum (alt. 3100 ft.), Kashan, and Ispahan (alt. 5300 ft.), the second city of P. in commercial importance, and the former political cap. of the country. W. of Kum and Kashan lie Hamadan (P. 20,000–40,000; alt. 6280 ft.), reputed the ancient city of *Ecbatana;* Nihavend; Burujird, an important strategical point; Sultanabad, centre of the carpet industry; Gulpaigan; Khonsar, famous for its manna. W. of Ispahan is Nejefabad. The cap. of the prov. of Fars (ancient *Persis*) is Shiraz (P. 20,000; alt. 4750 ft.), NE. of which are the ruins of the ancient caps. *Pasargadæ, Persepolis,* and *Istakhr;* the tombs of the Achæmenian sovereigns of P. at Naksh-i-Rustam; and at Shapur, about 60 m. W. of Shiraz, ancient ruins and rock-inscriptions. Lar is the cap. of prov. Laristan. In Yezd the chief towns are Yezd, Nain, and Taft; in Kerman, Kerman, the cap., noted for its shawls, Shahr-i-Babek, Bahramabad, and Bam. Nearly every one of the provincial caps. mentioned in this div. are seats of **manufactures**—carpets, felts, shawls, opium, cottons, silks, dyes, copper and brass wares, leather, printed calico, and glazed tiles being the most noticeable products, almost entirely made by hand; carpets are woven by the W. nomads and in the E. provs., as well as in the towns of the centre; enamelling on metal and mosaic work in bone, ivory, &c., are carried on at Shiraz. **Communications.**—As the Persians have next to no rivers, so they have next to no carriage roads; the only roads of this class in use run from Julfa (Russo-Persian frontier) to Tabriz (80 m.), from Resht *viâ* Teheran to Kum (about 200 m.), and from Kuchan to Ashkabad (140 m.), on the Transcaspian Rly. Others are in process of construction to connect Teheran with Shushter *viâ* Kum, Sultanabad, and Burujird (total 500 m.). Indeed the principal routes are little better than tracks worn by the passage of pack-animals (mules, camels, asses, horses) during the long course of the centuries, and by the horses, &c., of the government officials and pilgrims travelling to the great Mohammedan shrines in P. (Meshed and Kum), in Turkey (Kerbela), and in Arabia (Mecca and Medina). The general decay of the country, the result principally of misgovernment, is evidenced by the half ruinous condition of many of the chief towns, and by the greater number of semi-deserted villages along the principal routes and in some of the more accessible dists. The most important avenues of entrance into P. are (1) the Persian Gulf ports in the S., (2) a route *viâ* Bagdad in the W., (3) a route to the Black Sea at Trebizond, (4) ports on the Caspian, and (5) routes converging upon Meshed in the NE. The principal routes from the S. start at Bushire and Bender-Abbas. The former is chiefly used for Teheran, which is reached *viâ* Shiraz, Ispahan, and Kashan, a distance of 770 m. Four steep passes, one of which climbs 3000 ft. in 4 or 5 m. and another 1200 ft. in 1 m., whilst the remaining two rise 1000 and 1400 ft. above the coast plain, lead up from the port to Shiraz. Up on the plateau the route crosses passes approximating 9000 ft. above the sea-level, but of course relatively low. Bender-Abbas is the port mostly used for Kerman (380 m.) and Yezd (580 m.); but also for Ispahan (780 m.) and for Meshed (950 m.). Caravans by this route are sometimes exposed to attack by the Baluchi and other nomads. An endeavour is now being made to utilise the Karun (*q.v.*) R., which is navigable. From Shushter a land route passes *viâ* Burujird, Sultanabad, and Kum to Teheran (500 m.); but not only does it climb to altitudes touching 7000 ft. with steep descents and ascents, it is also at times rendered unsafe by the marauding Ilyats, and is, moreover, blocked with snow for three or four months in the winter. Another cross-route connects Shushter and Ispahan over easy but lofty passes (up to 11,700 ft.). The route which is principally used in the W. starts from Bagdad, which is only 90 m. from Khanikin on the Persian frontier, and runs *viâ* Kermanshahan and Hamadan to Teheran (410 m. from the frontier). The busiest route in the NW., perhaps the busiest in all P., that travelled over by the Venetian traders in the 12th century, and in constant use ever since, begins at Trebizond on the Black Sea, and goes *viâ* Erzerum, Bayazid, Khoi, Tabriz, and Kazvin (300 m. to the frontier, 500 m. more to Teheran). The remaining routes of the N. all enter from Russian terr. and mostly connect with the railway line starting from Poti on the Black Sea. From Akstafa on the Tiflis-Batu line one route proceeds to Julfa (250 m.), and thence to Tabriz (80 m.). But the connection Tabriz-Astara (180 m.), the latter a Russian town on the Caspian, is now preferred. The principal sea-route by the Caspian is that from Batu to Enzeli and Resht, and thence over the Kharzan Pass (7500 ft.) to Teheran (200 m.). The ports Meshed-i-Ser (160 m. from Teheran, 12 m. N. Barfrush) and Mahmudabad (120 m.) are also occasionally resorted to, in spite of the roads to Teheran being difficult across the Elburz Mts. A considerable amount of trade passes further along the Transcaspian Rly. to Ashkabad, and thence by road to Kuchan and Meshed (140 m.). Gez, the port of Astrabad, has the best harbour of all the Persian ports on the Caspian. One of the most frequented routes in all P. is that connecting the cap. with Meshed (560 m.) and passing through Semnan, Shahrud, Sebzewar, and Nishapur. Travellers in P. either use the public post-horses, or hire or purchase horses for themselves. Caravans frequently travel by night to avoid the heat of the day. There are but two short lines of railway in all P., viz., from Teheran to the shrine of Shah Abdul Azim (6 m.), and Mahmudabad to Amol (12 m.). Telegraph lines connect the principal towns. The main line of the Indo-European Telegraph Company passes through P.,

touching at Julfa, Tabriz, Teheran, Bushire, and is worked by agents of the company and the Indian govt. There are regular post-office despatches between the cap. and chief provincial centres, and also to Europe and to India. **Trade.**—Broadly speaking, in the commerce which passes into P. and out by the Caspian routes, Russia has a decided preponderance, whilst England's (including India) ascendency is supreme in the commerce which enters and leaves by the ports of the S., though the Russians are stated to be slowly gaining ground, chiefly with printed calicoes, in this region. Of the trade which passes through Trebizond about 80 per cent. of that which goes into P. is English, but only 10 to 15 per cent. of the exports are destined for England. Austria, Germany, and France share between them a large proportion of the Trebizond trade, and participate in the trade of the ports of the Persian Gulf. The total commerce of P. may perhaps amount to seven or eight millions sterling, of which two-thirds is for imports. England's share of this aggregate is probably 40 per cent., Russia's about 30 per cent. The imports consist principally of calicoes (40 to 45 per cent. of the whole), silks, woollens, and cloth (together 20 per cent.), sugar, spices, glass-ware and crockery, tea, metals and hardware, indigo, and oil. The most noteworthy commodities amongst the exports are opium (25 per cent.), silk and cotton (25 per cent.), rice, drugs and dyes, dried fruits, tobacco, carpets and shawls, wheat and barley, wool, and pearls. Close upon 50 per cent. of the total trade, in point of value, passes through the three ports of Bushire, Lingah, and Bunder Abbas. By the Caspian routes the value amounts to 25 per cent. of the total; by Tabriz–Trebizond, 15 to 20 per cent.; and by way of Bagdad, 10 to 12 per cent. **Weights and Measures, Money.**—The unit of length is the zer=16 girih=41–44 in., for the standard varies in different parts of the country. The fersakh has a length of about 4 m. Surface areas are measured by the jerib=generally 1066 square zer. The chief units of weight are the miscal=1¼ oz. Troy, and the betman=6.48 lbs. The khervar, also in use=5¼ cwts. But these, like the measures of length, vary in different parts of the country. In actual practice the monetary unit is the kran, a silver coin which fluctuates in value, not only with the variations in the value of silver, but also in accordance with the changes in the weight and fineness of the coin, characteristic of the vicious system of administration. A British secretary of legation, writing in 1886, states that it formerly weighed 83 grains, was afterwards reduced to 77 grains, and then weighed 71 grains, while the fineness had been reduced to 89 or 90 per cent. It is now worth about 7d.; but the gold tuman = 10 krans, is also legal tender. The kran=1000 dinar=20 shahi. The **government** is, in every form of it, centred absolutely in the person of the sovereign, with the title of Shah. Certain of the more important provs. are placed under the rule of princes of the blood, who, however, are responsible not only for the imperial revenue, but for all acts of government, to the Shah himself. The post of governor in the remaining provs., and also the customs and similar administrative functions, are farmed to the highest bidders. The **army** consists of about 150,000 men, poorly armed and ill trained (except perhaps one-fifth of them), and of 15,000 to 20,000 frontier tribesmen, who serve as irregular cavalry. In addition to these there is the local militia (infantry) of the towns. The Lurs are excellent raw material for fighting. The best soldiers are levied in the prov. of Azerbaijan. The **population** numbers in all probably 7½ to 9 million, of whom about 2,000,000 are nomads, known collectively as Iliats or Ilyats. Ethnologically, the major portion are Persians (Aryans). The nomads — Lurs, Kurds, and Baluchis — in all probability are also of Aryan blood. The remaining ethnic strains are Turkic, Tatar, Arabic, Jewish, and Armenian. By religion the greater proportion are Mohammedans of the Shiite division; but in addition to these there are approximately 700,000 Sunnite Mohammedans; 44,000 Nestorian (Syrian) Christians, and 29,000 Armenian Christians; 19,000 Jews; and 9000 Zoroastrians or ancient fire-worshippers, mostly in Yezd prov. **Education** is cheap and general. In most villages the children are taught to read and recite the Koran, and often to write as well. At Teheran, Ispahan, and Tabriz there are imperial colleges, with a European curriculum, open to all native Persians, who are instructed by foreign and native teachers. P. embraces the greater part of ancient **Iran** (*q.v.*), which is commonly accepted as the original cradle of the Aryan or Indo-European races. The **history** of P. begins, so far as yet ascertained, in about the eighth century B.C., when the Medes of Ecbatana revolted against the Assyrians and founded an independent kingdom. The Median empire was subdued and conjoined with that of P. (centred in Persis with Pasargadæ for cap.) by Cyrus of the Achæmenian dynasty in the 6th century B.C. Cyrus and his successors carried their conquests over the greater part of W. Asia as far as Egypt, but were beaten back by the Greeks (5th century). This Medo-Persian empire was finally overthrown in 334 B.C. by Alexander the Great of Macedonia, who founded on its ruins the state ruled by the Græco-Macedonian dynasty of the Seleucidæ. About the middle of the 3rd century B.C. the empire of the Parthians began to grow into power in what is now the N. of Khorassan, and shortly afterwards they destroyed the supremacy of the Seleucids in P. The principal feature in the dominance of the Parthians was the beginning of the long struggle between P. and Greece, afterwards Rome, which was continued by the kings of the Sassanian line, a true Persian dynasty, who early in the 3rd century, A.D., recovered the sovereignty from the Parthians. The Sassanian empire was overthrown by the Mohammedan Arabs in the year 639, and thus P. became a prov. of the empire of the califs. Between the end of the 8th and the end of the 15th century, the history of P. is very complex, partly owing to the number of small kingdoms and semi-independent provs. into which it was divided, and partly to the conquests of successive invaders of different nationality. It must suffice to mention the more prominent dynasties, as the Ghaznevids, who maintained themselves in E. Persia and Afghanistan from the middle of the 10th century, or a little later, till nearly the end of the 12th century; the Turkish Seljuks, who established the centre of their power first at Bagdad (1050), and afterwards at Iconium in Asia Minor; the Mongols, who appeared in P. towards the middle of the 13th century under Hulagu, grandson of Jenggiz Khan, and kept their hold upon the country until shaken off by the victorious Tatar (Mongol) prince, Timur or Tamerlane, between the middle and close of the 14th century. Timur's successors ruled over P. until the very end of the 15th century, when they were supplanted by the Sufi or Sefawi dynasty (Mohammedans of Ardebil). The most celebrated monarchs of this line were Ismail I. (1499–1524) and Abbas the Great (1586–1628), both of whom successfully held their own against repeated attacks of the (Tatar) Uzbegs from the N. and the Turks from the W. In 1736 the throne was seized by a general of remarkable character, Nadir Shah, who conquered India; but after his death (1747) anarchy prevailed until Agha Mohammed, chief of Astrabad, made himself supreme, and founded the reigning dynasty of the Kajars. *Authorities:* Curzon, *Persia* (1892), where see a full bibliography; Rausch von Traubenberg, *Hauptverkehrswege Persiens* (1890); H. A. Sawyer in *Geog. Jour.*, 1894, pp. 481, &c.; Stolze and Andreas, *Handelsverhältnisse Persiens* in *Petermann's Ergänzungsheft*, 77 (1885); and Map (1: 3,810,000) of P. by Curzon (1892).

Persian Gulf, an arm of the Indian Ocean, between Arabia and Persia, lat. 24°–30° 15′ N., long. 48°–56° 30′ E. Length, 420 m.; breadth, 105–230 m. At its NW. extremity it receives the Shat-el-Arab, formed by the union of the Euphrates and Tigris Rivs., and the Karun. It communicates on the E. with the Arabian Sea by the Strait of Ormuz. It contains numerous islands, the principal being Kishm, Ormuz, Bushire, and Larak, off its N. or Persian coast, and the Bahrein Is. on its Arabian side, around which last-named an extensive pearl fishery is carried on. Its N. ct. is higher and bolder than that on the S., and tolerably uniform. The mean depth varies between 20 and 45 fathoms. Persia possesses three ports of considerable commercial importance on her shore of the gulf—Bunder Abbas, Lingah, and Bushire, besides some smaller ones. On the Shat-el-Arab are the ports of Busrah and Mohammerah. See **Persia.** A submarine telegraph cable extends along the Persian Gulf from the Euphrates to Karáchi; and a land line, 1200 m. long, from Bagdad to Busrah, was laid in 1865.

Perse, eccles. par., Scot., Forfarshire and Perthshire, Alyth, Bendochy, Blairgowrie, Caputh, Kirkmichael, Lethendy and Kinloch, and Rattray pars. P. <750.

Person, co., U.S., N. Carolina, on the N. frontier, crossed by 79° W.

Perth, city, royal and parl. burgh, co. tn., river port, and par., Scot., at the tidal head of the Firth of Tay, on an alluvial plain 47 m. NNW. Edinburgh, overlooked by the two wooded hills of Kinnoull, on l. bk., and Moncreiff, which separates the Tay from the Earn, and commanding fine views of the Highland mountains to N. Two public parks adjoin, called the N. Inch (98 ac.) and S. Inch (72 ac.), and a handsome bridge of nine arches connects with the suburb Bridgend. The chief buildings are St. John's Church (whence *St. Johnstoun*, or *St. John's Town*, the ancient name of the city), with square tower, an Episcopal cathedral, the city hall, the county buildings, the penitentiary and general prison for Scotland (1812), the academy. There is an imposing railway station, the common terminus of the N. B. R., C. R., and H. R. Perth is noted for its bleach-fields, at Luncarty, Pitcairnfield, and Stormont-

field, all 4 n. outside of the city, and for dyeing (nearly 4000 hands); ink, glass, cotton and linen goods, &c., are also manufactured. Valuable salmon fisheries. P. dates its charter from 1210, and till the death of James I. was capital of Scotland; fourteen Parliaments were held here, and sixteen ecclesiastical councils. Other events were the combat between two Highland clans, 1396, described in Scott's *Fair Maid of Perth;* Knox's Reformation sermon, 1559; the Gowrie Conspiracy, 1600; the battle of Tippermuir, 1644; enactment of the 'Five Articles of Perth,' 1618. The total quayage of Perth harbour is 1225 ft.; Friarton harbour is 507 ft. long, and 100 ft. broad; the tide rising to 13 ft. at highest. Vessels of 200 tons reach the quays. Market-day, F. Alt. 48 ft. Mean temp. (20 yrs., 1861–80), yr. 47.3° F., Jan. 37.2°, July 57.7°. Mean rfall. (1866–80), 32.1 in. Royal burgh, P. (1871) 22,300; (1891) 30,100; parl. burgh, (1871) 25,600; (1891) 29,900; par. (1891) 26,500; parl. divs. (**East**) P. 43,600; (**West**) P. 47,900.

Perth, city, W. Australia, co. P., cap. colony, on a picturesque site, on r. bk. of the Swan R., 10 m. NE. Freemantle, on the Eastern Rly.; is the seat of a Roman Catholic and of a Protestant bishopric. The public buildings include Government House, two cathedrals, Parliament House, &c. The main street, planted with trees, is nearly 2 m. long. Mean temp. (10 yrs., 1876-85), yr. 65.1° F., Feb. 76.3°, July 55.0°; (6 yrs., 1880–85), yr. 64.7° F., Jan. 75.8°, July 54.6°; rfall. (4 yrs.), 32.58 in. P. 8400.

Perth Amboy, city, U.S., New Jersey, Middlesex co., 20 m. SW. New York City, 14 m. from Sandy Hook, at head of Raritan Bay, and opposite S. end of Staten I. Extensive terra-cotta works; the fire-brick here manufactured is reputed the best in the U.S.; fire-clays exported. Settled in 1684. P. (1880) <5000; (1890) 9500; (1895) 12,000.

Pertholey, part of eccles. par., Monmouthshire. See **Llantrisent.**

Perthshire, inland co., Scot., occupying the whole of the Tay basin and part of that of the Forth. The surface varies greatly from the Grampian ranges N. and W. to the rich alluvial lands near the Tay, the Earn, and the Forth. The highest points are Ben Lawers, 4000 ft.; Benmore, 3843 ft.; Ben-y-gloe, 3671 ft; Schiehallion, 3547 ft.; Ben Voirlich, 3224 ft.; Ben Ledi, 2875 ft.; Ben Venue, 2393 ft.; and in the Ochil range, Dunmyat, 1375 ft.; Blairdenon, 2072 ft. The chief tribs. of the Tay are the Tummel, Lyon, Isla, Almond, and Earn, and those of the Forth, in this county, the Teith, Allan, and Devon. Of some 80 lakes, the largest are Loch Tay, Ericht, Earn, Rannoch, Katrine, Achray, Vennachar, and Menteith. For scenery this county is in many respects unequalled. For agricultural statistics, see **Appendix,** pp. 10–12. The ancient divs. of P. were Athol, Strathearn, Monteith (which formed three earldoms from the Pictish times), Gowrie, and Breadalbane. Geologically, the mountainous part consists largely of crystalline schists, with gneiss, quartz, limestone, &c., the rocks being in nearly parallel folds; the lowland part is occupied by the Lower Old Red Sandstone; and along the line of separation a dislocation has been traced. There are traces of volcanoes in the Ochil and Sidlaw Hills, and raised beaches in the Firth of Tay prove recent upheaval, as do also terraces along the banks of the Tay, Earn, Forth, &c. Peat deposits abound in many parts. Coal, copper ore, and ironstone occur in the Ochil range, lead near Tyndrum and in Glen Lyon, slates at Birnam and Logiealmond. There are some important Roman antiquities, as the large camp preserved at Ardoch, whence the military roads of Severus passed to the camps at Comrie and Buchanty; site of battle between Agricola and Galgacus, at Meikleour. There are other battlefields, and many historical castles. P. contains three cities, Perth (formerly the Scottish capital), Dunkeld, and Dunblane, both formerly seats of bishoprics. Besides the county town, Culross, Auchterarder, Abernethy, and Dunblane were royal burghs. For parliamentary purposes the county is divided into eastern and western divs., each sending one member to the House of Commons. Area of co. 1,617,808 ac. P. 126,184. In consequence of the Local Government Act of 1889 the parishes of Culross and Tulliallan, forming a detached portion of the county on the Firth of Forth, were transferred to the co. of Fife. P. of county thus reduced, 122,185. See **Scotland,** table.

* In 1793, 1,000,000; in 1836, 1,370,000; in 1866, 2,800,000.

Orography and Hydrography.—P. includes (1) the middle part of the whole range of the Andes, between the Gulf of Guayaquil and the Bay of Arica, and comprises the valleys of the headwaters (Huallaga, Ucayale) of the Marañon (Amazon) along with part of the basin of Lake Titicaca (see **Andes, C., Peruvian**); (2) the littoral lands (*la costa*) between the sea and the W. mountain range (the *Cordillera,* up to 1500 ft.); and (3) the *bosques* or *llanos,* that is, the forest-clad plains, stretching from the E. forest-clad highlands (*Montaña,* 1000–5000 ft. alt.) downwards, along the affluents of the upper Amazon (rivs. Marañon-Solimões, Javary, Purus, Madeira). Hydrographically and socially P. is turned towards the E. Her future development will be in this direction. **Rivers.**—(1) All the important hydrographic basins belong to the Amazon, and are E. of the littoral Cordillera: (*a*) S. of the Vilcanota knot, the SW. and S. parts of Lake Titicaca basin (see **Bolivia**); (*b*) between Vilcanota and Cerro de Pasco, the high valleys of the Ucayale-Apurimac (Lake Chinchaycocha); (*c*) N. of Cerro de Pasco, the high valleys of rivs. Marañon-Huallaga; (*d*) E. of the Montaña (Caravaya), the high affluents of rivs. Amanumayu-Beni, Purus, and Javary. (2) Of the minor rivers flowing W. into the Pacific, some (*a*) drain interior valleys of the Cordillera (Chira, Santa–Chuquicara, Pativilca-Chancay, Rimac, Ocoña, Victor, Tambo); others (*b*) are mere torrents of the slopes of the Cordillera. **Geology.**—The nucleus of the Andes is formed by Archæan, Palæozoic (Silurian), and eruptive rocks (diorites), on which lie Mesozoic formations (Jurassic, Cretaceous). Kainozoic strata cover part of the littoral *pampas* and the interior *llanos,* and are constantly being increased by large masses of rocks, which are detached by the mountain torrents, and swept down the valleys, at the bottom of which they form accumulations resembling glacial moraines. Very destructive earthquakes are frequent. The whole coast is rising. **Mineral products.**—P. is a continuous mine. Silver is the traditional and staple mineral product (Cerro de Pasco, since 1630, to the value of £80,000,000; Hualgayoc, Cajatambo, Castrovireyna, Yauli, Huanta, Jequetepeque, Recuay); gold (Cerro de Pasco, Ayavaca, Huanuco, Jaen de Bracamoros, Montes Claros, and also in the *Montaña*); copper (*pavonados,* with the silver on the plateaux, as well as on the littoral); mercury (Huancavelica, Caraz); antimony, lead (with the silver, Moho); zinc, nickel (Rapi), cobalt, iron, manganese (Marococha), coal (anthracite along with graphite and other minerals in the Santa valley), petroleum (extremely abundant in a vast region in the NW., from Tumbez to the S. of Sechura). The production is free from taxes (up to 1915). Large deposits of sulphur, salts, including rock-salt (*cachi*), at Huanso; sodium nitrate (*caliche*) at Huacho, Chachani, and Pachitea, and borax. Mineral waters abundant between Ica and Pisco, Yura, Sabandia, Yauli, Chachapoyas, Cajamarca, and in all the interior districts up to Loreto in the Amazon valley. The mining industry is increasing in activity under the management of English companies. **Climate.**—All the littoral of P. (mean temp. 67° F., max. 81°, min. 57°) is sheltered from the moist trade winds, and the land being, to a great altitude, warmer (in some points 72°) than the sea (59°), vapours cannot get condensed. In this region no rain has fallen for periods of twenty to eighty years (*desiertos* and *pampas* of Tumbez, Sechura, Ica-Tanga, Islay). S. winds predominate on the coast, becoming SW. (*pintor, aguaje,* between points Aguja and Paraças), through the strong attraction brought about by the high temperature and consequent rarefaction of the air of the pampas. SE. trade winds carry the sea-waters away from the coast, along which runs a cold current (the so-called Humboldt current, 59° F.). E. winds passing through the Andes

give some humidity to the western districts, where dense fogs (up to 800 ft.) are frequent (*tiempo de lomas*, or *de garúa*, April–Oct.). Up the slopes of the Cordillera rains become more regular (Dec.–May). The valleys of the Cordillera (Yuncas) are hot and wet; but the highlands (Entre-Sierra) are dry (mean temp., Cuzco, 59°; Cerro de Pasco, 40°). Temperature diminishes 1° F. for every 900 ft. alt. The snow-line lies between 15,000–16,000 ft. The E. valleys are very damp and hot (86° in the shade; min. 64°). All the E. slopes are under the influence of the moist trade winds. Rains are abundant (sometimes 32 in. in a few hours). Besides the astronomical observatory of Arequipa (Carmen, alt. 8054 ft., erected and maintained by the Harvard University of Massachusetts), there are two meteorological observatories (Chachani, 16,000 ft., the highest in the world, and at Isla Chincha del Norte). **Flora.**—The absence of nearly all kinds of vegetation is characteristic of the littoral tracts of P. (*desiertos, pampas*), where only a few drought-loving forms (*Cereus peruvianus, Prosopis siliquastrum*, and other Cactaceæ and Mimosæ) grow wild; the only cultivation is along the rivers (*valles*) or under irrigation. There are some good pastures during the *garúa*. Vegetation increases with increased humidity, and less sandy soil, on the higher slopes and valleys. Gramineæ (*ichu, ichales, pajonales*) cover vast tracts on the highlands. From 5000–11,500 ft. ('the sierra') European plants grow. Up to 14,000 ft. ('the puna') culture is still possible (*Espeletia, Boccharis tola*, Cactaceæ; *giganton, Cryptochæte andicola, huamauripa*, reach up to the snows). Above 14,000 ft. there is nothing but desert (*despoblado, puna brava*), with no culture. The E. lands (*Montaña*) and the slopes to the Amazonœ are covered with dense forests (*bosques*), continued, lower down, by the Hylæa [**Brazil**], including very fertile lands producing *Erythroxylon coca, Ceroxylon andicola* (wax-palm), chumayo, *Pithecolobium samam*, Cinchonæ (taken thence to India by C. Markham in 1861), *Syphocampylus* (caoutchouc), *Datura sanguinea*, tonga, *Phytelephas* (vegetable ivory), Cyclanthеæ, numerous Compositæ, &c. The **fauna** is original and varied in the inter-Andine regions, these forming special insulated zoological districts, with all the characteristic and useful American Camelidæ (guanaco, llama, alpaca up to 16,000 ft.) and Chinchillidæ (*Chinchilla viscacha*) [**Bolivia**], and also on the *Montaña* and E. slopes [**Brazil**]; but the fauna on the Pacific slopes, (where some parrots live in caves) is poor except in sea-birds, which are attracted by the extremely rich maritime fauna, and whose excreta, in the course of ages, have produced the stores of guano preserved to us by the extreme dryness of the climate. P. is in the neo-tropical zoologic region, the littoral and inter-Andine lands belonging to the Chilean, the E. valleys and Amazonian slopes to the Brazilian, divisions. **Ethnography.**—The Spaniards found in P.—(1) remains (still now visible) of an old high social organisation (the Yunca monuments, Pachacamac, Chimu near Trujillo, Chancay, Puerto Ancon, Huanasco Viejo, Paramanca); and (2) the highly organised Quichua civilisation. The Quichua (first divided into several nations, but finally represented by the Incas), traditionally supposed to have risen, with the sun, from Lake Titicaca, establishing their cap. at Cuzco, were able to subject to their influence (Manco-Capac, first known Inca chief in the 11th century) all the countries from Ecuador (Quitu) to Bolivia and Chile (Itahuantinsuyu, 'the four divisions,' 0°–34° S. lat., P. 10,000,000; (1580) 8,000,000; (1890) 6,000,000). Virocacha (supposed to have come from the E. seas; see **Colombia** and **Mexico**) was their civilising hero. The especial development of an interparietal bone (*os Incæ*) is the great anatomical characteristic of the Quichua. They had a rich literature, a hieroglyphic writing (registering facts by means of coloured threads, *quipu*), knew how to obtain and work metals, how to observe the eclipses and the march of the sun, which they worshipped, their year being 365 days long, and their decimal system of numeration having been extended to all their social and political institutions. P. was covered by a complete system of roads and bridges, by colossal civil works and religious monuments. Under the theocratic tyranny of the Inca (the privileged caste of 'the sons of the sun,') the Quichua were divided into fixed castes, the heads of the children being shaped according to the mental faculties necessary for their predestined social functions. The language (still now predominant) is very rich, and, although distinctly agglutinative, presents many words of an apparent Sanscritic descent. The Quichua are very much mixed now with Indians of many other races, with Spaniards, negroes, and even Chinese. (3) From Cuzco (Chalhuanca) to Lake Titicaca the Indians have Aymara blood (see **Bolivia**). (4) Numerous tribes of uncertain affinities live between the more pure representatives of those already mentioned, from the inter-Andine plateaux down to the Amazon: (*a*) Amahuacas, Conibos, Sipibos, Piros (in the valleys of the Urubamba, Ucayale), Cachibos (cannibals, from the Ucayale to the Amazon), Setibos, Panos or Sensi, Remos, Hibitos; Chunchos, Antis or Campa (with Mongolic facies, from Caravaya to riv. Madre de Dios); (*b*) Marahnas, Mayorhunas (very wild, between the Javary and Marañon); (*c*) Ticunas, Yalmas (the handsomest, Amazon); (*d*) Cocamas (Solimões), Oregones, Iquitos, Pebas, Omaguas (almost extinct in the valleys of the Napo, Marañon, Ucayale, Javary (see **Brazil**). Contagious diseases, introduced by the white man, have exterminated many of the native races. There is some European immigration: Italians (Callao-Lima, Chanchamayo, Merced, at 2400 ft.), French (Chanchamayo-Perene), German (San Carlos), English, negroes on the littoral, and Chinese ('Macacos' or Asiatics from Macao, since 1849, 80,000 in ten years). Indians (57 per cent.) and mixed races (Zambos, Cholos, Chino-Cholos, 23 per cent.) greatly predominate. No other country has so many special local diseases. Some (*soroche* or *veta*) are specific at great alts. (from 8000 to more than 13,000 ft.). The *verrugas* seem to be produced by some drinking-waters. The dists. with antimony are dangerous. The littoral (the cap., Lima, included) is very unhealthy even for the natives, malarial, typhoid, yellow, and typhus fever all being prevalent. So also is dysentery (but this, as well as phthisis, is cured on the highlands). **Productions.**—Agriculture was in a very advanced condition when P. was conquered (16th century), the littoral region, in particular, possessing extensive irrigation works, the restoration of which (*manpuesteria*) has now restored to fertility many desert districts. The old staple food products were maize (temperate zones), *Chenopodium quinoa* (highlands), and many tubers and roots (*curo* or *papa, arracacha, ulluco, oca*). The Spaniards introduced wheat, barley, and the banana, vine, and olive. Cotton is very good in Piura (up to 4600 ft.); sugar-cane, tobacco, and rice are cultivated almost everywhere. Many points of the littoral are thus important productive centres (Motupe, Morrope, Lambayeque, Huacho, Cañete, Ica, Tambo). Numerous cattle feed on the littoral pastures during the *garúa*, and later on ascend the slopes. The vine (since the 16th century) is extensively cultivated in the S. (Ica, Moquegua: 'the Peruvian Bordeaux'). Brandy (*Pisco, Italia, Moscatel*) is produced. Olive-trees (since 1560) are abundant in some parts (Cumana, Atico). There are on the mountains exceptional fertile zones (Arequipa, Huaylas, Cajamarca, Tarapoto, Lamas, Huanusco, Abancay, Vilcanota, Huancayo, Chacapoyas), where cereals, potatoes, cotton, tobacco, sugar-cane (up to 4300 ft.), coffee (up to 4000 ft.), coca (Huanuco), all fruits and vegetables, are extensively cultivated. Rum (*chaita*) is extensively produced. On the slopes of the Amazon basin cacao (up to 2000 ft.), coffee, and sugar-cane (up to 6500 ft.) are cultivated, although far from roads communicating with places of export. Manufactures of tobacco and cocaine. Some domestic industries (Ete, Cajamarca) are carried on. The great deposits of guano (Huanu) on the rocks of the littoral and islands (Lobos, off Lambayeque; Guañape, near riv. Viru; Chinchas, in the bay of Pisco), worked since 1841, are nearly exhausted (some are now in the possession of Chile). **Means of communication.**—Very few good roads. The completion of the railways was entrusted to an English company. Three trans-Andine railways are in an advanced condition—(1) N.: Pacasmayo–riv. Jequetepec–Cajamarca–Marañon–Huallaga, branching to Chepen, Guadalupe (the lowest of all, 8859 ft.); (2) centre: Callao-Lima-Oroya, rivs. Jauja, Perene, Pachitea (Ucayale), branching in the inter-Andine regions; (3) S.: Mollendo–Arequipa–Puno, branching to Cuzco [**Bolivia** and **Andes, C., Peruvian**]. Along the littoral, and between the maritime ports and the W. valleys, railways are more or less complete from Paita to the Chira and Piura valleys; from Chiclayo to Lambayeque, Ferriñape, Pátapo, Monsefu, Eten, Pimentel; from Salaverry to the Moche and Seco valleys, Chicama, Ascope; from Ferrol Bay to the Santa valley and Huaraz Recuay; from Lima to Callao, Ancon, Chancay, Magdalena, Chorrilos, Huaura, Huacho; from Ica to Pisco; from Moquegua to Ilo-Pacocha. The Marañon is navigable up to Pongo de Manseriche; the Huallaga up to Yurimaguas; the Ucayale up to Savayacu. By the valleys of the Canusa-Iaco and Santiago-Pauté (affluents of Marañon) communication will be eventually established between the Amazon and the Gulf of Guayaquil (**Ecuador**). Steamers on Lake Titicaca (see **Bolivia**). The international cable touches at Paita, Callao, and Mollendo. **Commerce.**—The port of Callao (at a short distance from Lima, the cap.) has more than half of the whole international traffic. Numerous ports (some of them, however, faulty) serve to export the local products of isolated centres (Tumbez, Payta, Sechura, Talara for the petroleum region, Eten, Pacasmayo, Malabrigo, Salaverry, Ferrol or Chimbote, Casma, Salinas, Ancon, Solar, Pisco, Mollendo). Bolivia sends her exports free by the Mollendo-Arequipa-Puno Railway. P. exports free by port of Loreto (Marañon-Solimões, the farthest E. port of P., 750 m. in a straight line from Callao) and the Amazon to Pará. Exports silver, copper, and other metals, salts, guano, cotton, wool (sheep and alpaca), sugar, rubber, coca and cocaine, medicinal plants; imports manufactured articles of food and dress, cereals, coal, machinery. Exports and imports, £3,000,000; half with Great Britain, then Chile, France, Germany, United States. **Political Institutions.**—A president elected for four years, two Houses of Parliament, two senators for each department of two provs., and one for

every group of four more, one deputy for every 30,000 inhabitants. Constitution of 1856 revised in 1860. Roman Catholic is the state religion; all others are tolerated, but their observance is prohibited in public places. Three universities—Lima (San Marcos, the oldest in America), Cuzco, Arequipa. The army numbers 6000 to 40,000. Through financial difficulties P. gave up to an English company the construction of her railways, the working of her mines, large tracts of land, and some of the guano islands. **Weights and Measures.**—The money is the (silver) *sole*=2s., *peseta*=½ *sole*; *real*=⅛ *peseta*. Metric system established since 1860. The old Spanish measures (see **Bolivia**) still in general use. **History.**—In 1515 Tumbez was discovered, and there (1531) Pizarro began, for Spain, the conquest of P., afterwards divided (*encomiendas*) between the conquerors. All the natives were obliged to work for the Spaniards in the mines (*mita*). In 1542 P., as a viceroyalty, became the centre of government for the whole W. of S. America. In 1717 took place the secession of Santa Fé de Bogota [**Colombia**]; in 1776, that of Upper P. (Charcas, **Bolivia**) under Buenos Aires; in 1740, 1780, 1814, three native rebellions against the whites. In 1810–17 occurred the secession of the *Capitania general de Santiago* [**Chile**]; in 1821–24, the war of independence with Spain; in 1825 the independence of Upper P. was declared under the name of Bolivia. From 1836 to 1839 P. and Bolivia united under a president. Santa Cruz carried on war with Chile. There was a war with Bolivia in 1841. In 1854 negro slavery was abolished. In 1864–66 a conflict with Spain occurred; and in 1879–83 an alliance with Bolivia and a war with Chile, in consequence of which P. lost Tarapaca (42,400 sq. m.) and Tacna. [**J. B. R.**]

Peru, or **Francis,** isl., Pacific, Gilbert group, in about 1½° S., 175½° E.

Peru, city, U.S., Illinois, La Salle co., at the head of navigation on r. bk. of Illinois R., 86 m. WSW. Chicago, adjoining W. La Salle. P. has extensive zinc and sulphuric acid works, and manufactures of clocks, watches, and agricultural implements, besides other industries. Large quantities of ice are annually exported to the S.; in the vicinity are extensive coal-mines. P. 5600.

Peru, city, U.S., Indiana, Miami co., on r. bk. of Wabash R. and the Wabash and Erie Canal, 67 m. N. Indianapolis; has important local trade. P. 7000.

Peru, vil., U.S., Nebraska, Nemaha co., on Missouri R., 15 m. SSE. Nebraska by rail. P. <1500.

Perucho (another name of the **Guallabamba**), or **Guaybamba,** riv., Ecuador, one of the headstreams of the Esmeraldas (*q.v.*).

Perucho, vil., Ecuador, 23 m. N. Quito.

Perugia, city and cap. prov., Italy, on the Tiber, r. bk., 127 m. N. Rome by rail, with fine position and scenery. It is surrounded by walls, one handsome gateway being named the Etruscan arch of Augustus. The main features are the *Corso*, joining two squares, a Gothic cathedral and several beautiful churches, the municipal palace, with its valuable art gallery, the university (1307)—a so-called free university, that is, not one of the state institutions, founded in 1276, now with 15 ordinary and 3 extra-ordinary professors—a library and museum. The neighbourhood is noted for its Etruscan tombs. The Romans took *Perusia*, as they called it, from the Etruscans 310 B.C., and Augustus rebuilt it in 41 B.C. In the 4th century it was besieged by Totila, king of the Goths. In the 15th century it became the centre of the Umbrian school of painting. Alt. 1706 ft. Mean temp., yr. 55.9° F., Jan. 39.4°, July 73.8°. P. (1871) 16,700; (1881) 17,400.

Perugia, Lake of. See **Trasimeno.**

Peterboro, tn., U.S., New Hampshire, Hillsboro co., on Contoocook R., 45 m. SW. Concord. P. <3000.

Peterborough, tn., Canada, Ontario, cap. P. co., 68 m. NE. by E. Toronto; an important railway centre. P. <1500.

Peterborough, episcopal city, parl. and (since 1874) mun. bor., par., and market-tn., Eng., Northamptonshire (with part in Huntingdonshire), 37 m. NE. Northampton, on the Nen, with stns. on G. N. R., M. R., L. & NW. R., and G. E. R. Principal trade is in corn, malt, coal, and timber, and the manufacture of agricultural implements and bricks. Cathedral of P., which is specially noted for the magnificence of its W. front, dates from 1118, and is on the site of a Saxon monastery, dedicated, 655, to St. Peter; the central tower has recently been rebuilt. The original name of the town was *Medeshamstede.* The present bishopric, dating from the dissolution of the monasteries (the abbey of P. having previously been in the diocese of Lincoln), includes Leicestershire, Northants, and Rutland, with parts of the counties of Derby, Hunts, and Warwick. The G. N. R. have large locomotive works on the N. suburb. There are many fairs. Market-days, W. and S. Mun. bor. 6564 ac. Alt. 50 ft. Mean rfall. (1866-80), yr. 23.8 in. P. (1801) 3400; (1851) 8700; (1871) 17,400; (1891) 25,200; parl. bor. P. (1891) 26,500.

Peterborough, settlement, Victoria, S. ct., on Cardie's Inlet, Heyterbury co., 40 m. WNW. of Cape Otway.

Peterchurch, par., Eng., Hereford, Ross div., on the Dore, 11 m. W. Hereford, on the Golden Valley Rly., PM.O.; 5164 ac. P. <750.

Peterculter (locally pronounced piterku'ter), par., Scot., co. and 7½ m. WSW. Aberdeen, on the l. bk. of the Dee, opposite Maryculter, includes the village of Culter, PMT.O.; 10,547 ac. P. <2500.

Peterhead, parl. and mun. burgh, seapt. tn., Scot., Aberdeenshire, on a rocky penin., 32 m. (44 by rail) NNE. Aberdeen, with stn. on the G. N. of S. R. Keith Inch, the eastern extremity of the penins., and the nucleus of the town, is now cut off by the harbour; it is chiefly occupied by fish-curing establishments. There are three harbours, the S. being 600 ft. by 350 ft. with 1800 ft. of quayage; the N. with two basins, one 500 ft. by 500 ft. with 1670 ft. of quayage, the other 380 ft. by 500 ft. with 2235 ft. of quayage; and Port Henry Harbour, with an area of 5 ac. and 850 ft. of quayage. Besides these a great 'harbour of refuge' (costing about £750,000) is in course of construction at the national expense. There are lighthouses at the entrances to the ports, each visible 10 m. The New Dock is 190 ft. long, and 35 ft. broad at entrance, and the Old Dock 136 ft. by 34 ft. Important trade; exports, herrings, red granite, and agricultural produce; important granite and polishing works in the neighbourhood. There are 500 boats employed in the herring-fishery. Formerly Peterhead was the chief station for the Greenland whale and seal fishery, carried on since 1788. Market-day, F. Par. P. (1871) 11,500; (1891) 9170 ac., P. 15,800; parl. burgh and town (including Buchanhaven, 1871) 8600; (1891) 12,200.

Peterhof, dist. tn., Russia, govt. and 19 m. by rail W. of St. Petersburg, on S. ct. of Gulf of Finland; founded by Peter I. Consists of **Old P.** and **New P.** Imperial palace, with beautiful parks and fountains; summer residence of Imperial family; camps of the military schools; stone-cutting works; steamers ply to St. Petersburg. P. 9520.

Philadelphia, vil., U.S., New York, Jefferson co., on Indian R., 52 m. SW. Ogdensburg. P. <1500.

Philadelphia (Greek, 'brotherly love,' so named by the founder: see below, under **History**), city, U.S., Pennsylvania, in 30° 57′ N., 75° 9′ W., on the W. bank of the Delaware R., 103 m. from mouth, 85 m. SW. of New York, and 125 m. NE. of Washington. The Schuylkill R., joining the Delaware near the S. boundary of the city, cuts off the portion called West Philadelphia. Seven railway bridges and eight others cross the Schuylkill in city limits. Area, coextensive with the county of Philadelphia, 129 sq. m.—greater than that of any other American city; greatest length, 22 m.; width, 5 to 10 m. The Delaware river-front is 20 m., with 5 m. of wharf; on the Schuylkill 20 m., 4 m. wharves. Average depth of water at wharves 50 ft., giving splendid accommodation for shipping. The largest steamer yet built, the *Great Eastern*, ascended the Delaware to P. P. was at first a close rival of New York in **commerce** and population, and, according to many estimates, actually ranked first until the completion of the Erie Canal in 1825 sent New York ahead. This relative decline has continued until now among U.S. cities P. ranks in commerce after New York, Boston, San Francisco, and New Orleans. The construction of the great western railway lines with their termini in P., partly explains why absolutely the exports continued to rise to 1876 (nearly £10,400,000), and the imports to 1880 (£8,000,000). The extension of the railways to New York accounts somewhat for the absence of progress since. In 1893 exports were above £10,100,000, imports above £13,500,000. Seven steamship lines cross to European ports, five go to Jamaica and the W. Indies, and six coastwise. Tank steamers carry from the pipe-line terminus of the Standard Oil Company on the Schuylkill one-third of the petroleum exported from U.S. P. has always been first in American shipbuilding; Cramp's yard, on League I., in the Delaware, has turned out 269 ships for the public service since 1830. **Manufactures** steadily increasing in importance. Third to New York and Chicago in total product reported by 1890 census (£118,528,634). Chief products, sugar and molasses, clothing, foundry and machine-shop products, printing and publishing. The clay substratum of the city yields one of the finest brick clays in U.S. Carpets and woollen goods. The site is remarkably level, and varies in elevation from 24½ ft. to 440 ft. in extreme N. As far as possible the city is laid out in uniform squares. The main **streets** are 50 ft. wide, a few are wider; Fourteenth or Broad Street is 113 ft. wide. The N. and S. streets are numbered from the Delaware W., while the E. and W. streets are named from trees and Pennsylvanian counties and governors. Electric trams (trolley cars) run through almost all the chief streets. This, with the level surface, enables the population to spread freely, and with cheap bricks makes P. 'the city of homes.' In 1890 there were 187,052 dwellings, of which over 120,000 were owned by occupants, and fewer families (1.1) and persons (5.8) to a dwelling than any other large American city. (New York, families, 3.8; persons, 16.4.) Up to about 1870 there was a painful uniformity in style and material (red brick) of **buildings.** The reaction in important buildings since erected has been almost extreme. The city hall, completed 1894, is the largest single building in America, covers an area of 4½ acres, and has the loftiest steeple in the world, crowned by a bronze statue of William Penn, 37 ft. high, and 547 ft. above the pavement. There are many buildings of great historical interest. Higher **education** is further provided for by the University of Pennsylvania, La Salle and Girard Colleges, 22 schools in special branches, besides 20 public libraries. Fourteen public squares are laid out as **parks,** and the immense Fairmount Park extends for 6 m. on both banks of the Schuylkill. **History.**—Surveyed, named, and settled by a part of William Penn's company of Friends or Quakers, 1682. Within present city limits are Wiccaco village, colonised by Swedes 1636, an older Indian town, and Germantown, settled by Dutch and Germans of Penn's company 1683; four of these sent to the Friends' meeting in 1688 the first public protest in America against slaveholding. Seven hundred houses and 4500 inhabitants in 1700. First Continental Congress 1774, second 1775, agreed next year to resolution declaring the States 'free and independent,' and Declaration of Independence was first publicly read. The losses at Germantown (1777) were heavier

than in any other battle in the Revolutionary War. **Climate.**—Mean temp. (15 yrs.), yr. 53.6° F., Jan. 32.1, July 76.4°; rfall. (52 yrs.), yr. 43.3 in. P. (1790) 28,500; (1820) 63,800; (1850) 121,400; (1880) 847,000; (1890) 1,047,000; (1892, city census), 1,143,000. A close second to New York city up to 1820. Baltimore took second place, 1830–50; fourth, after New Orleans, 1840; fourth, after Boston, 1850; second again, 1860–80; third, after New York and Chicago, 1890. [**W. S.**]

Philadelphia, or **Bunker,** isl., Pacific, in the Hawaii group, in about 28° N., 174° W.

Philadelphia, ancient tn., Syria. See **Rabba.**

Philæ, isl., Egypt. See **Assuan.**

Philaur, tn., India. See **Phillaur.**

Philiatra, tn., Greece, prov. Messenia, on the W. ct., 18 m. NNW. Navarino. P. 9000; comm. (**Erana**) P. 10,400.

Philip, isl., S. Pacific Ocean, 5 m. S. Norfolk I., crossed by 29° 8′ S., 167° 58′ E., a dependency of New South Wales.

Philip, isl., Pacific. See **Sorol.**

Philip, or **Makemo,** one of the Tuamotu Is.

Philip, Cape, Nova Scotia, S. extremity of Guisborough co.

Philip Edward, isl., Canada, Ontario, on the N. of Georgian Bay, 81° 7′–21′ W., with a lighthouse at its W. end.

Philiphaugh, an alluvial tract, Scot., Selkirkshire, at the confluence of the Yarrow and Ettrick, on their l. bk., 2 m. W. by S. Selkirk (*q.v.*); scene of Sir David Leslie's victory over Montrose, 1645.

Philip Norton, par., Eng. See **Norton St. Philip.**

Philippeville (French name), the ancient *Rusicada,* seapt., Algeria, cap. arr. P., on the SW. shore of the Gulf of P., 38 m. NNE. Constantine; the vine is extensively cultivated; has grain distillery, tanneries, manufacture of corks and cork articles; iron mines of Filfila near. The port is protected by two breakwaters, 1500 yards and 300 yards respectively, and has an area of 125 ac., divided into an outer and an inner harbour. Total quayage about 3000 ft., available for vessels drawing 22 ft. Rfall. (5 yrs.), 24 in. P. 15,800.

Philippeville, fortified tn., Belgium, prov. Namur, cap. arr. P., 15 m. S. by E. Charleroi; has slates, zinc, lead, and pyrites mines. P. <2000.

Philippeville, stn., W. Africa, French Congo Terr., on the l. bk. of the Niadi, 112 m. N. by E. Vivi, in about 4° 10′ S., 13° 53′ E.

Philippi, archæological site, Turkey in Europe, Macedonia, vilayet Salonica, 8 m. NW. Kavala; received its name from Philip of Macedonia. Celebrated in history as the scene of the victory of Octavius and Antony over Brutus and Cassius in 42 B.C., and as the place where Christianity was first preached in Europe (by St. Paul).

Philippi, vil., U.S., W. Virginia, Barbour co., on Pygant's Valley R., a branch of the Monongahela R., 31 m. W. by S. of the SW. corner of Maryland; scene of the first battle of the Civil War, June 1861. P. <1500.

Philippine, fortress, Holland, prov. Zeeland, on an inlet of the W. Scheldt, 13½ m. SE. by S. Flushing.

Philippine Islands, at first called **San Lazaro,** then **Magallania, East Islands, Indias Españolas** ('Spanish Indies'), one of the easternmost archipelagoes of Asia, in the shape of an inverted λ, between 4°–20° N. lat. and 116°–127° E. long., in front of China and Cochin-China. The archipelago of P. is composed of some 2000 islands, with an aggregate area of 114,400 sq. m., the principal being (1) Luzon and the adjacent islands (Batanes, Babuyanes, Polillo, Catanduanes, Mindoro, Marinduque, Burias, Masbate, &c.), which form the N. part of the whole group, succeeded S. by the (2) Visayas (Tablas, Panay, Negros, Cebu, Bohol, Leyte, Samar, &c.), prolonged SW. by (3) the Calamianes, Palawan, Balabac, then (4) Mindanao and the adjacent islands (Dinagat, Surigao, Basilan, &c.) form the extreme S. part, prolonged SW. by the (5) Sulu Archipelago. The P. group is connected N. with Formosa by the Babuyan and Batan Is., SW. with Borneo by (*a*) Palawan, (*b*) the Cagayanes, the Caweli, and (*c*) the Sulu Is., enclosing the Sulu Sea, SE. to Celebes, and the Moluccas by the Carcaralong, Talantse, and Tuber Is. The orientation of the submarine ridges, there represented by their summits above the ocean, is conspicuous on all the P. islands, sometimes converging, sometimes diverging or running parallel, ultimately to be seen, nearly all, in the N. of Luzon. Many of the numerous peninsulas of the P. islands were probably not long ago independent islands. **Geology.**—The mountainous P. form the centre of the great Kamchatka-New Zealand volcanic region. Lines of volcanoes, both extinct and active, coincide with the orographic lines, diverging from Apo (above 10,000 ft., Mindanao) to meet at Taal (Luzon). Volcanic activity is still considerable, earthquakes are very frequent and destructive (1880, 1881). P. are therefore constituted by a mass of eruptive rocks of many different ages, from Archæan and Palæozoic (principally Devonian) to Tertiary, Quaternary, and modern times. Imperfect exploration show the Archaic formations (granite, schists) in the N. and centre, Palæozoic all along the E., Tertiary S. and W. The P. seem to have been united to Borneo (and through it to Asia), and at several epochs to Celebes. Recent upheavals have occurred in many parts. There is, however, a zone of submergence SE. of Mindanao. Old and actual increasing coral formations all along the coasts (principally towards the Pacific). **The mineral productions** are gold (Luzon, Bengues, Vicols, Mindanao, Misamis, Surigao), galena (50 per cent. of pure metal), mercury, iron (Luzon, 75–80 per cent. of pure metal), copper (arsenical pyrites, 16 per cent. of copper at Luzon, Lepanto, Camarines, Masbate, Panay), coal (Luzon, Cavansan, Negros, Cebu), sulphur (Leyte), and numerous mineral waters (Bugnias, Maynit, Taysan, Tibi). **Climate.**—An equatorial current (the Kuroshiwo or Black Stream) runs along the P. The NE. islands have their rainy season, sometimes very severe (*colla*), while NE. winds blow (Oct.–April), the SW. during SW. monsoon (April–Oct.), the conflicting currents causing terrible equinoctial cyclones (*vagutos,* typhoons, with strong tides, *dolos*). The P. are under the isotherm of 79°, March to May are the hottest, Nov. to Feb. the coldest, and the best months for Europeans, with, however, little difference between the extreme temps. of a general tropical climate. To the general tropical Malayan **flora** more N. plants (*Pinus Merkusii, P. insularis*) and some Australian genera (*Leucopogon, Osbornia, Xanthostemon*) are added in the P. area. The P. are to a very great extent covered with forests, although they have been in many parts burnt (*cainges*), and turned into rice or grass (*cogon*) lands. Some of the most valuable woods grow in the P. forests: teak (*Tectona grandis*), molane (*Vitex altissima*), Palo Maria (*Calophyllum Inophyllum*), dongon (*Sterculia cymbiformis*), ipel (*Eperua decandra*), ebony (*Diospyrus*), sandal (*Pterocarpus*), many *Dipterocarpi,* supan (*Cæsalpinia suppan*), celebrated perfume-producing flowers (ilang-ilang, *Cananga odorata*), camphor (*Dryobalanops*), and areca, pepper, cinnamon, clover, tea, along with all tropical fruits (*Garcinia mangustana, Durio zibethinus*). **Palm** trees give excellent textiles (bejucos, *Dæmonorops, Calamus, Plectocomia;* buri, *Corypha;* cabo-negro, *Arenga*); the *Musae* (textiles *sapientum*) produce the Manilla hemp (abáca). **Fauna.**—The P. are in the Indo-Malayan subdivision of the oriental zoo-geographical region, showing, as well as the flora, both Asiatic and Australian forms. There are monkeys (*Macacus cynomolgus*), lemuroids (*Tarsius spectrum,* and the flying lemurs, *Galeopithecus*), boars (babuy), buffaloes (carabao), cervus, antelopes (pilandoc, *Tamarao depressicornis*); large *Gallinaceæ* (*Gallus bankiva*), a *Magapodius,* and the only cockatoo in the region; tortoises (panican-carey); numerous fishes (dalag, *Ophiocephalus, Hemiranphus*); very numerous insects (the leaf-like *Phasmidæ*); and mollusca (the gigantic taclobo, the *Perlifera Maleagrina,* the *Placuna placenta*). **Ethnography.**—The most ancient historical inhabitants were probably the Negritos (Negro pygmies), now in course of extinction as a pure race. A first invasion of Polynesians was succeeded (15th century) by one of Malays, who are now distinguished as (*a*) Catholic Indians and (*b*) Mohammedan Moros (Orang Islam). Numerous Chinese are established in the P. The pure Spanish population is very small. The climate is healthy (although entirely tropical), excepting all swampy localities. Leprosy is still prevalent in some parts (Luzon). All tropical economical plants grow well in the P., the principal **products** being, at present, hemp, sugar, tobacco (only cultivated in all the P. since 1882), coffee (principally since 1880), woods, rice, some cacao, and cotton. Only one-fifth of the land is under cultivation. The principal exporting industries are the making of cigars (the most important of all, the best from the Luzon provs. of Isabella and Gagayan), abaca tissues (with silk, Sinamay), straw hats, perfumes, sugar (2½ millions sterling exported). The imports are food and dress materials, fuel, arms, machinery, and iron. Greatest **commerce** with England, then United States, Spain, and Germany. Exports and imports in 1891, 10 millions sterling; 1892, 12 millions sterling. There are no interior good **roads,** large tracts of the principal islands and some of the smaller ones being entirely unknown. Regular steamers to Singapore and Hong-kong, and between the principal ports of the archipelago. Seventy miles of railway between Manila and Dagupan are in operation; 720 m. of telegraphs, and a submarine cable from Manila to Hong-kong. The P. are divided into three **governments:** (1) Luzon (36 provs.), with the Calamianes, Palawan, and Balabac; (2) Visayas (cap. Cebu); (3) Mindanao (cap. Zamboanga) and the Sulu Is. In many islands (principally in the interior of Mindanao), the natives are independent. Manila (Luzon) is the cap. of the whole archipelago (with a governor-capitan-general and an archbishop), to which belong, for administrative purposes, the Marianas, Caroline Is. and Palaos (Pelew) Is. An army of 10,000 men, and a naval station. Export duty on tobacco, and a general duty of 50 per cent. *ad valorem* on imports. The principal international ports are Manila, Albay, Sual (Luzon), Cebu, Leyte, Iloilo (Visayas), Zamboanga (Mindanao). Dangerous coral reefs are numerous. The coasts are very high, and sometimes dangerous under the violent waves of the Pacific. Magellan arrived at the P. in 1521, having crossed the Atlantic and the Pacific, and was killed shortly after in a skirmish on

the isl. of Maitan, opposite the town of Cebu. In 1569 Spain took formal possession of the archipelago. P. 7,000,000. See **Luzon, Mindanao,** and the other individual islands. [**J. B. R.**]

Philippolis, tn., Orange Free State, cap. of P. div. (on the SW. frontier), 90 m. W. by N. Aliwal North. P. <2000.

Philippopolis, Slavonic **Plovdiv** (till the 17th century *Plovdin*), Turkish **Filibe,** tn., Bulgaria, cap. of Eastern Roumelia and of prov. P., situated on three isolated syenite rocks (highest, the Jambaz-tepe, 695 ft.) and the intervening hollows, on the r. bk. of the Maritsa, 97 m. WNW. Adrianople; cereals, tobacco, otto of roses, silk-cocoons, and wine are produced in the neighbourhood, and silk is spun in the town. Houses mostly built of wood. Founded about 340 B.C. by Philip II. of Macedon; at first only a military post or convict colony. Surrounded by a strong wall by Marcus Aurelius, 172 A.D., removed in the 18th century. Sacked by the Goths in 251, by the Huns in 447. Now seat of Bulgarian, Greek, and Catholic bishops; strongly garrisoned. P. (1888) 33,000; Bulgarians, 19,500; Moham. 5600; Greeks, 3900.

Philippopolis, oasis, Syria. See **Orman.**

Philippsburg, urban comm., Ger., Baden, circle Karlsruhe, 17 m. SW. by S. Heidelberg; has a dismantled fortress; it figured frequently in the Franco-German wars of 17th and 18th centuries; under its walls the Duke of Berwick was killed in 1734. P. <3000.

Philip River, small riv., Canada, Nova Scotia, Cumberland co., flows N. into Northumberland Strait.

Philipsburg, bor., U.S., Pennsylvania, Center co., 27 m. NNE. Altoona, 96 m. ENE. Pittsburg, with rich coal and fireclay deposits. P. <4000.

Philipstown, vil., Cape Colony, dist. Hanover, 90 m. NNW. Middelburg. Alt. 4495 ft. Rfall. (6 yrs.), 10.83 in.

Philipstown, market-tn., Ire., E. King's co., bar. Lower P., 10½ m. NNW. Portarlington, 7 m. from Geashill stn., on Grand Canal; has an old castle, once the residence of King Philip of Spain (from whom the town was named), now used as barracks. PMT.O. P. <1000.

Philipstown, par., Ire., co. Louth, bar. and 5 m. NW. Ardee, on riv. Glyde. P. <750.

Phyöngan-do, or **Phyengan-do,** prov., Korea. See *Do.*

Phyöngyang, Phyengyang (*ph* pronounced as in loop-hole), **Pengyang,** or **Pingyang,** tn., Korea, 80 m. W. by S. Wönsan, beautifully situated on the right or N. bank of the Taidong, 36 m. from the sea. The river on which it stands is navigable by vessels of moderate draught to within 15 m. of the city, but above that shallows occur, though at P. itself the river is 20 ft. deep, and 200 yards wide. Centre of a silk industry. Large and thick coal seam near. Gold washings about 20 m. N. Rich iron ore near river banks about 50 m. NNE. Defeat of Chinese by Japanese in Sept. 1894. P. above 20,000 (Carles in *Proc. R. G. S.*, 1886, p. 300); probably 100,000 (Campbell in *Proc. R. G. S.*, 1892, p. 157).

Physkos, tn., Asia Minor. See **Marmaras.**

Piacenza, French **Plaisance,** anciently *Placentia,* city, see of a bishopric, and cap. prov. P., Italy, Emilia, on r. bk. Po, just below its confluence with the Trebbia, 43 m. SE. Milan, with bastioned walls and a ring of forts. The cathedral has a square bell-tower, 223 ft. high, and large crypts. There are other fine churches, the Farnese Palace, once famous, now used as a barracks; the communal palace (1281), and the palace of justice; the communal library of 120,000 vols.; the theatre, large hospital, &c. Some manufactures of silk, cloth; marble quarries. Founded as a Roman colony in 219 B.C.; its walls, the year after, afforded a refuge for the army of Scipio and Sempronius Longus after their defeat by Hannibal on the banks of the Trebbia. Ever since, P. has been of importance as a strategic point, and was in modern times a fortress of the first class. Two great lines of the Italian railway system meet here. Alt. 215 ft. P. (1881) 35,000, the same as in 1871.

Piacoa, vil., Venezuela, Bolivar, on an arm of delta of the Orinoco, 132 m. S. by W. of the SW. point of the isl. of Trinidad.

Piadena, vil., Italy, Lombardy, on the r. bk. of the Oglio, prov. and 20 m. W. Mantua. P. <2000.

Piaggine Soprane, tn., Italy, Campania, prov. and 40 m. SE. Salerno, circle Vallo della Lucania. P. <4000.

Piaggine Sottane, adjoining vil., 2 m. to the W. P. <2000.

Piako, co., New Zealand, North I., crossed in the S. by 38° S., and touched in the E. by 176° E.

Piako, riv., New Zealand, North I., rising in co. P., flows N. into Thames Firth, in about 37° 15′ N., lower course navigable. Length, 68 m.

Pialba, watering-place, Queensland, March co., on shore of Hervey Bay, in 25° 22′ S.; contains sugar-mills. P. <1500.

Piali, vil., Greece, prov. Arcadia, 4 m. S. by E. Tripolis.

Piana, vil., in the W. of Corsica, near the S. side of the Gulf of Porto, arr. and 23 m. N. by W. Ajaccio; noted for the magnificent scenery of the granite rocks known as the Calanches de P. P. <2000.

Piana de' Greci, tn., Sicily, prov. and 10 m. SSW. Palermo. P. 8900.

Pian Castagnajo, comm., Italy, Tuscany, prov. Siena, circle and 17 m. SSW. Montepulciano. P. <4000.

Piane, islet, Tunis. See **Plane.**

Pianella, tn., Italy, Abruzzi e Molise, prov. Teramo, 7 m. NW. by W. Chieti. P. <3000.

Piano del Voglio, comm., Italy, Emilia, prov. and 26 m. SSW. Bologna, circle Vergato. P. <5000.

Piano di Sorrento, comm., Italy, Campania, prov. Naples, circle and 5 m. Castellamare di Stabia, on Sorrento Bay. P. 8100.

Pianosa, Isola, islet, Italy, off the E. ct., in 42° 13½′ N.

Pianosa, Isola, isl., Italy, off the W. ct., about 8 m. S. of the W. end of Elba, in 42° 35′ N. P. 600.

Pianura, tn., Italy, Campania, prov. Naples, circle and 4 m. ENE. Pozzuoli. P. (comm.) <5000.

Piaroas, Indians, Venezuela, on the banks of the upper Orinoco.

Piasnitz, riv., Prussia. See **Zarnowitzer-See.**

Piassabussu, vil., Brazil, Alagoas, on the l. bk. of the Rio São Francisco, 195 m. SW. by S. Pernambuco, 70 m. SW. Maceio.

Piatra, tn., Roumania, prov. Neamţu, on the riv. Bistriţa, 59 m. WSW. Yassy; has paper-mill, and important trade in wood. P. (1873) estimated 20,000; (1889) 20,000.

Piatt, co., U.S., Illinois, crossed by 40° N., and E. of 89° W.

Piauhy, riv., Brazil, state of P., flows NW. and enters the Parnahiba in 6° 25′ S.

Piauhy, one of the NE. littoral states of Brazil (coast-line only 30 m.), naturally formed by the lands between the Rio Parnahiba and the water-parting of the E. part of its basin, drained by rivs. Longa, Poty, P.-Canindé, Gurgueio, Urussu. To a great extent unknown. Lies in the region subject to great periodical droughts, yet numerous cattle are reared on its vast plains. Iron abundant; silver, lead, nitrates, and rock-salt found. Cap. Therezina. See **Brazil,** table.

Piave, riv., N. Italy, rises in the Alps near Lienz, flows SW. to Vas, then SE. to the Adriatic, which it enters at Porto di Cortellazo, 22 m. ENE. Venice. Navigable from its entrance into the prov. of Venice, above that used for floating timber. Length, 137 m.; area of basin, 1583 sq. m.; discharge, mean 2100 cubic ft. per second, highest 106,000 cubic ft. per second.

Piazza, vil., Italy, Lombardy, prov. and 17 m. N. Bergamo. P. <2000.

Piazza Armerina, tn., Sicily, prov. and 18 m. SE. by E. Caltanissetta; a bishop's see; manufactures woollens, and trades in corn, olive oil, and fruits. Alt. 2365 ft. P. 16,000.

Pic, French, *Pico,* Spanish and Portuguese, 'a peak.'

Pic, riv., Canada, Ontario, flows S. from Lake McKay to the NE. corner of Lake Superior, in about 86° 15′ W.

Pica, oasis, Chile, Tarapaca, connected by canal 31 m. long with La Noria (which is WNW.); grapes and other fruit and vegetables. P. <2000.

Picacho, settlement, U.S., Arizona, Pinal co., 173 m. NW. by W. from the SE. corner of the terr.

Picacho de la Veleta, summit of the Sierra Nevada Range, Spain, 18 m. SE. Granada. Alt. 11,385 ft.

Picardy, former prov. of France, now included in deps. Pas-de-Calais, Somme, Nord, Oise, and Aisne.

Picasent, tn., Spain, prov. Valencia, dist. and 5 m. SW. Torrente. P. (comm.) <4000.

Pic du Midi, name given in the Pyrenees to several summits, the most celebrated being those of Bagnères-de-Bigorre, and Ossau, or Pau. The former (alt. 9440 ft.) has a meteorological observatory some feet from its top. Alt. of latter, 9465 ft.

Picerno, tn., Italy, Basilicata, prov. and 8½ m. W. Potenza. P. <5000.

Pichala, Punta, point, N. ct. Chile, in 19° 37′ S., 70° 20′ W.

Pichan, tn., E. Turkistan, 60 m. ESE. Turfan, in 42° 50′ N., 90° 20′ E.

Pichieh-hsien, tn., China, Kweichou, 81 m. WNW. Kwei-yang-fu.

Pichincha, volcano, Ecuador, in W. Cordilleras, Andes, W. of Quito. Alt. 15,805 ft. (Wolf), 15,918 ft. (Whymper), 15,705 ft. (Reiss and Stübel).

Pichit, tn., Siam, on the Liung arm of the Menam, 82 m. ESE. Rahang.

Pichucalco, tn., Mexico, Chiapas, 32 m. SSW. San Juan Bautista. P. 6000.

Pichu-Pichu, summit of Andes, Peru, NE. Arequipa. Alt. 18,600 ft.

Pichuta, pass, N. Chile, between Tarapaca and the Bolivian dep. of Oruro, 87 m. E. Pisagua.

Pickamink, riv., U.S. See **Iroquois River.**

Pickaway, co., U.S., Ohio, S. of 40° N., crossed by 83° W., traversed by the Scioto R.

Pickburn and Brodsworth, stn., Eng., Yorkshire, W. Riding, on S. Yorkshire Rly.

Pickenham, North and **South,** two adjoining pars., Eng., Norfolk, North P., SW. div., 18 m. SE. by E. King's Lynn, 3 m. SE. by E. Swaffham, 1 m. W. Holme Hale stn., P.O. and P.O. (**South P.**). P. (of each) <250; eccles. par. (**North P. with Houghton on the Hill**) P. <500.

Pickens, co., U.S., Alabama, on W. frontier, N. of 33° N.

Pickens, co., U.S., Georgia, between 34° and 35° N. and 84° and 85° W.

Pickens, tn., U.S., S. Carolina, cap. P. co., 22 m. SE. by E. of the NE. corner of Georgia. Alt. 1162 ft. (U. S. C. & G. S.). P. <1500.

Pickering, post-vil., Canada, Ontario, Ontario co., 21 m. NE. by E. Toronto, on Lake Toronto, and a railway. P. <1500.

Pickering, par. and market-tn., Eng., Yorkshire, N. Riding, Whitby div., 15½ m. W. by S. Scarborough, on the NE. R. The castle, first mentioned in reign of Henry III., was for a time occupied by Richard II. Besoms are made. Market-day, M. 15,604 ac. P. <4000. **P. Marishes,** adjoining par., P. <250. **P. Moor,** an upland tract about 7 m. to the N.

Pickett, co., U.S., Tennessee, N. frontier, W. of 85° W.

Pickhill, par., Wales, Denbighshire, E. div., 4½ m. ESE. Wrexham. P. <250.

Pickhill with Roxby, par., Eng., Yorkshire, N. Riding, Thirsk and Malton div., 7½ m. NNE. Ripon, with a stn. (**Pickhill**) on the NE. R., P.O. (**P.**). P. <500.

Pickmere, par., Eng., Cheshire, Knutsford div., 3 m. NE. Northwich. P. <250.

Pickton, par., Eng., Cheshire, Eddisbury div., 3 m. NE. by N. Chester, 1½ m. NW. by N. Mickle Trafford stn. (L. & NW. R.). P. <250.

Pickton, par., Eng., Yorkshire, N. Riding, Cleveland div., 9 m. SE. by E. Darlington, ½ m. W. by S. of its stn. (**Picton**) on the NE. R. P. <250.

Pickup Bank, vil., Eng., Lancashire, Darwen div., 4 m. SE. Blackburn, 2 m. E. by N. Darwen stn. See **Yate.**

Pickwell, par., Eng., Leicestershire, Melton div., 5 m. WNW. Oakham. P. <500.

Pickworth, par., Eng., Lincolnshire, S. Kesteven div., 8 m. E. by S. Grantham, 4½ m. W. Billingborough stn., P.O. P. <250.

Pickworth, par., Eng., Rutland, 9 m. ENE. Oakham, 3 m. SSW. Little Bytham stn. P. <250. See **Casterton, Great.**

Pico, Spanish and Portuguese, 'a peak.'

Pico, one of the Azores Is., in the Atlantic, covered with lava; has a volcanic peak 7613 ft. high, in 38° 28′ N., 28° 25′ W. Chief towns, Lagos, Magdalena, and San Rocco. Area, 254 sq. m.

Pico, tn., Italy, Campania, prov. Caserta, 17 m. N. Gaeta. P. <3000.

Pico, or **Catherine,** strait, between Iturup and Kunashir Is., Kurile Is., N. Japan; width, 16 m.

Pico d'Adan (Adam's Peak), summit, Chile, Magellan terr., NW. Desolation I., marking the W. entrance to Magellan Strait. Alt. 2855 ft.

Picolet Point, cape, N. ct. Haiti I., marking the entrance to the Bay of Cap Haitien.

Pico Peak, mt., U.S., in Green Mountain Range, Vermont, Rutland co., 6 m. ENE. Rutland. Alt. 3935 ft.

Picos, Sierra de, mt., Spain. See **Cantabrian Mountains.**

Picos de Aroche, range of mts. on the border of Spain and Portugal, stretching about 25 m. from W. by S. to N. by E., in about lat. 38° N., parallel to the Serra de Aracena.

Picquigny, tn., France, dep. Somme, on the Somme, arr. and 17 m. WNW. Amiens. P. <2000.

Picton, tn. and port of entry, Canada, Ontario, Prince Edward co., on the Bay of Quinté, 35 m. WSW. Kingston. P. <4000.

Picton, stn., Eng., Yorkshire. See **Pickton.**

Picton (formerly **Stonequarry**), tp., New South Wales, Camden co., 35 m. SW. by W. Sydney; in the neighbourhood, kerosene shale has been found. P. <1500.

Picton, port and bor., New Zealand, South I., chief port of Marlborough co., 38 m. E. Nelson, 20 m. N. Blenheim; has gold mining, and an excellent harbour, with a depth of water at wharf of 20 ft. Vessels convey produce direct to London. P. <1500.

Picton, Mount, in S. of Tasmania, source of Picton R. Alt. 3340 ft.

Picton Channel, strait, Chile, on W. side of Wellington I.,

and E. side of Mornington I. and North's Archipelago, between 49° 10′ and 49° 50′ S.

Pictou, tn. and port of entry, Canada, Nova Scotia, P. co., on P. Harbour, 90 m. NE. by N. Halifax. The harbour, which has a bar at its entrance with 22 ft. depth at high water ordinary springs and 20 ft. ordinary neaps, affords good anchorage in 30 ft. at high and 24 ft. at low water. There is a total of 3536 ft. of wharfage, with 20–30 ft. at high water ordinary springs. There are also two patent slips, 232 and 178 ft. long respectively. P. <3000.

Pictou Harbour, a large inlet, which above Pictou divides into three arms, of which the eastern receives the E. River, the middle the Mid River, and the western the W. River.

Pictou Island, isl., 7 m. long, 7 m. N. of the mouth of Pictou Harbour.

Picts Cross, P.O., Eng., 4 m. from Ross, Herefordshire.

Picture Rocks, manufacturing bor., U.S., Pennsylvania, Lycoming co., Muncy R. P. <1500.

Piddinghoe, par., Eng., Sussex, on the Ouse, div. and 5 m. S. by E. Lewes, 1½ m. NW. Newhaven, P.O. P. <250. See **Telscombe.**

Piddington, par., Eng., Mid div. of Northamptonshire, 5 m. SE. by S. Northampton, 1½ m. W. by S. of its stn. (**P. and Horton**) on the M. R., PMT.O. P. <750. See **Horton.**

Piddington, par., Eng., on the E. border of Oxfordshire, Woodstock div., 11 m. NE. by E. Oxford, 5 m. SE. Bicester. P. <500.

Piddle, riv., Eng., Dorsetshire, flows SE. past Puddletown into Poole Harbour. Length, 20 m.

Piddle, North, par., Eng., Worcestershire, Evesham div., on the Piddle, 7½ m. E. Worcester, 4 m. N. Pershore stn. P. <250.

Piddlehinton, PT.O., Eng., Dorsetshire. See **Puddlehinton.**

Piddletown, PMT.O., Eng., Dorsetshire. See **Puddletown.**

Piddletrenthide, PMT.O., Eng., Dorsetshire. See **Puddletrenthide.**

Pidley with Fenton, par., Eng., Huntingdonshire, Ramsey div., 6½ m. NE. by E. Huntingdon, 2 m. SSE. Warboys stn., P.O. (**Pidley**). P. <500. See **Somersham.**

Pidrutalagala, formerly **Pedrotallagalla,** mts., Ceylon, Central Prov., 21 m. SSE. Kandy. Alt. 8295 ft.

Piecombe, par., Eng., Sussex, Cuckfield union, P.O. (**Pyecombe**). P. <500.

Piedad, Ponta da, penin., S. extremity of Portugal, Algarve, in about 9° W.

Piedad de Rivas, La, tn., Mexico, state Michoacan, cap. dist. P., 78 m. NW. Morelia. P. (comm.) 16,200.

Piedade (Portuguese, 'mercy, pity'), vil., Brazil, state and 45 m. W. by S. São Paulo.

Piedecuesta, tn., Colombia, dep. Santander, 175 m. N. by E. Bogotá.

Piedicroce, vil., Corsica, arr. Corte, 23 m. SSW. Bastia. P. <2000.

Piediluco, vil., Italy, Umbria, prov. Perugia, circle and 6 m. ESE. Terni; frequented summer resort. P. <2000.

Piedimonte, tn., Italy, Campania, prov. Caserta, 43 m. E. by N. Gaeta. P. 6000.

Piedmont, Italian **Piemonte** ('foot of the mountains'), div. (*compartimento territoriale*) in the NW. of Italy, composed of four provs., two in the N. (Turin and Novara), and two in the S. (Cuneo and Alessandria). P. forms roughly a parallelogram between the Alps and the Apennines on the N., W., and S., and bounded on the E. by the Lago Maggiore, and the Ticino in its N. part, but further S. excluding the Lomellina (between the Ticino, Sesia, and Po). The interior of the parallelogram belongs mainly to the plains of the Po basin, but includes also the hills of Montferrat (Monferrato), between the Po and the Tanaro. Besides the Po, the chief rivers are, on the l. bk. of the Po, the Pellice, Dora Riparia (whose valley is ascended by the Mont Cenis Rly.), Northern Stura, Dora Baltea, Sesia, and Ticino (with its trib. the Toce), and on the r. bk. of the Po, the Varaita, Maira, Tanaro (with the Bormida), and the Scrivia. Irrigation canals are numerous, the principal being the Cavour Canal (*q.v.*), the Charles Albert Canal, the latter originating in the Bormida, and after passing Alessandria discharging into the Tanaro. The principal crops are wheat, maize, and rice, the last cultivated almost exclusively in the prov. of Novara, in the dist. round Vercelli. The vine is cultivated in all the provs., but chiefly in that of Alessandria, in which the wines of Asti are noted. Chestnuts also are largely cultivated. Hemp covers a considerable area in provs. Cuneo and Turin. The silkworm is extensively reared. Useful minerals are rare. A little inferior anthracite is obtained in the Alpine valleys in the NW. There are gold veins in the Alps, in the Val d' Anzasca, and in the Apennines to the S. of Ovada, but in neither locality are they of much economic importance. The nickel ores of the Val Sesia have ceased to be worked since the discovery of those of New Caledonia. The granites of the Lago Maggiore and the Lago d' Orta, the syenites of the dist. of Biella, and gneisses of Luserna and other parts of the Alps, are all excellent in quality, and extensively quarried. Mechanical industries are not generally concentrated in the larger towns, but are scattered over the smaller towns and villages. The most widely diffused is the reeling of silk, with which silk throwing and weaving is often associated. Woollen and cotton manufactures are most extensively pursued in the Alpine comms. of prov. Novara, especially Biella, Occhieppo Inferiore, and other places near; but also to a considerable extent in Rivarolo, Canarese, Caselle Torinesi, Chieri, and elsewhere in prov. Turin. See **Italy** (table and Historical Sketch) and **Alps.**

Piedmont, vil., U.S., Missouri, Wayne co., 84 m. W. by N. Cairo (Ill.). P. <1500.

Piedmont, tn., U.S., S. Carolina, Greenville co., 40 m. SE. by E. of the NE. corner of Georgia. P. <3000.

Piedmont, vil., U.S., W. Virginia, Mineral co., on N. branch of Potomac R., 173 m. E. Wheeling, in the great coal region of Virginia; has extensive railroad machine shops. P. <1500.

Piedra Blanca, settlement, Argentine Republic, prov. and 6 m. NE. by N. Catamarca, 108 m. SSW. Tucuman.

Piedrabuena, tn., Spain, prov. and 12 m. WNW. Ciudad Real, cap. dist. P. P. (comm.) <4000.

Piedrafita, comm., Spain, prov. and 33 m. SE. Lugo, dist. Becerreá. P. <4000.

Pilar, tn., Argentine Republic, prov. and 39 m. NW. by W. Santa Fé. P.<2000.

Pilar, tn., Brazil, Alagoas, 140 m. SW. by S. Pernambuco, 19 m. W. Maceió.

Pilar, vil., Brazil, Parahiba, on the Rio Parahiba, 66 m. NW. by N. Pernambuco, connected by rail with the town of Parahiba.

Pilar, vil., Brazil, prov. and 70 m. W. by S. São Paulo.

Pilar, Villa del, formerly **Neembucu,** tn. and river-port, Paraguay, on l. bk. riv. Paraguay, 112 m. SSW. Asuncion, 48 m. above the confluence of the Parana. P. 6700.

Pilas, tn., Spain, Andalusia, prov. and 19 m. WSW. Seville, dist. Sanlucar la Mayor. P. (comm.)<5000.

Pilate, Mont, mt., France, in the Cevennes chain, between deps. Rhône and Loire. Alt. 4705 ft.

Pilate, or **Pilatus, Mount,** an offset of the Alps, between the Swiss cantons Lucerne and Unterwalden. Its principal peak, the Tomlishorn, is 5 m. SW. Lucerne; alt. 6998 ft.

Pilaya, Camblaya, or **Suipacha,** riv., Bolivia, r. bk. trib. of the Pilcomayo, which it enters about 30 m. above the mission of San Francisco, 124 m. from its confluence. It is formed by the union of the San Juan (370 m.) and the Cotagaita (250 m.). The former flows chiefly NE. from the slopes of Mount Incahuasi in 23° S., the latter rises in middle of dep. Potosi, and flows E., the direction of the united streams.

Pilburra Creek, riv., W. Australia, NW. ct., trib. of the Yule, in 118°–119° E.

Pilburra Goldfield, a proclaimed area of about 32,000 sq. m. in the NW. of Western Australia, between the Fortescue and De Grey Rivs. A low alluvial coast-plain.

Pilciao, place with silver-refining works in connection with the mines of Fuerte de Andalgalá, Argentine Republic, Catamarca, in 27° 40′ S., 66° 36′ W. Alt. 2644 ft. Rfall. (7 yrs.), 5.2 in., April–Sept. 0.6 in.

Pilcomayo ('bird-river'), riv., S. America, rises in Bolivia, about 60 m. NW. of Potosi, and flows SE. to the Paraguay, for half of its course through Bolivia, and for the remainder separating the Argentine Republic from the Republic of Paraguay, and crossing the Gran Chaco in about the middle. The greater part of its course in Bolivia is winding and torrential, and in about 21° S. it passes over several rapids. From that point, until it flows into the Paraguay R. at Asuncion, in about 25° S., its stream glides between low banks at a medium pace, and frequently expands into swamps and lagoons. It is asserted (Thouar) to be navigable for vessels of 220 tons, drawing 2½ ft., up as far as San Francisco, in about 23° N. The principal trib. is the Pilaya, on the r. bk. Length not known, probably exceeding 1500 m.

Pilcot, P.O., Eng., Hampshire, 1½ m. SE. Winchfield stn.

Pilgram, tn., Austria, Bohemia, 16½ m. W. by N. Iglau; has mineral waters, and wool-spinning. P.<5000.

Pilgrims Hatch, P.O., Eng., Essex, 2 m. NW. Brentwood.

Pilgrim's Rest, tn., S. African Republic, 23 m. NE. Lydenburg.

Pilham, par., Eng., Lincolnshire, W. Lindsey div., 4½ m. NE. Gainsborough, 1½ m. E. Blyton stn. P.<250.

Pilibhit, municip., Brit. India, NW. Provs., cap. dist. P., 31 m. NE. Bareilly; staple trade in rice, borax, spices, sugar, and timber; manufactures metal vessels; sugar-refining. Outside the town is a military encamping ground. P. 33,800; Hindus, 19,700; Moham. 13,800.

Pilica, riv., Russian Poland, chief l. bk. trib. of Vistula, which it joins 28 m. above Warsaw, from SW. Length, 200 m.; navigable from Przedborz, 140 m.

Pilica, tn., Russian Poland, govt. and 52 m. SW. Kielce, on Pilica R., 940 ft. above the sea; old castle. P. 5000.

Pilis, comm., Hungary, 27 m. SE. by E. Budapest. P.<5000.

Pilis, isolated mt., Hungary, on r. bk. of the Danube, between Budapest and Gran. Alt. 2475 ft.

Pilkhuwa (Pilkhua, census), municip., Brit. India, NW. Provs., dist. Meerut, 27 m. E. by N. Delhi; has cotton-weaving. P. 5400; Hindus, 4700; Moham. 700.

Pilkington, par., Eng., Lancashire, partly in bor. of Bury; 5469 ac. P. 14,500.

Pill, eccles. par., Eng., Somerset, Easton in Gordano and Portbury pars., on the Avon, 5 m. NW. Bristol, on the G. W. R., PMT.O. P.<2000.

Pillar, cape, Chile, at the NW. of Desolation I., in 52° 40′ S., S. side of Pacific entrance to Strait of Magellan.

Pillar, Cape, Tasmania, SE. point of Tasman's Penin., in 148° 2′ E. long.

Pillar Mountain, Eng., Cumberland, 4 m. SE. foot of Ennerdale Water. **P. Rock,** one of the most dangerous crags in the Lake dist., is at its foot. Alt. 2927 ft.

Pillaton, par., Eng., Cornwall, Launceston div., 9 m. NW. Plymouth. P.<500.

Pillau, tn., Prussia, prov. E. Prussia, circle Fischhausen, on the W. shore of Danzig Bay, 24 m. W. by S. Königsberg, on the N. side of the entrance to the Frisches Haff. Harbour for Elbing, Braunsberg, and Königsberg, with which it is connected by two canals, available for vessels drawing 12½ and 18 ft. respectively; has sea-bathing and a school of navigation. There is good anchorage outside the breakwater in 7 fathoms depth, and between the breakwater and harbour in 5 fathoms. The average depth on the bar is 21½ ft., and the average depth in port 22 ft. There are 55,670 ft. of quayage available for vessels drawing 21½ ft., and a pontoon 150 ft. long. P. is defended by a fortress, constructed by Gustavus Adolphus of Sweden in 1626; manufactures sails, caviar, and amber ornaments. P.<4000. **Alt-Pillau,** adjoining village, P.<3000.

Pillerton Hersey and **Pillerton Priors,** two adjoining pars., Eng., Warwickshire. P. Hersey, Rugby div., 7½ m. SE. by E. Stratford-on-Avon, P.O., P.<250; P. Priors, P.O., P.<250.

Pinyalu, tn., Cochin-China, cap. arr., 12 m. NW. Pnompenh.

Pioche, vil., U.S., Nevada, Lincoln co., 290 m. ESE. Carson City, and 110 m. SW. Milford (Utah); has several rich silver-mines. Alt. 7000 ft. P. <1500.

Piojes, Indians, E. Ecuador, on the banks of the Aguarico and Napo rivs.

Piolenc, tn., France, dep. Vaucluse, arr. and 4 m. NW. by N. Orange. P. <2000.

Piombin'o, seapt., on the W. ct. of Italy, Tuscany, prov. Pisa, 39 m. S. by E. Leghorn. Mount P. is insular with an alt. of 940 ft. P. <3000.

Piombino, Channel of, Italy, W. ct. Tuscany, between Elba and the penin. of P., 2 m. ENE. Elba; in the channel is Palmajola, with lighthouse (visible 24 m.). The Gulf of P. opens opposite Elba on the coast of Tuscany.

Pioneer, mining-tn., Tasmania, on Ringarooma R., Dorset co., 49 m. NE. by E. Launceston. P. <1500.

Pioneer, vil., U.S., Ohio, Williams co., 53 m. W. Toledo. P. <1500.

Pioneer Peak, a peak of the Karakoram Range, in about 35° 39′ N., 76° 42′ E., alt. estimated at 22,600 ft., separated by an impassable chasm from the peak of the Golden Throne, about 1000 ft. higher; ascended in Aug. 1892 by W. M. Conway, the highest altitude yet attained by mountain-climbers.

Pionsat, tn., France, dep. Puy-de-Dôme, arr. Riom, 17 m. S. by E. Montluçon. P. <2000.

Piopolis, or **St. Zenon,** post-vil., Canada, Quebec, Compton co., 12 m. from Lake Megantic. P. <1500.

Piora, val., Switzd., cant. Ticino, stretches E. from the valley of the Tessin, beginning SSE. of the St. Gothard.

Pioraco, vil., Italy, The Marches, prov. Macerata, on the Potenza, 30 m. E. by N. Perugia. P. <2000.

Piossasco, tn., Italy, Piedmont, prov. and 11 m. SW. Turin. P. <3000.

Piotrków, govt. of Russian Poland, has Kalisz and Warsaw on N., Kielce and Silesia on S. and W. Surface undulating, and hilly in SW., the hills attaining from 1200 to 1600 ft. alt. Carboniferous limestones occupy a wide area in SE. (dist. Będzin); Permian conglomerates, pierced by porphyries, appear at Dąbrowa; they are surrounded by beds of Muschelkalk, which spread into Silesia; zinc ores (about 35,000 cwts.) are extracted near Będzin. The hilly region of the upper Warta is occupied by Keuper deposits, containing lignite and thick layers of iron ores (limonite), out of which iron is obtained; Jurassic deposits (Kellowey and Oxford) are widely spread in SW., while Upper Jurassic deposits appear in the N. Watered by the Warta and its r. bk. tribs. in S., the Pilica on E. frontier, and the heads of tribs. of the Vistula in N. Forests cover 894,000 acres; soil well cultivated; large areas under potatoes, grown for distilleries; there are also numerous breweries, besides manufactures of starch, and partly beetroot for sugar-works. The population includes 75 per cent. Poles, 12½ per cent. Germans (chiefly at Łódź), and 12 per cent. Jews. P. is the chief manufacturing govt. of Poland, and, with its aggregate production, attaining £9,610,000 (in 1891) for the large factories only, takes the fourth place in the Russian empire after Moscow, St. Petersburg, and Vladimir. The chief industries are cottons (at Łódź), woollen stuffs (at Tomaszów), and iron; coal extracted from twenty-six mines, to the amount of 1,800,000 tons in 1886–91, and 2,837,000 in 1892. Besides ninety-five large manufactories (over 100 workmen), and 333 smaller ones (10 to 100 women), there are 12,700 small manufactories employing less than ten women each, and representing the greatest variety of trades. Crossed NE. to SW. by railway from Warsaw to Vienna. Divided into eight dists.: Piotrków, Będzin, Brzeziny, Częstochowa, Łask, Łódź, Nowo Radomsk or Radomsk, and Rawa. Has several populous towns, besides the towns Tomaszów, Zgierz, Pabianice, and the villages Sosnowice, Sielce, and Zawiercie, having over 10,000 inhabitants each. Area, 4729 sq. m. P., thickest in Poland, and rapidly increasing, (1866) 620,000; (1886) 927,800; (1890) 1,091,300.

Piotrków, cap. of above govt., 90 m. by rail SW. Warsaw, on Strawa R.; steam flour-mills, manufactures of agricultural implements. P. (1890) 28,600.

Piove, tn., Italy, Venetia, prov. and 11 m. SE. Padua. P. 3000.

Piryatin, dist. tn., Russia, govt. and 118 m. NW. Poltava, connected by rail with Kiev–Kursk Rly. at Nyezhin (78 m.); trade in corn, cattle, and salt. P. 6700.

Pisa, city, Italy, cap. of Tuscany, on the Arno (both banks), 13 m. NE. Leghorn, formerly a seaport, but now 4 m. inland, owing to the silting up of the river; on a fair and fertile plain. Once a rival of Venice and Genoa, its commerce has been transferred to Leghorn. It has ancient walls and two citadels; the river quays are joined by three handsome bridges. Still noted for its public buildings, as the cathedral (1063–1118), with beautiful dome, nave 109 ft. high, and noble façade; the 'Leaning Tower,' a round marble campanile, much admired for its rich Romanesque pillars and details; the circular church of St. John, and many other fine churches and palaces; university founded in 1338, now with 48 ordinary and 10 extraordinary professors, with library (120,000 vols.) and museum; academy of fine arts; several important educational institutions. The Leaning Tower deviates 14 ft. from the perpendicular, and is 180 ft. high, consisting of 8 stories divided by rows of columns, the walls being entirely of marble. The chief architectural ornaments of P. belong to the 11th century, when it was a rich and powerful republic. At length, after frequent wars with Florence, Genoa, and other cities, P. was conquered at sea in 1284, and in the middle of the 16th century had scarcely 8000 inhabitants, instead of 150,000, as once. In the middle ages the Arno made a safe harbour, navigable for ships of war. The modern P. is a flourishing and wealthy city. Alt. 30 ft. Mean temp., Jan. 44°, July 77.5°. P. (1871) 25,900; (1881) 37,700; (1890) 44,500; comm. P. 53,960.

Pisac, vil., Peru, dep. and about 12 m. ENE. Cuzco, on r. bk. of Vilcamayo, has ruins of the 'Sanctuary of the Sun,' fortress and remains of old town. Alt. 9900 ft. P. (dist.) <5000.

Pisagua, tn., Chile, prov. Tarapaca, on the W. ct., 44 m. N. Iquique; port of shipment for large quantities of nitrate of soda. Bad port; lighters loaded by a kind of rafts made with blown up seal-skins. Vessels anchor close in shore in 20 to 30 fathoms. Destroyed by the great wave following the earthquake of Aug. 13, 1868, and afterwards burnt by the Chileans in the war with Peru; since totally rebuilt. P. <5000.

Pisang (Malay, 'banana'), two isls., Malay Archipelago, one in the Jilolo passage, the other belonging to the Banda Is.

Pisang Bay, Dutch New Guinea, crossed by 4° 40′ S., 136½° E.

Pitt (or **Pit**) **River,** U.S., California, issues from Goose Lake in NE. of state, and flows S. then W. and SW., and joins the Sacramento (of which it is much the longest headstream) in 40° 45′ N. Length about 140 m.
Pittsburg, city, U.S., Kansas, Crawford co., 117 m. S. Kansas City, 30 m. N. by W. of the SE. corner of the state. P. 7000.
Pittsburg, formerly also **Pittsburgh** [The city was chartered in 1816 under the form Pittsburg, which is still the official form, and is now the only form recognised by the U.S. Board on Geographic Names; the *h* appears to have been added by the P.O. Department], city and port of entry, U.S., in the W. and towards the S. of Pennsylvania, cap. Allegheny co., on a plain between the Monongahela and Allegheny Rivs. Allegheny, Birmingham, Manchester, and Laurenceville, practically suburbs of P., are all situated within a radius of 5 m. from the Court House. The manufactures are carried on in the outlying towns and villages, the warehouses being in P. Lying on a coalfield, in a dist. which at one time afforded considerable supplies of iron ore (now nearly exhausted), and at the confluence of important navigable streams, one of which, the Monongahela, brings down large quantities of coal, P. early became the greatest centre of the manufacture of iron and glass in the U.S., which it still remains, now producing about one-third of the iron and steel manufactured in the country. The use of coal as a fuel in the P. factories was afterwards to some extent replaced by petroleum pumped from the oil dist. in the NW. of Pennsylvania, and this again has since 1875, more generally since 1884, been replaced by natural gas led in pipes from Canonsburg, Murraysville, Leechville, Tarentum, and other places within a radius of 20 m. This fuel is specially valued in the glass-works, producing glass of peculiar transparency. Coal and iron abound in its vicinity; it is one of the most important centres in the world for the manufacture of iron and steel goods. It has numerous blast-furnaces, rolling-mills, and glass-works; other industries are brass and copper works, cotton, flour, paper, saw, and planing mills, &c. Shipbuilding, especially for steamers, is carried on on a large scale, and most of the machinery for the Mississippi steamboats is made here; steam and other boats built in sections are sent by rail to New York, shipped to destination, and there put together for service. P. was founded in 1765 on the site of Fort du Quesne; on its capture by the British the name was changed to Fort Pitt. Alt. 776 ft. Mean temp., yr. 52.5° F., Jan. 31.1°, July 74.3°; rfall. (12 yrs.), 37.04 in. P. (1800) 1600; (1830) 12,500; (1850) 46,600; (1870) 86,100; (1880) 156,400; (1890) 238,600.

Plata, Spanish, 'silver.'

Plata, isl., Pacific Ocean, off the coast of Ecuador, 20 m. SW. Cape San Lorenzo.

Plata, La, tns. See **La Plata.**

Plata, Rio de la, or **River Plate** ('silver river'), a vast inlet on the E. ct. of S. America, between Uruguay and the Argentine Republic, forming the estuary of the rivs. Paraná and Uruguay, the former of which enters it by a long delta at its head, the latter immediately to the E. of the delta. The estuary measures 170 m. in length to a line connecting Maldonado with Cape San Antonio, where the width is 140 m., but measured to a line connecting Montevideo with Cape Piedras, where the width is 65 m., and the estuary proper (about 5000 sq. m. in extent) may be said to end, the length is only 120 m. The whole extent is very shallow, generally less than 10 fathoms above Maldonado to San Antonio, and less than 5 fathoms above Montevideo to Piedras. [See **Buenos Aires.**] The muddy waters brought down by the rivs. Paraná and Uruguay can be distinguished for more than 200 m. out to sea beyond Montevideo. The estuary was discovered by Diaz de Solis in 1515. Discharge estimated at 700,000 cubic ft. per second; annual deposit of sediment at 1,543,500,000 cubic ft.

Pluscarden Abbey, remains of a Cistercian abbey, Scot., Elginshire, 5½ m. SW. by W. Elgin, and 2½ m. SSE. Alves stn., foundation dating from 13th century, P.O. (**Pluscarden**).

Pluss, riv., Malay Penin., Perak, l. bk. trib. of Perak R.; its mouth, in about 4° 53′ N., is near the village of Kambiri. Entire length, 62 m.; one-third navigable, to the rapids.

Pluvigner, tn., France, dep. Morbihan, arr. and 17 m. E. by N. Lorient. P. <2000.

Plyesh, vil., Turkey in Europe, 67 m. WNW. Novibazar.

Plym, riv., Eng., in the SW. of Devonshire, flows into Plymouth Sound at Plymouth.

Plymouth, mun. bor. (by prescription, first incorporated by statute in 1439), parl. bor. (2 members), co. bor., seapt. and naval station, Eng., Devonshire, 36 m. SW. and in the diocese of Exeter, at the confluence of the Plym and Tamar, at the head of Plymouth Sound, with stns. on G. W. R. and SW. R. It was named *Tamarweorth* by the Saxons, and afterwards *Sutton* (*Sutone* in Domesday), returning two M.P.'s under the latter name in the time of Edward I. Along the eastern side of the **Hamoaze,** which is the estuary of the Tamar, is the town of **Devonport,** and between the Hamoaze and P. lies a smaller town, **Stonehouse;** these form one continuous aggregate known as 'the Three Towns,' a term used as synonymous with P. taken as a whole. From the great irregularity of the sites, the variety and change of scene, and the beauty of the neighbourhood, it is one of the most attractive of English large towns. A prominent feature of P. is the Hoe, a lofty and rocky ridge between Sutton Pool and Millbay, with limestone cliffs, commanding extensive prospects over sea and land, and laid out with walks and drives. A public park slopes from it down to the promenade pier. Besides a chain of strong forts and barracks at Millbay, P. is protected by a citadel E. of the Hoe, which commands the Sound, the ramparts forming a favourite resort, with fine views. The Sound is an inlet of the sea, 3 m. wide at the entrance, with lofty banks on three sides, containing Drakes I., fortified, and protected by the celebrated breakwater (1812), 1700 yds. long (cost £1,500,000). Mount Edgecumbe, on its western shore (and in the co. of Cornwall), is famed for the beauty of its prospects, groves, and gardens. The Sound contains excellent anchorage for all the British navy. Along the Hamoaze, to W., are the dockyard, arsenal, and other government establishments. On the E., the harbour of Catwater with Sutton Pool affords ample room for shipping arriving from all countries. Besides a large coasting trade, P. has traffic with America, W. Indies, Mauritius, Africa, and the Baltic, and is the port of starting and landing for several lines of ocean steamers. The Great Western Dock is 464 ft. long by 80 ft. at entrance, another 242 ft. by 50 ft., and a third 144 ft. by 37 ft.; the Great Western Pontoon 300 ft. long, and a patent slip 300 ft. by 125 ft. The Great Western Wet Dock is 1200 ft. long by 450 ft., with 2640 ft. quayage; the Millbay Tidal Harbour, 35 ac. area, 3380 ft. quayage; Sutton Tidal Harbour 3500 ft. quayage, Catwater 6000 ft. quayage; there is also 350 ft. of quayage on the riv. Plym. P. has recently much improved in street architecture and general appearance as a town. The Guild Hall forms an imposing Gothic group of buildings, with a lofty tower. The market-place occupies 3 ac. There are many important schools and colleges, and several large charitable institutions. Chief exports, copper, lead, tin, granite; imports, mainly timber and agricultural produce. Manufactures unimportant, gin, sailcloth, soap, &c. The fisheries are extensive. Market-days, Tu., Th., and S.; cattle-fair, first Tuesday in April. Alt. 69 ft. Mean temp. (16 yrs., 1865-80), yr. 51.5° F., Jan. 42.2°, July 62.5°. Mun. bor. P. (1821) 21,600; (1851) 52,200; (1871) 68,800; (1891) 84,200; parl. bor. P. (1891) 87,500.

Plymouth, gold-mining vil., U.S., California, Amador co., 36 m. E. by S. Sacramento. P. <1500.

Plymouth, tn., U.S., Connecticut, Litchfield co., 21 m. WSW. Hartford; has large manufacture of locks, carriage and iron works. P. <3000.

Pnompenh, Panompenh, or **Penompenh,** cap. of Cambodia, on r. bk. Mekong, at point of junction of the Tonle (or Tale) Sap arm, 130 m. WNW. Saigon.

Po, tn., China, prov. Nganhwei, 220 m. NW. by W. Nanking.

Po (*Padus and Eridanus*), largest riv. of Italy, in the N., irrigating, with its affluents, the entire plain of Piedmont and Lombardy, rises in Monte Viso, in 44° 38′ N., 7° 0′ E., at an alt. of 6700 ft.; flows first NE. to Turin, and thence mostly eastward, with a very tortuous course, to the Adriatic, which it enters by several mouths between 44° 48′ and 45° 10′ N., the principal being the Po della Maestra, Po della Tolle, Po di Goro, and Po di Volano. The delta stretches 35 m. from N. to S. By the time the river has reached Pavia, it is only 300 ft. above the level of the Adriatic; indeed, in the first 20 m. or so it descends 5500 ft. Principal affluents on left, the Dora Riparia, Dora Baltea, Sesia, Ticino, Lambro, Adda, Oglio, and Mincio; and on the right, the Maira, Tanaro, Trebbia, Taro, Parma, Secchia, and Panaro. The Po is, in many parts of Lombardy, above the neighbouring plains; below Piacenza (145 ft. alt.), it is enclosed by embankments (510 m. in total length), formed by its own deposits, and carefully kept up to prevent inundations from floods. Several canals connect the tribs. with one another and with the mother-river, the greatest being the Cavour Canal, joining the Ticino with the Po. Its ordinary width at the head of the delta averages 1600–1800 ft. Its current in the dry season is sluggish, but in spring and summer turbulent. Its rapid stream, numerous islands, and the many sandbanks in its lower reaches, greatly impede navigation; but it is highly useful in fertilising the country, and abounds with sturgeon, salmon, and other fish. Length, 418 m.; area of basin, 26,800 sq. m.; discharge, mean 61,300 cubic ft. per second, highest 247,200 cubic ft. per second.

Poas, or **Los Votos,** volcano, Costa Rica republic, 19 m. NW. San José. Height, 8500 ft.

Pocahontas, vil., U.S., Arkansas, Randolph co., on Black R., which is navigable for steamboats to this point. P. <1500.

Podkumok, or **Little Kuma,** riv., N. Caucasia, r. bk. trib. of Kuma; mineral waters at Pyatigorsk, Essentuki, and Kislovodsk. Length about 100 m.

Podolia ('low-lying land'), govt. of SW. Russia, has Volhynia on N., Kiev and Kherson on E. and S., Bessarabia on SW., and Austrian Galicia on W.; intersected in the direction of its length, from NW. to SE., by two parallel ridges of hills, the highest of which attain 1150 ft. Watered by navigable Dniester, which flows on SW. border, and Bug, which flows parallel to it in a somewhat swampy valley. The former is an important channel for export trade. Soil very fertile, and well-cultivated. Forests cover about 200,000 ac. Climate moderate, the average temp. at Kamenets being, yr. 48°, Jan. 24°, July 69°. Population Little Russians, Poles (12 per cent.) and Jews (13 per cent.), Moldavians, and some Germans. Cereals exported, good cattle, bee culture; sericulture extending; numerous tobacco plantations, especially about Kamenets; rising manufactures, especially sugar-works, flour-mills, distilleries, and lately woollen cloth mills. Brisk trade with Austria (chief custom-houses, Gusyatin and Isakovets). Animated fairs (Balta, Yarmolintsy). Railway from Odessa to Galicia, parallel to frontier, with many lateral branches. Divided into twelve dists.: Kamenets Podolsk (cap. of prov.), Bratslav, Gaisin, Letichev, Litin, Mohilev-on-Dniester, Novaya Ushitsa, Olgopol, Proskurov, Vinnitsa, Balta, and Yampol. Bar, Khmelnik, Tulchin, and many others also have municipal institutions. Area, 16,224 sq. m. P. (1881) 2,242,700; (1890) 2,604,800.

Podolsk, dist. tn., Russia, govt. and 23 m. by rail S. Moscow, on hilly banks of Pakhra, crossed by two bridges, at junction of two highroads to Warsaw and Crimea; limestone quarries; active carrying trade. P. 10,920.

Podor, military post, French Senegal, 115 m. NNE. St. Louis, on l. bk. Senegal, in 16° 30′ N., 15° 1′ W.; has trade in gums.

Podrinje, prov., on W. frontier of Servia, crossed by 44½° N.

Podsosninskoye, vil., E. Siberia, prov. Yeniseisk, 80 m. WSW. Krasnoyarsk, on navigable Chulym. P. <5000.

Podunavlje, prov., Servia, on the Danube, bounded on the E. by the Morava; cap. Semendria (Smederevo).

Podwoloczyska, tn., Austria, Galicia, dist. Skalat, 25 m. E. Tarnopol; trade in cereals. P. <4000.

Point Judith Pond, lake, U.S., Rhode Island, in the extreme SE. of Washington co., in 41° 23′ N., 71° 30′ W.

Point Lonsdale, Victoria, W. entrance to Port Phillip Bay, in 144° 38′ E. long.

Point Lookout, headland, Queensland, S. of Moreton Bay in 153° 34′ E. long.

Point McLeay, post-tn., S. Australia, Russell co., 63 m. SE. Adelaide by road and rail. In the neighbourhood, at Reidtown, is a mission station of the Aboriginal Friends' Association. P. <1500.

Point Marblehead, vil., U.S., Ohio, Ottawa co., on Lake Erie, 12 m. E. Port Clinton; limestone is quarried. P. <1500.

Point Nepean, E. entrance to Port Phillip Bay, Victoria, in 144° 40′ E. long.

Pointon, par., Eng., Lincolnshire, S. Kesteven div., 10 m. NW. by W. Spalding, P.O. P. <500. See **Sempringham.**

Point Parker, port, Queensland, Porchester co., 95 m. ESE. from the NW. point of the colony, W. of Bentinck I., in 139° 10′ E. long. P. <1500.

Point Pedro, tn. and co., Ceylon, Northern prov., on the N. ct. of Jaffna I., 114 m. NW. by N. Trincomali.

Point Perpendicular, cape, New South Wales, N. of Jervis Bay, in 35° 5′ S. lat.

Point Pleasant, vil., U.S., New Jersey, Ocean co., on the coast, 39 m. E. by S. Trenton. P. <1500.

Point Pleasant, tn., U.S., W. Virginia, cap. Mason co., at the confluence of Great Kanawha R. with the Ohio, 45 m. NW. Charleston; has boat-building, and extensive trade in lumber and coal. P. <2000.

Point Shediac Bay, Canada, New Brunswick, inlet of Northumberland Strait, between cos. Kent and Westmorland.

Point Sturt, postal-tp., S. Australia, Hindmarsh co., 53 m. SE. Adelaide by road and rail. P. <1500.

Point Whidby, headland, S. Australia, NW. Avoid Bay, in 153° 3′ E. long.

Pointzpass, tn., Ire., NE. cos. Armagh and Down, bars. Lower Orior and Upper Iveagh, 9 m. SSE. Portadown, on the Newry Canal, with a stn. (**Poyntzpass**) on the Dublin & Belfast Junction Rly., PMT.O. (**Poyntzpass**). Market-day, F. P. <500.

Poiré-sur-Vie, Le, tn., France, dep. Vendée, 46 m. NNW. La Rochelle, arr. and 8 m. NW. by N. La Roche-sur-Yon. P. <2000.

Poirino, tn., Italy, Piedmont, on the Banna, prov. and 13 m. SE. by S. Turin. P. <1500.

Poisdorf, vil., Lower Austria, dist. Mistelbach, 33 m. NNE. Vienna. P. <3000.

Poissons, tn., France, dep. Haute-Marne, arr. Wassy, 24 m. S. by E. Bar-le-Duc. P. <2000.

Poissy, the ancient *Pinciacum,* tn., France, dep. Seine-et-Oise, arr. Versailles, on the Seine, 14½ m. WNW. Notre Dame, Paris, with stone quarries and machine shops; has ruins of an important Dominican abbey; the church dates from 1125 to 1130. Birthplace of St. Louis (Louis IX.). In 1414 the town was taken by John the Fearless, Duke of Burgundy; in 1419, by the Duke of Gloucester; in 1441, by Talbot, Earl of Shrewsbury. The famous Conference of P., between the Protestants and Roman Catholics, was held here in 1561. P. <5000.

Poitiers, city, France, cap. dep. Vienne, and formerly cap. of prov. Poitou, on a height at the junction of the Clain and the

Boivre, 61 m. SSW. Tours. It has a noble cathedral, scene of 23 councils from 4th to 15th centuries, and other interesting churches; palais-de-justice, a university founded in 1431, a museum, library (30,000 vols.). Several railways meet here. Manufactures unimportant. The name, anciently *Poictiers*, is derived from the Pictones; many Celtic and Roman remains, especially in a town (found 1882) occupying 14 ac. P. is associated with three great victories, that of Clovis over Alaric the Goth (507), that of Charles Martel over the Saracens (732), and that of the English under the Black Prince over the French in 1356. After coming by marriage into possession of the Dukes of Normandy, P. remained for three centuries attached to the English crown. Alt. plateau, 130 ft. above the streams. Alt. 384 ft. Mean temp., yr. 51.9° F., Jan. 38.6°, July 66.2°. P. (1872) 28,200; (1886) 34,600; (1890) 37,500.

Poitou, former prov., France, now comprised chiefly in deps. Vienne, Vendée, and Deux-Sèvres.

Polx, tn., France, dep. Somme, arr. and 16 m. SW. by S. Amiens. P. <2000.

Pojána, vil., Hungary, co. and 20 m. NW. Szeben, dist. Szerdahely. P. <4000.

Pol, comm., Spain, Galicia, prov., dist., and 15 m. NE. Lugo. P. <5000.

Pola, the ancient *Colonia Pola*, later *Pietas Julia*, the great naval port and arsenal of Austria, Coast Prov., cap. dist. P., near the S. extremity of the penin. of Istria, on the Bay of Porto delle Rose, 19 m. SSE. Rovigno; reputed to be the most unhealthy spot of the penin. In the centre of the basin are two islets, Santa Caterina and San Andrea, covered with fortifications. The harbour communicates with the sea by a channel, in some parts less than 2300 ft. in width, and has a lighthouse, visible 10 m. There are two government dry docks, one 467 ft. 3 in. long, 83 ft. wide, and 27 ft. 10 in. deep on sill ordinary springs high water, the other 408 ft. long, 91 ft. 10 in. wide, and 32 ft. 1 in. on sill; and a government floating-dock, 300 ft. long by 84 ft. wide. In the neighbourhood are sand-pits worked for the glass-works in Venice. The town is enclosed by Venetian walls of the 16th century, and has a cathedral. It is composed of two distinct parts, the old and the new. The first has numerous Roman monuments, temples of Diana and Augustus, the latter now a museum, four gateways, and an amphitheatre capable of holding 21,000 spectators. P. was one of the principal arsenals of the Roman Empire (2nd to 3rd century). The new town is ornamented with monuments to the Archduke Maximilian and Admiral Tegethoff. Here was a famous sea-fight, in which the Genoese defeated the Venetians in 1378. In 1815 P. passed to Austria, with Istria. Mean temp., yr. 56.9° F., Jan. 41.5°, July 75.0°. Comm. P. (1869) 16,324; tn. P. 10,473; (1890) 31,600.

Pola de Gordon, comm., Spain, prov. and 19 m. NNW. Leon, dist. Vecilla. P. <4000.

Poland, tn., U.S., Maine, Androscoggin co., 4 m. from Mechanics Falls. P. <3000.

Poland, Kingdom of (Polskie Królestwo, Russian **Tsarstvo Polskoye**), part of Poland belonging to the Russian Empire, and consisting of the following ten govts., formed in 1867, and often described now in official documents as 'The Governments on the Vistula' (*Privislyanskiya Gubernii*):—

Governments.	Area in sq. m.	Population in Thousands.		
		1881.	1890.	Per sq. m. 1890.
Kalisz . . .	4,392	765	837	190
Kielce . . .	3,897	623	692	177
Łomża . . .	4,667	539	609	130
Lublin . . .	6,499	860	980	150
Piotrków . . .	4,729	838	1,091	230
Płock . . .	4,200	538	701	167
Radom . . .	4,769	634	782	164
Siedlce . . .	5,535	617	672	122
Suwałki . . .	4,846	603	657	135
Warsaw . . .	5,623	1,303	1,465	260
Poland . . .	49,157	7,320	8,486	173

P. projects on the W. of European Russia, between 50° 4′ and 55° 6′ N., 17° 40′ and 24° 18′ E., as a wide semicircle, which has West and East Prussia on the N., Posen and Prussian Silesia on the W., Galicia on the S., and the Russian govts. Vilno, Grodno, and Kovno on the E. **Surface.**—Its middle parts are occupied by a belt of low plains, 150 m. wide, stretching from the Oder to 'The Woods' of Volhynia and Grodno and the marshes of Pinsk. These plains are separated from the Baltic Sea by a broad flat swelling 600–700 ft. high, dotted with lakes, marshes, and forests—the govt. of Suwałki protruding northwards beyond this swelling. In the S. the central plains gradually rise to plateaux 800–1000 ft. high, of hilly aspect, deeply cut by ravines, and covered with thick forests in the SE. (*Podlasie*). The hills are known as Lublin Hills in the SE., and Sędomierz (Sandomir) Hills, or Central Heights, in the S. of P., where they take the shape of ridges running WNW. to ESE., parallel to the Beskids—the highest of them being the Lysogórski or Swiętokrzyski Hills, whose highest points attain 1813 ft. and 1961 ft. The Chęcinski Hills (Zamkowa Góra, 1135 ft.) run along the Nida. The SW. of P., which contains the chief mineral wealth of the country, is occupied by the Olkusz Hills, the spurs of the Beskids (Podzamcze, 1473 ft.), and the Częstochowa Hills, 1000–1300 ft., separating the Oder from the Warta. **Rivers** and **Canals.**—The chief river is the Vistula or Wisła, which flows from Galicia, waters the plain belt, and enters Prussia about Thorn, after having received the San, Wieprz, and Bug with Narew from the right, and the Nida and Pilica from the left. The Warta has its upper course in the SW., and the Niemen flows along the NE. border of P., separating it from Lithuania. All these rivers are of great importance for interior traffic and export trade, the more so as they are connected by canals with the chief rivers of Russia and Prussia. The Augustowski Canal connects the Vistula with the Niemen (Memel), while the Niemen is connected with the Dnieper (by Oginski Canal, in Minsk), the Vistula with the Warta (by Bydgoski or Bromberg Canal, in Prussia), and the Bug with the Dnieper (by Dnieprovsko-Bugskiy Canal, in Grodno). Some marshes accompany the courses of the rivers, and the inundations of the Vistula are sometimes ruinous in the plains. Considerable amounts of corn, timber, wooden wares, &c., are shipped to Prussia, and imported from SW. Russia. The **climate** is more congenial and wet than in European Russia, the average temps. being: yr. from 42° to 46° F. (41° in Łysogórski Hills); winter 36° to 39°, summer 61° to 64°; yearly rfall., 21.7 to 23.6 in., rising to 30.3 in. on the slopes of the Carpathians. The rivers remain under ice—the Vistula, at Warsaw, for an average of 80 days (occasionally 116 days), the Niemen for 100 days, and the Warta for 70 to 80 days. The **population** has grown as follows:—(1816) 2,732,324; (1829) 4,137,634; (1846) 4,867,129; (1860) 4,840,466; (1871) 6,193,710; (1893) 8,808,969, out of whom 2,378,238 lived in towns. The bulk of the population are Poles (68 per cent.), next come the Jews (14 per cent., rapidly increasing), the Little Russians, especially in SE. (8 per cent.), the Lithuanians, especially in NE. (4 per cent.), and the Germans, especially in SW. and W. (6 per cent.). Roman Catholicism is the prevailing religion (75.5 per cent. of population), the remainder being Jews, Lutherans (about 6 per cent.), and Greek Orthodox (5 per cent.). **Agriculture and cattle-breeding** are the chief pursuits of the bulk of the population. Land is well cultivated in the central plains, and nearly 70,000 tons of wheat and rye are exported abroad, while a nearly equal amount of the same, as well as about 50,000 tons of oats, are imported from Russia. The average crops of 1888–92 were, in quarters: wheat, 1,874,200; rye, 5,683,600; barley, 1,497,000; oats, 4,076,400; various, about 1,000,000; potatoes, 20,609,000 quarters, largely used for distilleries; beetroot, about 15,000,000 cwts. The forests cover 6,706,000 ac. Live stock are estimated to number 1,204,300 horses, 3,013,400 horned cattle, and 3,754,700 sheep, fine breeds

of cattle and sheep being reared. **Mining.**—South P. possesses considerable mineral wealth in its coal, brown hematite, copper, zinc, and tin ores; and the mining industry has lately been rapidly developing. Coal-mining alone (at Dombrovo) occupies over 10,000 men; and the extraction of coal, which was but 210,000 tons in 1870, attained 2,837,300 tons in 1892. The fabrication of iron and steel has increased tenfold since 1812, nearly 100,000 tons of iron and steel prepared, chiefly in Radom and Piotrków, 5060 tons of zinc (in dist. Olkusz), as well as some copper, sulphur, and salt (at Ciechocinek) must be added to the above. **Industries.**—The development of industries during the last thirty years has been very rapid, the aggregate annual production now attaining over £25,000,000, as against £4,250,000 in 1857. The chief manufacturing centres are the Łódź region, in Piotrków (cottons, woollen stuffs, leather, ironworks, machinery, and distilleries), and Warsaw (linen stuffs, silks, sugar, machinery, leather, &c.); Kalisz and Lublin are also important centres, especially for sugar-works, distilleries, and leather. Moreover, a great variety of petty trades are carried on at Warsaw by numerous skilled artisans. The chief manufacturing production falls upon the govts. of Piotrków (yielding about half the entire value), Warsaw, Kalisz, Lublin, and Kielce. **Railways.**—P. is crossed from NE. to SW. by two main lines, from St. Petersburg *viâ* Warsaw to Vienna, and from Moscow to Vienna, both meeting on the S. frontier at Dombrovo, and by three main lines running NW. to SE., with many branches, especially in SW., being a total of 1250 m. A very brisk traffic is maintained on the railways of P., the chief custom-houses of the Russian Empire being the Polish frontier towns of Wierzbołowo, Sosnovice, and Granica, besides many smaller ones, and Warsaw. **Defence.**—P. has several Russian fortresses placed along the Vistula—Novogeorgievsk, Warsaw, and Ivangorod, with Sierock in the rear. All SW. Poland remained, however, unprotected till lately, when some fortifications have been erected in the govt. of Kalisz. **Administration.**—P. is placed under a governor-general and commander-in-chief of the troops, residing at Warsaw, and endowed with wide powers. Each of the ten govts. is divided into 10 to 12 dists., placed under a special police chief; and each dist. is divided into 12 to 20 *gminas*, which are village communities consisting of several villages and farms (2000 to 10,000 inhabitants), all landholders of which, possessing 4 ac. or more (except the clergy and the police), take part in the folkmoot; the decisions of the latter are, however, much interfered with by the police chiefs. Before the insurrection of 1863 P. had 453 towns possessed of municipal institutions, but since that time all towns with less than 2000 inhabitants have been included in the *gminas*, and the new municipal institutions introduced in 1870 have deprived the towns of all self-government. P. had in 1891 nine cities with over 20,000 inhabitants—namely, Warsaw (465,270), Łódź (143,930), Lublin (53,620), Częstochowa (29,630), Piotrków (28,570), Suwałki (23,850), Radom (23,725), Płock (21,660), and Włocławek (20,500); 13 towns with from 10,000 to 20,000 inhabitants; and no less than 59 towns with from 5000 to 10,000 inhabitants. **Education.**—P. has a university at Warsaw, with about 850 students, in which teaching is conducted in Russian, several excellent technical and agricultural high schools, over twenty gymnasiums, and about 3500 primary schools, in all of which teaching is very much hampered by Russian authorities. Several scientific societies of P. have a universal renown.

Polangen, tn., Russia, Courland, 55° 55′ N., 21° 4′ E., on the Russian frontier, the most southern Russian settlement on the Baltic Sea; bathing-place, custom-house; manufacture of amber goods. Close by the Beruta Hill, famous for its temple in Lithuanian folklore. P. (tn.) <4000.

Polstead, par., Eng., Suffolk, Sudbury div., 11½ m. WSW. Ipswich, 3⅛ m. SW. Hadleigh, P.O. P. <750.

Poltava, govt. of Little Russia, has Chernigov on N., Kharkov on E., Kiev on W., Ekaterinoslav and Kherson on S. Surface an undulating, deeply trenched plain, 500–600 ft. high, gently sloping towards SW. Bordered by Dnieper on SW., and watered by its tribs., Sula, Psiol, Vorskla, Trubezh, &c. Soil very fertile; forests absent. Population Little Russian throughout. Cereals largely grown, and exported; tobacco and sunflower culture (for oil); gardening (apothecaries' garden at Lubny); extensive cattle and sheep breeding; distilleries, flour-mills, and tobacco works are the chief industries. Several important fairs, especially at P., for wool, Romny for tobacco, Kobelyaki for sheep skins, and Kremenchug for various goods. Divided into fifteen dists.: Poltava, Gadyach, Khorol, Kobelyaki, Konstantinograd, Kremenchug, Lokhvitsa, Lubny, Mirgorod, Pereyaslav, Piryatin, Priluki, Romny, Zenkov, and Zolotonosha; moreover has several towns with from 5000 to 10,000 inhabitants. Area, 19,265 sq. m. P. (1881) 2,418,870; (1890) 2,898,600.

Poltava, cap. of above govt., 87 m. by rail SW. Kharkov, on Vorskla R.; old town, centre of Khmelnitsky's uprise, battlefield where Peter I. defeated Karl XII. Military school, besides usual educational institutions. Good theatre. Important fair for wools for all SW. Russia (returns about £1,500,000), to which over 30,000 people come together. Woollen cloth mills. P. (1865) 31,000; (1891) 53,560.

Poltavskaya, Cossack vil., Russia, N. Caucasia, prov. Kubañ, 43 m. NW. Ekaterinodar. P. 8000.

Poltimore, par., Eng., Devonshire, Tiverton div., 4 m. NE. Exeter, 2 m. N. Pinhoe stn., P.O. P. <500; eccles. par. (**P. with Huxham**) P. <500.

Polton, stn., Scot., Midlothian, on the North Esk, 3 m. SW. by W. Dalkeith, on the N. B. R., PT.O.

Poltonhall and Dalhousie Colliery, vil., Scot., Midlothian. See **Dalhousie.**

Polu, oasis, Eastern Turkistan, on the N. slopes of the Kuenlun range and on the Kiria R., 50 m. S. by W. Kiria, in about 36° 10′ N., 81° 30′ E. Alt. 8400 ft.

Poludennaya, vil., Russian Turkistan, prov. Akmolinsk, 155 m. WSW. Omsk. P. <5000.

Polur, tn., Brit. India, Madras, dist. North Arcot, 29 m. S. Vellore; magnetic iron ore is found. P. 8600; Hindus, 6700.

Polverigi, tn., Italy, The Marches, prov. and 9 m. SW. Ancona. P. <3000.

Polwarth, par., Scot., Berwickshire, 3½ m. SW. Duns, 1 m. NW. Marchmont stn. P. <250.

Polwarth, co., Victoria, on the S. ct., crossed in the E. by 144° E.

Poly, in Indian names corruption of Tamil *Palli*, 'a small town' or 'village.'

Polyesiye, region, W. Russia, govts. Minsk and N. Volhynia, including basin of **Pripet** (**Minsk**). Covered with marshy forests, now canalised for purposes of drainage.

Polygyros, or **Polyhieros,** vil., Turkey in Europe, vilayet, sanjak, and 28 m. SE. by E. Salonica. P. <3000.

Polykandros, isl., Greece. See **Pholegandros.**

Polynesia (Greek, 'many islands'), one of the major divs. of the Pacific, embracing those groups and islands which are peopled by races of Polynesian descent—*e.g.*, Tonga, Samoa, Ellice, Tokelau, Phœnix, Cook (Hervey), Austral, Society (Tahiti), Tuamotu (Low), Marquesas, Sandwich, New Zealand, &c. These groups of islands make up an aggregate area of nearly 115,000 sq. m., with about 250,000 Polynesian inhabitants, the best types of whom are found in the natives of the Marquesas and the Maories of New Zealand. Their ethnographical relations have not yet been satisfactorily cleared up, some authorities connecting them with Aryans, others with the Mongoloid Malays. At all events, they are distinct from the Melanesians (*q.v.*).

Polzin, tn., Prussia, prov. Pomerania, circle Belgard, 35 m. SE. by S. Kolberg. In the vicinity is the health-resort of Luisenbad, with three chalybeate springs. P. <5000.

Poma, vil., Argentine Republic, Salta, 165 m. N. by W. Tucuman. P. <2000.

Pomabamba, vil., Bolivia, dep. Chuquisaca, 135 m. SE. Sucre; gold, silver, copper, and coal mines.

Pomabamba, tn., Peru, dep. Ancachs, 40 m. N. by W. Lima. P. 4000.

Pomabamba, vil., Peru, dep. and 44 m. from Ayacucho, prov. Cangallo; has mine of alabaster, known as Huamanga stone, and used for sculptures. P. <2000.

Pomachi, or **Pomaki,** Mussulmen, Bulgaria. See **Pomoki.**

Poman, tn., Argentine Republic, prov. and 65 m. W. Catamarca. P. <2000.

Pomarance, tn., Italy, Tuscany, prov. Pisa, 23 m. W. Siena. To the S. are the chief borax lagoons of Tuscany, principally at **Larderello** (formerly **Monte Cerboli**); in the neighbourhood are the mineral springs of St. Michael. P. <2000.

Pomarape, peak of the Andes, Peru, dep. Tacna, 68 m. ENE. Arica. Alt. about 21,000 ft.

Pomarico, tn., Italy, prov. Potenza, 12 m. S. Matera. P. 5200.

Pomasi, summit of the Andes, Peru, between deps. Puno and Arequipa, in 15° 15′ S.; rich silver deposits.

Pomasqui, vil., Ecuador, about 12 m. N. Quito, much frequented place of pilgrimage. Alt. 8225 ft. P. <2000.

Pomathorn, stn., Scot., Midlothian, on the N. B. R., 7½ m. SW. Dalkeith.

Pomáz, comm., Hungary, co. Pest-Pilis-Solt-Kis-Kun, dist. Pilis-felsö, 11 m. N. Buda. P. <4000.

Pomba, vil., Brazil, state Minas Geraes, 68 m. SSE. Ouro Preto. P. <2000.

Pomba, bay, Portuguese E. Africa, mainly to the N. of 13° S.

Pombal, tn., Portugal, prov. Estremadura, dist. Leiria, 22 m. SW. by S. Coimbra. P. <5000.

Pombo, M'Pombo, or **Mbossi,** post, in French Congo, central Africa, in 1° 21′ S., 16° 15′ E.

Pombue, vil., French W. Africa, on the coast, in 2° 4′ N.

Pomègue, Isle, isl., France, in the Gulf of Lyons, 3½ m. WSW. Marseilles; has port Frioul, divided into two sub-ports, Pomègue (5½ ac.), and Ratonneau (37 ac.), with lazaretto and quarantine. Length, 2 m.

Pomerania, in German **Pommern,** prov., Prussia, situated N. of Brandenburg, on the shores of the Baltic Sea (*q.v.*). It lies in the North German Plain, but has some elevations (Ratzenberg, 700 ft.; Steinberg, 765 ft.). Principal river of P., Oder (*q.v.*); other rivers, Recknitz, Persante, Wipper, Stolpe, and Leba. P. has many small lakes [see **Baltic Lake Plateau**]. Of principal importance are agricultural pursuits, cattle-rearing, and horse-breeding [see **German Empire**]. The manufactures include machinery, chemicals, tobacco, leather goods, textiles, beet-sugar, and spirits; shipbuilding is of great importance at Stettin. The railways belong to the state. The cap. of P. is Stettin, which is at the same time the industrial and commercial centre of the province. Other towns of importance are Stralsund, Köslin, Greifswald (university), Swinemünde, Stargard, Stolpe. Nearly all the inhabitants are Protestants. Most of them are Germans, but there is a limited number of Cassubes in the eastern districts. P., originally inhabited by Germans, was occupied by the Slavs in the fifth century of the Christian era, but it has gradually become again almost completely 'Germanised.' See **German Empire,** table.

Pomeroy, par. and tn., Ire., E. co. Tyrone, bar. Middle Dungannon, 8½ m. NW. Dungannon, on the Portadown, Dungannon, and Omagh Rly., PMT.O. Market-day, Tu. Par. 15,952 ac., P. <4500; tn. P. <500.

Pomeroy, tn., Natal, Umsinga div., 73 m. N. Pietermaritzburg. Alt. 4300 ft.

Pomeroy, city, U.S., Ohio, Meigs co., on the Ohio, midway between Pittsburg and Cincinnati, 82 m. SE. by E. Columbus; has rolling and flour-mills, salt and bromine works, and furniture factories. In the neighbourhood are extensive deposits of bituminous coal and salt. P. <5000.

Pomeroy, vil., U.S., Washington, Garfield co., 47 m. NE. by E. Walla Walla. P. <1500.

Pomesanien, dist., Prussia, prov. W. Prussia, in the middle of the part lying E. of the Vistula.

Pomfret, Eng., Yorkshire. See **Pontefract.**

Pomfret, tn., U.S., Connecticut, Windham co., 37 m. N. by E. New London. P. <1500.

Pomigliano d'Arco, tn., Italy, Campania, prov. and 7 m. N. by E. Naples. P. (comm.) 9400.

Pomiria, or **Gluboka,** tn., Roumania, Moldavia, dep. and 6 m. NNW. Dorohoi. P. <4000.

Pommard, vil., France, dep. Côte d'Or, 24 m. E. by N. Autun, arr. and 3 m. WSW. Beaune. P. <2000.

Pomme de Terre, riv., U.S., Minnesota, rises in Grant co., flows S. into Minnesota R., in Swift co. Length, 100 m.

Pomme de Terre River, U.S., Missouri, rises in Greene co., flows N. into Osage R., in Hickory co. Length, 125 m.

Pommerellen, dist., Prussia, prov. W. Prussia, in the W., stretching from N. to S. through nearly the whole width of the prov.

Pommerensdorf, vil., Prussia, prov. Pomerania, govt. and 2 m. SW. Stettin, circle Randow. P. <3000.

Pommern. See **Pomerania.**

Pomo, isl., Dalmatian Archipelago, Austria-Hungary, 58 m. WSW. Spalato.

Pomo-chang, lake, Tibet, 10 m. SW. Lake Palti. Alt. 16,000 ft.; length, 18 m.; breadth, 5 m.

Pomoki, Pomaki, or **Pomachi,** Mussulmen of Bulgarian origin, Bulgaria, on the N. slope of the Balkans, between the Isker and Osma. P. (in forty vils.) 100,000.

Pomona, or **Mainland,** the largest of the Orkney Is., and nearly in their centre, divided by Kirkwall Bay and Scapa Flow into two principal portions. Its W. coasts are precipitous, but it has several good harbours, that of Stromness being the best in N. Scotland. Surface hilly; highest peak the Ward Hill of Ophir, 876 ft. Much of the heath and moor has lately been improved, and there are many fertile tracts, with fresh-water lakes. The only towns are Kirkwall and Stromness. It contains the famous antiquities called 'Standing Stones of Stenness' and Maes Howe; the latter has Runic letters inscribed on the walls; shape very irregular. Length of W. island, 16 m.; E. island, 9 m.; breadth varying to 7½ m.; total area, 150 sq. m. Mean rfall. (1866–80; Sandwick, alt. 78 ft.), yr. 37.8 in. P. 16,498.

Pomona, city, U.S., California, Los Angeles co., 2 m. E. Spadra. P. <4000.

Pomona, vil., U.S., Kansas, Franklin co., 31 m. SSE. Topeka. P. <1500.

Pomorzany, tn., Austria, Galicia, dist. Zborów, 30 m. W. by N. Tarnopol. P. <5000.

Pomoshang, or **Pomoshangtang,** lake, Tibet, 10 m. SW. Lake Palti. Alt. 16,045 ft.; length, 19 m.; breadth, 5 m.

Pompeii, ancient city of S. Italy, 14 m. SE. of Naples, at the S. base of Mount Vesuvius, was first overthrown by an earthquake in February 63 A.D., and sixteen years later, having in the interval been hastily rebuilt, was buried, 23rd–26th August 79, by an eruption of that volcano, under cinders, scoriæ, and lava, and so remained until it was rediscovered in 1748. Since 1860 the greater part of its area has been uncovered, whence it appears that it was enclosed by walls, entered by several gates, and had streets paved with lava, terraced houses of two or three stories, with shops and shop-signs still plainly visible, theatres, temples, baths, a street of the tombs, a forum, prisons, and other public buildings.

Pompeiopolis, ruins, Turkey in Asia. See **Mersina.**

Pompey, tn., France, dep. Meurthe-et-Moselle, arr. Nord, 6 m. NNW. Nancy, on the Moselle; iron hydrates extracted; has blast-furnaces and forges. P. <3000.

Pompey Smash, coal-mining vil., U.S., Maryland, Alleghany co., 3 m. from Frostburg. P. <1500.

Pomponne, vil., France, dep. Seine-et-Marne, arr. Meaux, on the Marne, 16 m. E. Paris. P. <2000.

Ponaganselt, settlement, U.S., Rhode Island, co. and 14 m. W. Providence.

Ponáni, riv., Brit. India, Madras, rising in Anamalai Mts., flows across Malabar dist. into the sea at P. town; used for timber floating. Length, 120 m.

Ponáni, tn. and seapt., Brit. India, Madras, dist. Malabar, on the W. ct., 38 m. S. by E. Calicut, trading largely in salt; the centre of Mussulman education on the coast. P. 9200; Moham. 8800.

Ponape, Puinipet, or **Ascension,** isl., Pacific, Caroline group, just S. of 7° N., and E. of 158° E., an important mission centre of the Americans. It is surrounded by a coral reef, 2 to 5 m. distant, in the middle of which remains of old ramparts and stone houses have been found, but the natives have no traditions about them. The highest point is Montesanto (2880 ft.). Area, 134 sq. m. P. about 2000.

Ponarth, vil., Prussia, prov. E. Prussia, govt., circle, and 2 m. SW. Königsberg. P. <4000.

Ponask Lake, Canadian NW. Terrs., crossed by 54° 35′ N., 94° 0′ W.; a Hudson Bay Company's post upon its W. side.

Ponca, city, U.S., Nebraska, Dixon co., on the r. bk. of the Missouri, 98 m. NNW. Omaha. P. <1500.

Ponce, tn., isl. of Porto Rico, S. ct., 50 m. SW. San Juan, in 66° 38′ W. There are 32 ft. of water in the port at high water, and 30 ft. at low water; but the entrance has only 24 ft. at high water. P. dist. (1872) 33,200; (1887) 42,400.

Ponce de Leon Bay, U.S., Florida, large inlet of Gulf of Mexico, S. of Monroe co., studded with small islands called The Thousand Isles.

Poncho Springs, vil., U.S., Colorado, Chaffee co., near Poncho Pass (alt. 7500 ft.; 8945 ft. [Wheeler]), which gives communication between Arkansas Valley and the N. of San Luis Park. P. <1500.

Poncin, tn., France, dep. Ain, on the Ain, 36 m. W. by S. Geneva, arr. and 11 m. WSW. Nantua. P. <2000.

Ponda, vil., Portuguese India, 7 m. SE. Goa, cap. dist. P.; fort important in the 16th and 17th centuries.

Ponder's End, stn., Eng., Middlesex, Enfield div., 6½ m. E. Barnet, on the G. E. R.

Pondichéry, or **Pondicherri,** settlement, French India, surrounded by dist. South Arcot, on the E. ct. of Madras, 18 m. NNE. Cuddalore. P. has no harbour or dock, only one pier 800 ft. long; there are many artesian wells in the hills around; climate healthy. The terr. comprises four dists.; the town (which is now connected by rail with Villapuram, and thus brought into communication with the city of Madras as well as the southern parts of the peninsula) is divided into two, the White Town and Black Town, separated by a canal; chief industries, weaving and dyeing. P. settlement (1891) 173,000.

Pond Island, islet, U.S., Maine, at mouth of Kennebec R., with lighthouse, visible 13 m.

Pondo-land, country in SE. Africa, belonging to Cape Colony (since 1894). P. is situated NE. of Tembu-land (see **Kaffraria**), between the eastern offshoots of the Kwathlamba Mts. (*q.v.*) and the Indian Ocean. Undulating plains, steep and picturesque mountains, and deep valleys are the characteristic features of P. P. is inhabited by the Amapondo, closely related to but not identical with the Zulus. The country is said to be rich in agricultural and mineral possibilities, but at present it is little known. The vegetation in the neighbourhood of the coast is luxuriant, timber-trees and fruit-trees being abundant (palms, bananas, oranges, lemons, and conifers). Indian corn and other cereals grow readily. P. is well adapted for cattle-rearing and horse and sheep breeding. Nothing definite is known about the mineral resources of the country. P. is traversed by the St. John's or Umzimvubu R., the mouth of which is described as one of the best harbours of Africa. Area unknown. P. estimated at 150,000. **[H. G. S.]**

Ponds, tn., Ire., S. co. Dublin, bar. Rathdown, Rathfarnham par., 4 m. from Dublin. P. <250.

Pond's Bridge, eccles. par., Eng., Cambridgeshire and Huntingdonshire, Standground and Ramsey pars. P. <750.

Ponevyezh, dist. tn., Russia, govt. and 86 m. NE. Kovno, on Libau-Dünaburg Rly.; trade in corn, flax, salt. P. 17,700.

Poney Hollow, vil., U.S., New York, Tompkins co., 12 m. SW. Ithaca. P. <1500.

Ponfeigh, colliery vil., Scot., S. Lanarkshire, 4 m. NE. Douglas, on the C. & G. & SW. Joint Rly.

Ponferrada, tn., Spain, prov. Leon, cap. dist. P., 52 m. N. by E. Braganza. P. (comm.) 7300.

Pong, W. Africa. See **Kong.**

Ponga, comm., Spain, Asturias, prov. and 37 m. ESE. Oviedo, dist. Cangas de Onis. P. <4000.

Po-ngai, tn., China, in SE. of Yünnan, near the frontier of Kwangsi, limit of navigation for small boats (1 ft. draught) on the Yu-kiang (N. fork of the Si-kiang or West R.). Rapids impede the navigation between this place and Pose-ting, 45 m. below, so that three days are required for upstream traffic. Said to be very malarious. Alt. 690 ft. (Bourne).

Pongara, Cape, promontory, W. ct. Africa, at S. entrance of the Gabun estuary.

Pong-hu, isls. See **Pescadores.**

Pont-de-Vaux, tn., France, dep. Ain, arr. Bourg, on the Reyssouse, 25 m. S. by E. Châlon-sur-Saône, 10 m. NE. by N. Macon. P. <3000.

Pont de Veyle, tn., France, dep. Ain, arr. Bourg, on the Veyle, 34 m. N. Lyons, 5 m. SE. Macon. P. <2000.

Pont Dolanog, eccles. par., Wales, Montgomeryshire, on the Vyrnwy, 11 m. WNW. Welshpool. P. <500.

Pontdolgoch, stn., Wales, Montgomeryshire, on the Cambrian Rly., 6½ m. W. by N. Newtown.

Pont du Château, tn., France, dep. Puy-de-Dôme, arr. and 9 m. E. Clermont-Ferrand. P. <4000.

Pont du Gard, railway station and aqueduct, France, dep. Gard, 16 m. W. Avignon. Here the picturesque gorges of the riv. Gard are spanned by a magnificent Roman aqueduct of three tiers of superimposed arches, the highest being 161 ft. above the surface of the river. Length of aqueduct, 883 ft. Immediately above the foot of the aqueduct is the prehistoric cave of La Salpetrière, discovered in 1871.

Pont du Shelif (in French spelling **Chélif**), vil., Algeria, arr. Mostaganem, on the r. bk. of the Shelif, 55 m. ENE. Oran. P. <2000.

Ponte, tn., Austria, Istria, on a bay on W. side of island, and a few miles E. of town of Veglia. P. <3000.

Pontebba, vil., Italy, Venetia, on the Austrian frontier, prov. and 31 m. N. by E. Udine. P. <2000.

Pontecorvo, tn., Italy, Campania, prov. Caserta, on the Liri, 18 m. N. by E. Gaeta. P. 5300.

Pontedecimo, tn., Italy, Liguria, prov. and 7 m. N. by W. Genoa. P. <3000.

Ponte dell' Olio, vil., Italy, Emilia, prov. and 13½ m. S. by W. Piacenza. P. <2000.

Pontedera, tn., Italy, Tuscany, prov. and 12 m. ESE. Pisa, on the Arno. P. 6300.

Pontefract (locally pom'fret), mun. bor. (since the time of Richard I.) and parl. bor., Eng., Yorkshire, W. Riding, 7½ m. E. Wakefield, 21 m. SSW. York, in the diocese of York, with stns. on the L. & Y. R. and the Swinton and Knottingley Joint Rly. The parl. bor. also includes **Ferrybridge** stn. on the latter railway, and **Knottingley** stn. on the L. & Y. R. The staple trade is in corn, malt, and garden produce; there

are manufs. of agricultural implements, brushes, and sacking, and the town is noted for 'Pontefract cakes.' The ancient castle in which Richard II. is represented to have died (1400), and in which Rivers, Grey, and Vaughan were put to death by order of Richard III., is now in ruins; but the site is used as a recreation ground. The races are held in the Town Park (325 ac.). There are many fairs. Market-day, S. Mun. bor. P. (1801) 3100; (1851) 5100; (1891) 9700; parl. bor. P. (1891) 16,400.

Ponte in Valtellina, vil., Italy, Lombardy, prov. and 6 m. E. Sondrio, in the Valtellina, 36 m. NNE. Bergamo. P. <2000.

Ponteland, par., Eng., Northumberland, Wansbeck div., on the Pont, 8½ m. S. by W. Morpeth, 5 m. N. by E. Ryton stn.; has coal. PMT.O. P. <500.

Pont-en-Royans, vil., France, on the S. border of dep. Isère, arr. St. Marcellin, 21 m. WSW. Grenoble. P. <2000.

Pontenure, vil., Italy, Emilia, on the Nure, prov. and 7 m. SE. Piacenza. P. <2000.

Ponticelli, comm., Italy, Campania, prov., circle, and 3 m. E. Naples. P. 7300.

Pontigny, vil., France, dep. Yonne, on the Serain, 32 m. SW. by S. Troyes, arr. and 11 m. NE. Auxerre. P. <2000.

Pontine, Isole, group of isls., Italy, off the W. ct., in the Tyrrhenian Sea, in 40° 50'–58' N.

Pontine Marshes, Italian **Paludi Pontine,** a marshy and malarial tract in the SE. of prov. Rome, Italy, extending over a length of 30 m., from Cisterna di Roma (a few miles SE. of Velletri) SE. to Terracina, with a width of about 5 to 8 m. between the sea and the Monti Lepini (Volscian Hills); total area of the marshes proper about 130 sq. m., but the infected area is nearly 350 sq. m. The surface is formed of a soft, close, and elastic peat, under which is a stratum of clay of about one foot thick, containing a quantity of shells, sea-sand, and the remains of plants, the peat increasing in thickness from about 10 ft. near the Appian Way (which traverses it in a straight line between the places above named) to 70 ft. at the base of the mountains. So deadly is the climate, that the only inhabitants are about thirty persons, occupying the isolated post-stations of the Appian Way, though the soil is said to be unequalled in fertility by any in Europe. Under the Amelioration Law of June 1882, works are now in progress affecting the southern portion of the marshes (as far as 41½° N.), the riv. Amaseno being made use of for the purpose.

Pontisbright, par., Eng., Essex. See **Chapple.**

Pontivy, formerly **Napoléonville,** tn., France, dep. Morbihan, cap. arr. P., 29 m. NE. Lorient. P. 6300.

Port Curtis, settlement, Queensland, div. Port C., in 24° S. lat.; important goldfields in dist.

Port Cygnet, inlet, Tasmania, in the NE. of D'Entrecasteaux Channel, in 43° 11′ S. and 147° 8′ E.

Port Dalhousie, port, Canada, Ontario, Lincoln co., on Lake Ontario, at the entrance to the Welland Canal, 32 m. E. by S. Hamilton. P. <1500.

Port Dalrymple, Tasmania, name given to the estuary of the Tamar, near Georgetown, by Bass and Flinders.

Port Daniel, vil., Canada, Quebec, Bonaventure co., on Chaleur Bay, in 64° 58′ W. P. <1500.

Port Darwin, the large inlet on which Palmerston stands, on NW. of the N. Terr. of S. Australia, in 12½° S. The jetty has a depth alongside ordinary springs of 15 fathoms high water, 11 fathoms low water. Mean temp. (5 yrs., 1878–82), yr. 83.7° F., Jan. 84.7°, July 78.0°.

Port Darwin Camp, tp., S. Australia, N. Terr., Rosebery co., 38 m. SE. by S. Palmerston; has gold, silver, and lead mines. P. <1500.

Port Davey, harb., Tasmania, on SW. ct., in 145° 55′ E.; receives the waters of Davey R.

Port de France, former name of **Numea** (Nouméa), New Caledonia.

Port de la Paix, maritime tn., isl. and republic Haiti, N. ct., 100 m. N. by W. Port au Prince, in 72° 45′ W.; vessels load and discharge by means of lighters.

Port Denison, spacious and safe harbour, E. ct. Queensland, of which the town and port are Bowen, in 20° S., forming the inner (N.) part of Edgecumbe Bay; discovered in 1859.

Port Deposit, tn., U.S., Maryland, Cecil co., on the l. bk. of the Susquehanna, at head of navigation for heavy-laden boats, 29 m. WSW. Wilmington (Del.); has lumber trade, and ships granite quarried here to Baltimore and even to Chicago. P. <2000.

Port Dickson, seapt., Malay Penin., state of Sungei Ujong, connected by rail with Seremban.

Port Dinorwic (or **Dinorwig**), seapt. vil., Wales, Carnarvonshire, on Menai Strait and the L. & NW. R.; shipping port for Llanberis slate quarries. The tidal basin includes 1060 ft. of quayage, and has a depth of 14 ft. ordinary spring tides, 8½ ft. ordinary neap tides. PMT.O.

Port Douglas, seapt., Queensland, Nares co., on the E. ct., 65 m. S. by E. Cooktown, in 16° 30′ S.; centre of cedar cutting operations. P. <1500.

Port Dover, vil. and port of entry, Canada, Ontario, Norfolk co., on Lake Erie, 39 m. SSW. Hamilton. Alt. 635 ft. Mean temp., yr. 45.4° F., Jan. 22.0°, July 68.9°. P. <1500.

Port-Dundas, eccles. par., Scot., Lanarkshire, in N. suburbs of Glasgow, Barony par., at the end of Forth and Clyde Canal. P. <5000.

Port Durnford, harb., S. Africa, at the mouth of the Emlalazi R., Zulu-land, in about 29° 3′ S.

Port Durnford, or **Wubushi,** inlet, Brit. E. Africa, in 1° 15′ S., formed by the mouth of the riv. Sheri, probably the southern arm of the riv. Juba. The bar behind the ledge of coral reef has 17 ft. of water over it at lowest tides.

Port Eads, vil., U.S., Louisiana, Plaquemines par., 84 m. SE. by E. New Orleans, on the S. pass of the Mississippi. Mean temp., yr. 69.4° F., Jan. 55.4°, Aug. 81.7°. P. <1500. See **Mississippi River.**

Port Edgar, small harb., Scot., Linlithgowshire, on the S. shore of the Firth of Forth, 1 m. WNW. South Queensferry.

Port Egmont, in the NW. of the Falkland Is., S. Atlantic, in about 60° 0′ W., 51° 20′ S.

Portel, Le, tn., France, dep. Pas-de-Calais, on the NW. ct., arr. and 2 m. SW. Boulogne. P. <5000.

Port Elgin, vil., Canada, Ontario, Bruce co., on Lake Huron, 58 m. W. Collingwood. P. <2000.

Port Elizabeth, maritime tn., Cape Colony, dist. Port Elizabeth, 125 m. SW. by W. King William's Town, with an open but safe harbour on Algoa Bay, in which vessels load from and discharge into lighters and steam-tugs plying from two jetties, one of which is being lengthened to 1150 ft.; salt-pans near. Mean temp., yr. 63.8° F., Jan. 70.8°, July 57.3°; rfall. (25 yrs.), 22.3 in. P. (1881) 13,000; (1891) 23,300.

Port Ellen, seapt. and fishing vil., Scot., Argyllshire, on the S. ct. of Islay, in 6° 11′ W.; has a distillery. P. <1000.

Port Elliot, seaside tn., S. Australia, Hindmarsh co., 42 m. S. Adelaide, 4 m. E. by N. Port Victor; harbour filling up. P. <1500.

Port Elliston, post-tn., S. Australia. See **Elliston.**

Port Elphinstone, tn., part of Inverurie (*q.v.*), Scot., W. Aberdeenshire, on the r. bk. of the Don, PM.O. P. <750.

Port Emma, settlement, U.S., N. Dakota, Dickey co., 87 m. SW. Fargo.

Portencross, PMT.O., Scot., Ayrshire, in par. and 3 m. NW. West Kilbride.

Portendik, old French settlement, W. ct. Africa, in 18° 19′ N.; dangerous roadstead.

Portenza, riv., Italy, The Marches, rises in the Apennines, and flows ENE. to the Adriatic, emptying itself near Porto Recanati, about 17 m. SE. of Ancona.

Porter, co., U.S., Indiana, on Lake Michigan, crossed by 87° W.

Porter, tn., U.S., Maine, Oxford co., 7 m. SW. West Baldwin. P. <1500.

Porter, tn., U.S., New York, co. Niagara, on Niagara R., 16 m. NW. Lockport. P. <1500.

Port' Ercole, seapt., on the W. ct. of Italy, Tuscany, prov. Grosseto, 35 m. NW. Cività Vecchia, on the SE. side of the penin. of Monte Argentario.

Port Erin, maritime vil., Isle of Man, on the W. ct., 4½ m. W. by N. Castletown, on the Isle of Man Rly.; a breakwater, 950 ft. long, encloses a harbour of refuge for vessels of all sizes, and a landing-pier for steamers. PMT.O.

Port Errol, or **Ward of Cruden,** vil., Scot., E. Aberdeenshire, on the E. ct., on the Bay of Cruden, or Ardendraught Bay, 6½ m. SSW. Peterhead; has active herring fishery. PMT.O. P. <500.

Porter's Lake, summer resort, U.S., Pennsylvania, Pike co. P. <1500.

Porters Mills, vil., U.S., Wisconsin, co. and 6 m. below Eau Claire, on Chippewa R. P. <1500.

Porterville, vil., Cape Colony, Piquetberg dist., 66 m. NE. by N. Cape Town. P. <1500.

Portesham, stn., Eng., Dorset. See **Portisham.**

Port Esperance, harb., Tasmania, Kent co., comprising the township of **Dover,** 34 m. SW. by S. Hobart. P. <1500.

Portessie, fishing vil., Scot., Banffshire, on the N. ct., on P. Bay, 4½ m. W. Cullen, on the G. N. of S. R., PMT.O. P. <1000.

Port Essington, post-vil., Canada, prov. Brit. Columbia, on the W. ct., and the Skeena R., in 54° 13′ N. P. <1500.

Port Essington, fine harb., S. Australia, N. Terr., to the NE. of Port Darwin; formerly (1831–50) a military and penal settlement, but abandoned on account of its unhealthiness. P. <1500.

Portet, tn., France, dep. Haute-Garonne, on the Ariège, arr. and 6 m. SSW. Toulouse. P. <2000.

Portete, Bahia, bay, Colombia, N. ct., in about 71° 55′ W.

Port Ewen, vil., U.S., New York, Ulster co., on the r. bk. Hudson R., near the mouth of the Delaware and Hudson Canal, 12 m. N. by W. Poughkeepsie. P. <1500.

Porteynon, par., Wales, Glamorganshire, Gower div., 13 m. WSW. Swansea, 1 m. N. **P. Point,** PMT.O. P. <250.

Port Fairy, formerly **Belfast,** seapt. tn. and watering-place, Victoria, Villiers co., at mouth of riv. Moyne, 12 m. W. Warrnambool, 186 m. WSW. Melbourne. P. <2000.

Port Famine, Chile. See **Famine, Port.**

Portfield, eccles. par., Eng., Sussex, Oving par., 2 m. E. Chichester, PM.O. P. <2000.

Portfield, vil., Wales, Pembrokeshire, 2½ m. W. by S. Haverfordwest, P.O. (**P. Gate**). See **Furzy Park.**

Port Francais, creek, N. ct. Haiti I., 4 m. WNW. Cape Haitien.

Port Franks, vil., Canada, Ontario, Lambton co., on Lake Huron, in 43° 14′ N., 36 m. WNW. London. P. <1500.

Port Frederick, inlet, on the NE. of Chichagof I., Alaska.

Port Frederick, Tasmania, estuary of the Mersey, Bass Strait, in 146° 20′ E.

Port Fulton, tn., U.S., in SE. of Indiana, Clarke co., near Jeffersonville. P. <1500.

Portgate, par., Eng., Northumberland, div. and 3½ m. NE. Hexham. P. <250.

Port Gavorn, seapt. vil., Eng., NW. ct. of Cornwall, 6 m. N. Camelford.

Port Germein, seapt. tn., S. Australia, Frome co., on the W. ct., on Spencer Gulf, 40 m. SSE. Port Augusta; depth in port at low water, 17–20 ft. P. <1500.

Port Gibson, tn., U.S., Mississippi, Claiborne co., 26 m. S. by W. Vicksburg. P. <2000.

Port Glasgow, a small inlet on the S. ct. Brit. New Guinea, in about 149½° E.

Port-Glasgow, parl. and mun. burgh and tn., Scot., W. Renfrewshire, on the l. bk. of the Clyde and the C. R., 3 m. ESE. Greenock. It has a public library, harbours with quays, and large graving dock; the original graving dock, built in 1762, was the first of its kind in Scotland. Shipbuilding is extensively carried on; other industries are sail-making and iron-founding. It is one of the chief ports on the Clyde for imports of N. American timber. The town was founded by the Glasgow magistrates in 1668 to be the seaport of Glasgow. The burgh unites with Renfrew, Rutherglen, Dumbarton, and Kilmarnock in sending one member to House of Commons. Market-day, F. Tn. P. 14,700; parl. and mun. burgh P. 14,600.

Portglenone, par. and tn., Ire., W. co. Antrim, bar. Lower Toome, 15 m. NW. Antrim, 8 m. from Ballymena stn., on the r. bk. of the Bann; has salmon fishery, and manufacture of linen. PMT.O. Par. 10,751 ac., P. 5100; tn. (partly in co. Londonderry, bar. Loughinsholin) P. <750.

Port Gordon, seapt., Scot., Banffshire, on the coast and the G. N. of S. R., 8½ m. NNW. Keith, PMT.O. P. <1500.

Port Gorey, small port with pier, W. side of Little Sark, Channel Is.

Port Gower, fishing vil., Scot., Sutherland, E. ct., 13 m. NE. by E. Golspie, 1½ m. SW. Helmsdale stn.

Port (Harbour) Grace, small maritime tn., Newfoundland, W. side of Conception Bay, 25 m. NW. St. John.

Port Gueydon, name taken by the town of Azeffun, 34 m. WNW. Algiers, Africa, after the French admiral of that name; a prosperous colony. P. (comm.) 39,900.

Porth, stn., Wales, Glamorganshire, E. div., at the junction of the Rhondda and Rhondda-fach branches of the Taff Vale Rly., 9 m. S. by W. Merthyr-Tydfil; coal mined. PMT.O.

Port Hacking, bay, E. ct. New South Wales, 12 m. SW. Sydney. The dist. forms the National Park of Port Hacking.

Porthall, tnld., Ire., E. co. Donegal, bar. N. Raphoe, 3 m. N. Lifford, with a stn. on the Londonderry and Enniskillen Rly. P. <250.

Port Hamilton, fine harbour enclosed by three small islands forming the Nanhou group, about 30 m. from S. ct. Korea, 44 m. NE. Quelpart I.; commands the entrance to Broughton Strait and Gulf of Pechili. In 1885 it was occupied by the English, who abandoned it two years later.

Port Hastings, seapt. tn., Canada, Nova Scotia, Cape Breton I., Inverness co., on the Gut of Canso, 66 m. WSW. Sydney. P. <1500.

Port Havannah, harb., on Vate, Sandwich Is.

Port Hawkesbury, seapt. tn., Canada, Nova Scotia, Cape Breton I., Inverness co., on the Gut of Canso, 66 m. E. Pictou. The tidal harbour has a depth at ordinary springs high water at entrance of 34 ft., at quayside 25 ft.; low water at entrance 28 ft., quayside 19 ft. There is no bar. Good anchorage. P. <1500.

Porthcawl, vil. and bathing-place, Wales, Glamorganshire, S. div., on the S. ct., 14 m. SSE. Neath, on the G. W. R.; exports coal and iron. The dock (area 7½ ac.) has depth of water over sill of 26 ft. highest spring tides, 14 ft. highest neap tides; the basin has 22–24 ft. over sill at ordinary spring tides, 15–16 ft. ordinary neap. Coastguard station. PMT.O.

Porthcothan Bay, Eng., on the NW. ct. of Cornwall, in 50° 31′ N.

Porth Dinlleyn, bay, Wales, in the W. of Carnarvonshire, in 52° 56′ N.

Port Helick ('the cove of willows'), St. Mary's, Scilly Is.

Port Henderson, small bay, Scot., Ross-shire, W. ct., 8 m. SW. by W. of the foot of Loch Maree.

Port Henry, vil., U.S., New York, Essex co., on Lake Champlain, 32 m. SSW. Burlington (Vt.); has several iron ore mines. P. <3000.

Porth Enys, former tn., Eng. See **Mousehole.**

Port Herald, customs station, Brit. Nyassa-land, on r. bk. lower Shire, below Chiromo, in about 17° 6′ S.

Port Herbert, inlet, Canada, Nova Scotia, on the SE. ct., its mouth in 43° 47′ N.

Port Hill, post-vil., Canada, Prince Edward Island, co. Prince, 22 m. from Summerside. P. <1500.

Porthkerry, par., Wales, Glamorganshire, S. div., on the S. ct., 8½ m. SW. Cardiff, 1½ m. W. Barry stn. P. <250; eccles. par. (**P. with Barry**) P. <1000.

Porthleven, eccles. par. and small seapt., Eng., Cornwall, Truro div., on the S. ct., 10 m. E. by S. Penzance, 2 m. WSW. Helston, with fisheries and lifeboat. The inner harbour has a depth of 16 ft. over sill at ordinary spring tides, 9 ft. ordinary neap tides. PMT.O. P. <2000.

Porthllongddu, small seapt., Anglesey, 7 m. NW. Beaumaris, on W. side of Red Wharf Bay.

Porthloe, vil., Eng., Cornwall, St. Austell div., on the S. ct., 7½ m. ESE. Truro, with lifeboat and coastguard station, P.O.

Porthmullin, cave, Eng., Cornwall. See **Mullion.**

Porth Nigel, or **Hell's Mouth,** bay, Wales, in the S. of Carnarvonshire.

Port Hood, seapt. tn., Canada, Nova Scotia, Cape Breton I., Inverness co., on the W. ct., 64 m. W. Sydney; depth at entrance at high water ordinary springs 30 ft., on bar at low water 2 ft.; good anchorage. P. <1500.

Port Hope, tn. and port of entry, Canada, Ontario, Durham co., on Lake Ontario, 57 m. E. by N. Toronto. P. <5000.

Porthpean, vil., Eng., Cornwall, St. Austell div., on the S. ct., 10½ m. S. by W. Bodmin, 1½ m. SE. St. Austell stn., P.O.

Porth Penllech, bay, Wales, in the W. of Carnarvonshire, in 52° 53′ N.

Porthtowan, vil., Eng., on the NW. ct. of Cornwall, 8½ m. W. by N. Truro, P.O.

Port Hudson, vil., U.S., Louisiana, on l. bk. Mississippi, par. and 25 m. above Baton Rouge. P. <1500.

Port Huron, city, U.S., Michigan, St. Clair co., on St. Clair R., 55 m. NE. by N. Detroit. An iron cylinder tunnel, 7000 ft. long, and 20 ft. in diameter, under the St. Clair R., between Port H. and Port Sarnia, in Canada, was opened in 1890. Great trade in lumber; has large elevators, shipyards, and four dry docks. It is the port of entry of the dist. of H., and has large commerce. Extensive traffic with Canada is carried on by the Grand Trunk Rly., which crosses the St. Clair at Fort Gratiot, which now (since 1894) forms the N. part of the city. Two other lines have their termini here. Numerous natural gas wells. Alt. 633 ft. Mean temp., yr. 44.9° F., Jan. 21.4°, July 68.3°; rfall. (9 yrs.), 35.26 in. P. (1880) 8900; (1890) 13,500; (1895, including Fort Gratiot) about 20,000.

Porthwen, small bay, Wales, on the N. of Anglesey, 2½ m. NW. by W. Amlwch.

Porthyrhyd, P.O., Wales, Carmarthenshire, 6 m. from Llandovery.

Porthyrhyd, vil., Wales, Carmarthenshire, 4 m. SW. Lampeter, P.O.

Porth-yr-Ogof, or **Cwm Porth,** limestone cavern, Wales, Brecknockshire, Vale of Neath, traversed for 250 yards by Mellte R.

Port Ibrahim, the harbour of Suez, Egypt.

Portici, small coasting and fishing port and residential tn., Italy, Campania, on the Bay of Naples, prov. and 5 m. ESE. Naples; has a former royal palace. P. 9800.

Portico di Caserta, tn., Italy, Campania, prov. and 3 m. WSW. Caserta. P. <3000.

Portillo, El, small port, Cuba, S. ct., 95 m. W. Santiago de Cuba, in 77° 19′ W.

Portincaple, hamlet, Scot., Dumbartonshire, on the E. shore of Loch Long, 8 m. NW. by N. Helensburgh.

Portington and Cavil, par., Eng., Yorkshire, E. Riding, Howdenshire div., 3 m. NE. Howden. P. <250.

Portinscale, vil., Eng., Cumberland, Penrith div., at the lower end of Derwent Water, 1 m. W. Keswick, PMT.O.

Port Isaac, isl., Eng., Cornwall, on Port Isaac Bay, 6½ m. NE. Padstow; shipping place for slate from the Delabole quarries. PMT.O.

Portisham (por'ti-sham, pronounced by the peasantry pŏs'ŭm),

par., Eng., Dorsetshire, W. div., 6 m. WSW. Dorchester, with stn. (**Portesham**) on the G. W. R. Birthplace of Captain Hardy (Nelson's friend). PM.O. (**Portesham**). 4511 ac. P.<750.

Portishead (port'is-hed, pronounced by seamen pŏs'et), par., seapt., and small tn., Eng., Somerset, N. div., on the estuary of Severn, 8 m. WNW. Bristol, on the G. W. R.; a frequented watering-place. The dock of 12 ac. has a depth on sill at high water highest springs of 37 ft., lowest neaps 20 ft. PMT.O. P.<3000.

Portiţa (portitsa), an inlet, Roumania, leading from the Black Sea, in 44° 4′ N., into Lake Rasim on the N., and the Sinoe Liman on the S.

Port Jackson, inlet, New South Wales, co. Cumberland, its entrance being between two lofty cliffs, the N. and S. heads, on the latter of which is a lighthouse 345 ft. above the sea, in 33° 52′ S., 151° 18′ E. It has numerous creeks and bays, and forms one of the finest harbours known, with dry dock and naval station. The city of Sydney is on its S. side. It extends 15 m. inland.

Port Jackson, vil., U.S., New York, Montgomery co., on Mohawk R. and the Erie Canal, 31 m. WNW. Troy. P.<1500.

Port Jefferson, vil., U.S., New York, Suffolk co., 59 m. E. Brooklyn by rail, on Long Island Sound; has a good harbour, and shipbuilding. P.<3000.

Port Jervis, vil., U.S., New York, Orange co., on the l. bk. of the Delaware R., and the Delaware and Hudson Canal, 48 m. SW. by W. Poughkeepsie. The fine scenery renders it a favourite summer resort; has extensive railroad shops. P. (1880) 8700; (1890) 9300.

Port Joinville, tn., France. See **Port Breton.**

Port Joli, inlet, Canada, Nova Scotia, on the SE. ct., its mouth in 43° 50′ N.

Port Joly, settlement, Canada, Quebec, L'Islet co., on the r. bk. of St. Lawrence, 53 m. NE. by E. Quebec.

Port Kennedy, harb., Queensland. See **Thursday Island.**

Portknockie (locally pronounced portnŏk'i, and accordingly incorrectly spelt **Portnockie**), vil., Scot., Banffshire, on the N. ct., 1½ m. NW. by W. Cullen, on the G. N. of S. R., PMT.O. P.<1500.

Portland, former tn., Canada, New Brunswick, St. John co., 2 m. N. by W. St. John, in which it is now included.

Portland, post-vil., Canada, Ontario, Leeds co., on Lake Rideau, 36 m. NNE. Kingston. P.<1500.

Portland, P.O., Ire., co. Tipperary, on the Shannon, 2 m. NE. Portumna, 12 m. from Parsonstown stn.

Portland, co., Queensland, crossed by 24° S. and 144° E.

Portland, tn., U.S., Connecticut, Middlesex co., on the l. bk. of the Connecticut, opposite Middletown, 14 m. S. by E. Hartford; noted for its quarries of brown sandstone. P.<5000.

Portland, city, U.S., Indiana, Jay co., 73 m. NE. by E. Indianapolis. P.<4000.

Portland, city and seapt., U.S., Maine, Cumberland co., 53 m. SSW. Augusta, on Casco Bay. The harbour is safe and spacious, and only occasionally obstructed with ice. At its entrance, on P. Head, is a lighthouse 70 ft. high, visible 16 m. There are no wet docks. The dry dock is the largest in the country after those at Brooklyn. The foreign trade is carried on chiefly with the W. Indies, S. America, and Europe; chief exports, provisions, fish, ice, and lumber; imports, iron, salt, crockery, sugar, and molasses. The greater part of British imports to P. are for transmission to Canada, during the winter season, by the Grand Trunk Rly. Manufactures include locomotives and marine engines, carriages, furniture varnishes, &c. The cod and mackerel fisheries are very important; grain trade large; the corn and lobster-canning business is extensive. Popular summer resort. First settled in 1632, incorporated a town in 1786, became a city in 1832. In 1866 a large part of the city was destroyed by fire. Mean temp., yr. 46.7° F., Jan. 24.0°, July 69.4°; rfall. (12 yrs.), 38.67 in. P. (1850) 20,800; (1870) 31,400; (1890) 36,400.

Portland, vil., U.S., Michigan, Ionia co., on Grand R., 71 m. SW. Bay City, and 20 m. NW. by W. Lansing. P.<2000.

Portland, settlement, U.S., N. Dakota, Traill co., 51 m. NW. by N. Fargo.

Portland, vil., U.S., Ohio. See **Oak Hill.**

Portland, city, U.S., Oregon, Multnomah co., on both banks of the Willamette R., at the head of ship navigation, 80 m. SE. of the mouth of Columbia R., 122 m. by these rivers from the Pacific Ocean, on a plateau rising from the stream, sheltered on the W. by a range of fir-covered hills; lighted by electricity, force supplied by the Willamette Falls, 12 m. distant. Next to San Francisco, the most important city on the Pacific coast of the U.S. It has regular steam communication with Brit. Columbia, San Francisco, Alaska, and other parts. The commerce is increasing rapidly, the chief exports being wheat, flour, salmon, and lumber; manufactures extensive; there are numerous foundries, saw-mills, and factories. The entrance channel to the port has 25 ft. of water at lowest water. Depth alongside the wharves at ordinary spring tides, high water 24 ft., low water 21 ft. Mean temp., yr. 52.7° F., Jan. 39.5°, July 67.2°; rfall. (yr.), 51.1 in., June–Sept. 4.92 in. P. (1850)<3000; (1870) 8300; (1880) 17,600; (1890) 46,400. **East P.,** adjoining city, P. (1880)<3000; (1890) 10,500. East P. and Albula united with P. in 1891.

Portland, bor., U.S., Pennsylvania, Northampton co., on the Delaware, 47 m. SE. Scranton. P.<1500.

Portland, seapt. tn., in W. of Victoria, Normanby co., on W. side of P. Bay, in 141° 4′ E., 250 m. NW. Melbourne by rail; has good harbour accommodation. Mean temp., yr. 56.6° F., Feb. 63.2°, July 49.5°; rfall. (16 yrs.), 32.84 in. P.<3000.

Portland, Isle of, penin. par. and tn., Eng., co. and 4 m. S. Dorset, insular only at certain states of the tide, and extending into the English Channel, 4½ m. in length N. to S., by 2 m. in breadth, connected with the mainland by the Chesil Bank, a narrow ridge of shingle 10½ m. in length, and terminating on the S. by **Portland Bill,** a rocky promontory, with two lighthouses 198 ft. above the sea, in 50° 31′ N., 2° 26′ W. It forms the S. side of Weymouth Harbour, and has extensive quarries of oolitic limestone, called Portland stone. A railway (L. & SW. R.) connects it with Weymouth. **Portland** is famous for its immense breakwaters, one 1800 ft., the other 6000 ft. long, which is separated from the first by a passage of 400 ft. in breadth, and 45 ft. deep at the lowest tide. The stone was conveyed from the top of the island by the convicts from Portland prison. The breakwater was commenced in 1849, and completed in 1871, at a cost of upwards of £1,000,000. The harbour formed by it has an area of about 2000 acres. It is defended by shore batteries and a fort. Par. and tn. P. 9400.

Portland Bay, large bay, Victoria, W. Cape Sir William Grant, in 141° 50′ E.

Portland Bill, cape, Eng., Dorsetshire, S. end of Portland I.

Portland Canal, fjord on the W. side of N. America, 60 m. long, bordered by mountains 3000–4000 ft. high at the entrance, and twice that height at the head; forms the boundary between Alaska and British Columbia.

Portland Cape, headland, Tasmania, NE. ct. Banks Strait, in 147° 57′ E.

Portland Ferry, Ire., N. co. Tipperary, bar. Lower Ormond, on the Shannon, 10½ m. W. Parsonstown.

Portland Islands, small group, Pacific Ocean, W. New Hanover.

Portland Isle, isl., New Zealand, S. Mahai Penin., at E. point of Hawkes Bay.

Portland Point, cape, Jamaica, on the S. ct., in 77° 8′ W.; off it, on the E., are Portland Keys.

Portland Race, Eng., a dangerous part of English Channel, in which the tides set E. with great velocity, off S. extremity of Portland I.

Portland Road, roadstead, Eng., on the S. ct. of Dorsetshire, between Weymouth and the isl. of Portland, protected on the E. by a breakwater 2½ m. long.

Portland Road, stn., Eng., London, Metropolitan Rly. (Inner Circle), 2 m. WNW. St. Paul's.

Portland Town, eccles. par., Eng., co. of London, St. Marylebone par. P. 8300.

Port La Tour, port of entry, Canada, Nova Scotia, co. Shelburne, 8 m. from Barrington. P.<1500.

Port Lavaca, vil., U.S., Texas, Calhoun co., on Matagorda Bay, 120 m. WSW. Galveston. P.<1500.

Portlaw, tn., Ire., N. co. Waterford, bar. Upperthird, 9 m. W. by N. Waterford, 3 m. from Fiddown stn., 1½ m. from the r. bk. of the Suir, PMT.O. P.<1500.

Port Lazaref, bay, on the E. ct. of Korea, at mouth of riv. Dungan, in 39° 20′ N., forming the N. part of the bay, which has Wönsan on its S. shore; an excellent natural harbour; deposits of gold within 20 m.

Portlemouth, East, par., Eng., Devonshire, Totnes div., 11½ m. SW. Dartmouth, 3 m. NW. Prawle Point. P.<500.

Port Leschenault, inlet, W. Australia, dist. Wellington, forming a backwater of the Indian Ocean. Length, 15 m.; breadth, 1 m.

Portlethen, fishing vil., Scot., Kincardineshire, on the E. ct., 6 m. S. by W. Aberdeen, on the C. R. P.<500.

Port Lewalgue, hamlet and small port, E. ct. Isle of Man, 2 m. SE. Ramsey.

Port Lihau, bay, on S. side of Prince of Wales I., in Endeavour Strait, Torres Strait, Queensland.

Port Lincoln, seapt. tn., S. Australia, Eyre's Penin., E. side, Flinders co., 156 m. W. Adelaide. Its harbour is one of the largest, and admits vessels of any draught. P.<1500.

Port Logan, seapt. vil., Scot., Wigtownshire, on a bay of the same name, 7 m. NW. by N. Mull of Galloway, 9½ m. SSE. Colfin stn., PT.O.

Port Lokko, tn., Africa, Sierra Leone, 35 m. ENE. Freetown, with station of the Church Missionary Society.

Portloman, par., Ire., W. co. Westmeath, bar. Corkaree, 4½ m. NW. Mullingar. P.<250.

Portlorgan, small fishing harbour, Ire., N. co. Donegal, near Malin Head.

Port Louis, fortified tn., France, dep. Morbihan, on the coast, arr. and 3 m. S. Lorient. P.<3000.

Port Louis, seapt., cap. Mauritius, on the W. ct. Rfall. (10 yrs.), 52.46 in. P. (including suburbs) about 60,000.

Port Louis, maritime tn., W. Indies, on NE. ct. of Guadeloupe I.

Port Lyttelton, New Zealand. See **Lyttelton.**

Port MacDonnell, port, S. Australia, Grey co., 18 m. SSW. Mount Gambier, 304 m. SE. Adelaide. P.<1500.

Port Macquarie, seapt. tn., New South Wales, Macquarie co., at mouth of riv. Hastings, 100 m. SE. Armidale, 180 m. N. Sydney. Mean temp., yr. 64.4° F., Feb. 73.1°, July 54.5°; rfall. (29 yrs.), 60.05 in. P.<1500.

Port Madison, vil., U.S., Washington, Kitsap co., 50 m. NNE. Olympia. P.<1500.

Portmadoc, small seapt. and market-tn., Wales, Carnarvonshire, Eifion div., on the S. ct., 16 m. SSE. Carnarvon, on the Festiniog and Cambrian Rlys. The harbour has a depth at high water of 13 ft. Its thriving trade is chiefly in slates, from the quarries of Festiniog, in Merionethshire, with which it is connected by railway. Market-day, F. See **Ynyscynhaiarn.**

Portslade, par. and seaside resort, Eng., Sussex, Lewes div., 4 m. WNW. Brighton, on the L. B. & S. C. R., P.O., and PMT.O. (**Portslade-by-Sea**). P. <4500; eccles. par. (**Portslade-by-Sea**) P. <2000.

Portsmouth, vil., Canada, Ontario, Frontenac co., on Portsmouth Bay, 1 m. W. by S. Kingston. P. <2000.

Portsmouth, parl. bor., and (since Richard I.) mun. and co. bor., naval-port and arsenal, Eng., Hampshire, 18 m. SE. Southampton, in the diocese of Winchester, on the SW. of **Portsea I.,** opposite **Gosport,** with which it has bridge communication, at the entrance to a magnificent harbour of the same name; stn. on the L. & SW. and Brighton Rlys. The suburbs, Portsea, on N., Landport, on NE., and Southsea, on E., now contain most of the population. The original Portsmouth being the garrison-town, Portsea the naval dockyard quarter, and Southsea the more fashionable dist., in which are fine thoroughfares and good shops, with two piers and an excellent esplanade, with fine views of Spithead and the Isle of Wight. Portsmouth also comprises Landport, besides Hilsea and other hamlets. The streets of the old town contain few features of interest, and, excepting the dockyard and harbour, there is little to attract visitors. The town-hall, costing £140,000, was opened in 1890, and the Victoria Park, Southsea Common, and other open spaces now afford much-needed recreation-grounds. The new jail and borough asylum are in the outskirts. At present Portsmouth is the most regular fortress in Great Britain, being protected by a series of detached forts, the outer line being on the heights N. of the harbour, with an inner line protecting Gosport and the Hilsea lines on the E. There are besides sea forts on the S., the coast to E. being under the Cumberland and South Sea Castle forts. Of eight barracks in the whole district, five are in Portsmouth proper. The floating bridge to Gosport starts from Point (where many boats land), which is separated from Portsmouth by a commercial harbour called the 'Cumber.' An interesting Norman fortress, Porchester Castle, N. of the harbour, was built on the site of *Portus Magnus*, a Roman station. The churches of Portsmouth have some antiquarian interest, and the house is still shown where Buckingham was stabbed by Felton. Portsea is separated from Portsmouth proper by an inlet called Millpond, and has on E. two gates. From the Hard, or beach, the Royal Albert Pier is projected. The dockyard, at the spot where King Alfred assembled his navy to fight the Danes, has been increased to an area of 293 ac. by recent improvements, and contains twelve docks, 22 ft. to 36 ft. deep, sufficient for the largest vessels—one of the building-slips admitting several vessels at the same time. The various departments of this quarter abound in interesting details of mechanical and engineering contrivances. In the dockyard is a government school of naval architecture. The docks are numbered from No. 1 to No. 15, besides five others, and are from 466 to 253½ ft. long. Portsmouth harbour, 'the finest in the world for ships of war,' to N. expands from 220 yards to 3 m. in breadth, with a length from N. to S. of 4 m., and depth of 24 ft. at low water. It lies close to Spithead, which is between Portsmouth and the Isle of Wight, where over 1000 men-of-war vessels can be anchored safely. The port, outside of the harbour, stretches 5 m. W., forming the N. side of Spithead, and 9 m. E. A buoy marks the spot where the *Royal George* went down in 1782. N. of the dockyard, the harbour, with its islands, looks like a picturesque lake. Admiral Byng was executed here in 1757. Portsmouth has little trade or manufactures apart from the government works. For local demand, there is trade in timber and coal, fruits, agricultural produce, &c. The only exports are pottery and tar. Portsmouth has steam communication with London, Southampton, the Isle of Wight, Plymouth, Falmouth, and Dublin. The Cumber slip is 500 ft. long, and its dry dock 349½ ft. There are two patent slips, 128 ft. and 72 ft. long respectively. The quayage of Inner Cumber is 1908 ft., and Outer Cumber 1155 ft. Average tide, 10 ft. Market-days, Tu., Th., and S. P. (1801) 32,200; (1851) 72,100; (1871) 113,600; (1891) 159,300.

Portsmouth, stn., Eng., Lancashire, Middleton div., on the L. & Y. R., 5½ m. SE. Burnley.

Portsmouth, city and seapt., U.S., New Hampshire, Rockingham co., 35 m. E. by N. Manchester, on the Piscataqua R., here from ½ to ¾ m. wide, which has so rapid a current as to prevent the freezing of the river; it forms a secure and commodious harbour for ships of any size, being well sheltered by its islands from the NE. storms, and is defended by several forts. The U.S. navy yard, on an island on E. side of the river, has every convenience for the construction and repair of the largest vessels. Depth at entrance to harbour at ordinary springs low water, 53 ft.; depth alongside quays, high water 30 ft., low water 20 ft. The lighthouse on the SW. side of the inner entrance is vis. 14 m. Considerable manufactures, including cotton fabrics, hosiery, ale and beer, boots and shoes, carriages, copper and brass products, &c.; shipbuilding. P. (1880) 9700; (1890) 9800.

Portsmouth, settlement, U.S., N. Carolina, Carteret co., 120 m. NE. by E. Wilmington, on Ocracoke Inlet, Pamplico Sound.

Portsmouth, city, U.S., Ohio, Scioto co., on the Ohio, at the mouth of Scioto R., 91 m. (113 m. by river) ESE. Cincinnati; shipping point for the minerals of S. Ohio and NE. Kentucky; has various manufactures. Alt. 533 ft. (R.R.). P. (1880) 11,300; (1890) 12,400.

Portsmouth, tn., U.S., Rhode Island, New Port co., on the coast, 10 m. SW. Fall R. (Mass.). P. <2000.

Portsmouth, city, U.S., Virginia, Norfolk co., on an inlet communicating with Hampton Roads, 79 m. SE. by E. Richmond; has dry dock and naval hospital, and in its suburb, Gosport, a U.S. navy yard. Vessels of the largest size come up to its wharves. Exports cotton, lumber, naval stores, pig iron, &c. P. (1880) 11,400; (1890) 13,300.

Portsmouth, maritime vil., W. Indies, on the W. ct. of Dominica, in the N. of the island.

Portsmouth Arms, stn., Eng., Devonshire, on the L. & SW. R., 9½ m. SE. by S. Barnstaple.

Port Soderick, stn., Isle of Man Rly., 2½ m. SW. Douglas, P.O.

Port Sonachan, hamlet, Scot., Argyllshire, on the SE. side of Loch Awe, 13 m. ESE. Oban; has pier and ferry. PMT.O.

Port Sorell, harb., Tasmania, in Bass's Straits, in 146° 30′ E. long.

Port Soullac, or **Savanne,** seapt., Mauritius, S. ct.

Portsoy, tn., Scot., Banffshire, on the N. ct., on Links Bay, 5 m. E. by S. Cullen, on the G. N. of S. R. It has a harbour and carries on a brisk trade; has fisheries and large distillery in neighbourhood. Serpentine obtained from cliffs on the coast. PMT.O. P. <2500.

Port Stanley, vil. and port of entry, Canada, Ontario, Elgin co., on Lake Erie, 22 m. S. London. Alt. 592 ft. Mean temp., yr. 45.3° F., Jan. 21.6°, July 68.4°. P. <1500.

Port Stanley, seapt., cap. Falkland Is., S. Atlantic, on the E. side of E. Falkland, in 51° 41′ S., 57° 51′ W. Mean temp. (4½ yrs., 1881–83, 1885, 1887), yr. 42.6° F., Feb. 49.5°, July 36.6°; mean rfall. (3 yrs.), 20.3 in. P. <1000.

Port Stephens, harbour of refuge, New South Wales, Gloucester co., 30 m. NE. by E. Newcastle; easy of access. Lighthouse at Point Stephens, visible 17 m.

Port Stewart, tn., Ire., NE. ct., co. Londonderry, bar. Coleraine, 3 m. WSW. Portrush, with stn. (**Portstewart**) on the Belfast & Northern Counties Rly.; a frequented watering-place. PMT.O. (**Port Steward**). P. <750.

Port-sur-Saône, tn., France, dep. Haute-Saône, on the Saône, 32 m. Besançon, arr. and 7 m. NW. Vesoul. P. <2000.

Portswood, Christchurch and **St. Denys,** two eccles. pars., Eng., Hampshire, South Stoneham par., on NE. side of Southampton, P.O. (**Portswood**). P. Christchurch, P. <3000; P. St. Denys, P. 4500.

Port Sydney, settlement, Canada, Ontario, Muskoka co., on Mary Lake and a railway, 105 m. N. Toronto.

Port Talbot, post-vil., Canada, Ontario, Elgin co., on Lake Erie, 24 m. S. by W. London. P. <1500.

Port Talbot, small port, Wales, Glamorganshire, 5 m. S. by E. Neath, belonging to the Swansea dist. of parl. bors., on the G. W. R. (stn. for **Aberavon**), and (**Port Talbot Docks**) on Rhondda and Swansea Bay Rly., port for Aberavon; the harbour is frequented by numerous coasting vessels; coal mined; has blast-furnaces and copper-works. The dock has a length of 1¼ m., depth over sill at ordinary spring tides 22½ ft., ordinary neap tides 13 ft.

Port Tampa, U.S., Florida. See **Tampa.**

Port Tennant, suburb of Swansea, Wales, Glamorganshire, E. side of Swansea harbour; has zinc-smelting works.

Port Tewfik, docks at S. end of Suez Canal, 2 m. S. of the town of Suez.

Port Tobacco, vil., U.S., Maryland, Charles co., 25 m. S. Washington (D. C.), on the Potomac. P. <1500.

Port Townsend, city, U.S., Washington, Jefferson co., 37 m. SE. Victoria (V. I.); has lumber trade. Port of entry for Puget Sound customs dist., and point of departure of U.S. mails for Alaska. Rfall. (14 yrs.), 19.23 in. P. <5000.

Portugal (as to the name, see **Oporto**), a kingdom occupying one-fifth of the Iberian penin., at the extreme SW. of Europe, between 36-43° N. and 6-10° W., in the shape of a N. to S. elongated rectangle (340 m. by 100 m., having Spain N. and E. for 620 m.), the Atlantic W. and S. (500 m. of coast), equal to more than one-third of the area of Great Britain. It is divided as shown in the following table:—

Districts. Old Provs.	Area in sq. m.	Pop. in Thousands. Jan. 1, 1878.	Pop. in Thousands. Nov. 30, 1890.	Mean incr. per Cent. per Annum, 1878-90.	Per sq. m. 1890.

Portugal (total)	35,745	4551	5082	0.85	142

Orography and Hydrography.—A diagonal, crossing P. NW. to SE., divides the lower littoral lands from the higher plateaux and mountains, which are principally piled up N. of riv. Tagus, and in the E., on the Spanish border. The lowlands thus gradually increase in width towards the S., where they embrace the flat *charnecas* of Alemtejo (at 650 ft. alt.). In the extreme S. of P., however, the mountains stretch from NE. to SW. One continuous mass of mountains seems to have formed, as a prolongation of the Spanish ridges [**Spain**], all the highlands of P., which, in course of time, were broken and traversed by the lower courses of four of the great Iberian rivers. The principal fragments of that mass are now: (1) between rivs. Minho and Douro: Peneda (4710 ft.), Gerez-Cabreira-Larouco (5180 ft.)-Nogueira-Bornes; (2) between rivs. Douro and Tagus: Montemuro (4530 ft.)-Manhouce-Caramullo (3510 ft.)-Bussaco, Mesas-Malcata-Gardunha (4000 ft.)-Alvellos-Perdigão-Estrella (6535 ft., the highest)-Açôr (4360 ft.)-Louzan-Aire-Monte Junto-Cintra (1640 ft.), reaching, to Cape da Roca, the westernmost point of continental Europe; (3) between rivs. Tagus and Guadiana, Niza-São Mamede, Ossa (2128 ft.), Portel, Ficalho (1690 ft.), Arrabida (1630 ft.), Grandola-Cercal, Monchique (Foia, 2962 ft.)-Caldeirão (Mu, 1886 ft.). Smaller rivers have their basins on the Portuguese plateaux (Lima, Vouga, Mondego, Sado); others merely drain the W. slopes of the highlands. The principal rivers are navigable, for steamers, for a considerable distance inland (Minho, 25 m.; Douro, 50 m.; Vouga, 26 m.; Tagus, 50 m.; Sado, 30 m.; Guadiana, 35 m.). **Geology.**—Archæan formations (Laurentian, Huronian) occupy the whole N. and E. of P. Palæozoic rocks (Silurian, Devonian) form long stretches among them. Granite, gneiss, crystalline schists, and limestones cover two-thirds of P. The Upper Carboniferous appears in the N. (Vallongo to Gafanhão), in the centre with Permian (Bussaco), and in the S. (near Alcacer), and the Lower Carboniferous in the extreme S. (W. and S. of Alemtejo). All other formations are included in a triangle formed on the W. and S. by the sea, and inland by a line from Ovar to Coimbra, Sardoal, the Tagus, and the lower valleys of rivs. Tagus and Sado (principally Jurassic, Cretaceous, N. of Lisbon; Tertiary, S. of riv. Tagus, the Sado valley), and all along the littoral of Algarve (Triassic, Jurassic, Cretaceous, and Tertiary). Volcanic rocks (basalt) are abundant around Lisbon. **Mineral Products.**—Copper (with sulphur and some gold and silver, principally in Alemtejo, as at São Domingos, part of the Iberian zone of pyrites, producing, since 1859, 100,000 tons annually; at Aljustrel, Chança, Mostardeira, Bogatho, Commenda, Sobral; also in Aveiro Palhal, Telhadella, Moinho do Pintor, with nickel and cobalt; in Bragança, at Vimioso, and Algarve, at the foot of the Monchique ridge), iron (in Traz-os-Montes, at Moncorvo, Quadramil; in Alemtejo, at Monges, Ayres, Zambujal, and from Santiago de Cacem to Odemira, with manganese; also in Estremadura, at Leiria), tin (at Rebordosa, Codeço, Villa Real, Vizeu), manganese (at Mertola, Grandola, Odemira), antimony (at Gondomar, Vallongo, Paredes, Monte Mór, Alcoutim), lead (at Marão, Villa Real, Vizeu: on the banks of riv. Douro; in Aveiro, at Braçal and Malhada; at Portalegre and Beja; sometimes with silver, as at Varzea de Trevões), coal (anthracite, at São Pedro da Cova, Bussaco; in Alcacer, at Moinho da Ordem; lignite, bituminous coal, at Buarcos, Cabeço de Veado, Arrimalde, Chão Preto; peat, in Setubal, at Comporta; bituminous sandstones, at Leiria and Torres Vedras), very good marbles, (in Alemtejo, at Estremoz, in Estremadura, at Ançan, Batalha, Pero Pinheiro, Arrabida, and in Algarve), kaolin (in Oporto, and in Aveiro, at Feira, and in Lisbon, Abrigada, Sacavem, Leiria), salt (320,000 tons annually from Aveiro, Figueira, Lisbon, Setubal, Faro). Mineral waters (Vizella, Taipas, Gerez, Felgueira, Vidago, São Pedro do Sul (temp. 156° F.), Luso, Caldas da Rainha, Vimieiro, Cucos, Estoril, Alcaçarias, Cabeço de Vide, Monchique).

Climate.—N. of riv. Mondego (principally on the littoral), P. is one of the dampest regions of Europe (mean annual humidity, 70 to 100 per cent.; rain, 46 to 79 in.). S. of riv. Tagus, P. is one of the driest (mean annual humidity, 30-80 per cent.; rain, 19-23 in. The N. interior plateau is drier than the littoral. The rains are almost abundant in winter; scarce in summer (in the S. only 3-10 per cent. of the total annual amount). Mean temp. increases from the extreme N. (53°-58° F.) to the extreme S. (63°), and from the sea to the interior (min. 20°, Jan., at Guarda; max. 111°, July, at Campo Maior). For four or five months the highest mountains in the N. are covered with snow. The Gulf Stream flows (N.-S.) along the coast. There are daily breezes from the Atlantic. The dominant winds are on the W. (summer, spring, autumn), NW., N., NE. (winter), SW., W., NW. (thirty years' observation), the old provs. of P. (Minho, Traz-os-Montes, Beiras, Estremadura, Alemtejo, Algarve), coincide with natural, climatic and orographic regions. The **flora** of N. and central Europe meets, in the centre of P., the African (Mediterranean) flora. Chestnuts and deciduous oaks form the inland N. forests; evergreen oaks (*Quercus lusitanica, Ilex, suber*) form those of the S.

Pines (*Pinus Pinaster*, *P. Pinea*, the only large forest of the latter being in the valley of riv. Sado, in Alemtejo), predominate on the littoral, N. of the Sado and Tagus valleys. The lower valley of riv. Mondego and the lofty mountains of Beira are the S. limit of the *Betula alba* of N. European forests. Olive and orange trees are to be found all over P. The American agaves and opuntiæ are everywhere naturalised. Fig-trees, the carob, *Rhododendron boeticum*, palms (*chamærops*), grow spontaneously in the S. Sugar-cane, cotton, and earth-nuts can here be cultivated. **Fauna.**—P. is in the Mediterranean subregion of the Palæarctic Zoogeographical region. See **Spain. Ethnography.**—The first historical inhabitants were so called Iberians and Celts (Lusitanians forming the central nucleus). P. was then successively colonised (along the coasts) by Greeks and Phœnicians, conquered by Romans, invaded by Suevians and Goths, occupied by Berbers and Arabs. Jews have formed since the Middle Ages an important part of the population. Many colonies from N. and central Europe were established during the Crusades. Many negroes were introduced in the 15th century, and, subsequently, a large emigration has been going on to Brazil and Africa (about 30,000 per year, mostly from the N. provs.).

Agricultural and Industrial Production.—P. produces some of the most world-renowned wines (the rich port or Douro wine, Bairrada, Carcavellos, Lavradio, Setubal, Algarve; the table wines of Dão, Torres Vedras, Cartaxo, Bucellas, Collares, Alemtejo), olive-oil, cork (from Alemtejo and Algarve), figs (Algarve), oranges (Tagus valley, Setubal, Algarve), and a great variety of fruits, including (in the S.) some tropical ones (bananas, dates). There are abundant fisheries (salmon, sardines, tunny); cattle are reared all over P. (oxen principally N., sheep in the centre, pigs S.). Rye and barley are the cereals of the N. regions; wheat of the S. Maize is grown everywhere; some rice on the swampy lands. There has been of late a great industrial activity (Oporto, Lisbon, Covilhan). The principal products are cottons, woollens, leather, tobacco, corks, machinery, alcohol, earthenware, glass, alimentary preserves, paper, lace, gold and silver filigrees, and domestic industries. Some ship-building is carried on. **Commerce.**—The principal exportation is of agricultural products (wine, cork, cattle, onions, fruit), fish, copper, sulphur, and some other mining products. Manufactured articles for the colonies (Angola). The importations are: cereals, articles of dress, machinery, coal, iron, sugar, fish, chemicals, timber. For statistics, see **Appendix**, pp. 3–5. The most extensive commerce is with Great Britain, then France, Germany, Brazil, United States, Spain, Belgium. **Means of Communication.**—The railway net of P. is almost complete (some important branches only wanting in Traz-os-Montes and Alemtejo), six international lines: (1) Oporto–Minho–Galicia; (2) Oporto–Douro–Salamanca; (3) Beira Alta; (4) Beira Baixa; (5) Lisbon–Caceres; (6) Lisbon–Badajoz. Total length of railway, 1400 m. (500 m. belong to the state). There are telegraph cables to England, the Azores, and Brazil (by Madeira and the Cape Verde Is.). The principal ports are: Caminha, Vianna, Povoa de Varzim, Oporto-Leixões, Aveiro, Figueira, São Martinho, Lisbon, Setubal, Villa Nova de Mil Fontes (W. ct., in the order from N. to S.), Lagos, Portimão, Faro, Tavira, Villa Real de Santo Antonio (S. ct.). The entrances to some of the W. ports are often obstructed by sands. The Portuguese ports are the natural commercial stations between Europe, America, and (W. and S.) Africa. **Public Institutions.**—P. is an hereditary monarchy governed by a Parliament (*Cortes*), with a Chamber of Peers (100 for life, 50 elected) and a Chamber of Deputies (173 elected by direct suffrage), where the colonies are represented. The Roman Catholic is the state religion, but all others are tolerated. There is an army of 30,000–150,000 men; a very small navy (5000 men). **Measures and Money.**—The metric system is universally used (since 1852). The *real* is the nominal standard of money; 4500 *reaes*, or *reis* in gold = £1. Silver coins of 500 (*meia corôa*), 200,100 (*tostaõ*), and 50 *reis* (500 *reis* piece = 12.5 gram., ·916 fine). The circulation is now chiefly of Bank of Portugal paper. **Historical Notes.**—The creation of the county of P. dates from the end of the 11th century; that of the kingdom of P. (to riv. Tagus) from the middle of the 12th century. In the middle of the 13th century this kingdom was extended to its extreme S. limit (Algarve). In 1308 was concluded the first commercial treaty with England. The 15th to 17th centuries are the epoch of the principal travels and geographical discoveries of the Portuguese (Atlantic is., Africa, America, from India to Persia, Arabia, China, Japan, the Moluccas, and Australasia). In 1486 Bartholomew Diaz passed to the E. of Cape of Good Hope. In 1497–8 Vasco da Gama made a voyage along the W., S., and E. coasts of Africa, and reached India. In the course of a few years the efforts of Pacheco, Almeida, Albuquerque, and Castro established Portuguese authority and dominion in many parts of Asia. The exploration of Brazil by the Portuguese began after the voyage of Cabral in 1500. From 1581 to 1640 P. was under Philips II., III., and IV. of Spain, and during that period the colonial power of P. rapidly declined. [**J. B. R.**]

Portugal Cove, vil., Newfoundland, on S. side of Conception Bay, 10 m. from St. John's. P. <1500.

Pose, China. See **Pose-ting.**

Posen, prov., Prussia, situated in the North German Plain, between Brandenburg and Russian Poland. The only small elevations are some isolated hills (Sichberg, 635 ft.). Principal rivers: Warthe (trib. of Oder, *q.v.*), with Prosna, Obra, and

Netze. The Vistula touches P. near Bromberg. Swamps and morasses form a peculiar feature in connection with the river courses, *e.g.*, the Obrabruch. Canals: the Bromberger Canal between Vistula and Netze, and the Sud Canal between Oder and Obra. P. has many small lakes, the most important being Lake Goplo. The climate of P. is changeable but healthy. The principal products are those of agriculture [see **German Empire**], besides timber and wax. Great attention is paid to horse and sheep breeding, large quantities of wool being produced. Principal manufactures: beet-sugar, paper, leather goods, beer, spirits, machinery, carriages, war materials, and textiles. The railways belong to the state. Cap. Posen; other towns of importance, Bromberg, Lissa, Ostrowo, Gnesen. About two-thirds of the inhabitants are Roman Catholics, about one-third Protestants; there are also a considerable number of Jews in the country. More than one-half of the population consists of Poles, the others are mostly Germans. The episcopate of P., founded as early as 968, was eventually added to the kingdom of Poland. After the divisions of Poland in 1772 and 1793 P. became a prov. of Prussia. See **German Empire,** table.

Posen, tn., Prussia, in the middle of prov. P., 102 m. E. Frankfurt on the Oder, on the Warthe at confluence of Cybina, cap. prov. and govt. P., containing also the administrative chief offices of circles East and West P.; a fortress of the first class (the defensive works including Fort Winiary on l. bk. Warthe and a girdle of detached forts in course of erection). Contains a cathedral with the monuments of the Polish kings Miecislaw I. and Boleslaw I., and the Raczynski Palace, with the library of 30,000 vols. Has manufactures of machinery, iron-wares, &c., and an active trade by rail and river in agricultural produce. P. was made the see of a bishop shortly before 1000 A.D., and in early times was regarded as the cap. of Great Poland; afterwards it declined and did not revive till it came into the hands of Prussia (1793, 1815). Mean temp., yr. 47.3° F., Jan. 29.3°, July 66.0°; rfall. (23 yrs.), 19.84 in. P. (1816) 23,900; (1871) 56,400; (1890) 69,600.

Posenhall, par., Eng., Salop, Wellington div., 12½ m. SE. by E. Shrewsbury, 3 m. ENE. Much Wenlock. P. <250.

Posefing, Pose, Pese, or **Pakshik,** tn., China, Kwangsi, 20 m. E. of the frontier of Yünnan, limit of navigation of the Yu-kiang (N. fork of the Si-kiang or West R.) for boats drawing more than 1 ft.; unhealthy. Alt. 530 ft. (Bourne). See **Po-ngai.**

Potamos, vil., Greece, on the E. ct. of Corfu I., 4 m. W. Corfu. P. <2000.

Potanúr, rly. stn., Brit. India, Madras, dist. and 4 m. SE. Coimbatore.

Potchefstroom, tn., S. African Republic, cap. of P. div., on the S. frontier, 90 m. SW. Pretoria. P. <2000.

Poteau River, U.S., Arkansas, rises in Scott co., flows W. and N. into Arkansas R. near Fort Smith. Length about 100 m.

Potenza, the ancient *Potentia,* tn., Italy, Basilicata, cap. prov. P., on a height above the Basento, 55 m. E. Salerno. In ancient times and the Middle Ages more important than now; sacked by the Emperor Frederick II. in 1250, and by Charles of Anjou in 1268; destroyed by an earthquake in 1273, and again in 1857. Alt. 2712 ft. Mean temp., yr. 53.0° F., Jan. 37.8°, July 70.9°; rfall. (13 yrs., 1879–91), 26.3 in. P. 17,000.

Potenza, riv., Italy, rises in Monte Pennino, prov. Perugia, flows ENE. into the Adriatic at Recanati. Length, 58 m.; area of basin, 283 sq. m.; mean discharge, 400 cubic ft. per second, highest discharge 23,000 cubic ft. per second.

Potenza Picena, tn., Italy, The Marches, prov. Macerata, 19 m. S. by E. Ancona. P. <3000.

Potgieter, settlement, Cape Colony, Griqua-land West, dist. Hay, 110 m. SW. by S. Kuruman.

Poti, or **Putl,** small tn., Brazil, state Piauhy, 120 m. N. Oeiras, on l. bk. of the Paranahiba, at confluence of riv. Poti, in 5° 43′ S. Mean temp., yr. 58.6° F., Jan. 42.3°, Aug. 75.1°.

Poti (Turkish **Kala-fash**), tn. and seaport, Russia, Transcaucasia, govt. and 79 m. WNW. Kutais, on Black Sea, at the mouth of the Rion, near Lake Paleostome, 42° 8′ N., 41° 39′ E.; terminus of railway to Tiflis and Baku, with a branch to Batum. Built on low ground, and very unhealthy on account of surrounding marshes and heavy rainfall (13 yrs.), 65.7 in. Open roadstead; nevertheless the export and import trade attain the value of £600,000, while the coasting trade is still more important. P. 4700.

Potok Zloty, tn., Austria, Galicia, dist. and 10 m. S. by W. Buczacz. P. <4000.

Potolah, Tibet. See **Lhasa.**

Poto'mac, riv., U.S., rises by two heads in the Alleghany Mts., flows SE. along the boundary between Maryland and Virginia, and enters Chesapeake Bay by a mouth 10 m. in width. Principal affluents, the Savage and Shenandoah. Leonard Town, Harper's Ferry, and Alexandria are on its banks. It abounds in beautiful scenery, the place where it breaks being specially noted on this account. Above Washington it is obstructed by falls of 40 ft. in height, and rapids, around all which canals have been constructed. Length, 550 m.; navigable for warships to Washington, 110 m.; area of basin, 16,000 sq. m.

Potosí, tn., Bolivia, cap. dep. P., 50 m. SW. Sucre; noted for centuries for its production of silver, which is still mined here [**Bolivia,** Mineral wealth]. A railway connecting it with the Antofagasta-Oruro line is projected. Alt. about 13,000 ft. P. 11,900.

Potosí, tn., Mexico, Nuevo Leon, 64 m. S. Monterey.

Potosí, vil., U.S., Missouri, Washington co., 56 m. SW. by S. St. Louis; extensive mines of iron and lead near. P. <1500.

Potosí, vil., U.S., Wisconsin, Grant co., 12 m. N. by W. Dubuque (Io.). P. <1500.

Potro, summit of the Andes, Chile, in 28° 28′ S., 90 m. SSE. Copiapo. Alt. 18,320 ft.

Potschappel, vil., Ger., kgd. Saxony, circle, dist., and 4 m. SW. Dresden. P. <5000.

Potsdam, vil., Cape Colony, dist. and 14 m. NW. East London.

Potsdam, tn., Prussia, cap. prov. Brandenburg, circle P., on an island in the Havel, 16 m. SW. Berlin. It is well laid out and finely built, with broad streets, fine squares and gardens. There are several royal palaces near, especially the official one, with handsome grounds, that of Sans-Souci in the formal French style, that of Friedrichskron with nearly 200 rooms, Charlottenhof, the Marble Palace, and Babelsberg. The chief public buildings are the military orphanage, the garrison-church with a steeple 290 ft. high. There are also an observatory, military colleges, &c. Several spaces are laid out as orna-

mental pleasure-grounds. Before the time of Frederick II., Potsdam was only known as a fishing-village, and the whole of this 'German Versailles' and its surroundings is a monument of his taste and splendour. Manufactures sugar, cotton and woollen goods, chocolate, and tobacco; flower-gardening is an important industry. The town depends on the court, the garrison, and the visitors from Berlin. P. (1816) 20,250; (1871) 43,800; (1880) 48,400; (1890) 54,100, mostly Protestant; about 7000 are in garrison.

Potsdam, vil., U.S., New York, St. Lawrence co., on Racket R., 90 m. W. by N. Burlington (Vt.), 25 m. E. by S. Ogdensburg; has foundries, machine-shops, and manufactures of agricultural implements; noted for extensive quarries of sandstone of a geological formation named from this place. P. <4000.

Potsdam Hafen, port, Ger. New Guinea, in 4° 15′ S., 144° 55′.

Pozzomaggiore, tn., Sardinia, prov. Sassari, 21 m. ESE. Alghero. P.<4000.

Pozzuoli, the ancient *Puteoli*, tn., Italy, Campania, on the Bay of Naples, prov. and 7 m. W. Naples. The ancient city was three times destroyed in the 4th and 5th centuries A.D., but on each occasion speedily rebuilt. There are still numerous remains of antiquity, the most remarkable being a mole and three columns of the temple of Serapis, with borings of shell-fish at the height of about 15–25 ft. from the ground, which are usually taken to indicate the oscillations that the land has undergone here (sinking between the 3rd and the 16th century, and afterwards rising). Near the town is the solfatara, from which sulphur is obtained, the Grotto del Cane, and the Cave of Avernus. Near it also is obtained the reddish earth hence known as pozzolana, which when mixed with other earthy matter forms an excellent cement (of which the ancient mole is built). Now see of a bishop, and seat of a govt. factory of arms, armour-plates, and naval machinery. P. 11,500.

Praga, suburb of **Warsaw** (*q.v.*).

Prague, German **Prag,** Bohemian (Chekh) **Praha,** fortified city, Austria, cap. of Bohemia, situated near the centre of that kingdom, 155 m. NW. Vienna, on both banks of the Moldau, at the head of steam navigation on that river, by which and the Elbe it is placed in regular steamer communication with Hamburg. It occupies a picturesque site in a basin-shaped valley at the base and on the slopes of hills near the N. border of the southern and more elevated region of Bohemia, at the crossing-place of the ancient N. and S. line of communication formed by the Moldau with the E. and W. routes through the valleys of the Elbe and Eger. On the r. bk. of the Moldau stands the greater part of the city, comprising the *Altstadt* and *Neustadt*, together with, outside the walls, the suburbs of Karolinenthal, Königliche Weinberge, and Žižkov (Žižkow); on the l. bk., within the walls, the *Kleinseite* and the *Hradschin*, with the S. suburb of Smichov (Smichow) outside. The two sides are connected by seven bridges. Karlsbrücke, the most interesting bridge, 543 yards long, has mediæval gate towers, and statues of saints along its numerous buttresses. Altstadt, the old town, is the com-

mercial centre, and most densely populated, containing the university and other important educational institutions; the faculties of theology and philosophy occupy the 'Clementinum,' an ancient Jesuit college, where also is the university library (180,000 volumes). On the quay is the Rudolfinum, a large Renaissance building, comprising an art academy, a musical 'conservatoire,' and a museum. Other structures are the chief church, the Crusaders' Church, and the Gallas Palace. Neustadt, the new town, enclosing the Altstadt between it and the river, has many handsome broad streets and squares, and contains the Bohemian technical college and a magnificent new Bohemian theatre. Kleinseite, or Little Prague, is the aristocratic quarter, built on the slopes of the hills Laurenzberg and Hradschin, and containing the Palace Waldstein (or Wallenstein), the hall of the Bohemian diet, the residence of the Viceroy of Bohemia, and a handsome Jesuit church. Behind Kleinseite rises Hradschin castle hill to a height of 240 ft., crowned with the Imperial palace, an extensive and irregular pile, containing the cathedral of St. Vitus, with a tower 300 ft. high, a mausoleum of the Bohemian kings, and the regalia of the kingdom. Near the Imperial palace are three other palaces and several large monasteries. P. is noted for its public parks and gardens. It is the centre of Bohemian commerce and industry. Manufactures machinery, linen, cotton, leather, gloves, &c. The transit trade is important, and is much assisted by the roads and railway system, of which Prague is an important central point. In 1744 P. capitulated to Frederick the Great, and in 1866 it was occupied by the Prussians, who here concluded a treaty with Austria. Alt. 730–895 ft. Mean temp., yr. 48.0° F., Jan 30.2°, July 67.1°; rfall. (50 yrs.), 18.5 in. P. (1869) 157,700; (1890) 182,500; including suburbs, 310,500.

Prah, riv., Africa. See **Busum Pra.**

Prahecq, vil., France, dep. Deux-Sèvres, arr. and 7 m. SE. Niort. P. <2000.

Prahova, riv., Roumania, rises in the Transylvanian Alps, and flows SSE. and SE. to the Ialomița, which it joins on the l. bk. 28 m. SE. by E. of Ployeshti.

Prahran, city, Victoria, SE. suburb of Melbourne. P. 39,700.

Prahsu, tn., Africa, Gold Coast, 75 m. WNW. Akra, generally chosen as the 'key' to Ashantee.

Praia, or **Praya** (**Porto Praya**), tn., Cape Verde Is., on SE. ct. Santiago I., cap. of the archipelago, in 14° 54′ N,, 28° 10′ E. It succeeded Ribeira-Grande as cap. in 1770; climate still unhealthy. It has been proposed to transfer the government of the islands to another town. P. is the telegraphic station by which Senegal is connected with the submarine cables of Europe, W. ct. of Africa, and the New World. The harbour is an open bay, with anchorage in 4–6 fathoms in low water. The tide rises 5 ft. Mean temp. (5 yrs., 1875–79), yr. 76° F., Jan. 72.0°, Aug. 79.7°; rfall. (5 yrs.), 12.72 in. P. 4000.

Pressburg, or **Presburg,** Hungarian **Pozsony,** anciently *Posonium,* city and royal free tn., Hungary, on the Danube, l. bk., in the midst of a beautiful country, 35 m. E. Vienna. It is the see of an Evangelical bishop, and was formerly cap. of the kingdom. Besides a superior law-court, there are several important public institutions: academy of jurisprudence and philosophy, Evangelical lyceum and seminary, Roman Catholic gymnasium, the ancient cathedral (where many of the Hungarian kings have been crowned), the town house, Parliament House, and many churches. The royal castle, on the Schlossberg (destroyed by fire in 1811), is a prominent feature, overlooking the Danube on a plateau 273 ft. high. It was an important fortress in the struggle against Turkish invasion; when Buda was taken, P. was made the cap. of Hungary and place of coronation, the parliament being held here till 1848. There is an important transit trade in grain, linen, and Hungarian wines. Alt. 540 ft. Mean temp., yr. 50.1° F., Jan. 30.1°, July 71.0°. P. (1850) 42,100; (1869) 46,500; (1890) 52,400 (three-fifths Germans).

Preston, parl. bor. (2 members), mun. bor. (since Henry II.), and co. bor., port, par., and market-tn., Eng., Lancashire, 21 m. SSE. Lancaster, in the diocese of Manchester, on a height 120 ft. above the navigable riv. Ribble and the Lancaster Canal, on the L. & NW. R. and L. & Y. R. The staple manufacture now is cotton (principally fine yarns), Arkwright, a native, having here set up his first spinning-frame in 1768; iron and machine-works; large shipbuilding trade, and increase of shipping trade for ocean traffic. Amongst the public buildings are a new county hall, and a free library and museum containing a valuable art collection. There are now three large public parks. The new Albert Edward Dock is expected to increase the Ribble navigation; its water area is 40 ac., with 6798 ft. of quayage, and a depth on sill of 29 ft. at high water ordinary springs, 22 ft. at high water ordinary neaps; but the depth in the harbour available for vessels entering port is only 16–17 ft. at high water ordinary springs. P. is an old town which grew up on the decline of the older port of Ribblechester, higher up the river. Its name, interpreted as *Priest's Town*, is said to have been due to the number of religious houses here in the Saxon times. In Camden's time (1607) it is described as a large and, for these parts, handsome and populous town. There are many fairs held. Market-days, M., W., and S. Mun. bor. (1891) 4089 ac., P. (1801) 11,900; (1851) 69,500; (1871) 85,400; (1891) 107,600; parl. bor. (1891) 6071 ac., P. 111,700.

Pretoria, tn., Africa, cap. of the S. African Republic, picturesquely situated on the slopes of a well-watered and fertile upland valley S. of the Magalies range near the source of the Apies R., in 25° 45′ S., 28° 25′ E. Founded about 1855, and named after the then president of the republic, M. W. Pretorius. Climate changeable, and for new-comers at least unhealthy, especially in the summer, when rains are constant, and the low-lying parts are marshy and fever-breeding. Till 1891 even the drinking-water was polluted, but in that year an abundant supply was introduced. The population has been rapidly increasing of late owing to the prosperity of the neighbouring gold-mines of the Witwatersrand, and the opening of railway communication with Cape Town (Jan. 1, 1893). Since the 8th of July 1895 the town has also been connected by rail with Delagoa Bay, and a line is now being continued to P. from Charlestown, Natal. Alt. 4462 ft. Mean temp. (3½ yrs., 1875–78), yr. 66.9° F., Jan. 73.6°, July 58.8°. In 1890 the white population was found by census to amount to a little more than 5000, and the black population at the same date was estimated at about 6000.

Prince Edward, co., U.S., Virginia, in the S., N. of 37° N., and W. of 78° W.

Prince Edward Island, prov. of the Dominion of Canada, North America, in the Gulf of St. Lawrence, mostly between 46° and 47° N., 62° and 64° 30′ W., separated S. and W. from Nova Scotia and New Brunswick by Northumberland Strait. Length, 140 m.; breadth, 15–34 m.; about seven times the size of the isl. of Anglesey. It is divided into three counties, Queen's, Prince, and King's. The surface is generally level or undulating, and well watered; the shores are indented by numerous inlets. The island is entirely composed of triassic and carboniferous sandstone. Climate [**Charlottetown**] milder than in the surrounding British colonies, and generally free from fogs. Soil fertile. Most of the grains and vegetables raised in England come to perfection in this colony; timber is plentiful, and the pastures are of a superior quality. The island is said to be the best fishing station in the Gulf of St. Lawrence; but the inhabitants are mainly agricultural, and the fishermen come mostly from the neighbouring provs. and the U.S. Mackerel, herring, cod, haddock, hake, halibut, trout, smelts, and eels, besides oysters and lobsters, are the chief fishery products. Communication with the mainland by ordinary steamer lines plying daily to Nova Scotia and New Brunswick from about the middle of April to the middle of December; during the remainder of the year by a steamer specially constructed for winter navigation, and by boats crossing to New Brunswick at the nearest points, a distance of 9 m. A submarine tunnel is projected. Government vested in a lieutenant-governor, appointed by the Dominion government, a council of eight members, and a house of assembly of thirty members, elected by the inhabitants. Chief towns, Charlottetown, the cap., Princetown, and Georgetown. Free schools were established over all the island in 1856. Area, 2133 sq. m. P. (1891) 109,100. See **Canada,** table.

Prince Frederick Harbour, gulf full of minor islets, NW. ct. of Australia, in 15° S., 125° E.; coasts steep.

Prince Frederick Sound, channel, Alaska, running E. and W. between Baranof I. and the mainland, in 57° 10′ N.

Prince Frederik Hendrik, isl., Dutch New Guinea. See **Frederik Hendrik.**

Prince George, co., U.S., Virginia, in the SE., crossed in the extreme E. by 77° W., and bounded on the N. by the estuary of James R.

Prince George's, co., U.S., Maryland, on the W. frontier, crossed in the N. by 39° N., bounded on the E. by the Patuxent R.

Prince Island, Gulf of Guinea. See **Principe, Ilha do.**

Prince Leopold Island, Brit. N. America, at W. end of Barrow Strait, in 74° 5′ N., 90° 0′ W.

Princenhage, vil., Netherlands, prov. N. Brabant, about 2 m. SW. Breda. P. (comm.) 7200.

Prince of Wales Archipelago, N. America, the southernmost group of the Alaska terr., between 54° 25′ and 56° 30′ N., 132° and 134° 0′ W., 40 m. N. Queen Charlotte Is.; main island about 120 m. long by 10-40 m. broad; abounds in salmon and the yellow cedar (*Cupressus nutkaensis*), the most valuable shipbuilding timber of the Pacific coast, resisting as it does the attacks of the teredo. Scantily inhabited by a tribe known as Tleviakans, or Kaigahnees, whose chief settlement is at Howkan, on Córdova Bay in SW. There is a United States post-office at Klawak, about the middle of the W. coast.

Prince of Wales Island, Straits Settlements. See **Pulo Penang.**

Prince of Wales Islands, group belonging to Queensland, at the N. end of the Cape York Penin., the largest called Prince of Wales I. or Muralug. See **Thursday Island.**

Princes Channel, fairway in Thames estuary, Eng., 10 m. NW. Margate; on N. side of channel is Princes Channel lightvessel, visible 10 m.

Prince's End, stn., Eng., S. Staffordshire, on the G. W. R., about 2 m. S. Bilston.

Princes Islands (Turkish **Kizil Adalar**), group in the E. of the Sea of Marmora, 13 m. S. Constantinople, near the coast of Asia Minor; the group consists of nine islands, the largest being Prinkipo and Khalki.

Princes Pier, a steamboat pier, Scot., Greenock, also a terminal stn. of the G. & SW. R.

Princes Risborough, par., Eng., Buckingham, div. and 6½ m. S. by W. Aylesbury, ½ m. S. Monks Risborough, with stn. (**P. Risboro'**) on the G. W. R. PMT.O. (**P. Risboro'**). Market-day, Th. 4697 ac. P. <2500.

Princess Anne, vil., U.S., Maryland, Somerset co., 81 m. SE. by E. Washington (D. C.). P. <1500.

Princess Anne, co., U.S., Virginia, in the extreme SE.

Princess Charlotte Bay, NE. ct. Queensland, in 14° 29′ S., 144° E.; breadth, 30 m.

Princess Marianne, strait, Dutch New Guinea. See **Prinses Marianne.**

Princess Royal Harbour, W. Australia, dist. Plantagenet, a bay of King George's Sound, capable of receiving the largest ships. On its N. side is Albany town.

Princess Royal Islands, Brit. N. America, Pacific Ocean, N. of Vancouver I.

Prince's Strait, Eastern Archipelago. See **Behouden Passage.**

Princeton, tn., U.S., Missouri, Mercer co., 84 m. NE. by E. St. Joseph. P. <1500.

Princeton, bor., U.S., New Jersey, Mercer co., 10 m. NE. by N. Trenton, beautifully situated upon an elevated ridge; seat of the celebrated P. College, founded 1746. Battle here in 1777, when Washington defeated the English. P. <4000.

Princeton, vil., U.S., Wisconsin, Green Lake co., 70 m. SW. of the head of Green Bay. P. <1500.

Princetown, seapt. tn., Canada, Prince Edward I., Prince co., on the N. ct., 34 m. NW. Charlottetown. P. <1500.

Princetown, vil., Eng., Devonshire, Tavistock div., 14 m. NE. by N. Plymouth, on a branch of the G. W. R., near Dartmoor convict prison. PMT.O. (**Prince Town**).

Princeville, coal-mining vil., U.S., Illinois, co. and 22 m. NW. Peoria by rail. P. <1500.

Prince William, co., U.S., Virginia, in the NE., on the estuary of the Potomac, N. of 38½° N.

Prince William, isl. in Fiji group, Pacific Ocean.

Prince William Henry, isls., Pacific. See **Negonego.**

Prince William's (or **Chugach**) **Sound,** large gulf on the S. ct. of Alaska, in 60–62° N., 146–148° W. Navigation rendered difficult for small boats by the floating ice derived from the numerous great glaciers that descend to its shores from the Chugach Alps. Unsurveyed, and hence not visited by large vessels.

Principe, Ilha do (Prince I.), Portuguese isl., Gulf of Guinea, W. Africa, about the size of the Isle of Wight, 86 m. NE. of São Thome (St. Thomas), on which it depends, 135 m. SW. Fernando Po; bristling with mountains covered with luxuriant vegetation, hence the name of 'Garden of Africa'; soil fertile, climate unhealthy; had formerly large sugar plantations. Now its chief product is cacao, but very little of the area is under cultivation. Chief town and port São Antonio (in NE.), one of the most beautiful of tropical harbours.

Principe da Beira, fort, Brazil, on the riv. Guapore (Bolivian frontier), at the confluence of the riv. Itonamas, in about 64° 30′ W.

Pring, co., Queensland, crossed by 28° S. and 150° E.

Pringles, settlement about 65 m. in a direct line above the mouth of the Rio Negro, govt. of the Rio Negro, Argentine Republic, founded in 1836. Consists of about 200 houses of sun-dried bricks.

Prinkipo, one of the **Princes Islands** (*q.v.*), Sea of Marmora.

Prinknash Park, par., Eng., Gloucestershire, dist. Gloucester, 2 m. N. Painswick. P. <250.

Prinlaws, part of Leslie (*q.v.*), tn., Scot., Fifeshire. P. <1000.

Prins Alexander Polder, reclaimed land, Holland, prov. S. Holland, about 1 m. N. Rotterdam.

Prinses Marianne, Marianne, or **Dourga,** strait, separating Frederik Hendrik I. from S. ct. of Dutch New Guinea, 8° S., 138° 50′ E.

Printlan Isles, group of isls., Siam, Malay Penin., off the E. ct., in about 5° 53′ N.

Prinz Albrecht Hafen, port, Ger. New Guinea, in 4° 17′ S., 144° 58′ E.

Prinzapolca, dist., Central America, Nicaragua, crossed by 13½° N., 84½° W.; cap. Cuicuina. Gold-mines on the banks of the **riv. Prinzapolca,** which flows E. through the dist. and enters the Caribbean Sea in 13° 18′ N.

Prinzenthal, vil., Prussia, prov. Posen, govt., circle, and immediately adjoining Bromberg on the W. P. <3000.

Prinz Frederik Karl Hafen, port, Ger. New Guinea, in about 145° 47′ E., 5° 12′ S.

Prinz Heinrich Hafen, small bay in the E. of Ger. New Guinea, in 5° 13½′ S.

Prinz Wilhelm Island, Mathias, or **St. Mathias,** isl., S. Pacific Ocean, Bismarck Archipelago, NW. of New Hanover, crossed by 1° 40′ S., 149° 40′ E. Interior mountainous. Area about 250 sq. m.

Prion, eccles. par., Wales, Denbighshire, Llanrhaiadr in Kinmerch par. P. <750.

Prior, par., Ire., co. Kerry, bar. Iveragh, on Ballinskelligs Bay, 7 m. S. Cahersiveen; 11,795 ac. P. 2500.

Prior, cape, on the NW. of Spain, 10 m. NW. Ferrol.

Prior Fen, P.O., Eng., Cambridgeshire, 4 m. from Waterbeach.

Prioriño Grande, cape, on the NW. of Spain, 7 m. W. Ferrol.

Priors Dean, par., Eng., Hampshire, Petersfield div., 15½ m. E. Winchester, 3 m. WNW. Liss stn. P. <250. See **Colemore.**

Priors Hardwick, par., Eng., Warwickshire, Rugby div., 10 m. N. by E. Banbury, 3½ m. NW. Byfield stn., P.O. P. <500.

Prior's Lee, eccles. par., Eng., Salop, Newport div., 14 m. E. Shrewsbury, 3 m. NW. by W. Shiffnal, 1 m. N. Malins Lee stn., P.O. P. <2000.

Priors Marston, par., Eng., Warwickshire, Rugby div., 11 m. N. by E. Banbury, 3 m. NW. by N. Byfield stn., PM.O. P. <750.

Pripet, or **Pripyat,** riv., W. Russia, govts. Volhynia, Minsk, and Kiev, r. bk. trib. of Dnieper, rises in Vladimir-Volhynsk dist., flows E. 500 m. through a flat marshy country, often inundated, joins Dnieper 50 m. above Kiev, receives Yatsolda (Yasolda), Sluch, and Ptich (240 m.) from left, Turiya, Styr, and Goryń, with another Sluch, from right; important channel of navigation, the Yasolda, or Yatsolda (165 m.), being connected by Oginski Canal with the Niemen (Memel). Free from ice for 256 days at Mozyr.

Prishtina, tn., Turkey in Europe, cap. prov. (sanjak) Prishtina, and of the vilayet of Kossovo, 38 m. NE. by N. Prizren. Alt. 2065 ft. P. 17,550, mainly Moham. (G. 231).

Prisren, Turkey. See **Prizren.**

Prüfening, vil., Ger., kgd. Bavaria, govt. Upper Palatinate, on r. bk. of the Danube, 3 m. WSW. Regensburg. P. <2000.

Prüm, tn., Prussia, Rhine Prov., circle P., 42 m. SSE. Aix-la-Chapelle, 34 m. NNW. Trèves. P. <3000.

Pruna, comm., Spain, Andalusia, prov. and 53 m. SE. Seville, dist. Morón. P. <4000.

Prunelli, or **Prunelle di Fiumorbo,** comm., Corsica, 32 m. E. by N. Ajaccio; baths of Pietrapola near. P. <2000.

Pruntrut, Switzd. See **Porrentruy.**

Prussia, German **Preussen,** kgd., Ger., the largest and most important state of the German Empire, stretching, though not everywhere uninterruptedly, across the whole width of the empire at its widest part, and reaching S. of 50° N. both in the SW. and SE., besides including the outlying principality of Hohenzollern still further S. between Würtemberg and SE. Baden. It is composed of the provs. named in the table under German Empire.

The **surface** of P. being described in its broad features under German Empire, and in detail under the several provs., it is enough to say here that the mountains and high grounds generally are found chiefly in the SW. of the kingdom, and in the SW. frontier of the prov. of Silesia, and that the whole of the N. German plain is included in P., with the exception of the northern sections of Oldenburg, the territory of the free cities of Bremen, Hamburg, and Lübeck, the grand-duchies of Mecklenburg, Schaumburg-Lippe, and parts of Lippe, Brunswick, and Anhalt. In this plain there are extensive areas of heath and moorland W. of the Elbe; the Lüneburg heath in E. Hanover, a vast forest-clad heath in the neighbouring Altmark (N. of prov. Saxony), the Senne in E. Westphalia between Paderborn and the Lippe section of the Teutoburg Forest, the Bourtanger Moor, Saterland, &c., in W. of prov. Hanover. E. of the Elbe the plains include vast forest-clad areas especially in the SE. of prov. Brandenburg and W. of Posen. **Agriculture** still forms the most important branch of industry, though the soil is mostly of only moderately good quality. About 50 per cent. of the entire surface is occupied by field and garden land. Wheat on an average is most productive in Schleswig-Holstein and Saxony. Wheat, barley, and oats are grown in quantity sufficient to meet general demand; but rye, the principal grain used as food by the people, has to be imported annually in large quantities. Potatoes, after a favourable harvest, form an important export article. Among plants used in manufacture, flax and beet-root are the most important, the latter being cultivated chiefly in the province of Saxony. Posen is the chief centre for cultivation of hops. Fruit cultivation is carried on everywhere, except on the high-lying mountain-regions, on the sterile heath, and on the coast-regions exposed to cold and violent winds. The cultivation of the vine is almost confined to the valleys of the Rhine (as far as Bonn), the Nake, Moselle, Saar, and Ahr, though it is worthy of note that the vine reaches a higher latitude in P. than anywhere else in the world, being grown (though to a limited extent) as far N. as 52½° towards the E. of the kingdom. Among **minerals,** the most important is coal (Westphalia, the Rhine Province on the Saar, Ruhr, and Upper and Lower Silesia); lignite chiefly in Saxony; amber in E. and W. Prussia; iron ore in all the provinces; zinc ore chiefly in Upper Silesia, besides lead and copper ore. Gold and silver ore (Harz) are of little importance. Common salt and potash salts are produced in immense quantity at Stassfurt (prov. Saxony). The manufacturing **industry** of Prussia is comparatively recent, its first development belonging to the time of Frederick the Great. The provs. in which it is now most highly developed are the Rhine Prov., Westphalia, and Silesia — those in fact in which there is the greatest abundance of coal. Smelting-works are found chiefly in the provs. just mentioned and in Hanover. There are manufactures of copper, brass, and bronze in Westphalia and Brandenburg; zinc foundries chiefly at Berlin; iron and steel ware manufacture in Westphalia (Hagen, Iserlohn), and in the Rhine Prov. (Remscheid, Solingen). The large towns on the Baltic are important for shipbuilding. There are also manufactures of scientific and musical instruments (Berlin, &c.), porcelain (Silesia). The textile industries are carried on especially in the western provs. and at Berlin. There are more than 100 beetroot factories, chiefly in the prov. of Saxony, and the manufacture of tobacco and cigars is pursued on a large scale.

Form of Government. — P. is a constitutional monarchy (based on the charter of the constitution of 1850). The head of the state is the king—the crown being hereditary in the male line of the House of Hohenzollern, and joined to the German Imperial Crown. All the executive power is vested in the king. The legislative authority belongs to the Diet; but the laws passed by it do not take effect till promulgated by the king. The Diet consists of two chambers, that of the lords (*Herrenhaus*) and that of the deputies (*Haus der Abgeordneten*). The deliberations take place separately, except when the appointment of a regency has to be decided, in which case they sit in common. The House of Lords consists of 310 members; they are (1) the princes of the Royal house, as soon as, having reached their majority, they are called into the House of Lords by the king; (2) members of hereditary privilege, chiefly belonging to the higher nobility (at present 98); (3) life members, nominated by the king (at present 46); (4) members nominated by the king on the 'presentation' of certain corporations (at present 165, virtually representatives of universities and towns). The House of Delegates consists of 433 members indirectly elected. Those enjoying the franchise are all Prussians of at least thirty years of age, who have lived in the community in which they vote for at least six months, and are not in receipt of parochial relief. They are divided into three classes, according to the direct taxes paid by them; they choose the electors, by whom the deputies are directly elected. The duration of the Diet is five years. The highest state authorities are, the Ministry of State, the several Ministries, the Evangelical High Consistory, and the Head Court of Control (Audit Office). In every prov. there is a Provincial Council. The consultative organ of the administration is the State Council, consisting of royal princes, ministers, higher military and other officials. The finances of the Prussian state are always in excellent order. Receipts are derived partly from public property and industries of the state, partly from direct and indirect taxes, dues, and stamp duties. As regards **religion,** as is shown in the general table under the German Empire, nearly two-thirds of the population are Protestants, the remainder chiefly Roman Catholics. The Evangelical State Church forms in the eleven older provs. of Prussia a single whole under the Evangelical High Consistory at Berlin. The state churches of the terrs. joined to P. in 1866 (now forming the provs. of Hanover and Hesse-Nassau) are under the minister for ecclesiastical affairs, and remain independent. There are two archbishoprics of the Roman Catholic Church—Cologne and Posen-Gnesen. **Education.**—The law insists that all children from six to fourteen years of age shall be sent to school, unless educated somewhere else. There are eleven universities, Berlin, Bonn, Breslau, Göttingen, Greifswald, Halle on the Saale, Kiel, Königsberg, Marburg, Münster (academy), and Bromsberg (lyceum); three technical high-schools, Berlin, Hanover, and Aix-la-Chapelle; mining-schools at Berlin and Klausthal; academies of art at Berlin, Königsberg, Düsseldorf, and Kassel.

History. — Under the Emperor Otto I. the Northmark,

later Altmark—that is, old 'mark,' or march—founded on the middle Elbe for the protection of the German Empire against the Wends, was extended as far as the Oder; there then arose the bishoprics of Havelberg and Brandenburg. The Wends again pushed westwards, and the Northmark was limited to the l. bk. of the Elbe; but Margrave Albert the Bear, of the family of the Askanians (1134–1320), reconquered the Havel terr., and styled himself Margrave of Brandenburg. His descendants gained the Neumark (new mark) on the E. side of the Oder; towns were founded (Berlin 1240), and a new bishopric (Lebus). The Askanians (ruling) in Brandenburg having died out, there was an interregnum of 4 years in the Mark, until the Emperor Louis the Bavarian took the country as a fief. From 1324 to 1373 the Bavarian (Wittelsbach) margraves continued to reign; among these Louis II. became elector, 1356. Otto (the Finlander) ceded the land (1373) to Emperor Charles IV., and the margraviate remained under the dominion of the Luxemburg family till 1415. By this time the Mark was greatly reduced in extent and resources. The Neumark had been ceded piecemeal to the knights of the Teutonic Order (established in the present provs. of E. and W. Prussia), and territory had been lost also in other directions. From the Emperor Sigismund, the last of the margraves of the Luxemburg family, the Mark passed in 1415 to Frederick VI., burggrave of Nuremberg, of the House of Hohenzollern, under whom the fortunes of Brandenburg began to revive. He broke the power of the robber-barons, and waged successful war against Pomerania and Mecklenburg. Under him too Brandenburg became an electorate. Frederic II. (the man of iron) bought back the Neumark from the Teutonic Order. After his death the family terrs. were again divided, but they became re-united once more in 1471. Albert Achilles, in 1473, decreed that the Mark, and all terrs. belonging to it, should henceforth pass with the electorate undivided to the eldest son. Joachim II. (1535–71) accepted the reformation (Nov. 1, 1539, at Spandau), obtaining the investiture over Prussia in common with the King of Poland. Joachim Frederick (1598–1608), since 1566 administrator of the bishopric of Magdeburg, also became administrator of Prussia in 1605. During the Thirty Years' War (1618–48) these terrs. suffered terribly, but even before its close Frederick William (1640–88), the Great Elector, had begun to raise the Brandenburg-Prussian state into a European power, founding the absolute monarchy by abolishing the rights of the Diet (chambers). At the peace of Westphalia in 1648, the state obtained Hinder (Eastern) Pomerania, the bishoprics of Halberstadt and Minden, and the archbishopric of Magdeburg; in 1666, through the final settlement of the Jülich War of Succession, Cleves, Mark, and Ravensburg, the first possessions in the W. of Germany. The same ruler also acquired in 1656, during the embroilment of Sweden and Poland, the bishopric of Ermeland, but renounced it in 1657, receiving in exchange, among other things, the full sovereignty over P. The title of King of Prussia was not assumed till 1701, when the Elector Frederick III., with the consent of the Emperor Leopold I., whom he supported in the Spanish War of Succession, was crowned at Königsberg as Frederick I. His son, Frederick William I., promoted the welfare of the country through strict economy, good administration of the finances, through the promotion of agriculture and trade, and by creating a large army. In the Northern war he gained Stettin and half of Vorder (Western) Pomerania (as far as the Peene), along with Usedom and Wollin. His successor, Frederick II., the Great (1740–86), still further increased the power and extent of P. The revival of the old claims of P. to Liegnitz, Brieg, and Wohlau served as the pretext for the first Silesian war (1740–42) against the Empress Maria Theresia, which led to the acquisition of the greater part of Silesia, an acquisition confirmed after the second Silesian war in the peace at Dresden, 1745, and maintained in the Seven Years' War (1756–63), when Frederick had to fight the allied armies of Russia, Austria, Saxony, the empire, France, and Sweden. Meanwhile, E. Friesland, after the principality became extinct (1744), had also fallen to P. In 1772, P., through participating in the first partition of Poland, obtained W. Prussia (except Danzig and Thorn), Ermeland, and the Metze dist. Through the second partition of Poland in 1793, Danzig, Thorn, Great Poland were added to the kingdom under Frederick William II. (nephew of Frederick the Great); and through the third partition (1795) Masovia with Warsaw, the country between Vistula, Bug, and Niemen, and part of the terr. of Cracow. The reign of his son Frederick William III. (1797–1840) witnessed all the vicissitudes of the Napoleonic period, during which P. lost much temporarily, but at its close was placed by the decision of the Congress of Vienna (1814–15) in possession of Posen, along with Danzig, the whole of Pomerania with Rügen, an extended terr. in Westphalia, the Rhine Prov., on both sides of the Rhine, and the larger half of Saxony (prov. of Saxony), as well as the Swiss canton of Neuchâtel. Frederick William IV. (1840–61) obtained Hohenzollern in 1849 through cession, and in 1853 the Jahde terr., but in 1857 ceded Neuchâtel to Switzd. His brother, King William I. (1861–88), in 1864, conquered Schleswig-Holstein in conjunction with Austria, which in accordance with the arrangement of the treaty of Gastein was to have administered Holstein, while P. undertook the administration of Schleswig; but when P. showed a determination to withdraw from the German Confederation, to which it had belonged since 1815, war ensued (1866) between P. on the one hand and the greater part of Germany on the other, a war that ended in the victory of P., and the annexation to the P. kingdom of the whole prov. of Schleswig-Holstein, together with Hanover, the electorate of Hesse, the duchy of Nassau, and the free imperial town of Frankfurt on the Main. See also **German Empire,** history.

Prussia, East and **West,** the two most easterly provs. of Prussia, lying on the Baltic Sea, on which the shore line of a large part of E. Prussia and a smaller part of W. Prussia is formed by the long narrow spits of land cutting off the shallow lagoons known as the Kurisches Haff and the Frisches Haff. The two provs. correspond approximately to the terr. formerly belonging to the Teutonic Order (Pomerellen, W. of the Vistula, and various minor dists. E. of that river). The principal rivers are the Vistula and its tribs. in W. Prussia, the Pregel and Memel (Niemen) in E. Prussia. Both provs. belong to the great plain of N. Germany, and in great part to the Baltic Lake Plateau (*q.v.*). The most considerable altitudes lie in W. Prussia, in a ridge (1086 to 400 ft.) which runs from near the Baltic coast SE. to the intersection of 53½° N. and 20° E. W. of this ridge the most striking diversity of the surface is the Tuchel Heath, a depression which slopes SE. from 400 ft. to 260 ft. near the Vistula. In the NE. near Elbing is a small elevated region called Trunz (650 ft.). In E. Prussia the whole area between the Memel, and the Pregel, E. and S. of the Kurisches Haff, is a tract of lowlands, only a few feet above the level of that lagoon. Besides the lagoons already mentioned the coast is deeply indented by the Bay of Danzig, into which projects on the W. the Putziger Nehrung, a long narrow spit of land, forming the Putziger Wiek. There are numerous small lakes besides the considerable Spirding-see in the SE. of E. Prussia. Two groups of lakes are connected by canals, one upon the common frontier, by the Oberländisch Canal (*q.v.*), the other in the SE. of E. Prussia, by the Masurian Canals (*q.v.*). The climate is temperate, but inclined to severity in the higher parts. The elevated tracts, especially in the W., are not fertile; but the Vistula delta and other valleys, and Kulmer Land (SE. of W. Prussia), possess soil of considerable fertility, upon which wheat is grown, and in parts betroot. But the staple crops of the provs. are rye and potatoes. Nearly 55 per cent. of the area of W. Prussia, and about 51 per cent. of that of E. Prussia, is cultivated. Forests, chiefly *coniferæ*, cover 21 per cent. of the surface in W. Prussia, and 18 per cent. in E. Prussia, and some in both are of great extent—in W. Prussia, in the S. half of Pomerellen (the Tuchel Heath, the valley of the Brahe, and S. of the Vistula between Thorn and the frontier), in E. Prussia, S. of the Spirding-see, and SE. of the Kurisches Haff. Great pains are taken with the breeding of horses and sheep; cattle also are kept, as well as swine and goats. Turf and anthracite are worked, but to no very great extent; amber has for ages been an important product of E. Prussia, being extracted both from the sea in the Samland (the region between the Frisches and the Kurisches Haff), and in the Kurisches Haff itself. Königsberg (cap. of E. Prussia) and Gumbinnen are the chief towns of the two governments (*Regierungsbezirke*) of E. Prussia. Danzig (cap. of W. Prussia) and Marienwerder are the chief towns of those of W. Prussia. The earliest inhabitants, the Pruzzi, a branch of the Lithuanian Guttones or Æstii, were partly conquered and christianised by the Poles in the 11th century; but it was the Teutonic Knights who, from 1230 onwards, definitively christianised and Germanised the heathen Prussians. In 1466 the Knights were obliged to cede W. Prussia to Poland, who retained it down to 1772, at which date it fell to the kingdom of Prussia. E. Prussia, P. (1890) 1,958,700; W. Prussia, P. 1,433,700. See **German Empire,** table.

Prut, or **Pruth,** riv., SE. Europe, Austria, Roumania, and Russia, rises in Austrian Bukovina, flows E. and S., forming frontier between Roumania and Russia, joins Danube from left at Reni. Length, 380 m.

Pruvinum, ancient tn., France. See **Provins.**

Pruvos, comm., Austria. See **Privos.**

Pruzhany (Polish **Prużany,** or **Prużana**), dist. tn., Russia, govt. and 190 m. SSE. Grodno, 5 m. from Warsaw–Moscow Rly. P. 8150.

Pryepolye, tn., Turkey in Europe, sanjak Tashlija, on the Lim, 45 m. WNW. Novibazar; commands one of the routes from Constantinople to Serajevo. An Austrian military force is maintained here under the Treaty of Berlin (1878). Near it are the ruins of the monastery of Miloshevo, sacked by Sirien Pasha in 1559, when the bones of St. Sava were burnt. Alt. 1500 ft. P. 4000.

Pryesnogorkovskaya, Cossack vil., Russia, W. Siberia, prov. Akmolinsk, 285 m. WSW. Omsk. P. <5000.

Pryleston, par., Eng., Norfolk. See **Billingford.**

Pryors Hayes, par., Eng., Cheshire, Tawin dist., 4 m. E. Chester. P. <250.

Prysk and Carvan, par., Wales, Cardiganshire, dist. Tregaron. P. <250.

Prysnovskaya, vil., Russia, W. Siberia, prov. Akmolinsk, 270 m. WSW. Omsk. P. <5000.

Prysor, small riv., Wales, Merionethshire, in the NW., flowing NW. into the estuary of the Dwyryd.

Przasnysz, or **Prasnysz,** dist. tn., Russian Poland, govt. and 60 m. NE. Płock, 16 m. from Ciechanowa railway station, near Prussian frontier; brisk trade. P. 8000.

Przedborz, tn., Russian Poland, govt. and 55 m. SW. Radom, on r. bk. Pilica. P. 6600.

Przemyśl, fortified tn., Austria, crownland Galicia, cap. dist. P., on the r. bk. of riv. San, 45 m. NW. Drohobycz. P. is the seat of two bishops, one Roman Catholic and one of the Greek Church; there are ruins near of a fortified castle, formerly the residence of the Ruthenian princes of a terr. of which P. was the cap.; has manufactures of linen. P. <35,200.

Przemyslany, tn., Austria, crownland Galicia, cap. dist. P., 27 m. ESE. Lemberg. P. <5000.

Przhevalsk, formerly **Karakol,** dist. tn., Russian Central Asia, prov. Semiryechensk, 14 m. from SE. ct. of Lake Issykkul; monument to Przhevalski, the explorer of central Asia, who died here. Alt. 5450 ft. Mean temp. (5 yrs.), yr. 43.1° F., Feb. 20.2°, July 62.4°. P. <5000.

Przhevalski Mountains, range of the Kuenlun system, central Asia, trending on the whole E. and W. from about 90° to 91½° E., in 36⅝° N.

Psakhna, tn., Greece, in the W. of Eubœa I., 9 m. NNE. Chalkis. P. <2000.

Psammathos, bay, Greece. See **Porto Quaglio.**

Psara, Ipsara, or **Ipsera,** Turkish isl., in the Ægean Sea, W. of the N. part of Chio (Khio), in 38° 35′ N., 25° 35′ E. P. of Psara town (seapt. in SW. angle) <5000 (Cuinet).

Pschow, comm., Prussia, Silesia, circle and 7½ m. WSW. Rybnik; has mines of coal and iron pyrites. P. <2000.

Pshaves, stem of Georgians, Caucasus Mts., Tioneti and Dusheti dists. of govt. Tiflis, inhabiting the gorges of the main range; live chiefly by cattle-rearing. P. about 9200.

Psinya, riv., Turkey in Europe, rises near the Bulgarian frontier, and flows WSW. and S. to the Vardar, which it joins on the l. bk., 18 m. SE. of Ushkub.

Psiol, riv., Russia, govts. Kursk, Kharkov, and Poltava, l. bk. trib. of Dnieper, flows with many windings W. and SW. through a very fertile region in a well peopled valley, receiving many small tribs., of which Khorol is the largest. Length, 420 m.

Pskov, govt., NW. Russia, lake dist., has St. Petersburg on N., Novgorod, Tver, and Smolensk on E., Livonia on W., and Vitebsk on S.; hilly in SE., where the Alaun heights, thickly clothed with forests, attain 800–1000 ft. alt., and W. and NW. A woody and marshy depression, watered by the Lovat, runs SW. to NE. between the hilly tracts. Surface all covered with boulder-clay. The chief rivers, Lovat and Sheloń, flow into Lake Ilmeń, the Velikaya into Lake P., and the upper W. Düna borders the govt. in SE. Many lakes, the chief of which is Lake P., 50 m. long, 13 m. broad, and from 3 to 18 ft. deep, which is connected by a broad channel with Lake Chudskoye (Peipus). Extensive marshes, many forests. Climate moist and changeable, the average temp. at P. being, yr. 41°, Jan. 17°, July 65°. Population Great Russian, with about 9000 Esthonians. Agriculture unproductive; cereals imported; flax culture; considerable fishing in lakes; timber trade; stone quarries. Divided into eight dists.: Pskov, Kholm, Novorzhev, Opochka, Ostrov, Porkhov, Toropets, and Velikiya Luki. Area, 17,069 sq. m. P. (1863) 719,000; (1890) 1,019,000.

Pskov, cap. of govt. P., 171 m. by rail SW. St. Petersburg, on both banks of broad Velikaya R., 9 m. from Lake P. Old town, which remained till the 16th century an independent sister republic to Novgorod, and was governed by its *vieche,* or forum, attaining a considerable population, and a great degree of prosperity, being a centre for trade with Germany, and a member of the Hanseatic League. Conquered and plundered by Moscow Tsars in 1510. Now a poor town, containing many relics of its past glory in its cathedral and kreml. Steamers ply to Dorpat. P. 23,900.

Psyrg, mt., Caucasus, dist. Sukhum-kale. Alt. 12,427 ft.

Puanting, tn., China, in the SW. of Kweichou, 130 m. E. by N. Yünnan-fu.

Pueblo, city, U.S., Colorado, P. co., on the Arkansas, 140 m. S. by E. Denver, in an agricultural and stock-raising region.; iron and steel works; manufacturing centre. Alt. 4639 ft. (R.R.). P. (1880)<4000; (1890) 24,600.

Pueblo Nuevo del Mar, comm., Spain, prov., dist., and 3½ m. NE. Valencia; sea-bathing place, much frequented by the Valencians. P. 11,300.

Pueblos, tribe of Indians, U.S., inhabiting the NE. part of terr. of New Mexico. In a wider sense the term is applied to the primitive settled inhabitants of the present Arizona and New Mexico, whose towns (Spanish, *pueblos*) were sometimes met with on the plains, sometimes hollowed out on the hill-sides, sometimes perched on nearly inaccessible cliffs ('cliff dwellings'). *Puente,* Spanish, 'bridge.'

Puenteareas, comm., Spain, Galicia, prov. and 20 m. SSE. Pontevedra, dist. P. P. 13,300.

Puente-Caldelas, comm., Spain, Galicia, prov. and 7½ m. ESE. Pontevedra, dist. P.-C.; with tin mines, and cold and tepid sulphureous springs. P. 7400.

Puente-Ceso, comm., Spain, Galicia, prov. Corunna, dist. Carballo. P. 6300.

Puente de Garcia Rodriguez, comm., Spain, prov. Corunna, dist. Ortigueira. P. <5000.

Puente del Arzobispo, comm., Spain, prov. Toledo, on r. bk. of Tagus, 23 m. WSW. Talavera de la Reina. P. <2000.

Puente del Inca, military post, Argentine Republic, 68 m. W. Mendoza, in the valley of the Rio de Mendoza, on a road leadingto the Uspallata Pass; has saline and calcareous springs.

Puentedéume, or **Santiago de Puentedéume,** comm., NW. of Spain, prov. Corunna, 5 m. SSE. Ferrol, at the head of one of the arms of the bay (Ria) of Corunna. P. 8500.

Puente Jenil, comm., Spain, Andalusia, prov. and 33 m. S. Córdoba, on the r. bk. of the riv. Jenil. P. 11,400.

Puente la Reina, comm., Spain, Navarre, dist. and 12½ m. SW. Pamplona; has excellent wines. P. <3000.

Puente-Nacional, tn., Colombia, dep. Santander, 11 m. S. Velez, on the Suarez; with coal and iron mines. Alt. 5275 ft. P. (with dist.) 16,000.

Puentenansa, comm., Spain, Old Castille, prov. and 36 m. WSW. Santander; has warm sulphur springs. P. <2000.

Pueres, Rio, riv., U.S., New Mexico, rises in Santa Anna co., flows S. for about 150 m., nearly on the meridian of 107° W., and joins the Rio Grande in Bernalillo co., SW. of Albuquerque, a few miles S. of 35° N. Great irrigation works in progress.

Puerh, Pueul (**Puöl**), or **Puheul** (**Puhöl**), tn., China, in the SW. of Yünnan, 190 m. S. by E. Tali-fu. It gives its name to a fine kind of tea grown in a neighbouring dist., in the Burmese Shan states. See *Kew Bulletin*, No. 30, and pp. 16-17 of the report there referred to (China, No. 1, 1888 [C.-5371]).

Puers, comm., Belgium, prov. and 11 m. SW. by S. Antwerp, arr. Malines. P. <4000.

Puerto, Spanish, 'port.'

Puerto Ancon, small fishing-vil. and watering-place on an open roadstead, Peru, about 11° 47′ S., a little N. of Callao Bay in the rainless zone of Peru. Near it is an ancient cemetery from which mummies and other objects throwing light on the ancient Inca civilisation have been obtained in an excellent state of preservation. See *The Necropolis of Ancon in Peru* by W. Reiss and A. Stübel, translated by A. H. Keane, Berlin, 1880-87.

Puerto Angel, small Mexican port on the Pacific, state of Oaxaca, in 15° 48′ N.; calling-place of the Pacific Mail Company's steamers.

Puerto Bello, Colombia. See **Porto Bello.**

Puerto Berrio, vil., Colombia, Antioquia, on the l. bk. of the Magdalena, 90 m. E. by N. Medellin, to which town a railway is in progress. Alt. 542 ft. Mean temp. (5 yrs.), yr. 78.7° F.; mean rfall. (5 yrs.), 97.02 in. P. <2000.

Puerto Caballos, seapt., Honduras. See **Puerto Cortez.**

Puerto Cabello, seapt. tn., Venezuela, Carabobo, on the N. ct. in about 63° 5′ W. Safe anchorage in bay in 50–100 ft. of water; depth at entrance to and in harbour, 12 ac., and at quayside at low water, 26 ft.; no bar. P. (with dist.) 10,100.

Puerto Cansado, bay, W. ct. of Africa, 47 m. ENE. Cape Jubi, in 28° 6′ N. This natural port is closed by a barrier of rocks and sand, passable at high tide. There is an ancient tower, possibly on the site of Santa Cruz de Mar Pequeña.

Puerto Chanchan, small bay, Chile, prov. and 23 m. N. Valdivia, in 39° 28′ S.

Puerto Cispata, Colombia. See **Morrosquillo,** gulf.

Puerto Colombia, port, Colombia. See **Sabanilla.**

Puerto Cortez, or **Caballos,** bay and vil., on N. ct. of Honduras, in 88° W. (on the Gulf of Honduras, in NW. of the republic); was the first port established by the Spaniards on these shores, and was selected by Cortez and called *Natividad.* Puerto Cortez is the northern terminus of the proposed Honduras interoceanic railway; good anchorage. Depth of 40 ft. available for vessels entering the port. P. <2000.

Puerto de la Cruz, tn., Canary Is., dist. and 2½ m. W. Orotava; at the end of the 18th century it was the chief seat of commerce of the Canary Is. P. <5000.

Puerto de la Mar, Chile. See **Cobija.**

Puerto de Luna, vil., U.S., New Mexico, San Miguel co., 96 m. SE. Santa Fé. P. <1500.

Puerto de Santa Maria, comm., Spain, prov. and on the Bay of Cadiz, 5 m. NE. by N. Cadiz, dist. Puerto de Santa Maria. To the S. of the town was fought in 711 the celebrated battle which placed Spain in the hands of the Moors. P. 20,100.

Puerto Deseado, Patagonia. See **Deseado, Rio.**

Puerto Expedicion, vil., Argentine Republic, terr. of the Chaco, on the r. bk. of Rio Bermejo, 68 m. N. by W. Corrientes. P. <2000.

Puerto Jobos, bay, Porto Rico. See **Jobos.**

Puerto Limon, seapt., Costa Rica. See **Limon.**

Puertollano, comm., Spain, prov. Ciudad Real, dist. Almodovar del Campo, 45 m. NW. by N. Lináres. P. 5100.

Puerto Madrin, seapt., Argentine Republic, terr. Chubut, on the Bahia Nueva, in 42° 49′ S.; connected by rail with the Welsh colony of Chubut.

Puerto Marin, comm., Spain, Galicia, prov. and 15 m. SSW. Lugo, dist. Chantada, on r. bk. of the Minho. P. <5000.

Puerto Menor, bay, Spain, NE. ct. of isl. of Majorca, 7½ m. long, 3–4 m. wide, forming the harbour of Pollenza, sometimes called Puerto de Pollenza.

Puerto Montt, or **Melipulli,** tn., Chile, cap. prov. Llanquihue, on the N. ct. of the Gulf of Reloncavi, 110 m. SSE. Valdivia; was founded in 1853. Mean temp. (4 yrs.), yr. 51.6° F., Jan. 57.7°, July 45.9°; mean rfall. (10 yrs.), 96.37 in. P. <3000.

Puerto Pacheco, riv.-port, on the Paraguay, Bolivia, in 20° 9′ S.; terminus of a projected railway from Sucre.

Puerto Padre, harbour, Cuba, N. ct., 97 m. NW. by N. Santiago de Cuba, in 76° 36′ W.

Puerto Perez, Bolivia. See **Chillaya.**

Puerto Plata, seapt., isl. of Haiti, republic and 108 m. NW. by N. Santo Domingo, in 70° 40′ W.; lighthouse; is the principal port of the republic on the N. ct. P. 18,000.

Puerto Princesa, seat of the governor of the Spanish isl. of Palawan on the Sulu Sea (E. ct. of isl.), in 8° 45′ N.; large and safe harbour. P. <2000.

Puerto Principe, comm., Cuba, cap. prov. Puerto Principe, 165 m. NW. by W. Santiago de Cuba; connected by rail with the port of Nuevitas (to the NE.). In the N. of the prov. in the Sierra Cubita are extensive deposits of various kinds of iron ore. City, P. 26,800 (20,100 white, 6700 coloured); comm. P. (pueblo) 41,700 (32,700 white, 9000 coloured). See **Nuevitas.**

Puerto Quemada, small bay, on the W. ct. of Colombia, in 7° N.

Puerto Real, comm., Spain, prov. and 6 m. E. Cadiz, dist. Puerto de Sta. Maria, on the Bay of Cadiz. The town was founded by Isabella of Castille in 1488. Along the Trocadero are dockyards, dry docks, and wharves. Puerto Real has important salt-mines. P. 9700.

Puerto Rico ('rich harbour'), frequently called in English and French **Porto Rico,** formerly the Boriquen of the Arawaks, the fourth in size and easternmost of the great Antilles, between the Atlantic and the Caribbean Sea (17°–19° N. lat.). A lengthened rectangle with the greatest diameter (90 m.) E. to W. (37 m. broad, 3550 sq. m.). Physically, it is a continuation of the emerged lands of Haiti (through Mona I.). Very mountainous, the general orientation of the ridge being SW. to NE., and the water-parting (Cayey) near the S. side (highest peak, Yunque ['anvil'] de Luquillo, in the NE. angle, 3670 ft.). The principal rivers consequently run N. (Grande de Arecibo, Manati, La Plata, Bayamon, Grande de Loiza). Among the rocks coralligenous limestones predominate. All lands exposed to the NE. trade-winds have abundant rains (San Juan, 12 yrs.; mean temp., 80.7° F., Jan.-Feb. 76.5°, July-Aug. 83.2°). The hills are covered with tropical forests. The dense native population was exterminated by the Spaniards, by whom Negroes were then introduced as slaves. The Spanish population is principally Andalusian (*jivaros, goajiros*), Balearic, and fugitives (1810–1825) from the other Spanish colonies. Puerto Rico is the healthiest and most densely peopled of all the West Indies. Slavery abolished in 1873. All the extensive littoral plains and valleys of rivers are exceedingly fertile and intensely cultivated. Principal products are sugar, coffee,

tobacco; then maize, rice, cotton. Many cattle. The adjacent Neona I. is covered with guano. Harbours are numerous, but mostly unprotected from the trade winds (N.), or filled with sand (W.). San Juan Bautista, in the N. of the island, is the cap. The principal coast centres are Arecibo and Bayamon. The W. exporting ports are Mayaguez (San German) and Aguadilla; those in the S. are Guánica, Guayanilla, Puerto Ponce (3 m. from Ponce, the most important town). The E. part of the island is the less important. Exports, sugar, rum, coffee, tobacco, timber and dyewood, cattle, horses, hides; imports, manufactured dress articles, rice, wine, oil, salt meat (*tasajo*, from Argentine), machinery. Exports and imports, 1891, £1,100,000. Commerce with Great Britain, Spain, United States, Germany, France. There are many good roads, and a railway (300 m. long) is in course of construction round the island. Puerto Rico is a colonial prov. of Spain, divided into 7 deps. The first Spanish establishment dates from 1509 (Ponce de Leon). P. (1765) 45,000; (1860) 600,000; (1887) 800,000; (320,000 negroes included). [**J. B. R.**]

Puerto San Juan, bay, Peru, in 15° 22′ S.

Puerto San Julian, estuary, Argentine Republic (Patagonia), govt. of Santa Cruz, mouth in 49° 11′ S.

Puerto San Lorenzo, small port, Central America, Honduras, 50 m. S. by W. Tegucigalpa, at the head of one of the branches of the Gulf of Fonseca, in 13° 25′ N.

Puerto San Nicolas, bay, Peru, in 15° 18′ S.

Puerto Utria, small bay, on the W. ct. of Colombia, in 6° N.

Puerto Valdes, long narrow inlet, Argentine Republic (Patagonia), on the E. ct. of the penin. San José or Valdes, mouth at S. end in 42° 30′ S.

Puertoviejo, Ecuador. See **Portoviejo.**

Pueul, tn., China. See **Puerh.**

Puffin Island, Ire., SW. co. Kerry, N. of St. Finan's Bay.

Puffin Island, small isl., Wales, about 1 m. NE. of the E. end of Anglesey; seat of a marine biological station; has ruins of a church tower, said to be of the 7th century.

Puget Sound, inland sea, U.S., Washington, extends S. from the E. end of Strait of Fuca, in a direct line of about 80 m. Its principal constituents are Admiralty Inlet, Puget Sound proper, and Hood's Canal. The sound ramifies into numerous bays and inlets, and contains many islets. Area of waters is about 2000 sq. m.; total length of shore line, 1594 m. See **Tacoma.**

Puget Théniers, comm., France, dep. Alpes-Maritimes, cap. arr., on the Var, 26 m. NW. Nice; has sulphur spring. Alt. 1475 ft. P. <2000.

Pungan-ting, tn., China, prov. Kweichou. See **Puanting.**

Punganúr, tn., Brit. India, Madras, dist. North Arcot, 72 m. ENE. Bangalore. P. (1891) 5600; Hindus, 4200.

Pungarehu, tn., New Zealand, North I., Taranaki co., 27 m. NW. by W. New Plymouth. Cape Egmont lighthouse is 3 m. distant. P. <1500.

Pungo Ndongo, tn., Portuguese W. Africa, a few miles to the N. of the Kwanza, 180 m. ESE. Loanda. P. N. is the chief entrepôt of trade with the interior, and one of the historic cities of Angola. German and Trappist mission station. Alt. 3835 ft. P. <2000.

Pungwe, or **Arwangwa,** riv., Portuguese E. Africa, flows E. from the Manica tableland, then SE., entering the Indian Ocean by an estuary just N. of the Bosi (or Busi) estuary, in about 19° 55′ S.; navigable about 40 m. up. In its lower course it divides into two branches, which surround the isl. of **Manangora,** or **Midinguidingwe,** about 25 m. long, by 10 m. wide. See **Fontesvilla.**

Punitaqui, vil., Chile, prov. Coquimbo, 21 m. S. Ovalle. P. <2000.

Punitz, tn., Prussia, prov. Posen, circle Gostyn, 32 m. E. by N. Goglau. P. (comm.) <3000.

Punjab, prov., in extreme NW. of Brit. India, having in connection with it Patiála, Baháwalpur, and other minor native states, besides Kashmír. The P. proper, the land of the five rivers, Sutlej, Beas, Rávi, Chenáb, and Jehlam, which, uniting to form the Panjnád (Punjnud), finally pour their waters into the Indus, came into the hands of the British at the end of the Sikh war in 1849, and under British rule is subdivided as shown in the following table:—

Districts. Divisions.	Area in sq. m.	Pop. 1868.	Pop. 1881.[2]	Pop. 1891.	Increase per Cent. 1881–91.	Pop. per sq. m. 1891.

[1] Including 17,600 Europeans and 3400 Eurasians in different dists.
[2] Census 1881, the first conducted 'with adequate thoroughness and detail.' Populations according to areas of 1891.
[3] Karnál dist. enlarged since 1881 by the transference of 214 sq. m. from Ambála, but diminished by the transference of 54 sq. m. to Hissár.
[4] Hissár dist. enlarged since 1881 by the transference of 1651 sq. m. from Sirsá, and 54 sq. m. from Karnál.
[5] Sirsá dist. abolished since 1881.
[6] Ambála dist. diminished by the transference of 214 sq. m. to Karnál.
[7] Dist. Firozpur enlarged since 1881 by the transference of 1355 sq. m. from Sirsá.

It consists mainly of the northern plains of the Indus, but some portions of it advance into the Himalayan region, both on the SW. and SE. of Kashmír. In the E. of the P., and partly also in the NW. Provs., from the Beas to the Ganges, a range of hills, called the Siwálik Hills, attaining at most a height of 3500 ft., runs parallel to the Himálayas, from which it is separated by a line of valleys known as the Duns. Another noteworthy feature of the prov. is the rough and broken tableland in the NW., in the angle between the Himálayas and the Suláiman Mts., bounded on the S. and SE. by the Salt Range, which rises abruptly from the plains beneath to the height of from 2000 to 5000 ft. This range, or rather southern escarpment of the tableland, which owes its name to the enormous masses

of rock-salt it contains (the largest known to exist anywhere), first faces that part of the Jehlam which flows to the SW., and then trends W. to and across the Indus. The salt-works supply the whole prov. with salt. The part of the plain which lies to the E. of Lahore is almost the only part that has in favourable years an adequate supply of rain for agriculture. (For details as to the **climate** see, for the Himalayan region, **Murree, Simla**; for the NW. and N. plains, **Peshâwar, Râwal Pindi, Siâlkot, Lahore, Ludhiâna**; for the eastern plains, **Delhi, Sirsa**; and for the SW. plains, **Dera Ismâil Khân** and **Mûltân**). The part E. of Lahore, in consequence of its more plentiful rainfall, though containing only about a quarter of the entire area, has half the cultivated area, and nearly half the population of the prov., but its rainfall being precarious, it is liable to disastrous failures of the crops. This was especially the case before the construction of the now numerous canals of the region (Bâri Doâb, Sirhind, and Western Jumna canals). Among the **crops** of this prov., wheat predominates to an even greater extent than in the NW. Provs., whereas rice is grown only to a small extent, occupying much less than a twentieth of the area devoted to grains and pulses generally. There are numerous tea-gardens in Kumâun, especially in the dist. of Kângra, the tea of which is now well known in the English market. The Kulu valley, a part of Kângra dist. containing the headwaters of the Beas, has a climate admirably suited for the cultivation of the fruits and vegetables of the temperate zone. The populous dists. in the N. of the prov. are directly connected with the **railway system** of the Ganges valley, and from this northern line two standard-gauge railways branch southwards, one starting at Lahore and keeping entirely to the S. of the Ravi, the other branching off at Lala Musa, between the Chenâb and the Jehlam, then crossing the Jehlam and proceeding westwards on the S. of the Salt Range as far as the Indus, and finally following the l. bk. of that river southwards. A branch from this railway runs N. to Kheura, a village near the chief mines of the Salt Range. These two railways now meet to the S. of Mûltân, on the l. bk. of the Chenâb, and a single railway proceeds southwards to Karâchi, in Sind. The principal **towns** in the order of population are Delhi, Lahore (the cap.), and Amritsar, with more than 100,000 inhabitants in 1891, Peshâwar, Ambâla, Mûltân, Râwal Pindi, Jâlandhar, Patiâla (native), Siâlkot, and Firozpur (with 50,000 to 100,000), and Ludhiâna and Bhiwâni (with 35,000 to 50,000). The prevailing **languages** are Punjâbi in the N., and the Brajbasha dialect of Hindu in the E. The Jatki dialect of Sindhi is spoken in the SW. In **religion** more than half the population of the British prov. are Mohammedans, more than one-third Hindus, and about one-fifteenth Sikhs, this being the population that contains the great bulk of that sect. In the native states they make up more than one-ninth of the population. See **India**, tables.

Punjkora, riv. and valley. See **Panjkhora.**

Punnae Observatory, Brit. India, dist. Tinnevelli, on the S. ct., 40 m. S. by W. Tinnevelli, 8 m. NE. Cape Comorin.

Punnett's Town, PMT. O., Eng., Sussex, 2 m. E. Heathfield.

Puno, tn., Peru, cap. dep. P., on a large bay, 150 m. WNW. La Paz. Immediately to the W. are silver-mines, formerly worked, but now those only within 18 m. SW. of P. are worked. P. 5000.

Puno, dep., in the extreme SE. of Peru, including the Peruvian portion of Lake Titicaca, bounded on the N. by the Madre de Dios; cap. P.

Punta Arenas ('sand point'), tn. and free port, Chile, cap. terr. Magallanes, on Magellan Strait, on the W. shore, about the middle of the portion of the strait that runs from N. to S.; coal mined. Principal capitalists and merchants English and German; centre of supplies for the various sheep-rearing stations of Tierra del Fuego, southern Patagonia, and the Falkland Is. Open roadstead. Good anchorage in 6–15 fathoms at about ¾ m. from shore. Vessels load and discharge by launches. Alt. 12,540 ft. Mean temp. (8 yrs., 1853–61), yr. 43.0° F., Jan. 51.5°, July 34.6°; mean rfall. (8 yrs.), 22.55 in. P. <2000.

Punta Arenas, or **Puntarenas,** seapt. tn., Costa Rica, on the E. side of the Gulf of Nicoya, at the extremity of a tongue of sand, in 9° 58′ N., 43 m. W. by N. San José, connected by rail with Esparta. P. A. is the chief port on the Pacific Ocean, but is only a roadstead; vessels drawing more than 6½ ft. anchor 2 m. from the shore. P. <5000.

Punta Avarena, cape, isl. of Haiti, in the S., in 71° W.

Punta Bianca Magra, cape, Italy, on the NW. ct., in 44° 3′ N., 9 m. SE. by E. Spezia.

Punta Brava, cape, Uruguay, on the Rio de la Plata, in 56° 9′ W., about 2 m. SE. Montevideo.

Punta Callejones, cape, Peru, in about 10° 29′ S.

Punta Cana, cape, W. Indies, republic Santo Domingo, in the E. of the isl. of Saona, in 68° 35′ W.

Punta Catuano, cape, W. Indies, republic Santo Domingo, in the NW. of the isl. of Saona, in 68° 48′ W.

Punta del Este ('East Cape'), cape, Uruguay, on the Rio de la Plata, 67 m. E. Montevideo.

Punta Delgada, cape, Argentine Republic, on the SE. of the Valdes Penin., in 42° 44′ S.

Punta Delgada, cape, Mexico, on the E. ct., in 19° 50′ N.

Punta de Maquijata, tn., Argentine Republic, prov. Santiago. P. <2000.

Punta de Zacate, isl., Central America, in the Gulf of Fonseca, belonging to the republic of Salvador.

Punta dos Salinas, capes. See **Salinas.**

Punta Engaño, cape, the eastern point of the isl. of Haiti.

Punta Espada, cape, isl. of Haiti, in the SE., in 68° 28′ W.

Punta Gorda, cape, Cuba, in the S., at the E. of the mouth of the Gulf of Matamano, in 82° 12′ W.

Punta Gorda, cape, Mexico, on the E. ct., 7 m. NW. Vera Cruz.

Punta Gorda, port, U.S., Florida, Manatee co., on E. side of Charlotte Harbour, Gulf of Mexico, in 26° 55′ N., connected by rail with Bartow, whence it receives phosphates for export; cannot be reached by vessels drawing more than 11 ft. of water. P. <1500.

Punta Guanal, cape, W. Indies, Isle of Pines, in the SE., in 82⅔° W.

Punta Guanico, cape, Cuba, on the N. ct., in 74° 47′ W.

Punta Marroqui, cape, on the Strait of Gibraltar, in the extreme S. of Spain.

Punta Matermillos, cape, Cuba, in the N., in 77° 8′ W.; lighthouse.

Puntamba, municip., Brit. India, Bombay, dist. and 50 m. N. by W. Ahmadnagar. P. <5000.

Puquio, vil., Peru, dep. Ayacucho, 145 m. WSW. Cuzco. P. (with dist.) <4000.

Puquios, comm., Chile, dep. and 31 m. NE. Copiapo; copper is mined here. Alt. 4500 ft. P. <2000.

Pur, tn., Brit. India, NW. Provs., dist. Muzaffarnagar, 41 m. N. by E. Meerut. P. (1891) 5500; Moham. 3200; Hindus, 2200.

Pura, vil., Persia. See **Tehre.**

Purace, active volcano, Colombia, in the Andes, to the ESE. of Popayan. Alt. about 15,420 ft. The vil. P. was destroyed by an eruption in 1827.

Purakanui, post-tn., New Zealand, South I., Waikouati co., 12 m. NE. Dunedin by road and rail. P. <1500.

Purali, riv., Baluchistan, flows S. into the Arabian Sea (which it only reaches in flood), a little to the W. of the port of Sonmiani. Length about 310 m.

Purandhar, sanitarium, Brit. India, Bombay, dist. Poona, in 18° 17′ N., 74° 1′ E.; comprises two hill-forts. Alt. of Purandhar Mt., above the plain 1700 ft., above the sea 4472 ft.

Purang, tn., Cambodia, 137 m. N. by E. Saigon.

Purbeck, Isle of, penin., Eng., Dorsetshire, between Poole Harbour and the English Channel on the S., terminating in St. Alban's Head. It is traversed E. and W. by a lofty range of chalk hills; in the centre is Corfe Castle; has excellent quarries of stone known as Purbeck stone. Length, 12 m.; breadth about 7 m.

Purbeck Hill, hill, Eng., Dorsetshire, Isle of Purbeck, 10 m. SW. by W. Poole.

Purbrook, eccles. par., Eng., Hampshire, Fareham div., 5½

m. NE. by N. Portsmouth, 2 m. NNE. Cosham stn., PMT.O. P. <500.

Purchena, comm., Spain, prov. and 35 m. N. by E. Almeria, cap. dist. P. .P. <3000.

Purdis Farm, par., Eng., Suffolk, Woodbridge div., 4 m. SE. Ipswich. P. <250.

Purdy Islands, group, Ger. New Guinea, crossed by 2° 50′ S., 146° 15′ E.; yield phosphates.

Purdysburn, P.O., Ire., N. co. Down, bar. Upper Castlereagh, 4 m. S. Belfast.

Purdytown, vil., U.S., Pennsylvania, Northumberland co. P. <1500.

Purfleet, eccles. par., Eng., Essex, SE. div., on the Thames, 7 m. SSE. Romford, on the London, Tilbury, and Southend Rly.; has a small pier for steamers, and a government powder magazine. PMT.O. See **Thurrock, West.**

Purgstall, comm., Austria, crownland Lower Austria, dist. Scheibbs, 35 m. E. Steyr. P. <2000.

Puri, or **Pooree,** commonly **Jagannáth** (Juggernauth), tn., Brit. India, Bengal, dist. P., 60 m. ENE. Ganjám, on the Bay of Bengal. The port is simply an open roadstead. Vessels load and discharge by surf boats. P. is one of the most sacred places of the prov., which for two thousand years has been the holy land of the Hindus. It is the seat of the shrine of Jagannáth (Juggernaut), and consequently a great resort of pilgrims, especially at the time of the great car festival, celebrated in June or July, when upwards of 100,000 persons sometimes assemble in the town, which is unhealthy. Cholera invariably breaks out during this festival in spite of the sanitary measures taken to lessen overcrowding and to prevent epidemics. Thousands of pilgrims die upon the journey. P. (1891) 28,800; Hindus, 28,500.

Purificacion, vil., Colombia, Tolima, on the l. bk. of the Magdalena, 80 m. SW. by W. Bogotá. P. (with dist.) 8800.

Puriscal, vil., Costa Rica, 17 m. SW. San José.

Purlton, par., Eng., Somerset, div. and 3½ m. NNE. Bridgwater, P.O. P. <750.

Purkaree, comm., Austria. See **Burgholz.**

Purkersdorf, tn., Austria, crownland Lower Austria, dist. Sechshaus, 9 m. W. Vienna. P. <3000.

Purleigh, par., Eng., Essex, SE. div., 3 m. SSW. Maldon, 1 m. N. by W. Cold Norton stn., P.O.; 5794 ac. P. <1000.

Purley, par., Eng., Berkshire, Newbury div., on the Thames, 3 m. NW. Reading, 1½ m. NW. Tilehurst stn., P.O. P. <250.

Purley, eccles. par., Eng., Surrey, 2½ m. S. Croydon, on the SE. R. and L. B. & S. C. R. (main line), PMT.O. P. <1500.

Purmamarca, vil., Argentine Republic, Jujuy, 223 m. N. Tucuman, 42 m. N. by W. Jujuy.

Purmerend, vil., on the coast of Dutch Guiana, on the l. bk. of the Surinam R., to the NE. of Paramaribo.

Purmerend, comm., Holland, prov. N. Holland, 9 m. N. Amsterdam. **P. Canal,** connecting P. with the harbour of Amsterdam, has 567 ft. of quayage, and a depth, in the part kept for sea-going vessels, of 18½ ft. P. 5600.

Purngarh, port, Brit. India, Bombay, dist. Batnágiri, at the mouth of Muchkundi R., 128 m. SSW. Poona. P. <5000.

Purniah (**Purneah,** census), tn., Brit. India, Bengal, cap. dist. P., 50 m. NE. by N. Bhágalpur; trade in jute. Subject to severe epidemics of fever. Alt. 125 ft. Mean temp., yr. 77° F., Jan. 62°, July 84°; mean rfall., yr. 64.6 in., June-Sept. 54.4 in. P. (1891) 14,600; Hindus, 9600; Moham. 4800.

Purnim, post-tn., Victoria, Villiers co., 8 m. N. by E. Warranambool. P. <1500.

Purple Mountain, Ire., middle co. Kerry, near W. shore of Lough Leane, one of the Macgillicuddy's Reeks, 6 m. WSW. Killarney. Alt. 2739 ft.

Pursak, or **Pursadu,** riv., Turkey in Asia, rises SE. of Kutaia in vilayet Brussa, flows first N. then E. past Kutaia and Eskishehr, and joins the Sakaria in 32° E. Length, 205 m.

Pursat, tn., Cambodia, on the Arai, 220 m. NW. by W. Saigon, about 8 m. W. of Lake Tale Sap, on the border of the region; liable to inundation; cap. prov. P.

Purse Caundle, par., Eng., Dorsetshire, N. div., 4 m. E. Sherborne, 3½ m. W. Stalbridge stn. P. <250.

Purston Jaglin, par., Eng., Yorkshire, W. Riding, Osgoldcross div., 2 m. SW. Pontefract, close to Featherstone stn., PMT.O. (**Purston**). P. <1500; eccles. par. (**P. with S. Featherstone**) P. <4000.

Purton, par., Eng., Wiltshire, Cricklade div., 5 m. NW. by W. Swindon, on the G. W. R., PMT.O.; 6465 ac. P. <2500.

Puruandiro de Calderon, comm., Mexico, state of Michoacan, 40 m. NW. Morelia. P. 7000.

Purúliá, tn., Brit. India, Bengal, cap. dist. Mánbhúm, 50 m. WSW. Ránigunj. P. (1891) 12,100; Hindus, 9900; Moham. 1600.

Purus, riv., S. America, rises by several headstreams in the Gulf of Peru, and flows E. and NE. across a wedge of Bolivia into Brazil, finally entering the Amazon in about 61° 25′ W., or about 100 m. WSW. Manaos. A characteristic river of the Amazonian plains, with endless windings, numerous side channels (*igarapes*), slight fall, no rapids. First explored nearly to its source in 1864–65 by W. Chandless, who at a distance of 1847 m. from the mouth found an alt. of only 1088 ft. (about 1000 ft. above the alt. at mouth). Steam navigation opened in 1869. In high water steamers can ascend nearly to the source, but at low water the limit of navigation for vessels of considerable size is about 66° W., occasional bars of sandstone in the bed of the river causing shallows higher up. There is a population of about 50,000 on its banks engaged in the indiarubber trade. Chief trib. Aquiry (Acre).

Purushottapur, tn., Brit. India, Madras, dist. and 12 m. NW. by W. Ganjám; noted for the Pillar of Tougodo (4 m. N.), bearing an Edict of Asoka (probably about 250 B.C.), and enclosed in a rampart-mound locally known as the Lac Fort. P. (1891) <5000.

Purvokarta, tn., Java, 45 m. E. Buitenzorg.

Purvorejo, tn., Java, 27 m. W. by N. Jokjokarta.

Purwá, tn., Brit. India, Oudh, dist. Unao, 28 m. E. Cawnpur; noted for shoes and leather work. P. (1891) 10,500; Hindus, 7700; Moham. 2800.

Púsad, tn., Brit. India, Berar, dist. Básim, 72 m. SSW. Amráoti. P. (1891) 5100; Hindus, 4000; Moham. 1000.

Pusan, another form of **Fusan,** port, Korea.

Puschlav, tn., Switzd. See **Poschiavo.**

Pusesávli, tn., Brit. India, Bombay, dist. Sátára, 80 m. S. by E. Poona. P. (1891) <5000.

Pusey, par., Eng., Berkshire, div. and 9 m. W. Abingdon, 4 m. E. Faringdon. P. <250.

Pushkar, tn., Brit. India, Ajmere-Merwára, Rájputána, in 26½° N., 74° 36′ E; the only town in India with temple to Brahma. No living thing may be put to death within the limits of the town. Great fair, annually attended by about 100,000 pilgrims, who bathe in the sacred lake. Alt. 2389 ft. P. (1891) <5000.

Pushpa-giri, peak, Brit. India, Madras, dist. S. Kánara, on the NW. boundary of Coorg, in 12° 40′ N., 75° 44′ E. Annual fair attracts large numbers of people. Alt. 5626 ft.

Pusht-hajikhak, pass, Afghanistan. See **Bamian.**

Pusla, tn., Brit. India, Berar, dist. Amráoti. P. 5700; Hindus, 5200.

Puslinch, vil., Canada, Ontario, Wellington co., 17½ m. NW. by N. Hamilton. P. <1500.

Püspökfürdo ('bishop's bath'), watering-place, Hungary, co. Bihar, 7 m. NNW. Grosswardein.

Püspök Ladány, comm., Hungary, co. Hajduken, 28 m. SW. by W. Debreczen. P. 9800.

Puster-thal, the valley which forms the main line of communication E. to W. (now by rail as well as road) in the SE. of the Tirol, Austria, between Lienz and Bruneck; drained E. by the Drave, W. by the Rienz (trib. Eisack), whose basins are separated only by a low water-parting. See **Alps,** PASSES, **IV.** (3).

Pustozersk, tn., Russia, govt. Archangel, near Pechora R., 65 m. above its mouth; exports fishery products. Place of exile of Matveyev and Golitsin in 17th century. P. <1000.

Pustyñ, Russian, 'monastery or convent in a secluded place.'

Pustynya, Russian, 'desert.'

Puszta (pusta), name given to the great plain of Hungary. See **Hungary.**

Putaendo, tn., Chile, prov. Aconcagua, 195 m. SSE. Coquimbo, 10 m. NNW. San Felipe, cap. dep. P. P. <3000.

Putaendo, riv., Chile, r. bk. trib. of the Rio Aconcagua.

Putai, tn., China, prov. Shantung, on the r. bk. of the Hwang-ho, 140 m. SSE. Tientsin.

Putbus, market-vil. and watering-place, Prussia, Pomerania, on S. ct. of isl. of Rügen, 15 m. E. by N. Stralsund. Mean temp. (15 yrs.), yr. 45.4° F., Jan. 30.8°, July 62.9°. P. <2000.

Puteaux, comm., France, dep. Seine, arr. St. Denis, on l. bk. of the Seine, 11 m. W. Paris; printing and dyeing of cottons, and manufacture of dyes. P. 17,500.

Puteoli, tn., Italy. See **Pozzuoli.**

Putford, East and **West,** two adjoining pars., Eng., Devonshire, Barnstaple div., on the l. bk. of the Torridge, 8½ m. SW. by S. Bideford, P.O. (**Putford**). East P., P. <250; West P., P. <250.

Puthai, people of the Laotian stock, occupying that portion of Annamite Laos included in the basin of the Bang-fay, l. bk. trib. of the Mekong.

Puthisat, same as **Pursat** (*q.v.*), tn., Cambodia.

Puti, tn., Brazil. See **Poti.**

Putignano, comm., Italy, Apulia, prov. and 23 m. SE. by S. Bari. P. 12,100.

Putilovo, vil., Russia, govt. St. Petersburg, on S. ct. of Lake Ladoga, 20 m. ESE. from Schlüsselburg; limestone quarries for the capital. P. <5000.

Put-in-Bay, isl., U.S., Oregon, Ottawa co., in Lake Erie; fashionable summer resort; grape culture carried on. Area about 2000 ac. P. <1500.

Putivl, dist. tn., Russia, govt. and 134 m. WSW. Kursk, on the high bank of the Seim, 10 m. N. of Kiev-Kursk Rly.; old

historical town; trade in corn, cattle, hemp, linen, and manufactured goods. P. 12,600.

Putley, par., Eng., Herefordshire, Ross div., 9 m. E. by S. Hereford, 2½ m. S. by W. Ashperton stn., P.O. P.<250.

Putlitz, tn., Ger., Prussia, prov. and 63 m. NNW. Brandenburg, circle Westpriegnitz. P.<2000.

Putna, riv., Roumania, r. bk. affluent of the Sereth, which it joins 27 m. WNW. Galatz; gives name to a prov. which it traverses (cap. Focsani); very rapid. Length, 81 m.

Putnam, tn., U.S., Connecticut, Windham co., 40 m. N. by E. New London. P. 6500.

Putnam, co., U.S., Florida, S. of 30° N., crossed in the W. by 82° W.

Putnam, co., U.S., Georgia, N. of 33° N., and between 83° and 84° W.

Putnam, co., U.S., Illinois, W. of 89° W., and N. of 41° N.

Putnam, co., U.S., Indiana, S. of 40° N., and just to E. of 87° W.

Putnam, co., U.S., Missouri, on the N. frontier, crossed by 93° W.

Putnam, co., U.S., New York, between the Hudson R. and the E. frontier, S. of 41½° N.

Putnam, co., U.S., Ohio, in the NW., crossed by 41° N., and in the E. by 84° W.

Putnam, co., U.S., Tennessee, W. of 85° W., N. of 36° N.

Putnam, co., U.S., W. Virginia, N. of 38° N., crossed in the extreme NW. by 82° W.; traversed by the Great Kanawha R.; with coal-mines.

Putney, suburb of London, Eng., Wandsworth div., on the r. bk. of the Thames, 6 m. SW. by W. St. Paul's, London, on the L. & SW. R. and (**East P.**) the District Rly. The University boat-race course is in the immediate vicinity, and rowing and sailing matches are often held here. **Putney Heath,** 1 m. S. by W. Putney, close to Southfields stn.

Putney, tn., U.S., Vermont, Windham co., on the Connecticut R., 46 m. SSE. Rutland. P.<1500.

Putney Bridge, stn., Eng., London. See **Fulham.**

Putney Bridge, stn., Eng., Middlesex, on the Thames, and the Metropolitan District Rly., opposite Putney.

Puttalam, or **Patlam,** vil., Ceylon, NW. prov., on the W. ct., 75 m. NW. Kandy. Identified by Col. Yule with Bettelar, a pearl-fishing centre mentioned by Marco Polo. P. 5000.

Putte, comm., Belgium, prov. Antwerp, arr. and 7 m. NE. Malines. P.<5000.

Putten, comm., Holland, prov. Gelderland, on the Zuider Zee, 6 m. S. Harderwijk. P. 5100.

Putten, former isl., Holland, prov. S. Holland, separated from the Hoeksche Waard by the Spui, now forming the E. portion of P. and Voorne I., from the W. or Voorne portion of which it is separated by the Voorne Canal.

Puttenham, par., Eng., in the extreme W. of Hertfordshire, Watford div., 4½ m. E. Aylesbury, 1½ m. SE. Marston Gate stn. P.<250.

Puttenham, par., Eng., Surrey, div. and 4½ m. WSW. Guildford, 2½ m. SE. Ashgreen stn., PM.O. P.<500.

Püttlingen, tn., Ger., govt. of Alsace-Lorraine, circle Forbach, 35 m. E. by S. Metz, 7 m. SW. by W. Saargemünd. P. (comm.)<3000.

Püttlingen, vil., Prussia, Rhine Prov., 34 m. S. by E. Trèves, circle and 7 m. NW. Saarbrück. P. 5400.

Putu, tn., Chile, prov. Talca, 10 m. N. Constitucion. P.<2000.

Putu, small isl. off the E. ct. of China, at the S. extremity of the entrance to Hangkow Bay, 2½ m. E. of the eastern point of the large island Chusan, in 30° 10′ N.

Putumayo, or **Içá,** riv., S. America, Colombia and Brazil, flows ESE. from the base of the Andes, on which it has numerous headstreams, winds very circuitously through perfectly flat country, and joins the Amazon l. bk. a little to the E. of 68° W. Its whole course is free from rapids, and at high water forms an excellent waterway almost to the Andes; at low water, however, numerous sandbanks impede navigation. The lower portion of the P. was partially surveyed in 1879 by Crevaux. Width above mouth, 820–2300 ft.; navigable for steamers to Cuemby, 600 m. in a straight line from its mouth.

Putung, or **Puntung,** suburb of Shanghai, China, S. of the town on the r. bk. of the Wusung.

Pütz, vil., Prussia, Rhine Prov., on riv. Erft, circle Bergheim, 22 m. W. by N. Cologne. P. (comm.)<3000.

Putzig, comm., Prussia, prov. W. Prussia, 26 m. NNW. Danzig, on the W. shore of **Putziger Wiek** (bay), in the NW. of Danzig Bay. P.<2000.

Puxton, par., Eng., Somerset, Wells div., 5½ m. ENE. Weston-super-Mare, 2 m. from its stn. on G. W. R. P.<250.

Puy, Le, tn., cap. dep. Haute-Loire, France, arr. Le Puy, a little above its confluence with the Loire, 37 m. SW. St. Étienne; seat of a bishop. The chief industry of P. from time immemorial has been the manufacture of lace and guipure. P. 20,300.

Puyallup, tn., U.S., Washington, Pierce co., on Puyallup R., 7 m. SE. Tacoma; valley noted for its hop-growing. P.<2000.

Puycerda, comm., Spain. See **Puigcerda.**

Puy-de-Dôme, dep., central France, formed chiefly from Auvergne, with small parts of Bourbonnais and Lyonnais; divided into five arrs.: Clermont (cap.), Ambert, Issoire, Riom, and Thiers. Surface mostly mountainous plateaux, separated into E. and W. sections by the Limagne valley, traversed S. to N. by the Allier. The principal mountains are, in the W., the Monts Dore, formed of trachyte and basalt, and culminating in Puy-de-Sancy (6190 ft.), the highest point in the dep. and in central France; the Dôme Mts., N. of the Dore, a mass of over 60 volcanic cones ('puys'), rising from a plateau of about 3300 ft.; highest point Puy-de-Dôme (4813 ft.), which gives its name to the dep.; the Liguet Mts., SE. of the Dore, form a link with the mountains of Cantal. In the E. section the granitic mountains of Forez (Pierre-sur-Haute, 5380 ft.), with their N. continuation, the Bois Noir, extend along the E. frontier; SE. the Monts Dolore, a branch of the Forez, rise to about 3300 ft., lowest point of dep. (880 ft.), where the Allier leaves it, in N. The Limagne, noted for its fertility, forms a narrow valley S. of Clermont, but northward widens to 12 m. The dep. belongs mainly to the basin of the Loire, through the Allier; a small portion in the SW. is drained to the Garonne by the Dordogne. The principal tribs. of the Allier are, r. bk. Dore; l. bk. the Couzes (a group of three primary and several secondary streams), Morge, and, beyond the dep., Sioule, which drains much of the NW.; the Cher, on the NW. frontier, receives a few streams. Climate very varied; rainfall, slight in Limagne, considerable in the mountainous districts [**Clermont-Ferrand**]. Forests occur on the mountains. Agriculture is carried on chiefly in the valleys, and to a less extent to a height of about 4000 ft. Of cereals, the principal is rye, then wheat and oats; the vine (of which the production is slightly below the average for France) is cultivated on the lower hill-slopes around Chanturgues, Clermont, Châteldon, Chauriat, &c.; other crops are forage roots and a little hemp. The most important mineral is coal, belonging to three basins, worked chiefly at Combelle (Brassac coalfield), Meisseix (Bourg-lastic), Montaigut (Saint Éloy); argentiferous lead (Pontgibaud) and precious stones are also found. Area, 3090 sq. m. P. (1891) 564,300. See **France,** table.

Puy-de-Dôme, celebrated mountain of central France, in the dep. to which it gives name, 5 m. W. Clermont. The astronomical post on the summit is in 45° 46′ 28″ N., and 2° 57′ 56″ E. Pascal and Périer made here the first observations on the weight of the atmosphere, in 1641 and 1648, and in 1876 a meteorological observatory was erected. Alt. 4813 ft. Mean temp. (12 yrs., 1878–89), yr. 37.9° F., Dec. 27.0°, July 51.4°; rfall. 62 in.

Puyehue, pass across the Andes on the borders of Chile and Argentina, in 40° 36′ S., on the road from Osorno to Lake Nahuel Huapi. Alt. 5000 ft. The road from Osorno passes the village of P. at the W. end of the Chilean **Lake of P.** (15 by 4 to 6 m.; alt. 500 ft.; drained NW. by the Pilmaiquen).

Puylaurens, comm., France, dep. Tarn, arr. and 12 m. W. by S. Castres. P. was one of the most strongly fortified places of Albigenses from the 12th to the 17th century; was abandoned and dismantled after 1229, and again fortified in the 16th century. P.<2000.

Puy l'Evêque, tn., France, dep. Lot, on the Lot, arr. Cahors, 33 m. NE. Agen. P.<2000.

Puymirol, tn., France, dep. Lot-et-Garonne, arr. and 8 m. E. by S. Agen. P.<2000.

Puys, or **Puits,** vil. and bathing-place, France, dep. Seine-Inférieure, 2 m. E. Dieppe. Dumas, the elder, died here in 1870. P.<2000.

Puy Saint André, vil., France, dep. Hautes-Alpes, arr., cant., and 2½ m. SW. Briançon; has deposits of anthracite. P.<2000.

Puy Saint Guimier, vil., France, dep. Puy-de-Dôme, arr. Riom, cant. and 5 m. SSW. Pontaumur; has deposits of anthracite. P.<2000.

Puzol, comm., Spain, prov. and 13 m. NNE. Valencia, dist. Sagunto. P.<4000.

Puzzichello, vil., Corsica, arr. Corte, 35 m. ENE. Ajaccio; has bathing establishment of cold saline and sulphureous waters. P.<2000.

Pwll, Welsh, 'a marsh,' 'pool.' See **Poll.**

Pwll, P.O., Wales, Carmarthenshire, 2 m. from Llanelly.

Pwllcrochan, par., Wales, Pembrokeshire, 2½ m. SE. Milford. P.<500.

Pwlliglas, P.O., Wales, co. and 8 m. SE. Denbigh.

Pwllheli, mun. bor. (since Edward the Black Prince), seapt., and market-tn., Wales, Carnarvonshire, in the Carnarvon parl. dist. of bor., and 19 m. SSW. Carnarvon, in the diocese of Bangor, on Cardigan Bay, branch terminus of Cambrian Rly. The harbour admits vessels of 400 tons. Sett-making is a considerable local industry; but the town is chiefly noted as a rising watering-place. It unites with Carnarvon, &c., to return one member to Parliament. There are many fairs held.

Market-days, W. and S. P. is a sub-port to Carnarvon. Copper, lead, manganese, and zinc ores are found in the neighbourhood. P. (1891) <3500.

Pwllypant, stn., Wales, Glamorganshire, E. div., on the L. & NW. R., 9 m. N. by W. Cardiff; coal mined. P.O.

Pyalong, post-tn., Victoria, Dalhousie co., 43 m. SE. by E. Sandhurst. P. <1500.

Pya-pun, tn., Lower Burma, dist. Thon-gwa, on the Pyapon, 46 m. SW. by S. Rangoon. P. (sea-fishing) <5000.

Pyasina, or **Pyasida,** riv., Russia, Arctic Siberia, issues from several lakes on NE. of Turukhansk, flows N. and NW. through Lake P., and continues N., its total length exceeding 350 m.; enters Arctic Ocean under 73½° N., to the NE. of the Yenisei, into the large **P. Bay,** dotted with Syevero-Vostochnyie and Kamennyie Is., having the Sukhanovskoye Zimoviye on the NE. ct.; covered with ice for 9½ months; receives the Dudypta from the right.

Pyatigorsk, dist. tn., Russia, N. Caucasia, prov. Terek, 145 m. by rail NW. Vladikavkaz, at the foot of the Mashuka and Beshtau Mts.; renowned for its hot sulphureous mineral waters, of which there are fifteen springs; well built; visited every year by thousands of patients. Mean rfall. (18 yrs.), yr. 21.7 in., April–Sept. 16.9 in. P. 16,500.

Pyatizbyanskaya, Cossack vil., Russia, prov. of Don, on r. bk. Don, 10 m. SW. from Kalach port, and terminus of Volga-Don Rly.; considerable shipping. P. 13,420.

Pyatt, co., U.S., S. Dakota, bounded on the N. by 45° N., crossed by 101° W., bounded on the E. by the Missouri R., and partly traversed by the Big Cheyenne R.

Pye Bridge, stn., Eng., on borders of Derbyshire and Nottinghamshire, on the M. R., 8 m. SW. Mansfield, P.O.

Pyecombe, or **Piecombe,** par., Eng., Sussex, Lewes div., 5½ m. N. by W. Brighton, 2 m. SSW. Hassocks stn., P.O. P. <500.

Pye Hill, stn., Eng., on borders of Derbyshire and Nottinghamshire, on the G. N. R., between Codnor Park and Pinxton stns.

Pyeng-dayay, vil., Burma, dist. Thon-gwa, 80 m. SSE. Bassein.

Pye's Corners, vil., Canada. See **Cornwall.**

Pymoor, P.O., Eng., Cambridgeshire, 6 m. NW. Ely.

Pyramid Hill, post-tn., Victoria, Gunbower co., 35 m. W. by N. Ecchuca. P. <1500.

Pyramid Lake, U.S., Nevada, in the NW., 50 m. NNE. Carson City, 30 m. long, by 4–13 m. wide. It has no outlet, but receives the surplus waters of Lake Tahoe by the Truckee R. Alt. 4890 ft. (Pac. R.R. Reports).

Pyramid Peak, mt., U.S., California, in 120° W., and S. of 39° N.

Pyramus, riv., Asia Minor. See **Jihun.**

Pyrenees (from Celtic *biren,* 'high pastures'), a name applied, in its widest sense, to a mountain chain (650 m. long) stretching from the Atlantic (Cape Finisterra) in Galicia to the Mediterranean (Cape Creus) in Catalonia (between 42°–43° N. lat.). A considerable depression (1600–3000 ft., between Tolosa and Pampelona) and a change of direction in the Atlantic coast of Europe (from NW.–SE. to SW.–NE.) naturally divide the P. into two sections: the W. (see **Cantabrian Mountains**) and the E. or **P. proper,** which stretch (for 350 m.) from sea to sea, across the isthmus, uniting the Iberian penin. to continental Europe (in a general direction W. 8° 28′ 25″ N.) at a mean alt. of 4000 ft., with a width of from 40 m. in the W. to 100 m. in the E., and covering a surface of 21,000 sq. m. (two-thirds on the S. Spanish slope, with 3 per cent. inclination; one-third on the N. French slope, with 7 per cent.). The rivs. Adour, Garonne, Aude, and Tet are the collecting channels of the torrents (*gaves*) in the upper parts of the N. slope; the Nevion, Ebro, Llobregat, and Ter those of the southern. All lands above 6500 ft. are in the centre of the chain (between the Saison, N., and Ezca, S., 1° W. long., and rivs. Boules–Tet, N., and Ample–Tech, S., 2° 30′ E. long.). All the highest peaks (*puygs*) are on the Spanish side (Marmoré, 11,000 ft.; Monte Perdido, 11,000 ft.; Posets, 11,040 ft.; Anethou, at Maladeta, the highest, 11,168 ft.). The chain is formed by a series of parallel orographic folds (NW.–SE., Larrun – Visaurin – Tendenera, Aran, &c.), intersected, at acute angles, by another series of ridges (NE.–SW., Andorra, Canigou–Cadi, &c.), the two series enclosing many secluded areas which were once lakes (*cirques*). The Albères (at the E. extremity of the chain) show both dominant directions (the SE., to the Cape of Creus, and on the SW. of the Gulf of Lyons; the NE. appearing in the mountains of Provence). From 30 to 40 m. S. of the principal mass other intersecting folds are seen (3000–6000 ft. alt.), enclosing the beds of three old lakes (*a.* Orba–Guara–Cancias; *b.* Balcez–Montsech–Cadi; *c.* Monserrat–Monseny). On the N. side of the P. signs of the same disposition are still to be seen (Salies de Béarn, Petites-Pyrénées). Most geological formations are parallel to the general direction of the chain (N.), NW. to SE. (W.), or SW. to NE. (E.). The central part and almost all the highest regions are now formed by Archæan and Palæozoic rocks (granites and schists). Some Permian, Triassic, and Jurassic sediments are to be seen in the N., more extensively developed in the W., and embrace, in an angle open to the E., two considerable zones of the Cretaceous formation, followed S. by a large zone of Eocene, and, still more to the S., by a larger one of Miocene. Some volcanic rocks in the SE. extremity of the chain (Olot). The snow-line reaches down to about 10,000 ft. on the S. slope, and 9000 ft. on the N. The glaciers (N. and NW.) are very small (the most important 1 to 2 m. long, ½ m. wide), and are gradually retiring. Numerous lakes (5000 ft. to 8500 ft. alt.) in the granitic districts. The minerals include iron (Andorra, Bielsa, Gisesani, S.; Ferrièrl, Vicdesors, N.), lead, silver, copper, nickel, cobalt (Aure, Bielsa, &c.), gold (Oriège, Ariège), coal (San Juan de las Abadesas, S.; Durban, Segure, N.); very good marbles (from Louvie to Saint Béat in Bagnères-de-Bigorre). Many famous mineral waters (Cauterets, Bigorre, Luchon, Salies, Encausse, Eaux-Bonnes, Salies-de-Béarn, &c.). N. and W. the climate is Atlantic (wet; rfall. 59 in.), S. and E. it is Mediterranean (dry; rfall. 10 in.). The limits of the perpetual snow and of the zones of vegetation rise from W. to E. and from N. to S. The characteristic plants from the lowest zones up to 10,000 ft. are olive-trees, vines, chestnuts, coniferæ (*Abies, Pinus*), birches, rhododendrons, junipers (up to 9200 ft.), lichens. Trees ascend to 6000 ft. N., 7500 ft. S. Among the animals are *Capra ibex* and *C. pyrenaica,* and *Antilocapra rupicapra* (chamois, isard), the first very rare. Population is decreasing. Toulouse, Bordeaux, on the Garonne; Saragossa, Barcelona, in the Ebro valley, are the commercial emporia of the P. Two railways cross the P. at their two extremities. All the passes (*cols*) on the central chain are very high (6500–10,000 ft.); but Col de Velate has less than 3000 ft., and there are others with less than 2000 ft. By the Perthus Pass (Perpignan to Gerona, 950 ft.) Hannibal entered Gaul in 218 B.C. See **Andorra, Spain, France.** [**J. B. R.**]

Pyrenees, mt. range, Victoria, near the sources of the Wimmera and Avoca Rivs., which form, for some distance, a portion of the Dividing Range, and then trend N.

Pyrénées, Basses-, maritime dep., SW. France, formed out of ancient provs. Béarn, Navarre, and Gascogne; divided into five arrs.: Pau (cap.), Bayonne, Mauléon, Oloron, and Orthez. Coast-line (19 m.) bordered by rocky cliffs, and indented by numerous creeks. The Pyrenees, from which the dep. is named, form the S. frontier, increasing the elevation towards the E. Amongst the principal summits are Pic d'Anie (8215 ft.), marking the E. limit of the Basques, Pic du Midi d'Ossau (9465 ft.), and Pic de Palais or Cuje de Palais (9765 ft.), the culminating point of the dep., on the frontier of Hautes-Pyrénées. The range in this dep. contains 26 passes, including the Port d'Ibañeta or Pass of Roncevaux. From the main chain several spurs stretch N., enclosing valleys (Baïgorry, Soule, Barétous, Ossau, &c.), which form a characteristic feature of the dep. With the exception of a few coast-streams, and the upper valley of the Irati (sub-affluent of Ebro), the dep. belongs to the basin of the Adour, on NW. frontier. Its principal trib. is the Gave de Pau with the Gave d'Oloron (both subject to dangerous floods); other tribs. are Bidouze and Nive (both navigable for a short distance), and several small streams in the NW. As regards geological formation, Cambrian and Silurian rocks predominate in the mountains, flanked N. by Cretaceous formations which stretch to the Adour; along the Gave de Pau are Tertiary and Quaternary deposits. Forests cover about one-fifth of the surface, principally in upper valleys (Ossau, Iraty, Isseaux, Halçarte, &c.). The most important cereal is maize, which forms the basis of the native food-supply; next wheat; the vine is cultivated in dists. around Pau, Garlin, &c., but the production per acre is less than half the average for France; little flax is grown; chestnuts are plentiful. Salt is mined at Larralde Villefranque, and there are salt-springs at Salies-de-Béarn; other mineral springs are numerous. Of the inhabitants, about one-fourth are Basques (*q.v.*); in some of the higher valleys (Chibitoua) is a tribe called Cagots, supposed to be of Gothic descent. Area, 2978 sq. m. P. (1891) 425,000. See **France,** table.

Pyrénées, Hautes-, frontier dep., SW. France, formed of parts of Gascogne (chiefly Bigorre, also Nébouzan and Quatre Vallées, with small portions of Armagnac and Astarac), divided into three arrs.: Tarbes (cap.), Argelès, and Bagnères-de-Bigorre. The surface comprises three distinct regions—

mountains in the S., plains in the N., plateau in the E. The mountainous region, marked off by the upper courses of the Gave and Neste, includes the highest summits in the French Pyrenees; spurs stretching N. enclose valleys presenting in the higher parts every variety of scenery, and in the lower well-cultivated fields. In the W., Vignemale (10,820 ft.), the culminating point, dominates the famous valley of **Cauterets**; further E. is the calcareous group, in which are excavated the Cirques of Gavarnie, Estaubie, and Troumouse; then the mountain-knot, crowned by the Pic de Néouville (10,145 ft.), whence a series of lofty summits, including the Pic du Midi de Bigorre (9440 ft.), extend NE. of the upper Gave valley. The plateau of Lannemezan, which occupies the NE. part, is a desolate region, swept in winter by terrible snow-storms, but of geographical importance as the centre, whence radiate, in a series of 'fans,' the head-streams of the Pyrenean region. The region of the plains consists properly of the last low hills of the Pyrenees with intervening valleys. The dep. belongs chiefly to the basin of the Adour, which rises in the S. and flows N. for 51 m.; it receives no tribs. of importance in the dep., but beyond it is joined by the Arros and Gave de Pau, both of which rise in the dep. The Garonne, on the SE. frontier, receives the drainage of a small area, partly by the Neste. Mesozoic formations flank the primary and granitic rocks of the Pyrenees, while Tertiary and Quaternary deposits extend northward. The principal forests are those of the Neste d'Aure, Gave de Cauterets, Azun, &c. The most important cereals are wheat and maize, cultivated in the valleys and on the slopes of the mountains; the former to the alt. of 3935 ft., and the latter to 1310 ft. The vine is grown chiefly in the dists. of Maderan and Peyriguère, but the production per acre is only about half the average for France. Other products are tobacco and flax (both limited), and chestnuts. The dep. is noted for its numerous mineral springs. Area, 1750 sq. m. P. (1891) 225,900. See **France,** table.

Pyrénées-Orientales, maritime and frontier dep., S. France, owes its name to its situation at the E. extremity of the Pyrenees; formed chiefly from the prov. of Roussillon (Capsir, Conflant, Vallespir, Cerdagne, and Val de Carol or Quérol), and Languedoc (Sournia and Fenouillet); divided into three arrs.: Perpignan (cap.), Céret, and Prades. Surface mountainous, except in the E., where the plain of Roussillon stretches inland from the coast. Granite, gneiss, and schists flanked by Cambrian predominate in the former region; Quaternary and Tertiary deposits in the plain. The coast (about 40 m.) is bordered by sandbanks, enclosing lagoons, of which the principal are Leucate or Salses, and Saint Nazare or Canet. The culminating point of the dep., Puig de Carlitte (9585 ft.), rises in a spur of the Pyrenees, which terminates in a plateau at the Col de la Perche (5320 ft.). The frontier range divides at Roque-Colomb into two branches, the Canigou trending NE. and culminating in Mount Canigou (9135 ft.), and the Albères SE. along the frontier to Cape Cerbère, highest point Pic de Costabonne (8130 ft.). This range, abrupt on the French side, is crossed by numerous passes, of which the Col du Perthus (950 ft.) was the most frequented previous to the opening of the railway from Narbonne to Barcelona, now carried through a tunnel in Mount Balitres. The Corbières, a secondary range, separates the Tet and Agly. The dep. is drained chiefly to the coast, the principal rivs. being Agly, Tet, and Tech; the Tet (83 m.) is used partly for irrigation. The Sègre drains the Cerdagne dist. to the Ebro, and a small area in the NW. is drained by the Aude. Climate, mild on coast, severe in higher parts of the interior [**Perpignan**]; the tramontane, a NNW. wind, resembles the mistral of Provence. Wheat and maize are the principal cereals, but the vine is the most important culture (Banyuls, Cosperons, Collioure, Mas-Deu, Rivesaltes, &c.), production per acre above the average for France; mulberry (Perpignan), olives, chestnuts. Area, 1599 sq. m. P. (1891) 210,100. See **France,** table.

Pyreneos, Serra dos (said to be a word of Indian origin pronounced 'perineos'), a range of mts., Brazil, state of Goyaz, at the headwaters of the Tocantins, between 15° and 16° S. and about 47½ and 49½° W.; highest peak, 4495 ft. In the region traversed by these mountains, an area of 5560 sq. m. has been selected as a federal dist. in which to found the new cap. of the republic of Brazil.

Pyrenopolis (called till 1893 **Meia Ponte**), tn., Brazil, Goyaz, in the Serra dos Pyreneos, about 620 m. NW. Rio de Janeiro, in 15° 53′ S., 49° 14′ W. Alt. 2430 ft. P. <3000.

Quebec (formerly **Lower Canada,** or **Canada, East**), prov., Canada, more than twice the area of Great Britain, on both sides of the St. Lawrence, bounded N. by Hudson's Bay Terr., W. by the Ottawa R., and S. by the U.S. and New Brunswick. Attached to it are Anticosti and the Magdalen Is., in the Gulf of St. Lawrence. Surface diversified, the characteristic features being its numerous lakes and rivers and vast forests. The principal mountains are the Nôtre Dame or Shickshock, S. of the St. Lawrence (Bayfield, 3973 ft.; Logan, 3767 ft.), and the Laurentian Mts. on the N., average height 1600 ft. The prov. belongs almost entirely to the basin of the St. Lawrence, which traverses it from SW. to NE.; principal tribs., r. bk., Richelieu (which drains Lake Champlain and affords communication with the Hudson), St. Francis, and Chaudière; l. bk., Ottawa, St. Maurice, and Saguenay (draining Lake St. John). Minor tributaries, St. Anne's, Rimouski, Magdalen, &c. Lakes are numerous, especially N. of the St. Lawrence, where they form part of the great lake-belt stretching around Hudson Bay from Labrador to the Arctic Ocean; amongst the principal are St. John, Mistassini, and Abbitibbi; S. of the St. Lawrence are Temiscouata, Memphremagog, and Megantic. The forests yield valuable timber (pine, spruce, ash, birch, beech, elm, walnut, maple, &c.). The climate is more severe than that of Ontario; the winters are longer, and the cold more intense, but the summer is much the same; coldest in N., mildest in SW. [**Chicoutimi, Cranbourne, Huntingdon**]. The snow, which covers the ground usually from December to April, has a very beneficial effect on vegetation, and as it hardens rapidly under traffic, forms excellent winter roads, which can be traversed with ease by heavily laden sleighs, while the dryness of the air greatly diminishes the sensible effects of the intense cold. The soil is in general very rich, and agriculture is the prevailing occupation. Cereals, grasses, and root-crops grow in perfection, and in the S. maize, where also grapes and tomatoes ripen freely in the open air; small fruits are abundant, and specially fine apples and plums are grown in certain parts. An abundance of excellent pasturage, more particularly in the Eastern Townships and N. of the St. Lawrence, is favourable for cattle, large numbers of which are now reared, both for export and dairying. The production of cheese and butter is an important and rapidly increasing industry (more than 600 butter and cheese factories in 1891, as against less than 150 in 1881). The coast fisheries are very important. Mineral products, which are rich and varied, include gold (Beauce dist.), copper, abundant in the Eastern Townships, iron, widely distributed; besides lead, silver, platinum, asbestos, immense deposits of phosphate of lime in the Ottawa valley, and peat; coal has not been found. Next to agriculture, the principal industry is lumbering; cheese is the leading manufacture; others are iron, hardware, and agricultural implements, refined sugar, chemicals, cotton, and woollen goods. The Eastern Townships, a dist. lying along the United States frontier for about 180 m., with an average breadth of 40 m., comprises lands allotted to loyalist immigrants from the United States at the time of the War of Independence. It received the name from its position to the E. of the 'seignories,' which had been granted to French settlers before Canada came into the possession of the English. The dist. is hilly, well-watered, and very fertile, noted for the production of timothy-grass seed; stock-raising is an important industry; manufactures are actively carried on in several towns, of which Sherbrooke is the chief. In various parts of the prov. uncleared crown lands may be purchased at low rates, and recently an extensive alluvial tract between St. John's Lake and the Ottawa R. has been thrown open for settlement. About three-fourths of the pop. are of French origin; French is spoken even more generally than English, and all official notifications are published in both languages. The English element predominates in the Eastern Townships. Area, 228,900 sq. m. P. (1891) 1,488,600. See **Canada, Dominion of,** table.

Quebec, city, Canada, prov. Quebec, on l. bk. of the St. Lawrence, at the influx of the St. Charles R., in 46° 49′ 1″ N., 71° 13′ W., 900 statute (719 nautical) m. from the Straits of Belle Isle. It covers a promontory between the two rivers, and is divided into two sections: (1) The upper town, occupying the highest point of the promontory, which is surrounded by strong walls and fortifications; (2) the lower town, the business quarter, built round the base of Cape Diamond. The citadel is a massive work on the summit of Cape Diamond, covering about 40 ac. It is the strongest fortress on the W. continent, and has been called the 'Gibraltar of America.' It is entered from the upper town by five gates. The St. Louis gate on SW. leads to the

Plains of Abraham,' the scene of Wolfe's victory and death in 1759. In the public garden is an obelisk in memory of Wolfe and Montcalm. Public edifices comprise the parliament house, which replaces the building destroyed by fire in 1854; Roman Catholic and Protestant cathedrals, and convent and church of St. Ursula. The French college, royal grammar-school, royal institution, literary and historical society, school of gunnery, school of military instruction, and medical school are amongst its chief public institutions. The commerce of the city is large, but the growth of its shipping has been retarded by the deepening of the St. Lawrence to Montreal. The Princess Louise Docks (area 36 ac.) have a depth over sill at ordinary spring tides of 36 ft., ordinary neaps 30 ft. The tidal basin (area 20 ac.) has a depth at entrance at ordinary neaps of 37 ft. Manufactures include iron, machinery, leather goods, &c.; extensive trade in lumber. Q. was founded by the French in 1608, taken by the British in 1629 and 1759, and finally ceded to Britain in 1763. It has been twice nearly destroyed by fire. The most attractive object in the vicinity is the Fall of Montmorency, 6 m. distant; the river here is 60 ft. wide, and the descent of the torrent 250 ft. Shortest sea-route to Liverpool, 2660 m. Alt. 312 ft. Mean temp., yr. 38.7° F., Jan. 9.1°, July 66.5°; mean rfall. (19 yrs., 1869–88), 25.1 in.; snowfall, 159.67 in. P. (1871) 59,700; (1881) 62,400; (1891) 63,100.

Queen Camel, par., Eng., Somerset. See **Camel, Queen.**

Queen Charlotte, isl., Pacific. See **Nuku-tavake.**

Queen Charlotte Islands, S. Pacific. See **Santa Cruz Islands.**

Queen Charlotte Islands, two isls. (**Graham** and **Moresby**) and numerous islets of Brit. N. America, in the Pacific Ocean, mostly between 52° and 54° N. and 131° and 133° W., 50 m. from the mainland. Length of group, 178 m.; breadth ranges up to 75 m. These islands (all densely wooded) are a half-submerged mountain range, the continuation of the Vancouver Island chain. In the W. the peaks rise sheer 2000–4000 ft., and rain is almost continuous. The E. is less rugged, and sunnier and drier. The islands were discovered by Juan Perez in 1774; in 1787 Captain Dixon gave them their present name in honour of his ship. The natives, a fast dwindling race known as the Haidas, are taller, fairer, and with more regular features than any of the Columbian coast tribes. In 1841 they numbered 6593. In 1878 they had only three permanent winter villages, Masset, Skidegate, and Gold Harbour. In 1891 they were enumerated as 700. Bituminous coal exists on Graham I., and there is anthracite near Skidegate.

Queen's County, inland co., Ire., prov. Leinster, S. of King's co., divided into the baronies named in the following table:—

Baronies.	Acres.	Pop. 1891.
Ballyadams	24,079	3,466
Clandonagh	43,735	6,264
Clarmallagh	43,486	5,660
Cullenagh	44,138	7,084
Maryborough, East	25,162	6,081
Maryborough, West	41,918	7,553
Portnahinch	35,832	7,521
Slievemargy	35,489	5,983
Stradbally	27,902	3,949
Tinnahinch	54,187	7,083
Upperwoods	48,925	4,239
Total	424,853	64,883

Surface mostly level, with much bogland in centre, rising in NW. to the Slieve Bloom Mts., summit Ardern, 1734 ft. Geologically, the county is entirely a limestone floor, with folds of Old Red Sandstone, the SE. being part of the Leinster coalfield worked for anthracite at Crettyard and other places. The main occupation is dairy-farming. For agricultural statistics, see **Appendix,** pp. 10–12. The drainage is by the riv. Barrow, from Slieve Bloom, the Nore, from co. Tipperary, and the Grand Canal. The G. S. & W. R. passes from NE. to SW., with several branches. The name is from Queen Mary (1556), in whose honour Maryborough, the county town, was also named. The castle of Dunamase and a round tower are the chief antiquities, besides ruins of a fort and an abbey, once seat of the Bishop of Ossory. The county returns two members to Parliament, and is in the Leinster circuit. See **Ireland,** table.

Queensferry, or **South Queensferry,** parl. and royal burgh and par., Scot., Linlithgowshire, on the S. shore of the Firth of Forth (here crossed by the Forth Bridge), 8½ m. WNW. Edinburgh, on the N. B. R. Q. is so named from being the place where Margaret, queen of Malcolm Canmore, crossed the Forth on her journeys between Edinburgh and Dunfermline. Parl. burgh, P. <2000; royal burgh and par. P. <1000.

Queensferry, post-tn., Victoria, Mornington co., on E. side of Western Port, in 38° 24′ S., 145° 27′ E. P. <1500.

Queen's Ferry, stn., Wales, Flintshire, on the L. & NW. R., 5½ m. W. by N. Chester, P.O.

Queensferry, North, vil., Scot., Fifeshire, on the S. ct. of the Firth of Forth, opposite Queensferry; is a sea-bathing resort. PMT.O. P. <500.

Queensland, a Brit. colony in NE. of Australia, between 10° 40′ and 29° 0′ S., including also the islands in Torres Strait. Area about 7½ times that of Great Britain; cap. Brisbane. The coast-line has a total length of 2250 m., and comprises many large bays and magnificent harbours on the Pacific coast, fringed by numerous islands, and bordered by the Great Barrier Reef (*q.v.*) as far S. as lat. 22°. The surface resembles that of New South Wales, of which it is a continuation, but the area of tableland above 1000 ft. is much greater; a main range of mountains traverses the whole length of the colony, but has few points over 3000 ft. in height; the highest summit is in a spur known as the Bellenden Ker Range, in about 17° 30′ S., which rises to 5240 ft. The rivers are thrown off by the Dividing Range in four directions; eastward to the Pacific, NW. to the Gulf of Carpentaria, SW. to the interior of Australia, and S. into the system of the Murray. Of the former the principal are the Burdekin, the Fitzroy, the Burnett, and the Brisbane, but none of them are navigable for any great distance, though they bring down from the tableland during the summer rains enor-

mous volumes of water charged with sediment. Those flowing to the Gulf of Carpentaria are the Flinders, Gilbert, and Mitchell, all unnavigable except near the mouth. The largest of the south-western, all of which are lost in the desert or its salt lakes, are the Georgina, the Diamantina or Mueller, the Barcoo, and the Thomson, which at some seasons join the Cooper Creek that feeds Lake Eyre. The Condamine or Balonne and the Warrego are tribs. to the Darling. Geologically, the country may be said to consist broadly of two distinct sections, the eastern and northern, formed of Primary and Secondary rocks, in which coal, gold, granite, slate, and basalt are found, and the great plains westward of the Dividing Range, consisting of decomposed Oolitic and Cretaceous shales, limestones, and sandstones. The general characteristics of the climate may be stated as moist and hot on the Pacific slope, and dry and hot in the western interior, with a cooler temperature on the hilly belt between [**Brisbane, Warwick, Toowoomba, Mackay, Thargomindah, Ravenswood, Somerset**]. In the coastal districts the country is intersected by numerous rivers and streams, the banks of which, formerly clothed with dense jungle, are very fertile, where the sugar-cane is successfully cultivated to a large extent; the soil and climate are also suitable for the production of all the cereals (especially wheat and maize), cotton, tobacco, rice, arrow-root, &c., and all kinds of semi-tropical and English fruits and vegetables are abundantly grown. The more elevated and drier region W. of the mountains is sparsely timbered but well grassed, and is largely occupied as sheep-runs; of late years, however, much attention has been given to deep borings, which have revealed almost unlimited supplies of **subterranean waters** (some borings yielding 2,000,000 gallons daily), which, it is expected, will very materially change the character of the country and render it available for agricultural pursuits. Cattle and sheep rearing, favoured by the nutritious grasses and rich fodder plants which abound, forms the most important commercial interest of the colony, and wool is the staple export. Gold, silver, tin, and copper are the principal **metals**. The first important discovery of gold was made in 1858 on the Fitzroy R., and it is now found in many places, but most abundantly at present in the neighbourhood of Charters Towers, on the Burdekin R., and round Gympie, near the coast N. of Brisbane; the total yield to end of 1892 is stated to be over 8,600,000 oz. Silver, associated with lead, is found in the vicinity of Herberton, Ravenswood, and Bowen; tin exists in almost exhaustless quantities, chiefly in the SE., on the New South Wales border, round Stanthorpe, and in the N. at Herberton; copper is found in various parts, and a very rich district lies round Cloncurry, S. of the Gulf of Carpentaria, but mining is at present practically suspended; opals are largely mined near Thargomindah. Coal is extensively diffused throughout the colony; as yet only comparatively surface coal is worked, in the SE., chiefly near Brisbane, but the deposits at greater depths are believed to be of very superior quality; it is estimated that the coal-beds underlie a surface of nearly 24,000 sq. m. In the extreme N. considerable attention is given to the pearl-fishery; and the collection of bêche-de-mer at the Great Barrier Reef employs a large number of hands, and is a profitable source of revenue. Railways to the extent of about 2400 m., all on the narrow-gauge system, have been developed from the eastern ports of Brisbane, Bundaberg, Rockhampton, Townsville, Cairns, and Cooktown into the interior, but the Brisbane-Bundaberg Coast Rly. is the only line bringing any two of these into connection. On the Gulf of Carpentaria side there is a railway connecting Normanton with the goldfield of Croydon. The government is vested in a governor appointed by the Crown, assisted by an executive council and two houses of parliament, one nominated by the Crown, the other elected by the people for three years. Labour still remains the great difficulty in the way of the satisfactory development of the natural products of the country; the climate in some parts, especially in the sugar plantations, is scarcely suitable to those of European origin, and recourse has been had to labourers introduced from the islands of the Pacific, generally known as *kanakas*; and more recently the experiment has been tried, with much apparent success, of Japanese labour immigration; besides Polynesians, who number nearly 10,000, nearly all men, there is about the same number of Chinese (males), who are chiefly employed as gardeners, servants, and shopkeepers. The greater part of Cape York Penin. is inhabited only by native tribes, who are well formed, but fierce. Q., which, as the Moreton Bay district, was formerly comprised in New South Wales, was separated and formed into an independent colony in 1859; during the last few years a movement has been made by northern residents to procure its division and the formation of the northern portion into another distinct colony; and attempts have been made to accomplish this, but as yet without success. See **Australia,** Discovery, and **Australasian Colonies** for area and population. [**W. J. T.**]

Quitman, co., U.S., Georgia, on W. frontier, and S. of 32° N.

Quitman, tn., U.S., Georgia, Brooks co., 54 m. NE. by E. Tallahassee (Florida); has several factories. P. <2000.

Quitman, co., U.S., Mississippi, to the N. of 34° N., and between 90° and 91° W.

Quitman, vil., U.S., Mississippi, Clarke co., 88 m. E. by S. Jackson. P. <1500.

Quito, tn., Ecuador, prov. Pichincha, ancient cap. of the Shiris and Incas, and now of the republic, 165 m. NE. by N. Guayaquil, situated in an Andine basin on an irregular part of the surface of a long plateau rising to the height of 1000–1300 ft. above the adjacent plain. Principal buildings, besides those of the government offices, the churches and convents, especially that of the Jesuits. Most of the churches deprived of their spires by the earthquake of 1859. Seat of an observatory (0° 13′ 34″ S.; longitude doubtful, but according to Wolf some minutes W. of that assigned by Humboldt, namely, 78° 44′ 29″ W.), of a university, and an institute of science, the laboratories and museum of natural history connected with which are located, along with the national library, in the old college of the Jesuits. Climate pleasant and healthy to those who are acclimatised, but not deserving, according to Wolf, of the epithet of eternal spring so frequent now with regard to it. Alt. 9350 ft. Mean temp. (1878–79), yr. 55.6° F. Population uncertain, no exact census having ever been taken; estimated by Wolf, who believes that it has certainly not increased in the 19th century, at not more than 40,000.

Quitta, W. Africa. See **Kita.**

Quixeramobim, Campo de, tn., Brazil, prov. and 120 m. SW. by S. Ceará.

Quiyndy, vil., Paraguay, 49 m. SE. by S. Asuncion.

Raba, riv., Austria, Galicia, r. bk. trib. of the Vistula, rises on the N. slope of the Beskids, or W. Carpathians, flows NE. past Rabka, and joins the Vistula 25 m. ENE. Cracow, after a course of 81 m.

Raba, riv., Hungary. See **Raab.**

Rába, vil., Palestine, *Rabbith* in the O. T., 32° 23′ N., 35° 23′ E., 12 m. NE. by N. Nablus.

Rabâbeh, Wâdi, the valley of Hinnom of the O.T., a narrow valley on the W. and S. of the height on which Jerusalem stands. It opens into the Wadi-en-Nar (valley of the Brook Kidron).

Rabagh, or **Sherm Rabegh,** seapt. tn., W. Arabia, Hejaz, on the Red Sea, 124 m. NW. Mecca, in 22° 38′ 14″ N. P. <2000.

Rabai, or **Rabbai,** vil., E. ct. Africa, 15½ m. N. Mombasa.

Rabastens, vil., France, dep. Hautes-Pyrénées, arr. Tarbes, 23 m. N. Bagnères-de-Bigorre. P. <2000.

Rabastens, the ancient *Rapistagnum,* tn., France, dep. and on the Tarn, arr. Gaillac, 21 m. NE. Toulouse. P. <3000.

Rabat, Rbat, or **Rabbat,** in full **R'bat el F'tah** ('camp of victory'), seapt., Morocco, W. ct., 77 m. W. by N. Mekines, is opposite Sali (Sallee). The fort is on a rock whose sides fall sheer to the ocean. Commerce is hindered by a bar at the mouth of the Bu-ragreg, ships being often obliged to anchor in the open roadstead. The depth of water on bar fluctuates, being occasionally as much as 16 ft. at high water. Its importations are less than £50,000, and decreasing. It exports skins, wool, and beans, but their value barely reaches £200,000 per annum; one-half the total trade is with England. R. was founded about 1190. Half a mile from the town are the ruins of the ancient *Shella,* the *Sala Colonia* of the Romans, which contains tombs of the Almohade and Marinide sultans, three of them with inscriptions. P., according to Lenz, 25,000, of which 4–5000 are Jews; according to De Campou, 12,000. See **Salch.**

Rabba, tn., central Sudan, ancient cap. of the kgd. Nupe, on the l. bk. of the Niger; formerly the centre of the slave-trade between the interior of Sudan and the coast. P. at beginning of 19th century, 100,000 (Lander); at end, 2000.

Rabba, ruins, Syria, *Rabbath Moab* in the O. T., called by the Greeks *Areopolis,* in 31° 17′ N., 35° 38′ E., 11 m. E. of the Dead Sea where narrowed by the penin. of El Lizan.

Rabba, tn., Syria, *Ur of Moab,* or *Rabbath Ammon,* in the O. T., called by the Greeks *Philadelphia,* 31° 57′ N., 35° 56′ E., 13 m. NE. by N. of the ancient Heshbon.

Rabbai, E. Africa. See **Rabai.**

Raguhn, tn., Ger., Anhalt, on riv. Mulde, 8½ m. S. by E. Dessau. P. <3000.

Ragusa (Slavonic **Dubrovnik,** Turkish **Paprovnik**), fortified city and seapt., Austria, prov. Dalmatia, cap. circle R., on a penin. on the Adriatic, 50 m. SSE. Mostar; surrounded by forts. It is partly enclosed by old walls, flanked by massive round towers. To the N. is Mount Sergio (alt. 1142 ft.), crowned by a fortress erected by the French, 1808–1813. Two other forts protect the coast, while a fourth, built by the French, is ½ m. S. the town, on the small isl. Lacroma, and commands the bay. R. has a cathedral (1713), a Gothic custom-house, a palace of the former rectors of the republic, and a Jesuit college. The port immediately E. the city, though protected by a mole, is fitted only for vessels not exceeding 200 tons; but the harbour of Gravosa, the real port, 1½ m. N. the penin., will receive ships of the line. Manufactures of silks, leather, and rosoglio, which, with oil, anchovies, and the products of Herzegovina, constitute the chief exports. R. is the birthplace of Boscovich, the mathematician, died 1787. Founded about the middle of the 7th century, this city became early in the 15th century a republic, which, though independent, was under the successive protection of the Greeks, Venetians, and Turks until 1810, when it was joined by Napoleon I. to Illyria. In 1815 it was transferred to Austria. The city was burnt down in 1023, 1296, and 1459; in 1667 it suffered from a terrible earthquake; this was the beginning of its fall. By her devotion to letters and science, as well as by her political and commercial activity, R. was a centre of civilisation from the middle of the 15th century. Mean temp. (15 yrs.), yr. 61.2° F., Jan. 47.7°, July 77.2°; mean rfall. (13 yrs.), 65.71 in. P. 7100.

Ragusa, comm., Sicily, prov. and 32 m. WSW. Syracuse; weaves silks, cloth, and woollens, and has an active trade in corn, wine, olive-oil, and cheese. Alt. 1630 ft. P. 24,300. **R. Inferiore** (Lower R.), adjoining comm., P. 7600.

Ragwen Point, cape, Wales, Carmarthenshire, 7 m. NE. by E. Tenby.

Rahad, riv., eastern Sudan; it rises, under the name of the Sinfa, on the W. of Abyssinia, and flows NW. into the Bahr-el-Azrek, or Blue Nile, 126 m. SE. Khartum. Its bed is quite dry during the greater part of the year; navigable for about eighty days during the year. Length (in a straight line from source to mouth), 250 m.

Rahaga, hamlet, Scot., Dumbartonshire, on the W. shore of the Gare Loch, 4½ m. NW. by W. Helensburgh.

* Exclusive of the British terr. of Ajmere-Merwárá (2711 sq. m.; P. (1891), 542,000).

Most of the native states placed themselves under British protection in 1818, on the conclusion of a war in which the British put down the robber hordes of the Pindáris, by whom the region had previously been harried. In the same year Ajmere was ceded to the British, who two years later conquered the dist. of Merwárá to the SW. The name Rájputána is due to the fact that in this region most of the pure Rájput clans, or members of the great warrior caste of old Aryans, have maintained, with varying fortunes, a certain measure of independence under their own rulers. As regards surface features, climate, and productions, Rájputána is divided into two well-marked sections by the Aráwalli Mts., which stretch from NE. to SW. through the whole terr. To the W. of these mountains is a region of low sandhills, in which the rainfall is extremely scanty [**Bikáner**], in which there is only one permanent river, the Lúni or Loni, in which the underground water is for the most part too deep to be used for irrigation, and, where it can be so used, is in many places not constant, so that the agricultural villages have to shift from spot to spot when the water fails. This is especially the character of the more westerly part of this section, in the states of Bikáner, Jaisalmer, and the Mallání dist. of Jodhpur, in all of which there are large tracts of absolute desert. In Jodhpur proper or Márwár, though it also belongs to this section, there are greater facilities for regular irrigation. In many places this is accomplished simply by embanking the field so as to enclose the rain that falls in the rainy season, and thus cause it to saturate the ground before the crops are sown. To the E. of the Aráwalli Mts. the surface is mostly composed of tablelands, in the NE. of plains, on all of which there is a more abundant, but yet somewhat precarious, rainfall [**Jaipur, Ajmere**], along with a much better soil and ampler opportunities for irrigation, which is effected mainly by means of innumerable small tanks. Some parts of this region have that black soil which is so widespread in the tableland of India, and which is so valuable in an arid climate on account of its remarkable tenacity of moisture. In the S., in Udaipur, a rugged, jungle-clad district, known as the hill tracts of Mewár, a district inhabited by the aboriginal tribe of the Bhíls, connects the southern end of the Aráwalli Mts. with the Vindhyan Range. The principal rivers of the eastern section are the Chambal, which partly flows through it, and in the NE. forms the boundary; the Banas, a l. bk. trib. of the Chambal; and the Mahi, an angle of which cuts off a portion of Rájputána on the S. The chief wealth of the western region consists in herds of sheep, goats, camels, and some hardy breeds of cattle and horses, which graze on the coarse and sparse herbage that appears on the sandhills in the rainy season. Almost the only cultivated crops of this region are the spiked millet (*bájra*) and the *math*, a kind of bean. The eastern section is part of the great cattle-rearing region of India, and has a much greater variety of crops. The most important mineral product of the whole of Rájputána is salt, which is obtained from Lake Sámbhar (to the N. of Ajmere) and the pits of Pachpadra, on the western frontier of Jodhpur. Rájputána is traversed by two main lines of the Rájputána-Malwa Rly. (metre-gauge), which has branches to both the places of salt production just mentioned. Hindí dialects are spoken throughout the region.

Rájsháhi, div., Bengal (*q.v.*).

Rakaanga, or **Rakahanga,** native name of **Rierson Island,** Pacific, in the Manahiki (*q.v.*) group, in about 10° S., 160¾° W.

Rakabdev, vil., India, Rájputána, state and 45 m. S. Udaipur; has famous Jain temples, resort for pilgrims from Gujarát.

Rakaia, post-tn., New Zealand, South I., Ashburton co., 35 m. WSW. Christchurch, on the rly. to Christchurch. P. <1500.

Rangitata, post-tn., New Zealand, South I., Geraldine co., 75 m. by road and rail from Christchurch, and 25 m. from Timaru. P. <1500.

Rangitikei, co., New Zealand, North I., on the SW. ct., crossed by 40° 0′ S., 175° 30′ E., bounded on the E. by Rangitikei R.

Rangitoto (Maori, 'bloody heaven'), isl., New Zealand, off the NE. ct. of North I., in the Gulf of Hauraki, opposite Auckland.

Rang-kul, two salt lakes of central Asia, Pamir, 50 m. SE. Kara-kul Lake, in 38⅓° 0′ N., 74° 10′–20′ E., the eastern (smaller) distinguished as Shor-kul. Both apparently shallow, greatest ascertained depth of Rang-kul 50 ft. Alt. (by Russian map) 12,250 ft.; (according to Sven Hedin, *bp.*) 12,730 ft. Salt extracted from beds to the E.

Rangoon, tn., port, and cantonment, Burma, dist. Hantha wadi, on the Rangoon, 44 m. SSW. Pegu, and on railway to Pegu and Mandalay. The chief port of Burma and the cap. of the prov., it stands on the Rangoon R., or Hlaing, an arm of the Iráwadi delta, but one which is not navigable directly to the Iráwadi itself, although in the rains there is a navigable connection with that river. Depth of water available for vessels entering port at spring tides, 29–30 ft., at neap tides 21 ft.; depth in port at ordinary spring tides, 30 ft. Two-thirds in value of the exports of Burma are shipped, and all but a small fraction of the imports are received at this port, which ranks third among the seaports of British India. According to Taiaing tradition, the first village was founded about 585 B.C. It was occupied by the Burmese in 1413, and until 1790 was the scene of incessant struggles between the Burmese and Peguans. About this time the English established a factory, and a British Resident was appointed in 1798; captured by the British in 1852.

The military cantonment is to the N.; within its limits stands the Shwe-Dagon pagoda, the most celebrated object of worship in all Indo-Chinese countries, as enshrining several hairs of Gautama Buddha. Manufactures salt, pottery, *nga-pi* or fish-paste, mats, silk and cotton cloth. Alt. 41 ft. Mean temp., yr. 79° F., Jan. 75°, April 84°; rfall., yr. 99 in., May–Oct. 93.3 in., June–Sept. 74.3 in. Tn. P. 158,000; (including suburbs, 180,300); Buddhists, 73,400; Hindus, 48,500; cantonment, 14,600; Buddhists, 4100; Hindus, 6400; port, 7700; Buddhists, 2300; Hindus, 3000.

Rangoon River, name usually given to lower portion of Hlaing R. (*q.v.*), Lower Burma.

Rangpur, ruins, Brit. India, Assam, dist. and about 5 m. SSW. Sibságar, 40 m. SSW. Dibrugarh; residence of the Áham kings during the 17th century.

Ratingen, tn., Prussia, Rhine Prov., circle and 6½ m. NE. by N. Düsseldorf. P. 5500.

Ratisbon, Ger. **Regensburg,** the ancient Gallic *Radaspona*, Roman *Castra Regina*, tn., Ger., kgd. Bavaria, cap. govt. Upper Palatinate, 35 m. NE. by E. Ingolstadt, in a fertile dist. on the right or S. bank of the Danube, near the most northerly point of the great northerly band of that river, opposite the influx of the Regen. The Danube is here crossed by a bridge 1140 ft. long, built in 1135-46. The town has mostly narrow and crooked streets, but with many signs of its former importance (the Gesandtenstrasse, or Ambassador's Street, with numerous coats of arms of former imperial ambassadors, the Wahlenstrasse, or Elector Street, with strong towers of families belonging to the Middle Ages, the residence of the Prince of Thurn and Taxis, the Benedictine abbey, founded in 652, and formerly enjoying princely rights under the old empire). Fine promenades have taken the place of the former fortifications. The town now has a considerable but very varied manufacturing industry. R. was a place of great importance even in Roman times. Its bishopric, which still exists, was founded by Boniface in 739. In the 11th century, and long subsequently, it was the usual residence of the emperors, and numerous imperial assemblies were held here, till at last in 1663 it became the regular place of assembly, which it remained till the extinction of the old empire in 1806. It came into the hands of Bavaria in 1810. Alt. 1178 ft. Mean temp. (15 yrs.), yr. 46.6° F., Jan. 28.1°, July 65.8°. P. (1840) 21,900; (1871) 36,100; (1890) 37,900.

Raveningham, par., Eng., Norfolk, S. div., 11 m. SW. Yarmouth, 3 m. N. by E. Geldeston stn., P.O. P.<500.

Ravenna, city, Italy, formerly cap. of the Romagna, now cap. prov. R., in a marshy plain, on the Montone, 5 m. from its port on the Adriatic, 17 m. NE. Forlì, and 42 m. E. by S. Bologna; seat of an archbishop. The city is surrounded by a wall about 3 m. in circuit, and is rich in antiquities of the Middle Ages, having been the residence of the Emperors of the West from the time of Honorius (402), and the cap. of Italy under Odoacer, Theodoric, and the succeeding Gothic kings, the Byzantine monarchs, the Lombards, and the Greek exarchs. Its ancient monuments are nearly all Christian. The cathedral, founded in the 4th century, has fine pictures by Guido, and remarkable antiquities; the magnificent church of San Vitale; the baptistery; the mausoleum of Placidia, containing the tombs of that empress, of Honorius, and Valentinian III., all richly ornamented with mosaics; and the church of St. Apollinare. The other objects of interest are the remains of the palace and tomb of Theodoric, Byron's house, and the tomb of Dante, who died at R. in 1321. A pillar outside of the city commemorates the death of Gaston de Foix, and the victory of Louis XII. of France and the Duke of Ferrara over Pope Julius II. and the Spaniards, in 1512. R. has manufactures of silks, and a trade in wine and agricultural produce, facilitated by a canal (7 m.) connecting its port with the Adriatic. Along the coast of that sea extends for 25 m. a fine forest (the *Pineta*), which supplied timber for shipbuilding in the time of the Romans, under whom R. was the chief port of the empire on the Adriatic. P. 12,000.

Ravenna, vil., U.S., Ohio, Portage co., 35 m. SE. Cleveland. Alt. 1103 ft. (R.R.). P.<4000.

Razzoli, Isole del, group of islets, Italy, off the NE. ct. of Sardinia, in 41° 18′ N., 9° 20′ E.

Rbat, tn., Morocco. See **Rabat.**

Ré, Île de, fortified isl., 2 m. from the W. ct. of France, dep. Charente-Inférieure, in lat. of arr. and 6 m. W. La Rochelle, separated on N. from the dep. Vendée by the strait called Pertuis Bréton (6 to 10 m.), and on S. from the Île d'Oléron by that of Pertuis d'Antioche (8 m.). It has valuable salt-works, and excellent vines, figs, pears, and other fruits. The Île de Ré forms two cantons of the arr. Rochelle, of which the chief towns are Ars and St. Martin. It has extensive oyster-beds. Length, 16 m.; breadth, 3 m. P. (1891) 12,500.

Rea, Lough, lake, Ire., in the SE. of co. Galway, with the town Loughrea at its N. end, 270 ft. above sea-level.

Reaburn, settlement, Canada, prov. Manitoba, on the C. P. R., 35 m. by rail W. Winnipeg.

Reach, vil., Eng., Bedfordshire. See **Heath.**

Read, par., Eng., Lancashire, Burnley dist., 2 m. E. Whalley, PM.O. P. <1500.

Readfield, tn., U.S., Maine, Kennebec co., 10 m. W. by N. Augusta. P. <1500.

Reading (rĕd'ing), parl., mun. (since Henry III.), and co. bor., market-tn., and cap. co., Eng., Berkshire, 39 m. by road (36 m. by the G. W. R.) W. London, in the diocese of Oxford, on the Kennet, at its confluence (r. bk.) with the Thames. Besides the G. W. R., the L. & SW. R. and the SE. R. have stations here. There was an abbey here in 1121, afterwards a royal residence, now an interesting ruin, surrounded by public gardens. The recent growth of the town is largely due to the biscuit manufactory (Huntley and Palmer), now employing over 4000, and to Sutton's seed establishment, the buildings of which occupy a portion of the site of the former abbey. There is also a large tin-box factory, besides other industries. The town is well laid out, and has some fine buildings, especially the town hall block, with an excellent public library and museum, the latter containing the most valuable collection of Romano-British remains in England, excavated at Silchester by the Society of Antiquaries, and lent to the town by the Duke of Wellington. The University Extension College (opened Sept. 1892) occupies what was once an old hospitium, has now seven departments, that of agriculture being especially prosperous. Suttons' Abbey Hall, erected by Messrs. Suttons, is for the free use of the people in all kinds of public meetings. The Palmer Park is a valuable recreation ground. Reading returns one member to Parliament, and from the time of Charles I. to 1885 returned two members. Five fairs held. Market-days, M. and S. Alt. 155 ft. Mean rfall. (1866–80), yr. 26.73 in. Mun. bor. P. (1801) 9700; (1851) 21,500; (1871) 32,300; (1891) 55,800.

Reading, tn., U.S., Massachusetts, Middlesex co., 13 m. N. by W. Boston. P. <5000.

Reading, vil., U.S., Michigan, Hillsdale co., 92 m. WSW. Detroit. P. <1500.

Reading, vil., U.S., Ohio, Hamilton co., 12 m. NNE. Cincinnati. P. <3000.

Reading, city, U.S., Pennsylvania, Berks co., on Schuylkill R., 52 m. E. by N. Harrisburg, at intersection of several railways; situated on rising ground, backed E. by Penns Mts., and S. by Neversink Mts.; has a great variety of manufactures, including iron-works of various kinds, cotton, stocking, silk, woollen, and paper-mills, hat factories, spectacle works, &c. The principal repair shops of the Reading Rly. are situated here, and employ a great number of hands. Alt. 268 ft. (R.R.). P. (1870) 33,900; (1880) 43,300; (1890) 58,700.

Reading, North, vil., U.S., Massachusetts, Middlesex co., on Ipswich R., 11 m. NW. Salem. P. <1500.

Reading Street, P.O., Eng., Kent, Ashford div., 6 m. N. Rye, 3 m. W. by N. Appledore stn.

Readypenny, P.O., Ire., NE. co. and bar. Louth, 5½ m. SSW. Dundalk.

Redriff, Eng., Surrey. See **Rotherhithe.**

Red River, Asia. See **Songkoi.**

Red River, par., U.S., Louisiana, in the NW., crossed by 32° N., W. of 93° W.

Red River, or **Rio Roxo,** riv., U.S., formed on the N. frontier of Texas by the union of several headstreams, the principal known as the Prairie Dog, the Salt, and the N. Fork of the Red R. The Prairie Dog Fork forms part of the frontier of Texas and Oklahoma, and receives the N. Fork in about 99° 12′ W., below which point it flows at first E., forming the limit between Texas and the Oklahoma and Indian territories, then SE. through Arkansas and Louisiana, and joins the Mississippi, 341 m. above its mouth, 128 m. NW. New Orleans. In its lower course the river flows through rich and densely wooded alluvial bottoms, where constant changes in the channel render navigation difficult. In this section it is subject to destructive inundations, which often leave a deposit of white sand, rendering the soil barren. Its flood depth varies from 6 or 8 ft. even in the desert, and 50 ft. in the fertile region. Steamers drawing 4 ft. can usually ascend to Shreveport (La.), 330 m. above its mouth. An immense raft of trees and driftwood, extending about 35 m. long, obstructed navigation above Shreveport, but in 1873 a navigable channel was opened through it. Red R. is named from its colour, due to the red clay formation traversed in its upper course. Chief l. bk. trib. is the Washita (Ouachita), in Louisiana. In Louisiana, Red R. forms numerous bayous and lakes. Total course estimated at 1200 m.; area of basin, 97,000 sq. m.

Red River, co., U.S., Texas, in the NE., on the Red R. (N. frontier), crossed in the W. by 95° W.

Red River of the North, rises in Elbow Lake, U.S., Minnesota, alt. 1680 ft., and flows S. about 100 m. to Otter Tail Lake, then W. 100 m. to Breckinridge, Wilkin co., and N. for about 550 m., separating Dakota from Minnesota, crosses the U.S. boundary, traverses Manitoba, and flows into Lake Winnipeg. The portion between Breckinridge and Otter Tail Lake is also called Otter Tail R., the term Red R. being sometimes restricted to the portion below Breckinridge. Fort Abercrombie, 26 m. below Breckinridge, is practically the head of navigation. Length about 750 m. See **Agassiz, Lake.**

Red River Settlement, a colony established by the Earl of Selkirk in 1813 on the Red River of the North, on the site of what is now Winnipeg; transferred to Canada in 1869.

Red Rock, stn., Eng., near Wigan, Lancashire, on L. & NW. R.

Red Row, vil., Scot., Lanarkshire, part of Dunlop Place (*q.v.*).

Redruth, par. and market-tn., Eng., Cornwall, Camborne div., 8 m. W. by S. Truro, on the G. W. R.; rich tin-mines in the vicinity, and tin smelted in the town. Near the town is Carn Brea (*q.v.*). Market-days, Tu. and F. 4006 ac. P. 10,300. **Redruth Highway,** P.O., adjoining Redruth.

Redruth, post-tn., S. Australia, Burra co., 105 m. SE. Port Augusta; the celebrated Burra Burra mine is ½ m. SW. of the town. P. <1500.

Redruth, vil., Victoria, 12 m. NW. Hamilton, on the Wannon R. P. <1500.

Red Scar Bay, on the S. ct. Brit. New Guinea, in 146¾° E.

Red Screes, mt., Eng., Westmorland, in the W. of the Appleby div., 4 m. N. of the head of Windermere. Height, 2541 ft.

Red Sea, or **Arabian Gulf** (the ancient Greek *Erythraia Thalassa,* Latin *Mare Rubrum*), inland sea between Africa and Asia (Arabia), 12° 40′–30° 0′ N., 32° 30′–43° 30′ E. Length, NW. to SE., 1450 m.; breadth varies from 16 to nearly 200 m. At its S. end it communicates with the Indian Ocean by the Strait Bab-el-Mandeb. In the N. it bifurcates into the Gulfs of Suez and Akaba, which enclose the penin. of Sinai. S. of 20° N. the greater part of the Red Sea is under 100 fathoms in depth, but N. of that line there is in most parts a depth exceeding 400 fathoms. The greatest depth yet sounded is 1242 fathoms, in 20° 5′ N., 38° 30′ E. (See chart showing contours of depth in *Petermann's Mitteil.*, 1888, pl. 16.) The salinity of the Red Sea is higher than in any other body of water in communication with the ocean, attaining a maximum of 4.3067 per cent. of saline matter; and, like all other enclosed seas with high salinity, it has at its mouth an inflowing surface current of water of a less degree of saltness, balanced by a deeper outflow current. Since the opening of the Suez Canal (1869), an interesting migration of vegetable and animal forms has taken place between the Red Sea and the Mediterranean. Among the members of the Red Sea fauna that have reached the Mediterranean are the *Mactra olorina, Cerithium scabridum,* and *Mytilus variabilis* (this last found at Port Said as early as 1876), and among the Mediterranean forms now occurring in the Red Sea are the common sole, the *Umbrina cirrhosa* and the *Labrax lupus,* the two latter now very abundant at Suez. It abounds with islands and coral reefs, and is supposed to have derived its name from the red coral and pink-coloured fuci which it yields; or from the ancient *Idumæa,* 'Sea of Edom' or 'Red Sea;' or from the blood-red colour frequently imparted to it by swarms of small animals. The country almost everywhere around it is mountainous. The SE. monsoon blows constantly for eight months of the year, and during the remainder the NW. monsoon. From October to May, when S. winds prevail, the water rises in the N. part of the sea, which then attains an elevation much higher than the Mediterranean, but from careful levellings it has been ascertained that the low-water level of the Red Sea and Mediterranean are identical. The navigation is difficult, owing to the sudden changes of wind and heavy gales. Principal ports are Mokha, Hodaida, Lohaia, Jedda, and Yambo on the Arabian side; and Suez, Kosseir, Sawákin (Suákin), and Massaua (Massowah) on the African coast. The Jews and Phœnicians appear to have carried on an extensive trade upon this sea; and after the destruction of the Persian empire it resumed importance as the principal route of the traffic between Europe and the East, which distinction it retained until the discovery of the passage round the Cape of Good Hope; and latterly, since the opening of the Suez Canal, it has resumed its ancient importance as a traffic route. See **Aden, Bab-el-Mandeb.**

Red Sulphur Springs, vil., U.S., W. Virginia, Monroe co., 38 m. SW. White Sulphur Springs; is a fashionable watering-place. P. <1500.

Reichenburg, vil., Switzd., cant. Schwiz, 10 m. NNW. Glarus. P. <2000.

Reichenhall, tn., Ger., in the SE. of Bavaria, govt. Upper Bavaria, 9½ m. SW. by W. Salzburg. R. has the most important salt-mines of Bavaria. The saline and ferruginous springs of Achselmannstein are much frequented, and have been famous since the 8th century. P. <4000.

Reichenow, vil., Prussia, prov. Brandenburg, circle Oberbarnim, dist. Wriezen; lignite-mines near. P. <2000.

Reichenstein, tn., Prussia, prov. Silesia, circle Frankenstein, on the border of Austrian Silesia, 46 m. S. by W. Breslau; arsenic mined. P. <3000.

Reichensteiner Gebirge, ramification of the Sudetes Mts., between Prussian and Austrian Silesia, trending NW. 24 m. Highest points the Heidelberg, alt. 2865 ft.; the Jauersberg, alt. 2860 ft.

Reichshofen, tn., Ger., Alsace-Lorraine, circle Hagenau, on the Zinzel R., 3 m. W. by S. Wörth. P. <4000.

Reichstadt, tn., Austria, Bohemia, 19 m. WSW. Reichenberg, circle and 4½ m. E. Böhmisch-Leipa. P. <2000.

Reichwaldau, tn., Austria, Silesia, circle Freistadt, dist. Oderberg. P. <4000.

Reid, isl., Pacific. See **Tuinake.**

Reida, tn., in the S. of Arabia, 195 m. NE. Aden.

Reid Reef, Pacific, in Lau or E. group, Fiji Is., in 17° 55′ S., 178° 20′ W.

Reid River, stn., Queensland. See **Reidsville.**

Reid's Creek, gold-mining locality, Queensland, Bowen co., 70 m. W. by N. Maryborough, in 25° 40′ S., 151° 40′ E. P. <1500.

Reid's Creek, mining-tn., Victoria, Bogong co., 133 m. ENE. Sandhurst, in 36° 20′ S., 146° 41′ E.; has gold and tin mines. P. <1500.

Reid's Mistake, inlet of the sea, New South Wales, about 10 m. S. Newcastle; connects Lake Macquarie with the Pacific.

Reidsville, or **Reid River,** stn., Queensland, on the Northern Rly., 35 m. S. Townsville, on Reid R. P. <1500.

Reidsville, tn., U.S., N. Carolina, Rockingham co., 70 m. NW. by W. Raleigh. P. <3000.

Reidtown, S. Australia. See **Point McLeay.**

Reigate (formerly spelt **Riegate** or **Rhigate,** also **Reygate,** probably = 'ridge-gate,' the place being situated near a 'gate' or opening in the ridge of the N. Downs, the gate now used by the railway at Redhill, E. of the town, but included in the par. and mun. bor. of R.; the *Cherchfelde* of Doomsday Book), mun. bor. (since 1863), par., and market-tn., Eng., Surrey, R. div., 19 m. SSW. London, with diocese of Winchester, on SE. R. (**R. Town**); has some trade in white (silver) sand, fullers' earth, freestone, and hearthstones, all obtained in the neighbourhood. The site of the old castle is marked by a large cave which the barons are said to have used as a meeting-place and guard-room. R. returned two M.P.'s till 1832, then one till 1867, when it was disfranchised. There is a fair on Whit Tuesday, and another, 9th December. Market-days, Tu. and each alternate W. P. (1801) <1000; (1871) 15,900; (1891) 22,600; pars., **R. Borough,** P. <250; **R. Foreign,** 5966 ac., P. 22,600; parl div. P. 64,500; eccles. par. (**R. with Nutley Lane**) P. <4500.

Reighton (ri′tŏn), par., Eng., Yorkshire, E. Riding, Buckrose div., 10 m. SE. by S. Scarborough, 1½ m. NW. Speeton stn. P. <500.

Reikjavik, or **Reykjavik,** tn., cap. Iceland, 73 m. WNW. Mount Hekla, at the SE. corner of Faxa Fjord; has 40 ft. of water in port at ordinary spring tides high water, 24 ft. at low water. Has a very small cathedral, a house of parliament, which is also used as a museum and library, a college, and governor's palace, and a statue of Thorvaldsen, who was an Icelander. Mean temp., yr. 39.7° F., Jan. 29.3°, July 53.5°; rfall. (7 yrs.), 28.94 in. P. about 3000.

Reilingen, comm., Ger., gd.-duchy of Baden, circle Mannheim, dist. and 6 m. S. Schwetzingen. P. <3000.

Reims, or **Rheims,** the ancient *Durocortorum*, city, France, cap. arr., dep. Marne, 15 m. N. by E. Épernay, 26 m. NW. by N. Châlons-sur-Marne, on the Vesle and the Aisne and Marne Canal. The seat of an archbishopric, R. is ornamented with fountains, and has a cathedral, church of St. Remi, a handsome hôtel-de-ville begun in 1627, an important museum of antiquities, and a library with 80,000 volumes and 1500 MSS., and the old gate of Mars, closed since 1545. On the Montagne de R., alt. 914 ft., S. of the city, are several Gallo-Roman remains. The town has statues of Louis XV., Colbert, and Marshal Drouet d'Erlon. Manufactures of cloth, cashmeres, flannels, merinoes, ironmongery, soap, oil, glass, and trade in the wine of its vicinity. It is the birthplace of Colbert, Gobelin, and Linguet. Clovis was baptized at R. in 496, after the battle of Tolbiac. Philip Augustus was consecrated here in 1179, and all his successors were also consecrated at R., till the revolution of 1830, with the exception of Henry IV. and Louis XVIII. Before the Revolution it had a university, and many councils have been held here. P. 104,200.

Reimûn, vil., Palestine, *Ramoth Gilead* in the O. T., 32° 16′ N., 35° 50′ E., 33 m. N. by E. of the ancient Heshbon.

Reinach, vil., Switzd., cant. and 4 m. S. Basel. P. <2000.

Reinbeck, vil., Prussia, prov. Schleswig-Holstein, 10 m. E. by S. Hamburg; has a hydropathic establishment, and is a country resort for the people of Hamburg. P. <2000.

Renela, or **Megale-Delos,** isl. See **Dēlos.**

Reneurling Hill, or **Cronk Urleigh,** hill, Eng., Isle of Man, 1 m. S. Kirkmichael; was the ancient Tynwald Hill.

Renfrew, vil., Canada, Nova Scotia, Hants co., 25 m. N. by W. Halifax. P.<1500.

Renfrew, vil., Canada, Ontario, R. co., on the riv. Bonnechère, 46 m. W. Ottawa, a railway junction. P.<3000.

Renfrew, royal and parl. burgh, par., and tn., Scot., W. Renfrewshire, on the l. bk. of the Clyde, and with a stn. (**Fulbar Street**) on the G. & SW. R., 2½ m. NE. by N. Paisley. R. was connected with the Clyde by a canal in 1786; has a commodious quay (16 ft. deep alongside at high water spring tides) on the river, opposite the town. Shipbuilding is the principal industry. Royal burgh, P. 6300; par. 4311 ac., P. 9300; parl. burgh and tn. P. 6800. See **Kilmarnock.**

Renfrewshire, maritime co., Scot., having Firth of Clyde on N. (excepting a part of Renfrew par., which lies on the N. side of the Clyde), and consisting mainly of three valleys, which are drained by the Gryfe, the Black Cart, and the White Cart, all tribs. of the riv. Clyde. On the Ayrshire border the surface rises to 1711 ft. at the Hill of Stake. The 'Upper Ward' of the county has Paisley as its district centre, and the 'Lower Ward,' Greenock; part of the S. suburbs of Glasgow in this county was, in 1892, transferred to Lanarkshire by the Boundary Commissioners for all purposes except parliamentary representation. This county was long associated with the Scottish royal family, since David I. bestowed 'Strathgryfe' upon the first high steward, founder of the Stuarts; in 1404 Robert III. made Renfrew a separate county, and created his eldest son Baron of Renfrew, a title still held by the heir to the throne. Geologically, the floor is Carboniferous, with various sandstones, cement-stones, basalts, &c.; to N. of Johnstone and NW. of Paisley oil-producing shales are extensively worked, and in the extreme NE. of the county the coal-measures intrude from the Lanarkshire and Stirling coalfield. Coal is worked near Paisley, Johnstone, and Pollokshaws; and ironstone at Hurlet and Annesland. W. Renfrewshire is one of the wettest dists. in Scotland. For agricultural statistics, see **Appendix,** pp. 10–12. See manufactures under **Paisley, Greenock.** The chief ports are Greenock and Port-Glasgow. For parliamentary purposes the county is divided into two divs., the eastern (P. 66,137) and the western (P. 56,622), which together with the parl. burghs of Renfrew, Paisley, Greenock, Port-Glasgow, and part of Glasgow make up the whole county. Area, 156,785 ac. P. (1891) 290,800. See **Scotland,** table.

Rengersdorf, vil., Prussia, prov. Silesia, circle and 4 m. S. Glatz; has a cotton factory and whetstone quarry. P.<3000.

Rengo, tn., Chile, Colchagua, 65 m. S. by W. Santiago. P. 5600.

Reni, tn., Russia, prov. Bessarabia, on l. bk. Danube, near its junction with Pruth, 140 m. SW. Odessa, connected by railway (178 m.) with Bendery. P. 6100.

Renishaw, stn., Eng., Derbyshire, NE. div., 6 m. NE. by E. Chesterfield, on the Chesterfield Canal, with a stn. (**Eckington** (*q.v.*) **and R.**) on the M. R. and M. S. & L. R., PM.T.O.

Renkum, comm., Netherlands, prov. Guelderland, arr. and 8½ m. W. Arnhem, on the Neder Rijn. P. 7100.

Renlaigne, hamlet, France, dep. Puy-de-Dôme, arr. and 11 m. W. Issoire; cold ferruginous springs. P.<2000.

Renmark, post-tn., S. Australia, Hamley co., 132 m. ENE. Adelaide; an irrigation colony. P.<1500.

Rennel, isl., off the coast of Chile, crossed by 52° S., 74° W.

Rennell, current, Atlantic Ocean, a branch of the Gulf Stream, from which it separates in about 45° N. It washes the shores of the N. ct. of Spain and the W. ct. of France.

Rennell, two isls. of the Solomon Archipelago, Melanesia. Joint area, 300 sq. m.

Rennes, the ancient *Condate,* tn., cap. dep. Ille-et-Vilaine, France, cap. arr. R., on the Vilaine, 43 m. W. Laval; manufactures hosiery, sailcloth, crockery, leather, and agricultural implements. Has a university academy, museum, and library with 50,000 vols. The 12th century cathedral was entirely destroyed, 1756. Besieged by the English in 1356; the siege was raised by Du Guesclin. The bishopric of R., founded at the end of the 4th century, was made an archbishopric in 1859. Mean temp. (15 yrs.), yr. 52.7° F., Jan. 40.5°, July 66.2°. P. 69,200.

Rennes-les-Bains, vil., France, dep. Aude, arr. Limoux, 10 m. S. Carcassonne; the five cold springs (ferruginous and saline) were known in the 13th century as Bains de Montferrand, and retained that name to the 17th century. Alt. 1045 ft. P.<2000.

Rennesö, isls., Norway, W. ct., in Bukke, or Bukn, Fjord, 7 m. N. Stavanger.

Rennie, stn., Canada, prov. Manitoba, on the C. P. R., 1343 m. by rail W. Montreal, 81 m. E. Winnipeg.

Renningen, vil., Ger., Würtemberg, circle Neckar, 5 m. WSW. Leonberg. P.<3000.

Rennington, par., Eng., Northumberland, Berwick-upon-Tweed div., 4 m. NNE. Alnwick, 1 m. NW. Little Mill stn. P.<500; eccles. par. (**R. with Rock**) P.<500.

Reno, riv., Italy, rises in the Etruscan Apennines, and flows NNE., ESE., and E. to the Adriatic Sea, which it enters about 13 m. NNE. Ravenna. It communicates with the Po by means of the Po di Primaro. Length, 137 m.; area of basin, 1810 sq. m.; discharge, mean 3400 cubic ft. per second, high 41,000 cubic ft. per second.

Reno, co., U.S., Kansas, in the S., crossed by 38° N., 98° W.

Reno, city, U.S., Nevada, Washoe co., 25 m. N. Carson City; centre of mining and manufactures. Alt. 4497 ft. (R.R.). P.<4000.

Reno, vil., U.S., Pennsylvania, Venango co., on Allegheny R., 51 m. SSE. Erie, 4 m. WSW. Oil City. P.<1500.

Reno, Fort, U.S. garrison, Oklahoma, near the Cheyenne Indian reservation.

Renovo, thriving bor., U.S., Pennsylvania, Clinton co., on Susquehanna R., 110 m. W. Scranton, 20 m. NW. Lock Haven; is a summer resort. P.<5000.

Renowes Harbour, tn. and port of entry, Newfoundland, on the E. ct., in 46° 53′ N., 54 m. S. St. John's. P.<1500.

Rensselaer, tn., U.S., Indiana, cap. Jasper co., close to Iroquois R., 63 m. SSE. Chicago (Ill.). P.<1500.

Rensselaer, co., U.S., New York, between the Hudson R. and the E. frontier, S. of 43° N.

Rensselaer Bay, Greenland. See **Unartok.**

Renteria, tn., Spain, Basque Provs., Guipúzcoa, dist. and 4½ m. ESE. San Sebastian, 7½ m. from the French frontier. P.<4000.

Renton, vil., Canada, Ontario, Norfolk co., 34½ m. SW. by S. Hamilton. P.<1500.

Renton, tn., Scot., Dumbartonshire, on the riv. Leven and N. B. R., 2 m. NNW. Dumbarton. The population is actively engaged in calico and bleaching establishments. Smollett was born here in 1721. P. 5300.

Renton, coal-mining vil., U.S., Washington, King co., 45 m. NE. Olympia. P.<1500.

Renty, vil., France, dep. Pas-de-Calais, arr. and 15 m. SW. St. Omer; scene of the victory of Henry II. over the Emperor Charles V., 1554. P.<2000.

Renville, co., U.S., Minnesota, N. of 44° N., and crossed by 95° W., bounded on the S. by the Minnesota R.

Renville, co., U.S., N. Dakota, on the N. frontier, between 101° and 102° W.

Renvyle, P.O., Ire., 4 m. from Letterfrack (co. Galway), 45 m. from Galway stn.

Renvyle (or **Rinvyle**) **Point,** cape, Ire., on NW. ct. of co. Galway, opposite Inishbofin I.

Renwez, tn., France, dep. Ardennes, arr. Mézières, 7 m. SE. by S. Rocroi. P.<2000.

Renwick, par., Eng., Cumberland, div. and 9½ m. NE. by N. Penrith, 4 m. NE. by E. Lazonby stn.; 4299 ac. P.<250.

Renwick, post-tn., New Zealand, South I., Marlborough co., 7 m. W. Blenheim. P.<1500.

Reocin, tn., Spain, Old Castille, prov. and 15½ m. SW. Santander. P.<3000.

Réole, La, tn., France, dep. Gironde, on the r. bk. of the Garonne; cap. arr. La R., 31 m. SE. by E. Bordeaux. P.<4000.

Reoti, tn., Brit. India, Oudh, dist. Ballia, 60 m. WNW. Patna. P. 8500; Hindus, 7600; Moham. 900.

Reotipur, tn., Brit. India, NW. Provs., dist. Gházipur, 45 m. ENE. Benares. R. is a purely agricultural village. P. 11,000; Hindus, 10,400.

Repcze, riv., Hungary. See **Rabnitz.**

Repelen, vil., Prussia, Rhine Prov., circle Mörs, 18 m. W. by N. Essen. P. (comm.)<3000.

Repentie, La, small port, France, dep. Charente-Inférieure, 4 m. WNW. La Rochelle, is a point of departure for the isl. of Ré.

Repentigny, vil., Canada, Quebec, L'Assomption co., 17 m. NE. Montreal. P.<1500.

Reppen, tn., Prussia, prov. Brandenburg, circle Weststernberg, 13 m. E. Frankfurt-on-Oder. P.<5000.

Repps with Bastwick, par., Eng., Norfolk, E. div., 9 m. NW. Yarmouth, 1½ m. S. Potter Heigham stn., P.O. (**Northrepps**), and PM.O. (**Southrepps**). P.<500.

Reps (German, in Hungarian **Kőhalom**), comm., Hungary, co. Nagy Küküllö, 32 m. NW. by N. Kronstadt; health resort. P.<3000.

Repten, vil., Prussia, prov. Silesia, circle and 2½ m. SW. Tarnowitz; iron and calamine ore mined here. P. <2000.

Repton, par. and vil., Eng., Derbyshire, S. div., on the r. bk. of the Trent, 4 m. NE. by E. Burton, with a stn. (**R. and Willington**) on the M. R. and L. & NW. R.; has a grammar-school, founded 1556. PMT.O. 4042 ac. P. <2000.

Republic, co., U.S., Kansas, on the N. frontier, E. of 98° W.

Republic, vil., U.S., Michigan, on Michigamie R., co. and 35 m. by rail SW. Marquette. P. <1500.

Republic, vil., U.S., Ohio, Seneca co., 45 m. SE. by S. Toledo. P. <1500.

Republican, riv., U.S., rises by several branches in the E. of Colorado, flows NW. through Kansas into Nebraska, re-enters Kansas in NW. of Republic co., and flows SE. to the Kansas R. near Junction City, Clay co. Length about 500 m.

Requeña, comm., Spain, prov. and 37 m. W. Valencia; manufactures taffetas and velvets; 6 m. to the S. are saline mineral springs. P. 14,500.

Rerrick, or **Rerwick,** par., Scot., Kirkcudbrightshire, 5½ m. ESE. Kirkcudbright; 19,980 ac. P. <2000.

Resaaba, walled tn., Arabia, Yemen, SW. of Sana.

Reschenscheideck Pass. See **Alps,** PASSES, **IV.** (1).

Reschitza, tn., Hungary. See **Resicza.**

Rescobie, par., Scot., Forfarshire, on the N. shore of R. Loch, 3½ m. E. by N. Forfar; 6559 ac. P. <750.

Resen, tn., Bulgaria, prov. Trnova. P. <3000.

Resen, tn., Turkey. See **Rezen.**

Reshiat, tn., E. Africa, N. shore Lake Rudolf.

Resht, or **Rasht,** tn., Persia, Gilan, 76 m. N. by W. Kazvin, 14 m. SE. of its port of Enzelli on the Caspian Sea. The town is situated in an unhealthy morass; the houses have tiled roofs, and there are numerous gardens. R. is the market for raw silk and cocoons. The port is 20 m. NW. the town before the bar at Enzelli. Imported goods, consisting chiefly of sugar, textiles, crockery, and naphtha, from Baku, and manufactured articles, nearly all of Russian origin, are brought by boat. Annual value, ¼ to ½ million sterling. The exports to Russia consist principally of rice, textiles, fruits, tobacco, cotton, wood, and dyes, and valued at approximately ½ million sterling. In addition there is a transit trade between R. and the interior of Persia exceeding ¾ million annually, in which Russia shares to the extent of about ½ million sterling. Estimated by Fraser in 1822 to have a population of 60–80,000, but almost depopulated by the Plague in 1830–31. P. now estimated at 25–30,000 (Curzon).

Resicza (in Ger. spelling **Reschitza**), in full **Resiczabanya,** tn. with magistracy, Hungary, co. Krassó-Szöreny, 45 m. SE. Temesvár; coal mined. P. 10,200.

Resina (ancient *Retina*, port of Herculaneum), tn., Italy, Campania, prov. and 4½ m. SE. Naples, at the W. foot of Vesuvius, on the Bay of Naples; the Lachryma Christi wine is made here. Tn. P. 12,000.

Resinár, or **Städterdorf,** comm., Hungary, co. Szeben, 10 m. SSW. Hermannstadt; seat of a bishop. P. 5200.

Resistencia, colony, Argentine Republic, terr. of the Chaco, near the r. bk. of the riv. Paraná, 20 m. W. Corrientes. P. 3000.

Resolis, or **Kirkmichael,** par., Scot., Cromartyshire, 7 m. W. by S. Cromarty, and 2½ m. SW. by S. Invergordon stn.; 12,449 ac. P. <1500.

Resolution, isl., Arctic Ocean, off the SE. point of Baffin's Land, bounds Hudson's Bay on the N. Area, 975 sq. m.

Resolution, isl., Pacific. See **Tawere.**

Resolven, par., Wales, Glamorganshire, Mid div., 6 m. NE. by E. Neath, on the G. W. R.; coal mined. PMT.O. 4671 ac. P. <2000.

Respenda de la Peña, comm., Spain, Old Castille, prov. and 53 m. NNW. Palencia. P. <4000.

Ressaix, comm., Belgium, prov. Hainaut, arr. Thuin, 11 m. W. by N. Charleroi. P. <2000.

Ressontois, dist., France, in the old prov. Picardy, now included in dep. Oise.

Restalrig (res'al-rig), decayed vil., Scot., Midlothian, 1½ m. ENE. Edinburgh, on the N. of Piershill stn.

Restauracion, vil., Argentine Republic. See **Paso de los Libres.**

Restelitsa, tn., Turkey in Europe, Macedonia, vilayet Monastir, 23 m. SSW. Prizren. P. 3000.

Restigouche, riv., Canada, New Brunswick, in the NW., flows NE. then N. to the frontier of Quebec, then E. along the frontier into the head of Chaleur Bay.

Restigouche, co., Canada, in the NW. of New Brunswick.

Reston, vil., Scot., Berwickshire, on Eye Water, 5 m. SSW. St. Abb's Head, with a stn. (**R. Junction**) on the N. B. R. (stn. for Coldingham and St. Abb's), PM.O.

Reston, North and **South,** two adjoining pars., Eng., Lincolnshire, E. Lindsey div., the former 4 m. SE. Louth, 2 m. ESE. Legbourne Road stn. P. (of each) <250.

Restoration Island, Queensland, off the E. ct. of Cape York, inside the Great Barrier Reef.

Resuttano, comm., Sicily, prov. and 13 m. N. Caltanissetta. P. <5000.

Retalhuleu, tn., Central America, state of and 80 m. W. Guatemala, cap. dep. R. P. <5000.

Retford, East, mun. bor. (by prescription), par., and market-tn., Eng., Nottinghamshire, Bassetlaw div., 21 m. NNW. Newark, in the diocese of Southwell, on the Idle, with conjoint stn. (**Retford**) on G. N. R. and M. S. & L. R. Manufactures paper and indiarubber; has iron foundries, and some trade in hops. There is a handsome market-place and town-hall. R. was a parl. bor. till 1885; there are five fairs. Market-days, M. and S. Alt. 50 ft. Mean annual rfall, (1866–80), 23.77 in. Mun. bor. P. 10,600; it includes the civil pars. of East R. P. <3500; West R. P. <1000; Ordsall, P. <4000; and North R. P. <2500.

Rethel, the ancient *Castrum Retertum*, or *Retectum*, comm., France, dep. Ardennes, on the Aisne, cap. arr. and 24 m. NE. Reims. Manufactures merinoes, flannels, and agricultural implements. Here Plessis-Praslin overcame Turenne and the Spanish forces combined against Mazarin, 1650. P. 6700.

Rethra-hythe, Eng., Surrey. See **Redriff.**

Rethymnon, tn., Crete. See **Retimo.**

Reti, vil. with rly. stn., Brit. India, Sind, dist. Shikárpur, 8f m. E. by S. Jacobábád.

Retimo, in Greek **Rethymnon** (rethimno), the ancient *Rhithymna*, seapt., Turkey, on the N. ct. of the isl. of Crete, 38 m. W. Candia, in 24° 29′ E.; the citadel is in ruins, and the port is full of sandbanks. P. 9100 (Cuinet).

Retina, tn., Italy. See **Resina.**

Retiro, vil., Colombia, dep. Antioquia, 12½ m. SSE. Medellin; salt is mined here. P. (with dist.) 5700.

Retournac, tn., France, dep. Haute-Loire, arr. and 6 m. NW. Yssingeaux, on the Loire; basaltic stone is quarried here; mineral spring. P. <2000.

Retournemer, lake, France, dep. Vosges, arr. and 16 m. S. St. Dié; communicates with Lake Longemer by the riv. Vologne, trib. of the Moselle.

Retreat Creek, gold-mining locality, Queensland, on the E. side of Cape York Penin., in about 13° S.

Rettendon, par., Eng., Essex, Chelmsford div., 8½ m. SW. Maldon, close to Battlesbridge stn., P.O. P. <1000.

Return Creek, mining tp., Queensland. See **Coolgarra.**

Retz, vil., France, dep. Pas-de-Calais, arr. and 10 m. NE. Boulogne; has coal-mines at Fiennes, also marble quarries and phosphates. P. <2000; comm. P. <3000.

Retz, or **Rais,** former dist., France, which comprised that part of Brittany S. of the Loire.

Retz, vil., Lower Austria, circle Oberhollabrunn, 45 m. NW. by N. Vienna. P. <2000.

Retzbach, tn., Ger., kgd. Bavaria, govt. Lower Franconia, on the r. bk. of the Main, 9 m. NW. by N. Würzburg. P. <2000.

Reuben Point, E. Africa. See **Delagoa Bay.**

Reudnitz, tn., Ger., kgd. Saxony, circle and SE. suburb Leipzig. P. 18,800.

Reuland, vil., Prussia, Rhine Prov., circle Malmedy, 41 m, S. Aix-la-Chapelle. P. (comm.) <3000.

Réunion, or **Bourbon,** a French isl. in the Mascarene group, Indian Ocean, in 20° 51′ S., 55° 30′ E., 485 m. E. Madagascar. The island, of volcanic origin, is divided by a chain of mountains and a tableland into two portions, E. and W., differing in formation, climate, and productions. Highest point Piton des Neiges, alt. 10,070 ft., surrounded by extinct craters or cones. The E. side, the centre of volcanic activity, contains Piton de la Fournaise, alt. 8600 ft., surrounded by the desolate region of the Grand Brûlé. Both slopes of the island abound in ravines, most of which are traversed by torrents. The climate is agreeable, varying according to altitude, but very hot on the coast. The bloody flux and a typhoid fever attack every European after a residence of four or five years on the island. The island is exposed to SE. winds. Annual rainfall at St. Benoit (E. side), 162.4 in.; at St. Paul (W. side), 27.6 in.; and at St. Denis, 49.1 in. Terrific hurricanes sometimes occur. Principal industries, the manufacture of sugar and rum, and ship's carpentering. The products are sugar, coffee, maize, rice, tobacco, vanilla, cacao, spices, food-stuffs, essences. Principal exports, sugar, rum, vanilla, coffee, £600,000–700,000. Imports, wheat, wine, flour, fish, spirits, machinery, and manufactured goods, £800,000–900,000 annually. The chief towns are St. Denis (the cap.), St. Paul, St. Pierre, St. Louis, St. Joseph, and St. Benoit. A fine road goes round the island, and there is a railway of 77 m. following the coast-line on the NE. from St. Benoit to St. Pierre. The best port is situated at Pointe des Galets, on the W. ct., near St. Pierre; it covers 41 ac., has more than half-a-dozen wharves, and can accommodate vessels up to 4000 tons. There are also a patent slip and machine-shops. R. was discovered by the Portuguese Mascarenhas early in the 16th century, and was originally called after him. In 1649 the French

took possession of the island and called it Bourbon, exchanged finally in 1848 for its present title. It was occupied by the English in 1810, and restored to France in 1814. Length, 44 m. by 32 m. broad; area, 970 sq. m. Mean temp. of St. Denis, Jan. 79.7° F., July 71.8°. P. (1888) 162,000; (1892) 171,700, the greater part of French nationality, but there are 23,000 Hindus, and 16,000 Africans and natives of Madagascar.

Reus, comm., Spain, prov. and 10 m. WNW. Tarragona; manufactures soap, morocco leather goods, wines, and has cotton and silk spinning, and cooperage. Birthplace of General Prim, and Fortuny, the painter. P. 28,800.

Reuse, or **Areuse,** riv., Switzd., rises in the Jura Mts., near St. Sulpice, flows through the lovely valley of Travers to Lake Neuchâtel, near Boudry. Length, 25 m.

Reuss, two princips., Ger., belonging to the Thuringian states, both composed of isolated sections, and both having sections in the SW. traversed by the Saale, and sections in the E. and NE. traversed by the Elster; the larger principality (younger line; cap. Gera in the north-easternmost section on the Elster) little more than the size of the isl. of Anglesey, the smaller (elder line; cap. Greiz, also on the Elster) little more than one-third of that size. See **Thuringian States** and **German Empire,** table.

Reuss, riv., Switzd., r. bk. trib. of the Aar, has its source in cant. Uri, by the junction of four torrents, and flows generally N. through the gorge of the Devil's Bridge and the valley of Göschenen, and near Altdorf enters Lake Lucerne, which it leaves in the NW. at the town of Lucerne, and continuing N. flows on to the Aar, which it joins in the middle of canton Aargau, about 15 m. S. of the confluence of the Aar with the Rhine. Total length, 80 m.; including Lake Lucerne, 100 m. Area of basin, 1320 sq. m.

Reussendorf, vil., Prussia, prov. Silesia, circle and 13 m. E. Waldenburg; coal is mined here. P. <4000.

Reut, Teutonic, 'a place where the wood has been cut down and cleared for tillage.' See *Rade.*

Reutlingen, city, Ger., kgd. Würtemburg, Black Forest circle, 7½ m. ESE. Tübingen, in a picturesque and fertile dist. Technical school for spinning and weaving; manufactures of cloth, lace, &c. Made an imperial free city in 1240. Alt. 1250 ft. P. (1818) 9000; (1890) 18,400.

Reva-Ujfalu, comm., Hungary, co. Torontál, dist. Pancsova. P. 7400.

Revdanda (census), tn., Brit. India. See **Rewadanda.**

Revdinskiy, iron-works, Russia, govt. Perm', 25 m. W. by S. Ekaterinburg, near Chusovaya R. P. 9920.

Revel, tn., France, dep. Haute-Garonne, arr. Villefranche, 16 m. SW. by W. Castres, 2 m. to the SE. is the basin of St. Ferréol, which supplies the Canal du Midi. Alt. 1120 ft. P. <4000.

Revel, or **Reval** (Esthonian **Tallina**), fortified seapt. and dist. tn., Russia, govt. Esthonia, on a small bay on S. side of Gulf of Finland, 249 m. by rail WSW. St. Petersburg, 59° 26′ N., 24° 45′ E., annexed to Russia in 1710; one of the chief ports of the Baltic for export of corn, flax, hemp, &c., visited by about 600 vessels; bathing-place. Mean rfall. (30 yrs.), yr. 19.7 in., June–Nov. 13 in. P. 52,650.

Revelganj, tn., India. See **Godná.**

Revello, tn., Italy, Piedmont, prov. Cuneo, 5½ m. W. by N. Saluzzo. P. <2000.

Revelstoke, stn., Canada, prov. Brit. Columbia, on the C. P. R., 1103 m. by rail from Winnipeg, 379 m. from Vancouver.

Revelstoke, par., Eng., Devonshire, Totnes div., on the coast, 7½ m. SE. Plymouth. P. <500.

Revere, comm., Italy, Lombardy, on the r. bk. of the Po, prov. and 18 m. ESE. Mantua. P. <4000.

Reyes, or **Valle de San Francisco,** tn., Mexico, state and 25 m. S. San Luis Potosi. P. (comm.) 18,900.

Reyes, tn., Spain. See **Caldas de Reyes.**

Reyes, Point, cape, U.S., California, 40 m. NW. by W. San Francisco, in 37° 57′ N., with lighthouse visible 24 m. Mean rfall., yr. 20.5 in., June–Sept. 0.46 in.

Reykjanäs, penin., forming the SW. angle of Iceland. Length, 40 m.

Reykjavik, Iceland. See **Reikjavik.**

Reymerston, par., Eng., Norfolk, Mid div., 14 m. W. Norwich, 5 m. S. by E. East Dereham, 1½ m. SW. Thuxton stn., P.O. P. <500.

Reynagh, par., Ire., King's co., bar. Garrycastle, contains Banagher town; 8747 ac. P. <2000.

Reynella, tn., S. Australia, co. and 13½ m. S. Adelaide by road and rail, in 35° 7′ S. and 138° 35′ E. P. <1500.

Reynolds, co., U.S., Missouri, in the SE., to the N. of 37° N., and crossed by 91° W.

Reynoldston, par., Wales, Glamorganshire, Gower div., 11½ m. W. by S. Swansea, PMT.O. (**Reynoldstone**). P. <500.

Reynoldston, par., Wales, co. and 8½ m. NE. by E. Pembroke, 2½ m. NW. by W. Kilgetty and Begelly stn. P. <250.

Reynoldsville, bor., U.S., Pennsylvania, Jefferson co., 74 m. NE. by E. Allegheny. P. <3000.

Reynoldton, bor., U.S., Pennsylvania, Allegheny co. P. < 1500.

Reynosa, comm., Mexico, Tamaulipas, 130 m. E. by N Monterey. P. <4000.

Reyrieux, tn., France, dep. Ain, 12 m. N. Lyons, arr. and 2½ m. ESE. Trévoux; has ferruginous and sulphur springs, probably known to the Romans. P. <2000.

Rezat, riv., Ger., Bavaria, formed by the union of the Franconian R., which flows SE. past Ansbach, and the Swabian R., which flows NNE. After the union it flows N., and at Fürth unites with the Pegnitz to form the Regnitz; not navigable.

Rezé, tn., France, dep. Loire-Inférieure, on the l. bk. of the Loire, arr. and 2 m. SSW. Nantes. P. <2000.

Rezekat, vil., Egypt. See **Riskat.**

Rezen, Rezna, or **Reznia,** tn., Turkey in Europe, vilayet, sanjak, and 18 m. W. by N. Monastir, in the plain N. of Lake Prespa. Alt. 2830 ft. P. 5200, mainly Christians, three-fifths Servians (G.).

Rezende, tn. and rly. stn., Brazil, state and 87 m. WNW. Rio de Janeiro. P. 15,700.

Rezende, tn., Portugal, dist. Vizeu, 35 m. E. by S. Oporto, and near l. bk. of Douro. P. <4000.

Rezhevskiy, iron-works, Russia, govt. Perm, 50 m. NE. Ekaterinburg. P. 5000.

Rezna, or **Reznia,** tn., Turkey in Europe. See **Rezen.**

Rezzato, comm., Italy, Lombardy, prov. and 5½ m. E. by S. Brescia. P. <3000.

Rgotina, tn., Servia, prov. and circle Crna Rjeka, 7½ m. NNW. Zaičar (Zaječar), 29 m. W. Vidin; beds of chalcedony. P. <3000.

Rh. For Arabic names beginning with this combination, see also under **Gh.** See also Introduction under Orthography.

Rhadames, oasis, Tripoli. See **Ghadámes.**

Rhades, vil. Tunis. See **Radès.**

Rhætia. See **Tirol.**

Rhætian (or **Rhætikon**) **Alps.** See **Alps,** SUBDIVISIONS, **II. A. 3.**

Rhagæ, or *Rhages,* ruins, Persia. See **Rhé** and **Teheran.**

Rhardaia, Algerian Sahara. See **Ghardaia.**

Rhar-el-Meia, tn., Tunis. See **Ghar-el-Mela.**

Rharsa, or **Gharsa,** shot or saline depression, Tunis, to the E. of the Shot Melrhirh, N. of 34° N., crossed by 8° E.; 65-70 ft. below the level of the Mediterranean.

Rhâsul, tn., Algeria. See **Rassul.**

Rhat, oasis, central Sahara. See **Ghat.**

Rhayader Gwy (Rhaidr-Gwy, 'the cataract on the Wye'), par. and market-tn., Wales, Radnorshire, on the l. bk. of the Wye, 16 m. W. by N. New Radnor, with a stn. (**Rhayader**) on the Cambrian Rly. Market-day, W. P. <1000.

Rhäzüns, or **Razen,** comm., Switzd., cant. Grisons, 7 m. SW. by W. Chur, on the l. bk. of the Hinter-Rhine. P. <3000.

Rhé, Ral, or **Shah Abdul Azim,** ancient *Rhagæ,* or *Rhages,* ruins, Persia, 6 m. S. Teheran, was for many centuries the cap. of Persia. At the SW. angle of the enclosure, more than 20 m. in circuit, is the tomb of Shah Abdul Azim, much frequented by pilgrims. R. was the birthplace of the Caliph Harun-ar-Rashid; it was destroyed by the Mongols about the middle of the 13th century, and the inhabitants removed to Teheran, then a growing town, a suburb of R.

Rhea Springs, vil., U.S., Tennessee, Rhea co., 2 m. from Spring City, 50 m. N. Chattanooga; has sulphur springs. P. <1500.

Rheda, riv., Prussia, in NW. of prov. W. Prussia, flows E. into Putziger Wiek of Danzig Bay, to NW. of Danzig; not navigable.

Rheda, tn., Prussia, prov. W. Prussia, circle Neustadt, 21 m. NW. by N. Danzig. P. <3000.

Rheda, tn., Prussia, prov. Westphalia, circle Wiedenbrück, 31 m. SSE. Osnabrück. P. <3000.

Rheden, comm., Netherlands, prov. Gelderland, 5½ m. ENE. Arnhem. P. 14,000.

Rhee, riv., Eng. See **Cam.**

Rhegium Julii and *Rhegium Lepidi,* tns., Italy. See **Reggio.**

Rheiderland, dist., Prussia, prov. Hanover, in the W., between the rivs. Ems and the Dollart.

Rheidol, riv., Wales, Cardiganshire, flows S. then W. into Cardigan Bay at Aberystwith.

Rheims, city, France. See **Reims.**

Rhein, riv. See **Rhine.**

Rhein, tn., Prussia, prov. E. Prussia, dist. Gumbinnen, 68 m. SE. by S. Königsberg. P. <3000.

Rheinbach, tn., Prussia, Rhine Prov., 11 m. SW. Bonn, circle R. P. <3000.

Rheinberg, tn., Prussia, Rhine Prov., circle Mörs, 23 m. NNW. Düsseldorf, 14 m. N. Krefeld; was formerly a strong fortress. P. <3000.

Rheinbrohl, vil., Prussia, Rhine Prov., circle and 7½ m. NW. Neuwied, on the r. bk. of the Rhine. P. <3000.

Rheindahlen, tn., Prussia, Rhine Prov., circle Gladbach, 18 m. WSW. Düsseldorf. P. (comm.) 6300.

Rheine, tn., Prussia, in the NW. of prov. Westphalia, circle Steinfurt, 23 m. NNW. Münster; has cotton and jute factories, iron, machinery, and salt works. P. 6900.

Rheineck, vil., Prussia, Rhine Prov., circle Ahrweiler, on the l. bk. of the Rhine, 19 m. SE. by S. Bonn. P. <2000.

Rheinegg, comm., Switzd., cant. and 10 m. ENE. St. Gall, on the l. bk. of the Rhine. P. <2000.

Rheinfeld, vil., Prussia, prov. W. Prussia, circle Carthaus, 10 m. WSW. Danzig. P. <2000.

Rheinfelden, comm., Switzd., cant. Aargau, on the Rhine, 9 m. E. Basel; saline baths in the neighbourhood. R. was one of the four fortified towns of Austrian Brisgau; its fortifications were destroyed by the French, 1644. P. <3000.

Rheingau, circle, Prussia, in SW. of prov. Hesse-Nassau, bounded S. and W. by the Rhine; contains some of the best vineyards of the Taunus; cap. Rüdesheim.

Rheingönnheim, vil., Ger., Bavaria, Palatinate of the Rhine, 9½ m. N. Speier (Spires). P. <3000.

Rheinkopf, summit of the Vosges Mts., Ger., Upper Alsace, 7½ m. WSW. Münster. Alt. 4330 ft.

Rhein-Marnekanal. See **Marne-Rhine Canal.**

Rheinsberg, or **Rheinsberg in der Mark,** tn., Prussia, prov. Brandenburg, circle Ruppin, 40 m. NNW. Spandau. P. <3000.

Rheinwaldhorn. See **Alps,** SUBDIVISIONS, **II. A. 2.**

Rheinwaldthal, valley, Switzd., cant. Grisons, traversed by the lower Rhine. Length about 20 m.

Rhemes, Val de, Alpine val., Italy, NW. Piedmont, opening from SW. into valley of the Dora Baltea, a few miles above Aosta.

Rhenela, isl., Greece. See **Dēlos.**

Rhenen, comm., Holland, prov. Utrecht, on the lower Rhine, 15 m. W. Arnhem. P. 5100.

Rhenoster Poort, pass, S. African Republic, on the road from Pietersburg to the Zoutpansberg goldfields, in 23° 40′ S., 29° 33′ E.

Rhens, market-vil., Prussia, Rhine Prov., circle and 5½ m. S. Koblenz. It formerly lay near the meeting-place of the terrs. of the electors of Mainz (Mayence), Cologne, and Trier (Trèves), and the Elector Palatine, and hence was chosen as the place of meeting of the seven Electors for the nomination of the emperor. In 1376 the Königgstuhl, or King's Chair, a small pulpit-like structure, was built for their meetings on the banks of the Rhine, about ½ m. from the town, by the Emperor Charles IV. This was destroyed by the French in 1794, but restored in 1843. P. <2000.

Rhenus, riv., Ger. See **Rhine.**

Rheola (formerly **Berlin**), postal-tp., Victoria, Gladstone co., 4 m. S. Kingower, and 143 m. NW. Melbourne by road and rail, in 36° 37′ S. and 143° 56′ E.; has gold-mines. P. <1500.

Rhesycae, eccles. par., Wales, Flintshire, 3½ m. S. Holywell, 2 m. ENE. Nannerch stn., P.O. P. <750.

Rhewl, stn., Wales, Denbighshire, W. div., on the L. & NW. R., 4½ m. SE. Denbigh, P.O.

Rheydt, tn., Prussia, Rhine Prov., circle München-Gladbach, 16 m. W. by S. Düsseldorf; has important cotton and other textile manufactures. P. 16,300.

Rhiar, or **Ghiar,** vil., Algeria, 170 m. SE. Tlemsen.

Rhigate, tn., Eng. See **Reigate.**

Rhigos, par., Wales, Glamorganshire, dist. and 10 m. SW. Merthyr-Tydfil; 5582 ac. P. <1000.

Rhilochan, P.O., Scot., Sutherlandshire, Rogart par.

Rhin, Bas and **Haut,** former deps. of France, now included in German Alsace.

Rhine, German **Rhein,** French **Rhin,** Latin *Rhenus,* one of the largest European rivers, and the most important river of Germany. Its principal headstream, known as the Vorder-Rhein, is formed at an alt. of 7660 ft., in the central Alps of Switzerland, on the N. slopes of Mount St. Gothard, and flows thence NE., enlarged by several alpine streams, as far as Chur (Coire), a short distance above which it receives on the right its other chief headstream, known as the Hinter-Rhein, which rises on the Rheinwaldhorn, in the SW. of the Grisons, and flows first NE. then N. through the Schams and Domleschg valleys. At Chur the river takes a northerly direction, flowing between Switzerland and Austria, passes through Lake Constance, and flows W. between Switzerland and Baden, leaping down the falls of Schaffhausen and piercing the Jura Mts. At Basel, 260 m. from the source, the river turns again N., separates Baden from Alsace and the Bavarian Palatinate, skirts the Taunus range, cuts through the Schiefergebirge, bends NW. across the prov. of Rhenish Prussia, turns to the W. as it enters Holland, and at the same time begins to send off the numerous arms of its delta, all of which eventually enter the North Sea. The head feeders descend each 5000-6000 ft. in less than the 30 m. of their length. By the time it reaches Lake Constance (45 m. from Chur) the river has come down to 1300 ft. above sea-level. The valley from Basel (alt. 740 ft.) northwards is wide and level, and shut in on the E. by the Black Forest, on the W. by the Vosges. The river-bed is diversified by several small islands, and divides into several lateral channels. But the main current is carefully controlled by works carried out between 1818 and 1872, and so made serviceable for navigation from Basel downwards. The stretch from Bingen, where the river cleaves its way through the Taunus range, up to Bonn, where it enters the lowlands, is the Rhine of romance and song, vineyards, castles, picturesque crags, and interesting legends claiming the attention at every turn of the winding waters. Numerous towns of historic and commercial importance stand on the banks of the R. or stud its valley, for this has for ages been one of the principal routes between the S. and the N. of Europe. Above Basel lie the towns of Constance (Baden) and Schaffhausen (Switzd.); below that city are Breisach, Strassburg, Germersheim, Spires, Mannheim, and Ludwigshafen, Worms, Mainz (where steamboat navigation commences), Bingen, Koblenz, Bonn, Cologne, Düsseldorf, Duisburg, Nijmegen, Dordrecht, Rotterdam. Its chief affluents are, on the r. bk., the Inn, Wutach, Kinzig, Murg, Neckar, Main, Lahn, Sieg, Wupper, Ruhr, and Lippe; on the l. bk., the Thur, Aar, Ill, Nahe, and Mosel. Immediately after entering Holland the R. sends off the IJssel to the Zuider Zee, and later the Kromme Rijn, whilst itself it enters the North Sea a few miles NW. of Leiden. But for the purposes of navigation by far the most important of the delta arms are the Lek and the Waal, which anastomose with the estuaries of the Maas. Length of river 810 m., of which 550 m. (from Basel) are navigable; area of basin, 86,600 sq. m. During the greater part of its history the shipping in the river was hampered by the vexatious tolls levied by the petty princes on its banks; but in 1803 all imposts of this character were abolished in Germany, and in Holland in 1831. Since 1869 the R. has been free to all nations. Steamers of considerable burden ascend as high as Mannheim (mouth of

Neckar), and direct communication has been maintained at times between London and Cologne. The R. is connected by canals with the Danube, Rhone, Marne, and Zuider Zee. See **Meuse.**

Rhine and Rhone Canal, constructed in 1783–1834, between the Ill near Strassburg and the Saône, the principal affluent of the Rhone. Its highest point lies 676 ft. above the Ill and 568 ft. above the Saône, and it descends to the former by 87 and to the latter by 70 sluices. Length, 217 m.; depth, 6.16 ft.

Rhinebeck, manufacturing vil. and shipping point, U.S., New York, Dutchess co., 13 m. N. Poughkeepsie. P. <2000.

Rhinecliff, vil., U.S., New York, Dutchess co., on the l. bk. of Hudson R., 14 m. N. Poughkeepsie. P. <1500.

Rhinefield, par., Eng., Hampshire, New Forest div., 11½ m. WSW. Southampton, 2½ m. NW. by W. Brockenhurst stn.; 7360 ac. P. <250.

Rhinelander, vil., U.S., Wisconsin, Oneida co., 103 m. NNW. Green Bay (city). P. <3000.

Rhine Province, the most westerly prov. of Prussia, traversed by the Rhine, and bounded E. by the provs. of Westphalia and Hesse-Nassau, in the SE. by the gd.-duchy of Hesse and the Rhine Palatinate, but having an outlying portion in Hesse-Nassau (dist. of Wetzlar), and surrounding in the S. the principality of Birkenfeld, which belongs to Oldenburg. The larger southern half of the province is mountainous. On the right, spurs of the Westerwald, to which belong the Siebengebirge, advance to the Rhine; on the left rises the Hunsrück (*q.v.*), with the Walderbeskopf (2675 ft.), the highest mountain of the province. Further N. is the Eifel with Hohe Acht (2490 ft.), and still further N. the High Venn with the Botrange (2470 ft.). The northern half lies in the German plain, and has very fertile agricultural districts, but also with sandy and marshy tracts. The principal river is the Rhine, with its tributaries: on the right, Wied, Sieg, Wupper, Ruhr, Lippe; on the left, Nahe, Moselle, Ahr, Erft. Tributaries of the Moselle: on the right, Saar; on the left, Sauer, Salm, Alf, and Elz. The Roer and Niers flow into the Meuse and the Rhine. The largest lake is Lake Lacher, a crater-lake of an extinct volcano on the Eifel. The High Venn contains morasses. Geologically, the Hunsruck, Eifel, and the mountains on the right of the Rhine are of Devonian age, the High Venn of Silurian. The Carboniferous system contains important coal-measures, both in the N. (near Aix-la-Chapelle, N. of the High Venn, and on the Rhine the W. portion of the Ruhr coal basin), and in the extreme S. (Saarbrück coalfield). The Trias also is developed in the W., on both sides of the Moselle. The climate in the Rhine and the other valleys is mild, with a mean temp. of 48°–50° F.; but on the southern mountains, especially on the Eifel, it is very inclement in winter. Forty-six per cent of the soil is used for agriculture. Besides corn, fruit, beetroot, tobacco, hops, flax, and hemp are grown, and excellent wine is produced to a large extent in the Rhine and Moselle valleys. The forests consist mostly of foliage trees, and cover about 30 per cent. of the soil. The breeding of cattle is important, but sheep-breeding is on the decrease. Among wild animals the wolf, which comes from the Ardennes, is still extant. The minerals include, besides coal, ore of iron, manganese, zinc, lead, and copper. Mineral springs, Apollinaris, Roisdorf, and Heppingen, &c., are abundant, especially on the Eifel. The chief watering-places, with baths, are at Aix-la-Chapelle, Burtscheid, Neuenahr, Kreuznach, and Münster on the Nahe. With respect to manufacturing industry, the Rhine Prov. takes the first place among the Prussian provs., and in the German empire is equalled only by the kingdom of Saxony. Iron and steel works are carried on at Essen, Oberhausen, Duisburg, Düsseldorf, Cologne, Deutz, Eschweiler. Steel wares are made at Solingen and Remscheid. There are needle manufactories at Aix-la-Chapelle and Burtscheid; brass manufactories at Stolberg; cloth manufactories at Eupen; hemp, Werden; silk at Krefeld, Viersen, Elberfeld, Barmen, Mühlheim; cotton spinning and weaving-mills at Gladbach, Cologne, Duisburg, Elberfeld, and Barmen. Among the inhabitants there are about 10,000 Walloons (of French extraction), near Malmedy. The higher education is provided for by a university at Bonn, a polytechnic at Aix-la-Chapelle, a military school at Engers. The capital is Cologne. There are five governments (*regierungsbezirke*): Cologne, Koblenz, Aachen, Düsseldorf, and Trier. A small portion of the prov. (the domains of Cleve, Mark, and Ravensberg) was acquired by Prussia in 1609, but the greater part fell to Prussia only after the Congress of Vienna in 1815. [**J. T. B.**]

Rhinns, The, Scot., Wigtownshire. See **Rinns.**

Rhinns of Islay, or **Rhynns of Islay,** penin. in the SW. of Islay, Scot., Argyllshire, on the W. of Loch Indaal.

Rhinns of Kells, upland tract, Scot., Kirkcudbrightshire, in the W., 11 m. NNE. Newton Stewart.

Rhinns Point, cape, Scot., Argyllshire, on the SW. ct. of Islay I., in 6° 29′ W.

Rhion, fort, Greece. See **Fort Morea.**

Rhirh (Rir, or **Ghigh) Wad,** oasis, Algeria, prov. Constantine, begins on the E. bank of the Shot Melrhirh, and extends about 90 m. SSE. to 33° N.

Rhisnes, vil., Belgium, prov., arr., and 4 m. NW. Namur; has iron-mines and freestone quarries. P. (comm.) <2000.

Rhiston, vil., Eng., Shropshire. See **Brompton and R.**
